

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

SIXTH ANNUAL REPORT

OF THE

STATE BOARD OF HEALTH OF ILLINOIS.

ILLINOIS STATE BOARD OF HEALTH.

OFFICE OF THE SECRETARY,

SPRINGFIELD, ILL., 1884.

To His Excellency, JOHN M. HAMILTON, Governor:

SIR: In conformity with the Twelfth Section of the Act to Create and Establish a BOARD OF HEALTH in the State of Illinois, approved May 28, 1877, I have the honor to submit to you the accompanying Report for the year 1883.

Very respectfully,

JOHN H. RAUCH, M. D.,

Secretary.

MEMBERS OF THE BOARD.

JOHN M. GREGORY, LL.D., Champaign, *President*.*

JOHN McLEAN, M. D., Pullman.

NEWTON BATEMAN, LL.D., Galesburg, *President*.

R. LUDLAM, M. D., Chicago.

A. L. CLARK, M. D., Elgin, *Treasurer*.

W. A. HASKELL, M. D., Alton.

W. R. MCKENZIE, M. D., Chester.†

JOHN H. RAUCH, M. D., Chicago, *Secretary*.

FRANK W. REILLY, M. D., Chicago, *Assistant Secretary*.

* Resigned to accept the office of U. S. Civil-Service Commissioner.

† Appointed to fill the unexpired term of Dr. GREGORY.

SUMMARY REPORT OF THE BOARD.

To His Excellency, JOHN M. HAMILTON, Governor:

SIR: The Sixth Annual Report of the STATE BOARD OF HEALTH OF ILLINOIS, herewith submitted, covers a period of more than ordinary interest in the history of the BOARD. An effort to improve the standard and methods of medical education, begun early in its existence, and still largely an experiment, has reached a stage which makes a review of the situation practicable and pertinent.

Boards of health are created and maintained for the conservation of the interests of health and life. Ordinarily their functions are limited to dealing with sanitary questions; with the removal of the causes of preventable disease and premature death. This BOARD, however, is also charged with the execution of the act to regulate the practice of medicine in the State; and thus the medical profession, one of the most important agencies which is concerned with the interests of health and life, is brought within the scope of sanitary legislation.

To improve the status of the individual practitioner, and to develop a well-trained and thoroughly educated medical profession, must result in increasing the value of this force in sanitary science and public hygiene; a force which, in the nature of things, must always exist so long as there are physicians and patients; and the character and influence of which must always hold a direct relation to the tone, the attainments, and the competency of those by whom it is exerted. A legitimate and fundamental branch of the BOARD's work is thus seen to be necessarily devoted to the subject of

MEDICAL EDUCATION.

Within the present generation there has been not only a marked improvement in curative and palliative medical practice, but the scope of medical science has been widened by the conception that many

of the diseases which afflict mankind may be prevented; that many of the causes of premature death may be removed; that the cure of disease is not the only function of the physician. From this improvement in practice and widening of the scope of medical effort and knowledge there logically resulted a necessity for better systems and longer periods of medical instruction and study—a demand which, owing to causes not necessary to recite in this connection, led to a great diversity in the methods, requirements and characteristics of medical colleges, and consequently to the relative value of diplomas as evidences of the professional attainments and competency of their possessors.

The act to regulate the practice of medicine in Illinois makes it the duty of this BOARD to issue certificates (authorizing practice in the State) to “all who furnish satisfactory proof of having received diplomas or licenses from legally-chartered medical institutions in *good standing*.” To determine what should constitute “good standing”—a duty equally imposed upon the BOARD by the terms of the act—was a grave question, the answer to which was sought by addressing leading members of the medical profession and the faculties of medical colleges in all parts of the country, a circular making the following inquiries:

I. In the present state of medical science and education in this country, what preparation is, and ought to be, required for admission to the lectures of a medical college, to entitle it to “good standing?”

II. On what branches of medical and cognate science ought courses of lectures to be provided, and what length of course in each to entitle the college to “good standing?”

III. What requirements as to full attendance, reading and quizzes, or other examinations, occasional or final, ought to be maintained in such colleges?

IV. What attendance on lectures, as to time, number of terms or courses, and intervals between courses, are, and ought to be, required by such colleges as conditions of graduation?

V. What other conditions of graduation, such as hospital practice, or practice under preceptors, attendance on clinics, and dissections, are, and ought to be, required for graduation?

In the Third Annual Report there was published a digest of the replies received to the above inquiries, accompanied by a table showing “the courses of study, fees and requirements of the medical college whose diplomas are recognized by the BOARD.” Based upon a consensus of these replies, and upon the usages and requirements of the majority of the schools, thus ascertained, and excluding the exceptionally best and most advanced—a Schedule of Minimum Requirements was promulgated, which, in effect, pre-

scribes that a medical college, in order to be held in good standing for the admission of its graduates to practice in Illinois, shall exact such a general preliminary education of the intending student before his admission to the lecture-room, as will enable him to comprehend the instruction therein given*; and shall issue its diploma conferring the degree of M. D., only upon the completion of such a curriculum of study—as to the branches of medical science taught, the duration of reading- and of lecture-terms, and the amount of practical instruction in hospital and at the bedside—as obtains in the average medical school.

Less than this the BOARD could not conscientiously accept as entitling a medical institution to be classed "in good standing" for the purposes of the Medical-Practice Act; more than this, it was not believed to be practicable to attempt at the time. With the general improvement which might reasonably be expected to follow, if this effort should prove successful, it was hoped that a further advance in the standard entitling to recognition would be a natural and logical sequence.

AFTER three years publication and notice, compliance with this Schedule is now made the test of recognition; and diplomas issued at the close of the sessions of 1883-84 are accepted or rejected, as qualifications for practice in Illinois, as the colleges issuing them have complied, or failed to comply, with the terms of this Schedule. Of the forty-seven colleges whose diplomas have been presented under these conditions, twenty-six have so far complied with the Schedule as to warrant the acceptance of their diplomas. In the remaining twenty-one cases the diploma has been accepted as evidence of the applicant's proficiency in the branches or subjects

*It is humiliating to be compelled to acknowledge that medical colleges can be found willing to admit to their lecture-classes, and thence to graduate, men so illiterate as some of those who have come before the BOARD, armed with a diploma and demanding thereon the certificate entitling them to practice medicine in Illinois. Some specimen illustrations of such cases, given on pages 60 and 61 of the ABSTRACT OF PROCEEDINGS, may be referred to as evidences that this requirement of the BOARD's Schedule is, unfortunately, only too well-founded. On pages 37 and 39, *ibid.*, are illustrations of the literary attainments of some of the medical faculties of the baser sort; but these are succumbing to the pressure of a higher standard in medical education, to the well-merited effects of exposure, and to the enforcement of legislative enactments regulating the practice of medicine.

Of the fraudulent institutions, which existed only for the sale of the potent "diploma," it is not known that a single one now remains in existence—the bogus Boston "Bellevue," exposed by the BOARD, in 1882, and the Milwaukee College of Medicine and Surgery, exposed in 1883, were the last of the brood.

claimed to be taught by the given college; but certificates are issued to such applicants only after they have passed a satisfactory examination by the BOARD in the branches or subjects omitted by their respective schools.

IN this connection some mention must be made of a widespread and mischievous delusion, which has been found to obtain even among some college faculties and editors of medical journals; a delusion concerning the "powers and rights" conferred by a diploma in this country. To your Excellency it is, of course, entirely unnecessary to say that a diploma carries with it no right of any character whatsoever; that it is merely "a document bearing record of a degree conferred by a literary society or educational institution" (Webster); and that the right to practice medicine is, intrinsically and essentially, a statutory right, subject to whatever conditions the law-making branch of the government may see fit to impose, in the interest of human health and life, as restraints upon the ignorant, incompetent, unprincipled or dishonorable. It was, however, found necessary to say all this, formally and authoritatively by the Secretary on behalf of the BOARD, for the reason that medical students and practitioners in other States were being advised, in effect, that the diploma of any chartered medical college entitled its possessor to practice in Illinois regardless of the provisions for the regulation of such practice enacted by the General Assembly. The text which called forth this exposition of the value of a diploma and of the right to practice medicine is quoted on page 39 of the ABSTRACT OF PROCEEDINGS.

WHAT the improvement in medical education and in the standard of attainments necessary to obtain a diploma has been, during the last four years, may be inferred from the following comparative statement: In the table already referred to—giving the courses of study, fees, requirements, etc., of medical colleges in 1880—there are listed fourteen (14) schools in the United States which then required evidence of a suitable preliminary education; in the CON-
SPECTUS OF MEDICAL COLLEGES, accompanying this report, there will be found the titles of ninety (90) schools in the United States which now announce a preliminary-education requirement as a condition of admission to their classes. In 1880, seventeen (17) schools gave more or less prominence to the study of Hygiene, or Preventive Medicine; in 1884, eighty (80) schools give instruction in this important branch of medical science. In 1880 there were eight (8)

schools which exacted attendance upon three or more courses of lectures as one of the conditions of graduation; in 1884 there are twenty-three (23) which make this obligatory, and fifty-six (56) others are making such tentative efforts in this direction as to provide for and recommend a three- or four-years' graded lecture-course.

It is to be observed, *en parenthese*, that the BOARD has not yet made a three-years' lecture-course obligatory, but it does insist upon the preliminary-education requirement and the study of Hygiene. The difference in the ratio of increase in the number of colleges making these three improvements in their methods is shown by these figures, based upon the present number of schools in the United States:

| | Per cent. | |
|--|-----------|----------|
| | In 1880. | In 1884. |
| Proportion of colleges exacting a preliminary education | 12.06 | 77.58 |
| Proportion of colleges giving instruction in hygiene | 14.65 | 68.96 |
| Proportion of colleges requiring attendance upon three courses of lectures | 6.89 | 19.82 |

While the increase in the two items of the above, which are embraced in the BOARD'S Schedule of Minimum Requirements, is about six and one-half times for the first, and nearly five times for the second, it is less than three times for the item not included in the Schedule; but the tendency is in the direction of a full, graded and systematic course of study, such as obtains in all other branches of education.

There is noted, also, an improvement in the character and amount of practical instruction given at the bedside and in hospital wards and amphitheatres; in dispensaries, and in anatomical, physiological, chemical and pathological laboratories.

It may be urged that much of this improvement is in seeming only; that it reads well in college prospectus and announcement—addressed to the eye, and ignored in the spirit and in practice. To a certain extent this is, doubtless, true; but, *prima facie*, the BOARD accepts the published announcement of every reputable college; and in its CONSPECTUS has put upon record, accurately and impartially, the exact claims of each college for itself. It can do no less in dealing with the official and deliberate utterances of a medical

faculty—members of one of the learned professions. The assumption is in favor of their honorable action and the trustworthiness of their statements.

But after making whatever allowance the most skeptical may demand, there still remains a substantial gain in the methods and practices of medical education in this country during the past four years—a gain, in which there is promise for the future. In the best class of medical schools in the United States, medical education is as thorough as anywhere; facilities for instruction are abundant, the teachers are competent and accomplished, and the graduates are fully equipped for their labors in the promotion of health, and “for the unending battle with disease and its causes.” Such schools and such graduates are becoming less rare year by year; and Illinois has been accorded a very gratifying recognition of its efforts in the direction of making them more numerous. To an Illinois school belongs the distinction of having been the first in the United States to provide a three-years’ graded course of medical instruction—the pioneer effort at reforming the old custom of granting a diploma after attendance upon two courses of lectures identical in subject, length and cost; and the Commissioner of Education, in his report for 1882–83, cites the regulation of the practice of medicine in this State as a solution of the “problem of protecting the public without assailing the right of personal medical judgment;” and says that, under the method of procedure adopted, “it is obvious that men of inferior attainments will be forced to prosecute their studies till they have acquired a sufficient amount of knowledge to satisfy the requirements of the BOARD; that medical colleges in the State and in surrounding commonwealths will be stimulated to increased exertions in order to prepare their students for the ordeal; and that quacks, pretenders and rascals will be gradually forced out of the State.”*

The situation, however, is by no means rose-colored. Much yet remains to be done, and in some respects the work has only been fairly entered upon. But, on the whole, there is encouragement for continued effort.

THE MEDICAL PROFESSION IN ILLINOIS.

Some interesting figures concerning the present personnel of the medical profession of the State, as contrasted with 1877—when the law to regulate the practice of medicine was enacted—will be found

* See CONSPECTUS OF MEDICAL COLLEGES, pages XXIV, XXV.

in the Notes concerning the OFFICIAL REGISTER of 1884, (pages v-ix of the OFFICIAL REGISTER—see Appendix.) There has been a diminution, since July 1, 1877, of over twenty per cent. in the total number of persons then claiming to be engaged in the practice of medicine; and this, notwithstanding an average increment of about 475 per annum, or a total of 3,325 during the period. The change in the professional status is even more striking than this—for, whereas, the proportion of graduates and licentiates of legally chartered medical institutions in good standing, amounted to only forty-eight per cent. of those engaged in practice in 1877; in 1884 it has risen to eighty-five per cent. of the whole number. This change will be better appreciated by a comparison of the actual figures: In 1877 there were, in round numbers, 3,600 graduates and licentiates, and 3,800 non-graduates, claiming to be engaged in the practice of medicine; in 1884 there are 5,032 graduates and licentiates and only 853 non-graduates in the State.

The cosmopolitan character of the medical profession in Illinois is set forth on pages vii-ix of the OFFICIAL REGISTER. In addition to graduates or licentiates of 138 medical institutions in twenty-four of the States of the Union (including the District of Columbia) and 10 in the Dominion of Canada, Great Britain has representatives from England, Ireland and Scotland; the Continent from Austria, Bavaria, Denmark, France, the German Empire, Hungary, Italy, Norway, Poland, Russia, Spain, Sweden and Switzerland; and South America is represented from Bolivia, and Africa from the Madeira Islands.

Five hundred and forty physicians have been admitted to practice during the year, of which number 515 were furnished certificates upon diplomas of recognized medical colleges, and 25 upon evidence of sixteen or more years' practice in the State. Including those of candidates for certificates upon examination by the BOARD—none of whom succeeded in attaining the required standard—there were 174 applications for certificates rejected or withdrawn by those who could not comply with the law.

Of the 18 non-graduate candidates, who appeared at the April meeting for examination, none attained the required percentage of correct answers, and the entire class was consequently rejected. The BOARD has issued certificates upon examination to a total of 219, out of over 600 candidates, and of this number 117, or more

than one-half, have, in compliance with the advice of the BOARD, subsequently attended lectures and graduated from reputable medical colleges.

As THE profession and the public become familiar with the Medical-Practice Act and the mode of procedure thereunder, the fraudulent advertising quack finds that his lot in Illinois is not a happy one. Except a few individuals who are shielded from the operation of the law by reason of the ten-years' prior practice clause, this class is now almost extinct. Time will ultimately remove the exempts, and a reasonably diligent enforcement of the Act will prevent their ranks being recruited from the quacks and charlatans of other States.

Desperate efforts are made by these outsiders, from time to time, to secure a foothold in Illinois. Unable to procure the necessary certificate legalizing their professional presence in the State, they have in some instances succeeded in inducing graduates of reputable medical colleges, holding certificates from the BOARD, to enter partnership, and to prostitute themselves to the unprofessional and dishonorable vocation of preying upon the credulity and the weaknesses of the unfortunate. Prompt revocation of the certificate follows proof of such facts, and thus far every attempt of the kind has been successfully frustrated—although at considerable expense and some annoyance.

In one flagrant instance, revocation of the certificate was followed by a suit against the Secretary of the BOARD for \$50,000 alleged damages. The suit was brought in the United States District Court of another State, in the city where the quack employers had their headquarters; and, after it had served its purpose in advertising these latter, it was allowed to drop.*

Acknowledgment of the valuable counsel and assistance of the Attorney-General, the Hon. JAMES McCARTNEY, must be made in this connection. Pages 65-67 of the ABSTRACT, contain one of his contributions, covering the mode of procedure in the indictment, and the trial of a suit, for violation of the statute regulating the practice of medicine. It furnishes a much-needed code of instructions and digest of authorities for use in the prosecution of these cases.

*See page 80 of the ABSTRACT.

THE PUBLIC HEALTH.

An unusually low death-rate and a remarkable freedom from any wide-spread prevalence of the contagious and infectious diseases, have characterized the year. Typhoid fever, scarlatina and diphtheria have appeared from time to time in various localities, but without attaining epidemic proportions. Small-pox has practically disappeared from the State, the only cases recently occurring being due, in every instance, to contagion brought from outside our own boundaries. Such an importation from Cincinnati into Crawford county, was the result of a mistaken diagnosis as to the character of the disease. The occurrence was made the occasion for calling the attention of physicians and sanitary officers to an obvious duty whenever suspicion is excited as to the nature of a case which may possibly be one of contagious disease, namely: To resolve any doubt which may arise or be suggested, especially with reference to such a disease as small-pox, in favor of the community rather than of the individual; and to act on the positive assumption, and not upon the negative, until the developments decide the character of the case.

The series of Preventable-Disease publications, prepared and distributed by the BOARD, has been added to by circulars upon the Prevention and Control of Scarlet Fever and of Diphtheria, and upon the Sanitary Features of Typhoid Fever and the Prevention of its Spread. The appreciation of this series of publications is attested by the prompt demand for them, and their frequent republication in local journals and otherwise, whenever one of these domestic pestilences makes its appearance in a community.

Whether as cause and effect, or as a mere coincidence, it has been repeatedly noticed that their distribution and republication have been followed by a speedy and marked subsidence of the outbreak. Whatever may be this relation, there can be no question as to the wisdom of the legislation which provides for the "dissemination among the people of such knowledge respecting diseases and such instruction concerning hygiene." So many and urgent requests have been received for these publications in other languages that the BOARD has been compelled to issue a German edition of those specified, and of the one on the Prevention of Small-Pox, both in German and Scandinavian.

EARLY in March, 1883, the Secretary, in preparing his notification for the annual session of the Sanitary Council of the Mississippi Valley, took occasion to call attention to the continuance of Asiatic

cholera in threatening proximity to lines of travel, and to the prolonged existence of a fatal form of cholera nostra in some parts of Mexico. During the spring and summer, inspections of the Illinois and Michigan canal and of the Chicago river and water-supply were made from time to time, with the same conditions in view, the importance of which was emphasized by the Damietta outbreak of cholera and the consequent menace to Southern Europe. The detailed reports of these inspections and of the action taken, will be found on pages 75-78 and 93-101, of the ABSTRACT OF PROCEEDINGS.

The inability of the National Board of Health—from lack of funds—to maintain its River and Rail Inspection Service in the Mississippi Valley after the close of June, threw the responsibility of continuing this safeguard of the public health upon the Sanitary Council, of which body the Secretary of this Board continues to be the secretary and executive officer; and upon him devolved the labor of supervising the administration of the Service in the valley between St. Louis and New Orleans. For the first time since 1877, yellow fever was entirely excluded from the Mississippi Valley, and there was complete freedom during the whole season, from the interruption and losses to travel and traffic which the recurrence of this disease had entailed for so many years. Aside from the occasional access of the disease to Southern Illinois, the interest of the State in its exclusion is of an economic and commercial character. This is true, of course, as to all questions pertaining to sanitary matters, although in no other to so marked an extent as in this case. An account of the action of the Council and of its executive committee is given on pages 56-58; and of the operations of the Service, under the supervision of the Secretary, in his quarterly report to the Board at the October meeting, pages 72-74.

OCCASION was taken at the January meeting to again place the Board on record as urging Congress to create a permanent National health organization; and, pending this, to enact the legislation necessary to secure an extension of the act of June 2, 1879, charging the provisional National Board of Health with the duty of co-operating with and aiding State and local boards of health in their efforts to prevent the introduction and to limit the spread of contagious and infectious diseases of foreign origin—such legislation to embrace a provision for making any unexpended balances of appropriations, standing to the credit of the National Board, immediately and continuously available for this purpose. Subsequently, a number of

other State boards and the Sanitary Council took similar action; but the only response which was made to these various requests was to put a contingent appropriation of \$100,000 at the disposal of the President for use in the event of an epidemic; and on the last of June the National Board of Health was compelled to suspend its work for want of means.

Exposed as is this country to imported contagion from every quarter of the globe, through its commercial relations and enormous immigration, the duty of the Federal Government in the premises is obvious. Illinois asks no assistance against domestic disease and its causes. With our legitimate sanitary problems we have thus far demonstrated our ability to deal. But against exotic pestilences—the yellow fever of the tropics, the cholera of Asia, the small-pox, and typhus, and relapsing fevers of the Old World—there remains, in the absence of an efficient National health service, only such protection as may be afforded by the voluntary co-operation of neighboring States, with a disparity of resources, authority and interests, which must seriously impair the efficiency of such defence, and, possibly, compel resort to the costly and demoralizing measure of non-intercourse quarantine.

Owing to want of adequate legislation concerning the diseases of domestic animals, the BOARD has been called upon to take action for the suppression of outbreaks of contagious glanders among horses in various parts of the State. Authority was conferred upon the State Veterinarian, and the necessary instructions to county and town authorities were issued—the expenses of the State Veterinarian being defrayed from the contingent appropriation for the suppression of epidemic contagious diseases. Two fatal cases of the disease in the human subject furnished the BOARD with the necessary warrant for its action; and the General Assembly, then in session, promptly amended the so-called pleuro-pneumonia act—which created the office of State Veterinarian—so as to make its provisions apply also to glanders.

Deaths from trichiniasis, occurring toward the close of the year, temporarily renewed interest in this disease; and the action of some of the European governments in interdicting the importation of American pork and its products, led to the publication* of the results of the investigations made by the Secretary, during the last eighteen years, concerning the prevalence and sanitary importance

* See ABSTRACT OF PROCEEDINGS, pages 82 and 83.

of the parasite. These results are, substantially, that American pork is less subject to trichinæ than that of other countries; that every case of disease arising from trichinous pork which was investigated, was proven to be caused by eating raw or imperfectly-cooked meat; that thorough cooking will render the most badly-infected trichinous meat absolutely harmless; and that, therefore, the question is one of economic and commercial importance, rather than of sanitary interest.

A comprehensive statement of the measures which have been enacted from time to time by the General Assembly, and of other provisions and agencies for the conservancy of food-producing animals from contagious or infectious diseases, was prepared in May in response to a communication from the French Consul at Chicago, asking for information which, it was understood, was to be laid before the French government as part of the basis for legislation concerning the importation of American food animals and their products into France. From the hostile character of such legislation by some of the Continental powers, it seemed proper to make this information as complete and exact as possible; and it is believed that the reply conclusively shows that the interests of the purchaser and foreign importer, at least, have been and are well protected. Such additional legislation as may be needed on this subject will be found to lie rather in the direction of protecting the vast interests of this country, engaged in the breeding, fattening, handling, packing and transportation of food animals, against the losses and injury which already seriously affect or threaten them in some regions, by the introduction of the foreign contagion of such diseases as contagious pleuro-pneumonia, the foot-and-mouth disease, and the cattle-plague or rinderpest—no one of which is indigenous to our native cattle.

MISCELLANEOUS MATTERS.

A summary of the work in the office of the BOARD, of the certificates and licenses issued, refused and revoked, and of other kindred matters, will be found on pages 80 and 81 of the ABSTRACT OF PROCEEDINGS. While the aggregate of mail matter received and sent is less than that of the previous year it has been of a more varied character, and has involved fully as much labor as usual. In connection with the issue of certificates and licenses, the correspondence resulting from the examination of the diplomas, licenses, affidavits and other papers in the applications from 787 physicians

and midwives, and the necessary action thereon, amounted to 1,252 letters written and mailed, together with the necessary printed forms of affidavits and certificates filled up and furnished; and 4,011 documents, affidavits, letters of recommendation, diplomas, etc., pertaining to the same matters, were received, examined, and filed or returned.

Of the other office correspondence, the majority was devoted to the subject of medical education and to matters affecting the public health; a total of 4,036 letters, reports and other communications being received, and 5,157 written and sent on these and miscellaneous subjects. Printed reports (annual and quarterly,) registers, preventable-disease circulars, instructions, blanks and other publications of the BOARD, aggregating over 76,000 copies, were also distributed.

Returns of births and deaths from the offices of the various county clerks have been received, and much preliminary labor performed in their tabulation for a volume of vital statistics. As has been previously stated, however, the law is so defective concerning this subject that there is a wide disparity in the character of the returns made under its provisions.

THE available resources of the BOARD during the fiscal year ended September 30, 1883, amounted to \$9,864.87, of which sum \$8,959.96 was derived from the regular and contingent appropriations, and \$904.91 from fees received for certificates, licenses and examinations—including \$684 received from these sources during the year, and a balance of \$220.91, remaining to the credit of this account at the close of the last fiscal year. Payments on all accounts aggregated \$9,101.31. An unexpended balance of the appropriations, amounting to \$574.50, lapsed into the State Treasury at the close of the fiscal year, and the Treasurer of the BOARD had an unexpended balance of \$189.06 remaining in his hands at the same date. These three sums, viz: \$9,101.30 payments, \$574.50 unexpended appropriations lapsed, and \$189.06 remaining in the Treasurer's hands, balance the sum of the resources, \$9,864.87. An itemized statement of the expenditures on all accounts, and the annual report of the Treasurer, will be found on pages 102 and 103.

THE records of the Thirtieth General Assembly, adjourned May 14, 1877, bear witness to the interest with which your Excellency, then a Senator from the 28th District, pushed to final enactment the bills to create and establish a board of health, and to regulate

the practice of medicine in the State of Illinois. The records, herewith submitted, of the labors of the BOARD thus created, and of the results of its efforts to regulate the practice of medicine, may, it is hoped, serve to show that the legislation you were then so largely instrumental in securing has inured to the benefit and the welfare of the citizens of the State in the interests of health and life.

Very respectfully,

NEWTON BATEMAN,
JOHN McLEAN,
R. LUDLAM,
A. L. CLARK,
W. A. HASKELL,
W. R. McKENZIE,
JOHN H. RAUCH.

ABSTRACT OF PROCEEDINGS

OF THE

ILLINOIS STATE BOARD OF HEALTH, 1883.

A B S T R A C T
OF THE
Proceedings of the Illinois State Board of Health,
AT THE
MEETINGS DURING THE YEAR 1883.

ANNUAL MEETING, SPRINGFIELD, JANUARY 11-12, 1883.

THE Sixth Annual Meeting of the ILLINOIS STATE BOARD OF HEALTH was held in the office of the BOARD, in the Capitol building at Springfield, the members being called to order by the President at 7 p. m., Thursday, January 11, 1883. Present: John M. Gregory, Newton Bateman, W. A. Haskell, John H. Rauch.

After the reading and approval of the minutes of the last meeting, October 5, 1882, at the suggestion of the Secretary, the regular order of business was suspended to give opportunity for the immediate examination of the cases of certain medical colleges against whose standing charges had been made—members of the several faculties being present and desirous of returning home promptly.

On motion of the Secretary, the BOARD went into executive session on these matters, and adjourned at 11:40 p. m., to meet on the following morning.

JANUARY 13, 1883, 10 o'clock a. m.—The BOARD met, pursuant to adjournment; present as before, together with Dr. John McLean. In the regular order of business Dr. Rauch presented the following

QUARTERLY REPORT OF THE SECRETARY.

DURING the quarter ended December 31, 1882, there were received in the Secretary's office 1,085 communications, letters, reports, etc., and 1,390 letters, postals and other communications were sent out, in addition to 503 copies of the Fourth Annual Report distributed, and 14,553 copies of blanks, circulars and other printed matter pertaining to the registration of vital statistics, to the vaccination of

school children, to the history of the small-pox epidemic, to the "Boston Bellevue" diploma manufactory, etc., etc. Of the matter sent out, 141 packages were forwarded by express and the remainder by mail. Forty-one telegrams were received and 38 sent.

There were issued 67 certificates entitling to practice medicine and surgery—60 on diplomas of medical institutions in good standing and 7 on length of practice in the State. Only 23 out of the total number of applicants for certificates were rejected during the quarter—a smaller proportion than usual. In fact, there is a very steady and uniform improvement in this respect. Certificates to midwives were also issued, as follows: 13 on diplomas from schools of midwifery, 10 after examination, and 2 on length of practice in the State.

Small-Pox.

WITH the advent of cold weather a few scattering cases of small-pox have appeared in the State, but without creating excitement or manifesting any tendency to become epidemic. At three points in Cook county, and in Aurora, Kane county, the infection is attributed to Chicago. At Marshall, in Clark county, the disease was brought from Cincinnati, and at Cambridge, in Henry county, it was brought from Pennsylvania. So far as the history of these cases has been ascertained, it is found that the victims were, in every instance, either unvaccinated or not vaccinated since infancy or childhood.*

There have been no cases among immigrants during the quarter—none, in fact, since the single case in the early part of June last, soon after the sanitary inspection of immigrants was begun. Strenuous efforts have been made to secure the continuance of these inspections, or, at least, their prompt resumption at the opening of the immigrant season. Among other contributions to this end, I have prepared and published a paper on the "Immigrant Introduction of Small-pox into the United States," in which I think is demonstrated—from the history of small-pox in Chicago during the past thirty-two years, from the consensus of statements of leading health officials concerning the origin and spread of the recent epidemic, and from the results of the operations of the Immigrant-Inspection Service—

1. That the immigrant is a prime factor in the origin and continuance of small-pox in the United States.
2. That State and local boards of health, acting independently, can not suppress the disease, when once introduced, so long as the influx of unprotected immigrants continues.
3. That the immigrant-inspection system, in addition to furnishing a practical mode of coöperation by the various State and local boards of health, has proved entirely adequate to the remedy of the defects arising from want of international quarantine laws and of uniformity in the administration of our own maritime and boundary quarantines.

* For details—see Fifth Annual Report, pp. 248, 253, 263 and 266.

In the interests of this Service, which has been of so much benefit to our own State, I visited Washington during the meeting of the National Board of Health, December 12-14, and subsequently presented the matter to various members and Senators, urging upon them the necessity of prompt appropriations for the further maintenance of the inspections.*

Immigrant-Inspection Service.

My final report to the Secretary of the National Board of Health, in which are summarized the operations of the Service in the Western District during the season, shows that a total of 115,057 immigrants were inspected in the District between June 1 and December 31, 1882. Of this number, 37,302 were found to have been satisfactorily vaccinated before sailing or during the voyage, and 3,127 were found to have had small-pox—making about 53 per cent. of the total number protected. There were 28,408 of the remainder vaccinated or revaccinated after arrival and before reaching this District; and 21,618 similarly treated by the Western inspectors, leaving 4,602 unaccounted for, including those whom it was deemed inadvisable to vaccinate.

At the close of August I made a table of the results obtained up to that time. There had then been an aggregate of 63,962 persons inspected, of whom it was found that 54 per cent. were imperfectly, or not at all, protected against small-pox on arrival; and that only 22 per cent. were vaccinated on shipboard. These figures have been changed, by the pressure and influence of the Inspection Service upon the steamship companies and their surgeons, so that, for the whole season, the percentage of "susceptible" was reduced to forty-seven, while the proportion of ship-vaccinations was increased to twenty-nine, in the hundred.

This latter figure (twenty-nine per cent.) represents an actual increase of fully 42,000 vaccinations secured on shipboard by this means, during the latter, as compared with the first, half of the season; and indicates the increasing value, efficiency and influence of the Service, both directly and indirectly, at the time when its operations were suspended.

Prior to the preliminary steps taken to secure this Service (including the notification of Dr. Smith, Health Officer of the port of New York, to the steamship companies last spring), vaccinations on shipboard—except in rare instances—were confined to the occasions of the actual appearance of small-pox cases on board. So that, as a matter of fact, an aggregate of 174,000 vaccinations on shipboard have been obtained among the arrivals at all ports, simply as a result of the existence of the Service, and independently of those performed by the inspectors after arrival.

For further details of this subject reference may be had to the report above mentioned, to the series of monthly reports heretofore published, and to the action (taken in July last) indicated in the

* Loc. cit., pp. 331-342.

following letter—a record of which is necessary to the completion of the history of the Service in the Western District:*

ILLINOIS STATE BOARD OF HEALTH,
OFFICE OF THE SECRETARY, Springfield, Ill., July 15, 1892.

To the Immigrant-Service Inspectors, Western District:

GENTLEMEN: For the first time in eighteen months small-pox is practically under control in Illinois. That is to say, there has been but one solitary new importation of the disease into the State since the Inspection Service was begun on June 1. There are, however, fully 1,500 immigrants arriving and passing through the State every day, and one-third of these are even yet found susceptible to the disease and capable of propagating the contagion. From the experience of the past year it is within bounds to say that there would have been at least thirty separate cases of infection developed in this State alone during the past six weeks, had it not been for this Inspection Service.

The refusal of Congress to appropriate the funds necessary to enable the National Board of Health to continue this work has caused the latter body to order a suspension of the Service on and after to-day. Such a suspension means a renewal of the exposure of Chicago, of Illinois, and of the region beyond, to the imported infection by which they have always been threatened, and frequently invaded, whenever there was much immigration. Hitherto it has been found impossible to prevent the repeated introduction of the disease by this class of persons.

Reliance on the seaboard quarantines has proved as baseless for the Northwest with regard to small-pox as for the Mississippi Valley with regard to yellow fever, or the country at large with regard to Asiatic cholera. As a rule, whenever any one of these diseases has been epidemic in countries in close commercial relation with our seaboard or Gulf ports it has speedily passed such ports into the Interior. The seaboard quarantine laws are imperfect, and their administration is inefficient. The Interior should no longer be asked to endure the sufferings and losses entailed by such defects and inefficiency, or forced to quarantines of detention and exclusion which are only less costly and vexatious to the quarantiner than to the quarantined.

A feasible and successful method has been demonstrated for the protection of the Mississippi Valley against yellow fever, and of the West and Northwest from small-pox—namely, a system of sanitary inspection carried on without obstruction of commerce or travel; covering the whole of the exposed territory without regard to State boundaries; regulated by a National organization independent of other considerations than those of the public health; and maintained, as such a Service legitimately should be, by the National government—as legitimately, at least, as a light-house, or harbor improvement, or life-saving, or any other service for the general welfare.

With the present defective—in many cases obsolete—local and State quarantine laws and their vacillating and inefficient administration,

* See also Fifth Annual Report, pp. 343-365.

and especially in these days of rapid transit, when, in point of time, Chicago is nearer Europe and its epidemics than New York was thirty years ago, and southern Illinois nearer the indigenous zone of yellow fever than Louisiana was when the principles of her present quarantine system were first adopted, some such system of continuous sanitary surveillance, operating between the ports of arrival and points of destination, has become absolutely necessary for the protection of the Interior from the introduction of foreign contagion.

The abolition of the Inspection Service at the very time when its value has been unquestionably proved, is an excusable trifling with the health interests of thirty millions of people, aside from any consideration of the effect upon commerce and the great grain and provision markets of the withdrawal of what had already come to be relied upon for truthful and authoritative announcements of the presence or absence of danger.

That no epidemic of yellow fever now exists in the Southern States, or that the small-pox epidemic in the West and Northwest is at length under control, is no justification for abandoning the principal agency by which the one has been prevented, and the other, to a great extent, suppressed.

The very essence of State Medicine lies in prevention; and it would be as wise to disband a fire department and dismantle the engines and water-service while a fire was still smouldering, but ready again to break into flames, as it is now to close inspection and refuge stations and abolish this Service while yellow-fever ships are arriving at Southern and Gulf ports, and cargoes of small-pox material are daily being distributed throughout the Northern States.

Actuated by the foregoing considerations, and in the interest of the public health, not alone of Illinois, but of all the region beyond, the ILLINOIS STATE BOARD OF HEALTH, with the co-operation of the health departments of Indianapolis, St. Louis and Chicago, will assume the responsibility of continuing the inspection of immigrants arriving in this District for the present.

The withdrawal of inspectors from the stations east of this District will necessitate a careful personal examination of each individual; and the number requiring vaccination or other preventive treatment, as well as of actually developed cases of small-pox likely to be met, will be greater, since little or none of this work will have been done previously. This will make the Service much more onerous both for the inspectors and for the railways, and more time will be required for inspections than hitherto.

If necessary to accomplish the work properly before arrival in the cities above mentioned, the side-tracking and detention of any train is hereby authorized. As heretofore, small-pox cases in transit will be removed from the trains and duly cared for at the nearest appropriate point after discovery. Weekly reports will be continued, and in these, in addition to nationalities of immigrants, names of steamships, dates and ports of arrival, condition of individuals, cars, etc., special mention will be made of the character and results of the work performed by steamship surgeons.

The steamship companies have the power to secure the almost absolute immunity of their steerage passengers from small-pox, or their liability to convey the disease. If they notoriously fail in this regard, justice demands that such publicity be given to the failure and its results as will tend to limit the evil in the future.

As far as practicable, the movements of trains will not be interfered with. The railroad companies have given such cordial support to this measure that they are entitled to every consideration consistent with the proper protection of the public health. Inspectors are specifically instructed to do all in their power to avoid any unnecessary interruption of travel.

Finally, inspectors are reminded that their duties involve not only the protection of their immediate districts, but that the exclusion of imported small-pox from Illinois furnishes the largest measure of protection to the region West, Northwest and Southwest. No immigrant capable of conveying the disease, either into or beyond the State, must be neglected.

JOHN H. RAUCH,
Secretary.

Fourth Annual Report.

As the BOARD is already aware, the pressure of important duties, in connection with the suppression of the Small-Pox Epidemic and the enforcement of the School-Vaccination Order, delayed the publication of the Annual Report for the year 1881. This, however, has been accomplished during the last quarter, (October-December, 1882,) and over one-fourth of the edition has already been distributed.

Some sections of the Report have been reprinted separately, among them that on Medical Colleges, embracing the report of the Committee on Medical Education, the Schedule of Minimum Requirements entitling schools to recognition under the Medical Practice Act, and a Directory of Medical Institutions granting diplomas or licenses in the United States and Canada.

The rulings and decisions of the BOARD under the Medical Practice Act, together with the mode of procedure under the Act, have also been published separately, for a two-fold use: first, to facilitate the transaction of business in the Secretary's office; and, secondly, to answer, succinctly and comprehensively, the increasing number of requests from other States for information concerning the operation of the Act to regulate the practice of medicine in this State.

Vital Statistics.

It was found impracticable to secure, without undue delay, the returns of vital statistics from all the counties for publication in the Fourth Annual Report. With a very few exceptions these returns are now all in hand, and it is proposed to publish them in a supplementary volume as soon as they can be tabulated. No definite time can be fixed for this with the limited clerical force of the office, which is now taxed to its utmost capacity in dealing with current business.

Medical Education.

The distribution of the section, from the Fourth Annual Report, containing the report of the Committee on Medical Education and the Schedule of Minimum Requirements, has elicited a satisfactory number of responses from college faculties. Without exception these, so far as heard from, approve the action of the BOARD in this effort to elevate the standard of requirements, and announce their intention to conform to the Schedule reported by the committee. It is particularly gratifying to be able to say that the medical schools of our own State are according the measure a ready support, in the spirit as well as the letter.

A large number of letters have also been received from prominent physicians, sanitarians, publicists and others, commending this action of the BOARD, and evincing a lively interest in its success.

The Boston Bellevue Medical College.

The exposure of the Boston Bellevue Medical College, and its consequent disruption, were followed by some unlooked-for developments. As a result of the correspondence carried on from the Secretary's office, the most convincing proof was secured that the so-called "college" sold diplomas and degrees to individuals grossly ignorant of any medical knowledge, and either with or without attendance upon its alleged course of instruction. Its officers were arrested for using the United States mails for fraudulent purposes, and, on trial, admitted all that was charged against them, except violation of the postal laws. To this charge they pleaded that they were legally incorporated, and were empowered by the laws of Massachusetts to issue diplomas and confer degrees without any restriction as to course of study or professional attainments. The United States Commissioner held the plea to be valid, and dismissed the case with the following remarks:

"The State has authorized this college to issue degrees, and it has been done according to legal right. * * * The law makes the faculty of the college the sole judges of eligibility of applicants for diplomas. There is no legal restriction, no legal requirement. *If the faculty choose to issue degrees to incompetent persons, the laws of Massachusetts authorize it.* This is, therefore, not a scheme to defraud under the statute. The defendants are dismissed."

Since this decision was rendered—that is, within a fortnight—the "American University of Boston," president, Dr. Buchanan, and the "First Medical College of the American Health Society, located at Boston," have been incorporated; and Dr. Alfred Booth, the first president and one of the incorporators of the "Boston Bellevue," has given notice of his intention to start the "Excelsior Medical College." Dr. Joseph Corken, one of the "Boston Bellevue" faculty, was arrested in November for procuring abortion, and charged with carrying on a wholesale business in that line, under the name of the "English Cottage Hospitals"; and Dr. C. J. Eastman, the "dean" of the "Boston Bellevue," has been identified under the *alias* of "Old Dr. Edwards, 18 Dover street, Boston, no-cure-no-pay-secrecy-preserved."

The "Lüders" Case.

At the last meeting the BOARD ordered the revocation of the certificate granted on the diploma of one "Henry A. Lüders," issued by the University of Göttingen, and presented by a man who, it was subsequently ascertained, was a barber by trade, without any medical education whatever, and whose real name was Lambrecht. The following account of this case has been furnished the press with the hope of preventing, by this publicity, the successful resumption of his infamous practices in adjoining States:

On the 6th day of October, 1879, a man calling himself "Dr. Henry A. Lüders" presented a diploma of the University of Göttingen, to one of the members of the STATE BOARD OF HEALTH, in Chicago, for verification as required by law before a certificate is granted. The usual affidavit, with fee, was sent to the office at Springfield, but, owing to some informalities in the affidavit, and the want of letters of recommendation, no certificate was issued. The applicant was written to twice, and finally replied that he would in a few days send the required letters from prominent German physicians of Chicago. These not being received, after considerable delay, he was again written to, but the letter was returned from the Chicago postoffice "not called for."

A letter was then addressed to one of the physicians whom he had mentioned, who replied that he knew "Lüders," but doubted whether he was legitimately entitled to the diploma he held. As there was a possibility that this doubt was the result of prejudice, the applicant was again written to on January 10, 1880, and finally replied, from St. Louis, on the 16th, requesting that the certificate be forwarded to him there, and enclosing a document, addressed to "Peter Lüders," stating that his son "Henry" had attended two courses of lectures, in 1855-56, at the University of Göttingen, and was a diligent student. In refusing the request, the history of the matter up to this time was briefly recited, and he was advised that he must clear up the doubts as to his graduation, and furnish the necessary letters of recommendation before a certificate could be granted to him.

In response to this, he forwarded, on the 20th of January, 1880, the diploma issued to "Heinrich Andreas Lüders," on the 14th of May, 1836, by the University of Göttingen; and further stated that he could not furnish letters of recommendation, owing to his want of professional acquaintance in this country, but hoped the certificate would be issued to him at once, while he would write to Germany for the necessary letters.

An examination of the diploma showed it to be a genuine document, duly signed and sealed; but the atmosphere of doubt which had gradually developed caused the Secretary to reply that he had no authority to issue a certificate until the letters of recommendation were received; that if the applicant knew no professional men in the United States, it would be necessary to wait until he could obtain letters from Germany, adding that "the BOARD had been already imposed upon by men who were graduates, but who turned out to be professional scoundrels."

To this letter no reply was received, and nothing more was heard of the matter until October, 1881, when he wrote (on the 15th.) from Collinsville, in Madison county, inclosing letters of recommendation purporting to be from reputable practitioners, and asking that the certificate be sent to him at once, as he proposed to practice in Collinsville.

A certificate was finally issued to him on November 1, 1881—over two years after his first application—but even now with some hesitation, notwithstanding the presentation of a genuine diploma from "a medical institution in good standing," a certificate of attendance upon lectures, and endorsements as to moral and professional character.

The certificate of the BOARD and the unscrupulous methods of the quack readily enabled him to obtain considerable practice; but his steady avoidance of the company and conversation of the medical men of the place, together with the stories which were circulated concerning his practice, soon aroused suspicion, which was further strengthened by the discovery that he was receiving letters under another name.

This suspicion was finally proved well-founded by the receipt of a letter by Charles P. Ochsner, of Collinsville, who had written to the dean of the medical faculty of the University at Göttingen, inquiring concerning the diploma of "Dr. Lüders." Prof. Leber, the dean, replied that "Heinrich Andreas Lüders," of Riffenbrück, in the Duchy of Braunschweig, after completing his literary studies at the University of Erlangen, was graduated in medicine from the University of Göttingen, on the 15th of May, 1836; that he returned to his native place, Riffenbrück, where he practiced his profession until his death, in November, 1878, being then about 39 years old; and that the diploma presented to the ILLINOIS STATE BOARD must have been fraudulently obtained, and the possessor was undoubtedly an imposter.

Meanwhile, occasion had been found to caution some of the correspondents of the BOARD concerning the fellow, and when the statements of Prof. Leber were communicated to the Secretary, it was determined to make an example of him. It was decided to prosecute him for felony under the 13th section of the Medical Practice Act; but in order to do this successfully it was deemed advisable to secure the diploma as evidence. Unfortunately, before this could be done, the sham doctor took the alarm and left for parts unknown, two days before the Secretary's arrival in Collinsville.

It has since been learned that the rascal's proper name is Lambrecht, and that he is a barber by trade; but how he became possessed of the real "Dr. Lüders'" diploma and other papers has not yet been ascertained. The letters of recommendation finally forwarded by the fellow are pronounced forgeries.

Some shocking instances of the miscreant's malpractice have come to light since his flight, among the most recent being the brutal butchery of a mother in labor and her unborn offspring. From the testimony of friends of the unfortunate woman, it appears that he used a stick and piece of string, in place of forceps, and, failing to effect delivery by this means, he eviscerated the infant with a common, rusty case-knife, finally hacking it to pieces with the same instrument, and taking it away piece-meal. The wretched mother was terribly injured during this performance, and died shortly after.

There is little hope that the villain will be apprehended in this State, where his career as a medical practitioner is forever closed. But he may go across the State line, in any direction, and resume his nefarious practices without interference, since, in the absence of a medical practice act in the neighboring States, there is no law to punish him outside of Illinois, nor any other method of prevention but through such publicity as may be given the facts by the press.*

Quarantine Authority Sustained.

In the early part of December a suit was tried in the Mercer County Circuit Court, in which the plaintiff charged the Board of Health of Cable with trespass and false imprisonment—damages \$10,000. The damages were alleged to be sustained by the enforcement of the quarantine rules and regulations of the local board, which were based upon the rules and regulations of the STATE BOARD, contained in Official Order No. 53. During the trial the question arose as to the authority to make and enforce such rules and regulations. The verdict of the jury was rendered in favor of the local board, thus sustaining its authority to enforce such measures as, in the exercise of a wise discretion, were deemed necessary for the protection of the public health.

School Vaccination.

A large number of Returns of Vaccination Certificates have been received during the quarter. In many places where the Order had been neglected, or its enforcement delayed last winter, for various reasons, it has since, either during the spring or fall months, been fully complied with. In a few localities, however, it is still ignored, owing to opposition or to want of interest due to freedom from the disease. These cases are difficult to reach without incurring great expense and outlay of valuable time. On the whole, however, the school population of Illinois is now quite well protected against small-pox. Respectfully submitted.

JOHN H. RAUCH,

Secretary.

On motion of Dr. McLean, the Secretary's report was received and approved. Under the call for reports from committees, Dr. Rauch presented the following report from the Committee on

Prevalent Preventable Diseases.

MR. PRESIDENT: The committee to which was assigned the duty of preparing a circular of instruction concerning the Prevention and Control of Scarlatina, Diphtheria and Typhoid Fever, begs leave to report that it has discharged said duty, and herewith presents the manuscript of circulars on each of the above named diseases.

In this connection it is thought worthy of noting that of every thousand deaths in the State during the past year it is estimated, on the basis of returns in the Secretary's office, that one hundred and thirteen were due to these three diseases, in about the following proportions: 17 from scarlatina; 45 from typhoid or enteric fever; and 51 from diphtheria. On the same basis it is estimated that 82 out of every thousand deaths were caused by cholera infantum; while nearly 250 out of every thousand deaths were of infants under one year of age, and 430 were of children under five years of age.

* Since the above was written the medical practice laws of Minnesota and Missouri have been enacted, and the public of those States now have the protection which such laws afford against this class of fraud and ignorance.

That this enormous mortality among children is largely preventable can not be questioned, and your committee would, therefore, suggest the preparation of a pamphlet of instructions upon the Hygiene of Infant Life, or the sanitary care of infants and children, for widespread distribution before the advent of the summer months, which are so destructive to early life.

Respectfully submitted.

Committee { JOHN H. RAUCH,
JOHN MCLEAN,
R. LUDLAM,
A. L. CLARK,
W. A. HASKELL.

On motion of Dr. Bateman, the report of the committee was received and adopted, and the publication of the circulars ordered.

National Board of Health.

Dr. Haskell presented the following preamble, resolutions and memorandum, which were unanimously adopted:

WHEREAS, The act of Congress, approved June 2, 1879, by which the National Board of Health is charged with the duty of co-operating with and aiding State and local boards of health in the enforcement of their rules and regulations to prevent the introduction of contagious and infectious diseases into the United States, and into one State from another, will expire by limitation on the 1st of June, proximo; and

WHEREAS, The said National Board of Health has discharged this duty with so much of success, honesty of purpose and regard to economy—the specific details of its work being briefly summarized in the appended memorandum—as to conclusively demonstrate the value of a National agency for the protection of the public health; therefore, be it

Resolved, That the ILLINOIS STATE BOARD OF HEALTH earnestly urges upon the Senators and Representatives from this State to obtain, during the present session, the legislation necessary to secure an extension of said act, pending the creation of a permanent National health organization—such legislation to include a provision whereby the unexpended balances of the original appropriations may be re-appropriated and made immediately available for the purposes of said act.

Resolved, That the Secretary be, and he hereby is, authorized to transmit a copy of this preamble, resolutions, and appended summary to each Senator and Representative from this State.

MEMORANDUM to Accompany the Preamble and Resolutions of the ILLINOIS STATE BOARD OF HEALTH Relative to the National Board of Health.

THE National Board of Health has demonstrated the value and efficiency of the National authority in the protection of the public health—

By initiating a reform in the principles and practice of maritime quarantine, which, so far as it has been carried out, has resulted in securing the largest measure of protection against the importation of foreign pestilence on the one hand, whilst, on the other, it relieves commerce from arbitrary, and often dangerous, detentions—with their consequent costly charges and exorbitant fees—which obtain under the old system, still largely in vogue.

By its service of sanitary inspection and supervision of immigrants and of inland transportation by river and rail, whereby the introduction and spread of small-pox and yellow fever have been effectually controlled; the barbarities of the “shot-gun quarantine” abolished; and commercial confidence, business interests, and travel and traffic protected against needless interruptions and loss through panic and unfounded alarm.

By its researches and investigations into the causes of yellow fever, diphtheria, malarial and other diseases; into the adulterations

of food and drugs; into the sources of, and remedies for air, soil and water pollution; and into many other problems of sanitary science and preventive medicine, the results of which are already utilized by sanitary engineers, legislators, medical teachers, physicians and others, in promoting human comfort and well-being, in preventing disease, and in saving life.

By demonstrating the feasibility of so dealing with an infected locality—by temporary depopulation, isolation, and sanitary supervision of its relations with exposed communities—as to secure the prevention of spread of the infection; the limitation of its ravages to the fewest number of victims within the locality itself; and the minimum of disturbance to the interests of threatened regions.

By its relations to State and local boards of health, through which have been secured co-operation and uniformity of action without regard to State and local boundaries or jurisdiction, to the great advantage of common carriers and other agencies of commerce, and to the more efficient protection of the public health; and through which, also, State and local boards have been relieved, *pro tanto*, from the necessity and expense of striving to guard against the invasion of disease from without—a necessity for which such boards, unaided, have neither adequate authority nor means.

THE remainder of the morning session, and the entire afternoon session were occupied with questions arising under the Medical Practice Act, in which the status, methods and reputability of a large number of medical colleges and practitioners were involved, the following being the most important:

Medical Colleges.

A communication asking whether it is necessary to insist upon an entrance examination of students attending the spring course of lectures, such course not being counted in the requirements for graduation.—The Secretary had replied that, while an entrance examination was called for in the STATE BOARD'S Schedule only for the course counted in graduation requirements, it would be well to examine also for the spring course. Reply approved.

A communication from the Northwestern Medical College, of St. Joseph, Mo., offering to comply with the requirements of the BOARD, and to annul their rule accepting three years' practice in lieu of one course of lectures.—Ordered that the diplomas of the college be recognized on receiving satisfactory proof of the fulfillment of these promises.

In the matter of the Indiana Eclectic Medical College, of Indianapolis, the Secretary stated that two of its diplomas had been recognized, after much hesitation, but in view of the fact that it had graduated, at its last commencement, 30 students out of a class of 36—being over 83 per cent.—some inquiry into its status and methods seemed desirable.—Ordered, that the Secretary notify the faculty of the College that they will be afforded an opportunity, at the next meeting, to be heard in explanation.

A communication from Dr. Thos. L. Stoddard, of LaCrosse, Wis.,

asking information as to the status of the College of Physicians and Surgeons, at Joplin, Mo., and stating that "two half-breed Indians, residents of Minnesota, whose only occupation, previous to last year, was the usual nomadic one, varied with an occasional attempt at horse-doctoring, spent *five weeks* last winter in Joplin at said institution, were graduated, and now advertise themselves extensively as 'Professors in the Joplin College of Physicians and Surgeons'."—The Secretary had replied that its diplomas were not recognized in Illinois, but that its graduates were, doubtless, legally entitled to recognition in Wisconsin, where the law makes the diploma of any legally-chartered institution valid evidence of its possessor's right to practice. The Joplin institution is duly equipped with a charter under the laws of Missouri.

Medical Practitioners.

The Secretary presented the papers in the case of August Legh, of Park Ridge, Cook county—applicant for a State certificate. The basis of the application is the usual affidavit, setting forth that said Legh is the lawful possessor of the annexed diploma, etc., which diploma, on examination, is found to be issued by the "Kaiserwerther Hospital and Diakonen-Anstalt." Not being familiar with the institution, the Secretary asked Legh to meet him personally in Chicago, and wrote to the dean of the medical faculty of the University of Berlin for information concerning the legal and professional status of the "Kaiserwerther." Legh met the Secretary and explained as to the Hospital, but said there was no need of going further in the matter, as he had decided to remove from the State. Prof. Bardeleben, dean of the Berlin University, writes, November 28, 1882, that only the Faculty of Medicine in the University can confer the degree of Doctor of Medicine in the Empire.

Several communications alleging unprofessional or irregular conduct on the part of various individuals. In twelve of the cases the Secretary had secured promises of amendment, and recommended that no further action be taken at the present time. In others it might be necessary to summon the offenders to appear before the Board to show cause why their certificates should not be revoked; but such action was not yet deemed advisable on account of incompleteness of formal charges and proof. The action of the Secretary was approved.

Sundry communications from individuals asking, either to be examined for certificates in advance of the time set for the regular examinations, or to be authorized to practice pending that time. The Secretary was authorized to reply that the BOARD saw no good reason for holding more than one annual session for examination, and had no authority to grant permission to practice in violation of law.

Miscellaneous.

The Secretary presented sundry communications from James A. Hawley, county clerk of Lee county, concerning the proposed extension of the cemetery within the city limits of Dixon to within 60 to

100 feet of residences—the drainage being through the residence and business portion of town. In response to a request for an opinion on the sanitary questions involved, the Secretary had furnished a copy of his monograph on Intra-Mural Interments. To the question, "Can the STATE BOARD OF HEALTH interfere to prevent the proposed extension?"—it was decided that such interference was not called for; that the proper course to adopt was for those whose property would be injured and health threatened by such extension to apply through the courts for relief.

Also a communication concerning the duty of medical men to make returns of births and deaths. The Secretary had replied by citing the law, and pointing out the obligation of the county clerk thereunder, with regard to its enforcement.

A communication was read from I. M. Browne, Medical Director, U. S. N., in charge of the Museum of Hygiene, asking for contributions to the Museum. The Secretary was instructed to furnish a set of the publications of the BOARD.

At 7:30 p. m. the BOARD again met in executive session, at the close of which it was announced that, after due investigation of the proof and testimony presented, the certificate No. 4,850, issued February 23, 1881, to Charles Gaylord, then of Chicago, recently of Paris, Edgar county, was ordered revoked, for gross unprofessional conduct; and the Secretary was authorized to prepare a history of the case for publication.

After the transaction of certain routine business, the reception of the report of the Auditing Committee, (which had examined and approved accounts amounting to \$2,048.48), the approval of the estimates for the ensuing year, and of the Secretary's correspondence, references and decisions during the past quarter, the President announced that the election of officers was next in order, whereupon Dr. Haskell offered and moved the adoption of a resolution of thanks to the retiring officers.

In seconding the motion for the adoption of the resolutions, Dr. Bateman spoke of the work which had been accomplished, its pioneer character in many respects, the multiplying evidences of popular appreciation coming under his observation, and the gratifying recognition of the BOARD in the following passage from the Governor's recent message:

"At the time of the organization of the BOARD OF HEALTH, there were doubts in the minds of many good people as to its necessity, and, for a time, much prejudice against its work. The doubts and prejudices, however, have gradually given way, as the BOARD has fearlessly and with prudence gone forward in the discharge of the work before it, until I think there is now an almost universal conviction that its services in protecting the people from contagious diseases and from the evils caused by ignorance and charlatanism in the practice of medicine, as well as the general sanitary work of the BOARD, can not be dispensed with. The acts creating this BOARD and conferring its powers, would have proved a dead letter if not enforced, as they have been, by a competent and determined executive agency; and it will be a gratification to the people of Illinois to know that in their enforcement the STATE BOARD OF HEALTH has exerted an influence which has been felt throughout the country in various ways, in the elevation of the standard of medical education, the suppression of fraudulent medical colleges, and the introduction of improved methods of establishing and maintaining an effective quarantine against infectious diseases. Its services have done much to add to the reputation of our State at home and abroad."

Dr. Gregory, in suggesting that the BOARD proceed to the election of a presiding officer, took occasion to thank the members for the honor they had conferred upon him during his two terms, briefly reviewed the labors of the BOARD during the period, congratulated his colleagues upon the results already accomplished and upon the promise for the future, and closed by nominating the Hon. Newton Bateman, LL.D., for President.

The result of the election, then held, is as follows:

President, the Hon. NEWTON BATEMAN, LL.D., of Galesburg.

Treasurer, A. L. CLARK, M.D., of Elgin.

Secretary, JOHN H. RAUCH, M.D., of Chicago.

On taking the chair, Dr. Bateman in his address, spoke in warm terms of his predecessor in the office.

On motion of the Secretary, the members of the Auditing Committee, Drs. JOHN McLEAN, and W. A. HASKELL, were reappointed for the ensuing year, and the BOARD, at 11 p.m., adjourned its Sixth Annual Meeting.

QUARTERLY MEETING, CHICAGO, APRIL 12-14, 1883.

THE regular quarterly meeting of the ILLINOIS STATE BOARD OF HEALTH was held at the Grand Pacific Hotel, in the City of Chicago, the members being called to order by the President at 9:45 a.m., Thursday, April 12, 1883.

Present: Newton Bateman, President; John McLean, R. Ludlam, A. L. Clark, and John H. Rauch, Secretary.

The regular order of business having been suspended, on motion of Dr. Clark, so as to take up the investigation of charges against a number of medical colleges and of private practitioners, the BOARD went into executive session for that purpose. At this session, which continued throughout the day and evening and was resumed for some time on the following day, action was taken on the charges against six colleges and seven individuals, and the following results were authorized to be made public:

Resolved, That the Indiana Eclectic Medical College, of Indianapolis, Ind., and the Joplin Medical College, of Joplin, Mo., having given assurances of their intention and determination to fully carry out and abide by all the requirements considered by the ILLINOIS STATE BOARD OF HEALTH as essential to the good standing of a medical college, the diplomas of said colleges will be recognized in the future by this BOARD whenever, and so long as, it shall appear that their methods and practices entitle them to be classed among "medical institutions in good standing."

Resolved, That in the case of applications now pending for certificates on diplomas of the Indiana Eclectic Medical College, the Secretary be endowed with discretionary power to act for the BOARD.

Resolved, That Certificate No. 142, issued to Dr. M. Morgan, July 6, 1878, be, and hereby is, revoked.

The examination of candidates for certificates was begun at 10 a.m., and at 10:30 p.m. the BOARD adjourned until the following morning.

FRIDAY, APRIL 13, 9.30 a.m.—The BOARD met pursuant to adjournment; present as before. The regular order of business being taken up, the minutes of the Sixth Annual Meeting, January 11-12, 1883, were read and approved.

Under the call for reports of officers, Dr. Rauch presented the following

QUARTERLY REPORT OF THE SECRETARY.

During the quarter, ended March 31, 1883, there were received in the Secretary's office 1,002 communications, letters, reports, etc., and 1,371 letters, postals and other written communications were sent out. Of printed matter there were distributed 1,876 copies of the Fourth Annual Report, and 46,920 copies of the Preventable-Disease Circulars and miscellaneous publications, blanks, etc., of the BOARD. There were also received 57 telegrams, and 40 were sent, at a cost of \$20.30. The postage account for the quarter was \$144, and the express account \$65.70, for which latter sum 298 packages were sent.

Certificates and Licenses.

State certificates entitling to practice medicine and surgery were issued to 149 graduates upon the diplomas of colleges in good standing, and three certificates were issued to practitioners on length of practice in the State. Certificates to midwives were issued to nine graduates, two practitioners, and to one upon examination. Six candidates presented themselves for examination in obstetrics, five of whom failed to come up to the required standard.

Two applications for the hundred-dollars-a-month license to itinerants, both from graduates of reputable medical schools, have been received, but I have felt constrained, in the interests both of the public and of the profession, to refuse the applications.

Exempts and Non-Graduates.

Among the certificates issued during the past month a considerable number were to practitioners exempt from the Medical-Practice Act, by reason of length of practice in the State, but who have recently graduated from reputable medical colleges; and also to others holding certificates based upon examinations, and who have pursued the same course. It is gratifying to be able to record this result of the recommendation of the BOARD, whose policy it has uniformly been to urge non-graduate candidates for its certificates to attend lectures and obtain the diploma of a college in good standing.

The Medical-Practice Act and the Colleges.

While the public undoubtedly profits by this obvious improvement in the status of the profession, the medical colleges have also benefited in this, among other ways, through the operation of the Medical-Practice Act. To some extent this is recognized by the colleges themselves; and their reception of the BOARD's standard of minimum requirements may be taken as an evidence of their generally favorable attitude toward the law and the methods of its enforcement which have thus far been pursued.

Since the last meeting many letters have been received from colleges, both in this and in other States, asking specific information as to whether the BOARD would recognize diplomas if issued to

certain students under the circumstances as detailed. A number of inquiries, both official and personal, have also been answered concerning the standing of colleges in various parts of the country, and the value of their diplomas in this State as entitling to practice. This correspondence marks an increasing sense of accountability in the teaching or educational department, and of its responsibility under the law. If this sense can be sufficiently quickened it may correct some of the evils arising from the want of an examining body independent of the colleges, and there is reason to hope for such result in the progress already made.

Minimum Requirements of the BOARD.

I would suggest that the attention of the colleges be again invited to the Schedule of Minimum Requirements, which the BOARD will hereafter exact as a condition of recognition; and that a communication be authorized requesting them to furnish formal statements as to their action concerning the BOARD's standard.

Among other reasons why such a communication seems desirable, is the fact that evidences of colleges not complying even with their own published requirements are increasing in the Secretary's office. Proofs are on file that students are graduated without having studied the required length of time, or without having studied under a preceptor; who have attended only one course of lectures; who have attended two courses in one year, without the necessary reading period intervening; who were not twenty-one years of age at the time of graduation, and who, in general, are not at all competent to practice medicine.

As a result of my own official experience during the past six years, I think it entirely within bounds to say that a strict adherence to their advertised requirements is the exception among colleges rather than the rule. In fully three-fourths of those who have come under my observation there have been irregularities of more or less gravity. It is unnecessary to attribute motives, for they are obvious and the natural result of the competition and rivalry between the various schools. To make the acquisition of the coveted diploma easy is the sure way to increased pecuniary returns and large classes, with a consequent substantial advantage in advertising both the college and the individual professors.

That the responsibilities of the BOARD are largely increased by this evil is manifest. Charges are now being investigated involving five different colleges whose diplomas have heretofore been recognized by the BOARD, and in the case of three other colleges I have refrained from issuing certificates upon their diplomas, because of a conviction that they have not the facilities to carry out their published requirements. In one instance, for example, there have been a number of changes in the personnel of the faculty since the announcement was published, and the diplomas issued at the close of the session of 1882-83 bear the signature of a graduate of 1882 as the incumbent of three different chairs—namely, as professor of anatomy, as professor of physiology, and as professor of hygiene.

Medical-College Announcements.

Announcement literature, in itself, presents some features worthy the serious attention both of the BOARD and of the profession. Aside from its legitimate function as a medium of information to the student concerning his studies, the annual announcement, so lavishly scattered throughout the country, is often prostituted to advertising the college and the claims of the individual members of the faculty, in terms and manner differing little, if any, from those of the ordinary advertising quack. In the course of the past six years I have carefully examined nearly all the announcements issued in this country, and do not hesitate to say that many of them are of such a character that if a private practitioner had been guilty of publishing a professional card, making such claims and couched in such terms, he would have been expelled from almost any medical society for a gross violation of ethics.

"Unprofessional and Dishonorable Conduct."

While this subject of "ethics" is attracting so much attention, it would seem to be a fitting time for the BOARD to consider whether the granting of a diploma to an unqualified and incompetent person, or in open violation of the requirements of the institution, should not subject those concerned in it to the odium and disqualifications which attach to any other unprofessional and dishonorable action. It might be suggested that this is a proper subject for the consideration of medical societies; but it seems to me that the BOARD may also fitly discuss the subject.

Modification of Affidavit.

In view of our past experience of the evasions of many colleges, even of their own requirements, as well as of the requirements of this BOARD, I have to suggest that it would be well to modify the present form of the affidavit so as to require graduate-applicants for certificates to state whether the requirements of the individual college and of the ILLINOIS STATE BOARD OF HEALTH, in the matter of medical education, have been fully carried out. Among other things, such modification of the affidavit would be of material assistance in enabling the BOARD to determine the good standing of colleges, as the law directs.

Importance of the Study of Hygiene.

It may be mentioned that the only criticisms on the Schedule of Minimum Requirements thus far received are in the nature of a suggestion that the usual college curriculum is already so full that there is no place for a chair of Hygiene. An examination of the different chairs and lectureships in many colleges reveals the fact that much time and attention are occupied by lectures and clinics on specialties, which, in many instances, are mere advertisements for the lecturer. A knowledge of Hygiene and Preventive Medicine is of far more importance to the general practitioner, as well as to the public, than such superficial acquaintance with many of these

specialties as only is possible except in post-graduate courses. Contact with medical men in the discharge of my official duties has strongly impressed me with the value of, and necessity for, this study.

United States Medical College.

The Supreme Court of the State of New York has recently decided that the United States Medical College is not a legally incorporated institution. In consideration of this, and of the further fact that the school has granted a diploma to a notorious "cancer doctor" of this State who could, under no circumstances, obtain a diploma from any Illinois college, I suggest that the United States Medical College of New York be placed in the list of those not recognized by this BOARD. Two of its diplomas were recognized conditionally some time since.

Preventable-Disease Circulars.

Twenty thousand copies each of the circulars on the Prevention and Control of Scarletina, Diphtheria and Typhoid Fever have been printed, in accordance with the order previously made. The demand for these circulars has been unexpectedly large, and a number of requests have been received for them in the German language.

Small-Pox.

The State remains gratifyingly free from the disease. There have, at no time during the winter and up to date, been any more cases than may be reasonably expected among a population so much exposed as that of Illinois. Since January 1, 1883, there have been cases at twelve different points. (The details of these are included in the Small-Pox Epidemic section of the Fifth Annual Report—which see.)

Glanders.

On the 7th of April a communication was received from Dr. Paaren, the State Veterinarian, enclosing a letter from Dr. R. M. Trumbower, a veterinary surgeon of Sterling, requesting that Dr. Paaren should immediately proceed to Sterling to examine some glandered horses in that vicinity, and explaining that—

"Mr. Conway, the owner and keeper of said glandered horses, has for years been treating nasal gleet, and now pays the dreadful penalty of a loathsome death by glanders in his own system. Two weeks ago a son of his died of the same disease. His farm has been a center of infection for years, and I was called to-day by some of his neighbors to examine his horses. Out of 13, I found five suffering from glanders in various stages of development. I had them placed by themselves, but not having authority to kill them myself, and the neighbors not desiring to do it under the circumstances of the family affliction, we considered it a proper case for the supervision of the State authority. All the horses have been running in the public road and have no proper care now, as the neighbors are afraid to go near the place."

There being no provision in the contagious-diseases-of-animals acts for the intervention of the State Veterinarian in the case of such a disease as glanders, it devolved upon the STATE BOARD OF HEALTH to take the necessary action. I at once telegraphed Dr. Trumbower for the name and address of the town clerk, to whom the following order was immediately forwarded:

ILLINOIS STATE BOARD OF HEALTH.

OFFICE OF THE SECRETARY, SPRINGFIELD, ILL., April 8, 1883.

SIR: By virtue of authority vested in this BOARD, you are hereby directed to convene your town board of health for the purpose of taking immediate action concerning the existence of glanders in your township.

Section 127, of article xiv, chapter 139 of the Revised Statutes, constitutes the supervisor, assessor and town clerk of each township a board of health, and empowers such board to make and enforce any rules and regulations tending to check the spread of contagious diseases.

From such information as is in possession of this office, prompt measures should be resorted to in the present case. The diseased animals should be killed, the premises thoroughly disinfected, and if any persons are found to be afflicted they should be isolated under the supervision of the medical attendant. The disease is one of the most contagious and loathsome character, and the fact that two deaths have already occurred from it admonishes to instant action and the employment of all needful precautions.

You are requested to make a full report of the facts, and of the action of your board, to this office as soon as practicable.

By order of the BOARD.

JOHN H. RAUCH, M. D.,

Secretary.

To S. S. COBB, Esq., Town Clerk, Coleta, Genesee Township, Whiteside County, Ill.

On the 9th inst., the following communication was received from Dr. Trumbower:

STERLING, ILL., April 7, 1883.

DR. J. H. RAUCH, *Secretary State Board of Health:*

J. J. Reimers, Veterinary Surgeon, of Morrison, Ill., and myself were out to see and examine the glandered horses on the Conway farm yesterday; we condemned six, one of which was shot immediately. The balance were placed in quarantine awaiting the orders of the town board of health, or the action of the neighbors. I think the necessity and consequent loss in killing the horses will be compromised with the family—a subscription taken up to reimburse them for the loss. I left definite directions as to hygienic measures to be taken as soon as the horses are removed, but it is doubtful whether they will be carried out, except under compulsion.

George Conway was taken sick on the 11th of March with evidences of catarrhal fever and a swelling over the frontal sinus, followed by induration of the right parotid gland, discharge from the nose, pustules and bullæ over the face, trunk and limbs. Died on the 23d, aged 17 years and a few days.

Wellington Conway, the father of the boy, was taken on the 23d of March with an attack simulating pleuro-pneumonia, followed by swelling of the glands, formation of pustules, ulcers, etc.; died on the 2d of April. He was the attendant of the son throughout his sickness, and the presumption is that he took the disease from the son.

There is not the least doubt in my mind, nor in that of other competent men who know the history of the cases, that the disease was "equinia."

The disease in two of the horses is so well marked that no one at all familiar with the disease could possibly make a mistake. Two horses have it in the chronic form and are apparently cases of long standing, one of them probably extending over a period of four years. The remaining animals are just showing evidences of the affection sufficient to justify condemnation.

M. R. TRUMBOWER.

The State Veterinarian has been requested to visit the infected locality, and to institute such measures in aid of the efforts of the town board as may be necessary—using the legal authority of the STATE BOARD to that end, if required. (Subsequent action on this subject will be found detailed in the report of the June meeting.)

Burial Permits and Death Certificates.

Since the last meeting, several towns have adopted the burial-permit ordinance proposed by the BOARD. It is noted that in some instances the maximum penalties imposed by the ordinance, as enacted, are in excess of the limit prescribed by the statutes. Attention is here called to this fact in order to prevent such a sentence being passed as would result in its being set aside, and thus defeat the purpose and intent of the enactment. Among the powers granted to city councils in cities, and to the presidents and boards of

trustees in villages, in article v, of chapter 24 of the Revised Statutes, is one authorizing them to pass all ordinances, rules, etc., etc., with such fines or penalties as they shall deem proper, "provided, no fine or penalty shall exceed \$200." * * * The validity of an ordinance is, probably, not affected by the fact that its maximum penalty is more than \$200; but any sentence imposing a fine of that amount would, undoubtedly, be illegal. It would be better to amend any ordinance, heretofore passed on this subject where the maximum penalty exceeds \$200, so as to conform to the statute; and, in all cases, to secure the necessary publication—that is, at least once within one month after passage; ordinances imposing fines or penalties not taking effect until ten days after such publication.

DR. JAMES F. POTTS, of Whitehall, President of the Greene County Medical Society, in a letter of the 24th of February, makes the following suggestions concerning the physician's certificate of the cause of death:

That the law be so changed as to require the undertaker, or the man who furnishes the coffin, to make reports of death, the physician last in attendance merely filling the necessary part of it relating to duration of sickness, cause of death, etc. At the last meeting of the Medical and Surgical Society of Western Illinois, I brought this matter up, and it met the approval of every member present.

The discussion which followed revealed the fact that, while reports of births were generally made, reports of death were surely falling more and more into desuetude, and that something must be done or the Medical Act will fall even in the house of its friends.

The obstetrician after the labor is ended is on the ground and has an abundance of time to make the necessary inquiries, and moreover he takes pride in doing so and in making reports.

It is far different with the physician as regards report of death. He is hardly ever present at the time of death, and, either in a wide country practice or in a crowded city, he may not see for months, or may never see, the friends or parents of deceased. These are lost. In a considerable proportion of cases, especially chronic ones, he does not know that he was last in attendance, and these are lost. Another considerable proportion of survivors are so dissatisfied with the physician, or account of the unfortunate termination, that it is a very delicate and unpleasant topic for both parties, and many of these are lost. Sudden deaths often are not reported—from violence, accidents, heart disease, apoplexy etc., and these are of grave importance in vital statistics. Many physicians, too, are bull-headed, and will not report, while others are careless and will report only in part.

Vital statistics, to be of any value, must be full, and it would seem impossible to get anything like full reports under our present law. With the change proposed, we may reasonably expect as full reports of deaths as we now have of births; for the undertaker, like the obstetrician, would have abundant time and opportunity to make inquiry, and would take the same pride in making the report.

This subject will doubtless be presented at the coming annual meeting of the State Medical Society, but I see no reason why, if the change is desirable, it may not be made during the present session of the Legislature.

To this letter, I replied, in substance, endorsing the suggestion as a good one and eminently practical, stating that I had "frequently considered whether such a division of the certificate could not be made under the law as it now stands, but without arriving at a satisfactory conclusion," and adding that "it is to be hoped the present General Assembly may do something toward perfecting legislation upon vital statistics." While awaiting such legislation, the custom which obtains where burial permits are required—and by which the undertaker practically does what Dr. Potts suggests—might be more generally adopted.

Sanitary Council.

On the third and fourth of April, the fifth annual meeting of the Sanitary Council of the Mississippi Valley was held at Jackson, Miss.

In some respects the results of this meeting promise to be of greater importance to the health interests of the Valley than those of any other since its organization. As stated in the circular letter of the Executive Committee, the suspension of some of the most important functions of the National Board of Health—especially its Sanitary Inspection services; the attitude of the Louisiana State Board of Health toward the New Orleans Auxiliary Sanitary Association, and toward other State Boards of Health in the Valley; the continuance of Asiatic cholera in threatening proximity to lines of travel, and the prolonged existence of a fatal form of *cholera nostra* in some parts of Mexico—together with other considerations touching the public health, have combined to renew the interest which originally attached to the deliberations and actions of this body.

Fifty delegates, from twelve States, were in attendance at Jackson; and among these, in addition to the various sanitary organizations, there were present representatives of the leading business and transportation interests. Illinois was represented by Dr. W. A. Haskell and the Secretary of the STATE BOARD; Chicago, by Dr. J. M. Hall, of the Health Department, and Dr. J. G. Kiernan; Joliet, by Dr. R. J. Curtiss; Springfield, by Drs. B. M. Griffith and J. L. Million; Braidwood, by Dr. LeCaron; Danville, by Dr. P. H. Barton; Belleville, by Dr. Schlernitzauer; Martinsville, by Dr. W. H. Doak; and Carbondale, by Dr. Heber Robarts.

Resolutions were adopted by the Council reciting that, as the National Board of Health possesses the fullest confidence of the Valley, it is recommended that the President of the United States place the epidemic fund of \$100,000 in the hands of that body for use in case of necessity; that the river and rail inspections, heretofore made by the National Board, be continued, if necessary, under the supervision of the Council, in the event that the former organization is unable to do so, and that the various States interested contribute to defray the expenses of such inspections.

The full report of this meeting is at hand for the information of the members, but its reading at the present time is unnecessary, attention having been called to the points upon which it seems desirable the BOARD should take action at this time. *

All of which is respectfully submitted.

JOHN H. RAUCH,
Secretary.

On motion of Dr. Clark, the Secretary's report was received and referred to a committee appointed by the Chair (consisting of Drs. Clark, Ludlam and McLean,) to formulate expressions of the views of the BOARD on its various recommendations and suggestions.

The executive session was then, at the instance of the Secretary, resumed and continued until 4 o'clock p. m. At that hour the regular order of business was called, and Dr. Clark, from the Committee on the Secretary's Report, submitted the following:

Mr. President:

Your committee, to whom was referred the quarterly Report of the Secretary, begs leave to state that it has given due consideration to the various matters therein discussed, and offers the following resolutions for the action of the BOARD:

For this report see subsequent pages of the present volume.

Resolved. That the ILLINOIS STATE BOARD OF HEALTH cordially approves the following actions and recommendations of its Secretary, as set forth in his quarterly report:

First. The refusal to issue, in the interests of the public and of the profession, the hundred-dollars-a-month license to two itinerants.

Second. The recommendation that medical colleges be again furnished with copies of the Schedule of Minimum Requirements, and requested to state formally their action thereon—such request to embody so much of the Secretary's argument for the necessity of this action as may be necessary for the further information of the colleges.

Third. The recommendation of the modification of the affidavit, required to be made by applicants for certificates, so as to require them to state whether the requirements of their individual colleges and of this BOARD, in the matter of medical education, have been fully complied with.

Fourth. The suggestion of the desirability of a prompt completion of the report of the BOARD's investigations into the causes, and the methods of preventing a repetition of the late small-pox epidemic.

Your committee would add that it knows of no more valuable work to the community than that foreshadowed in the facts and figures concerning this epidemic which are briefly given in the Secretary's report; and that it considers the prompt dissemination of such knowledge one of the most important with which the BOARD is charged, both by the constituting act, and by the terms of the contingent appropriation for the prevention of epidemics of contagious and infectious diseases.

With reference to the suggestion that the granting of diplomas by colleges to incompetent or unqualified persons, or in violation of their published requirements, should subject those responsible therefor to the odium and disqualifications attaching to any other unprofessional and dishonorable action, your committee concurs in the opinion expressed, that the subject is a fitting one for the consideration of the BOARD.

In the matter of the United States Medical College of New York City, the adoption of the following resolution is recommended:

Resolved. That, in view of the decision of the Supreme Court of the State of New York—to the effect that the charter of the United States Medical College of the City of New York is null and void—the diplomas of said college can not be legally recognized by this BOARD.

Respectfully submitted.

Committee { A. L. CLARK,
R. LUDLAM,
JOHN MCLEAN,

THE report of the committee was received and adopted. The Secretary called attention to the passage concerning the certificate of death, and suggested that the failure of physicians to make the returns required by law—returns of such vital importance to the public welfare—partakes of the character of unprofessional and dishonorable conduct.

ON motion of Dr. McLean, the BOARD endorsed the recent action of the Sanitary Council of the Mississippi Valley, and empowered the Secretary to take such steps, on behalf of the BOARD, as may be necessary to make effective that action so far as the State of Illinois is concerned.

Dr. Rauch briefly alluded to the necessity of harmonious action with the other Valley States—not so much with reference to the exclusion of yellow fever from the State, of which he had little fear, but on account of the demoralization of trade and commerce which ensues during the existence of that disease in the absence of co-operation between the various health authorities in the Valley.

AT the evening session, on motion of Dr. Ludlam, the Secretary was requested to announce that, in future, examinations of non-graduate candidates for certificates from the BOARD would be preceded by an examination into their general educational requirements—such examination, in default of a diploma or certificate of graduation from a literary and scientific college or high school, to

embrace the usual branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy.

On motion of Dr. Clark, the Secretary was authorized, during the interval between the present and the next meeting of the BOARD—regular or special—to take such action, in the event of a serious emergency arising threatening the public health, as, in his judgment, may be necessary.

The remainder of the evening session was occupied in the examination and rating of the answers of candidates in the branches so far as completed; and at 10 p. m. the BOARD adjourned until Saturday morning at 10 o'clock.

SATURDAY, APRIL 14, 1883. The BOARD was called to order by the President at 10 o'clock a. m., with the members in attendance as at the previous session.

DR. CLARK asked the opinion of the members upon the feasibility of an effort to secure one common Examining Board on Preliminary Education for the six medical colleges in Chicago. The suggestion was unanimously approved, and the Secretary requested to make mention of the matter in his published report for the purpose of bringing it before those interested.

THE auditing committee reported that it had examined and audited accounts, amounting to \$2,024.81, had found the same to be correct, and recommended that they be paid.

THE Secretary reported that 18 candidates had presented themselves for examination, of which number five withdrew before completing the answers to any of the sets of questions; and that, upon tabulating the ratings of the remaining 13, none were found to have attained the required minimum of 80 per cent. of correct answers. Following are the schedules of questions submitted:

EXAMINATION IN ANATOMY—BY W. A. HASKELL, M. D.

- 1st. Give the minute anatomy of bone.
- 2d. Describe the astragalus, and give its articulations.
- 3d. With what bones does the ulna articulate?
- 4th. Describe the ligaments of the elbow joint.
- 5th. Describe the biceps of the arm, giving its relation to the nerve by which it is supplied.
- 6th. Name the muscles involved in fracture of the radius near its center, and describe their action.
- 7th. Describe the vessels of the liver.
- 8th. Name the arteries forming the circle of Willis.
- 9th. Describe the superficial and deep palmar arches.
- 10th. Describe the Eustachian tube.
- 11th. Describe the kidneys.
- 12th. Give the anatomy of the inferior carotid triangle.
- 13th. Give the distribution of the fifth cranial nerve.

- 14th. Give the relations of the brachial artery, vein and nerve.
- 15th. Name the structures wounded by a ball which entered the right side about four inches from the median line of the spine, and on a level with the center of the first lumbar vertebra, and traversed the body, making its exit on a level with the eighth rib and ten inches to the left of the median line of the spine.

EXAMINATION IN PHYSIOLOGY—BY JOHN M'LEAN, M. D.

- 1st. What is physiology?
- 2d. Is digestion a simple or a complex function?
- 3d. What are the natural solvents for the food?
- 4th. Is the bile a secretion or an excretion?
- 5th. Name the chief constituents of the blood.
- 6th. What is the source of its white corpuscles?
- 7th. What is the relative frequency of the heart-beat and the respiratory act?
- 8th. Does urea exist in the blood in health, or is it manufactured in the kidney?
- 9th. If the renal function is temporarily suspended, what surfaces may eliminate the urinary salts?
- 10th. What is the function of the cerebellum?
- 11th. Give the physiology of menstruation.
- 12th. How is the ovum nourished prior to the formation of the placenta?
- 13th. Describe the function of the lymphatics.
- 14th. What are the sources of heat in the animal body?
- 15th. What is the average normal human temperature, and what is the range in health?

EXAMINATION IN CHEMISTRY—BY A. L. CLARK, M. D.

- 1st. What is an elementary body?
- 2d. Name ten elementary bodies, and give their chemical symbols.
- 3d. Define specific gravity.
- 4th. What is the use of the hydrometer?
- 5th. At what temperature Fahrenheit is water most dense?
- 6th. What are the properties of chlorine?
- 7th. What elements chiefly constitute common air, and in what manner are they associated, chemically or mechanically?
- 8th. What medicinal substance is represented by the chemical symbol KI?
- 9th. What metal forms the base of common clay?
- 10th. What element composes the principal bulk of plumbago, and name some other substances of which it is chief constituent.
- 11th. What is produced by the addition in solution of six parts acid tartaric to eight parts sodic bicarbonate?
- 12th. In what manner does the leavening or lightening of dough by yeast differ from the same accomplished by baking powders, and which process is most destructive to the virtues of the flour?
- 13th. What effect will usually be produced by the administration of a tablespoonful of Na Cl?
- 14th. What are the principal chemical elements found in milk?
- 15th. What is an acid; a salt; a base; an alkaloid; an alkali; an alcohol; a compound ether?

EXAMINATION IN GENERAL PATHOLOGY—BY R. LUDLAM, M. D.

- 1st. What is the difference between a fever and inflammation?
- 2d. Why do we distinguish predisposing from exciting causes of disease?
- 3d. Describe and define a cachexia?
- 4th. What is meant by the "latent period" of a disease?
- 5th. What is chloro-anemia?
- 6th. Name the most prominent of our epidemic diseases.
- 7th. Give the chief and common characteristics of malignant diseases.
- 8th. Explain the clinical significance of a hyper-thermal temperature.
- 9th. What is the import of glycosuria in malarial fevers?
- 10th. With what particular diathesis are cardiac lesions most frequently associated?

EXAMINATION IN THE PRACTICE OF MEDICINE—BY JOHN M'LEAN, M. D.

- 1st. Give the pathology, symptoms and treatment of empyema.
- 2d. What are the diagnostic symptoms of intestinal invagination?
- 3d. In what various ways may an attack of pneumonia terminate?
- 4th. Describe typical cases of measles, chicken-pox, small-pox, so as to indicate their differential diagnoses.
- 5th. Give the pathology, symptoms and treatment of typhoid fever.
- 6th. What precautions are necessary during the treatment of acute rheumatism with reference to complications or sequela?
- 7th. What are the symptoms and usual results of cerebral hemorrhage?
- 8th. Give the symptoms and treatment of croup.
- 9th. How would the scrofulous diathesis modify your treatment in an acute inflammatory attack?
- 10th. What is the essential pathological condition in *tabes mesenterica*? Indicate the general treatment.
- 11th. What are the symptoms of acute gastritis?
- 12th. What are the predisposing causes of Bright's disease?
- 13th. Give the symptoms and treatment of sunstroke.
- 14th. Give the symptoms and treatment of bronchitis.
- 15th. What is understood by the self-limitation of diseases?

EXAMINATION IN SURGERY—BY W. A. HASKELL, M. D.

- 1st. Describe the mode of pus formation?
- 2d. What are the uses of pus?
- 3d. What is the distinction between septicemia and pyemia?
- 4th. What are the complications of abscesses?
- 5th. Give the symptoms of gangrene.
- 6th. Define a burn of the second degree, and indicate its treatment.
- 7th. Give the treatment of lacerated wounds.
- 8th. Give the anatomy of epithelioma.
- 9th. Describe Teale's method of amputating, and name the advantages and disadvantages it presents.
- 10th. Give the relative advantages of the circular and the flap modes of amputating.
- 11th. What are the principal causes of death after amputation?
- 12th. Describe venesection upon the median basilic vein.
- 13th. Give the differential diagnosis of phimosis caused by gonorrhea from that caused by subpreputial chancroid.
- 14th. Describe the ligation of the radial artery in the forearm.
- 15th. Give the diagnosis of strangulated hernia.
- 16th. Give the differential diagnosis of fracture of the neck of the femur and of dislocation of that bone.

EXAMINATION IN OBSTETRICS—BY A. L. CLARK, M. D.

- 1st. What should be done in case of hemorrhage or flowing after the birth of the child?
- 2d. What are the functions of the placenta?
- 3d. What dangers attend the mother in twin labors?
- 4th. What dangers to the mother and what to the child in breech presentations?
- 5th. Under what circumstances is it proper to administer ergot during parturition?
- 6th. What treatment is necessary in presentation of the shoulders?
- 7th. Give the signs of pregnancy in the order in which they occur, and state what is the first *positive* sign.
- 8th. What should be done in case of prolapse of the cord?
- 9th. What are the principal fontanelles and what is their shape?
- 10th. How can you determine a hand from a foot presenting at or near the superior strait?

- 11th. Give pathology and prognosis in cyanosis.
- 12th. To what height in the abdomen does the uterus rise during the fifth month of pregnancy?
- 13th. Why does it usually descend during the last two weeks of pregnancy?
- 14th. Name all the female organs of generation.
- 15th. In what manner is septicemia made likely to follow parturition, and in what way should it be guarded against?

EXAMINATION IN GYNECOLOGY—BY R. LUDLAM, M. D.

- 1st. What is the depth of the normal unimpregnated uterus?
- 2d. What is the most frequent lesion in uterine leucorrhea?
- 3d. What form of nervous derangement is most likely to depend upon ovarian disease?
- 4th. What three diseases are apt to cause anchorage or fixity of the womb?
- 5th. What is the source of danger from pelvic hematocele?
- 6th. What conditions of the rectum predispose to pelvic disorders in woman?
- 7th. What are the causes and symptoms of laceration of the uterine cervix?
- 8th. What is the mode of operating for stone in the bladder of woman?
- 9th. What are the sources of poisoning in puerperal septicemia?
- 10th. What do we mean by sub-involution of the uterus?

EXAMINATION IN MATERIA MEDICA AND THERAPEUTICS.

BY JOHN H. RAUCH, M. D.

- 1st. Define (a) Materia Medica; (b) Therapeutics.
- 2d. Describe, briefly, the various methods in which medicines may be introduced into the system.
- 3d. Define topical remedies, and name some of the more important ones.
- 4th. Name some of the evacuants, and state how they act.
- 5th. What are the principal medicinal agents indigenous to Illinois?
- 6th. Write prescriptions embracing the following articles, and state the indications for each: \mathfrak{R} No. 1:—Sulphate of quinine and sulphate of iron. \mathfrak{R} No. 2:—Fluid extract of ergot and tincture of opium. \mathfrak{R} No. 3:—Fowler's solution. \mathfrak{R} No. 4:—Oil of turpentine. \mathfrak{R} No. 5:—Chloride of ammonium.
- 7th. Describe the therapeutic uses of the iodides of potassium and ammonium.
- 8th. Give the doses of fluid extract of digitalis; of podophyllin; of salicylic acid; of iodoform; of proto-iodide of mercury; of fluid extract of gelsemium; of arsenious acid; of sulphate of atropine; of alum; of bromide of potassium.
- 9th. What are the chief alkaloids of opium; of belladonna; of nux vomica; of aconite; of Calabar bean?
- 10th. Write three different prescriptions—for diarrhea; for pneumonia; for malarial fever—stating the different stage or character of the disease, or other indications, intended to be met by each prescription.
- 11th. What is hydrate of chloral; its uses; dangers? To what is it antidotal?
- 12th. Name, and give the doses of the different official preparations of opium.
- 13th. What are the principal anti-pyretics, and their modes of use?
- 14th. How do they act, and what conditions indicate their employment?
- 15th. What are anthelmintics? Mention the doses of three or more different ones.

EXAMINATION IN HYGIENE—BY JOHN H. RAUCH, M. D.

- 1st. What is a zymotic disease?
- 2d. Name the principal preventable diseases, in the order of their greatest prevalence in Illinois.
- 3d. What is the most common medium of diffusion of the poison of enteric, or typhoid fever; and in what way may the spread of this poison be effectually prevented?
- 4th. What are the chief sources of water pollution, and what diseases are caused by a polluted water supply?
- 5th. In a case of scarlet fever, when would it be prudent to permit the convalescent to mingle with others, and what precautions should be first enforced?
- 6th. During the prevalence of an epidemic of a contagious or infectious disease, what duty does the physician owe to the public and to his *clientele*?

- 7th. Within what distance of a well is a privy-vault, cesspool, or other subterranean storage of decomposing animal and vegetable matter, dangerous, and why?
- 8th. What are disinfectants; how are they used, and for what purposes?
- 9th. Indicate, briefly, the evils which should be guarded against in behalf of the health of school children?
- 10th. What are the chief causes of the excessive mortality of infants and children under five years of age, and how may they be largely remedied?
- 11th. To what is trichiniasis due, and how may it be prevented?
- 12th. What diseases are caused by a wet, undrained soil?
- 13th. What effect would general sub-soil drainage produce upon temperature, atmospheric humidity and wind movement?
- 14th. What is the agency of vegetation upon health?
- 15th. Describe, briefly, the sanitary conditions which should obtain in and about a dwelling house.

EXAMINATION IN MEDICAL JURISPRUDENCE—BY JOHN H. RAUCH, M. D.

- 1st. What is understood by medical jurisprudence or forensic medicine?
- 2d. A body is found upon a railroad track, mangled by the wheels of a train. How could it be determined whether the injuries were produced before or after death?
- 3d. In a case of suspected infanticide, what proof would be afforded by an examination of the lungs of the infant?
- 4th. What is the difference between abortion and miscarriage?
- 5th. Where a person knowingly communicates a contagious disease to another, and death results therefrom, can the law take cognizance of the facts; and if so, how?

As the published condition of these examinations requires 80 per cent. of correct answers in each of the first ten branches, and this had not been reached in any case, none of the candidates were adjudged entitled to a certificate, and the fees for examination were ordered to be returned.

On motion of the Secretary, the BOARD finally adjourned at 1 o'clock p. m.

QUARTERLY MEETING, SPRINGFIELD, JUNE 29, 1883.

THE regular quarterly meeting of the ILLINOIS STATE BOARD OF HEALTH was held in the rooms of the BOARD, in the Capitol building at Springfield, on Friday, June 29, 1883.

Present: Newton Bateman, W. A. Haskell, W. R. McKenzie, John H. Rauch.

On calling the meeting to order, the President formally introduced Dr. McKenzie, of Chester, Randolph county, appointed to fill the unexpired term of Dr. Gregory, resigned to accept the office of Civil Service Commissioner.

Under the regular order of business, upon the call for reports from officers, the Secretary presented the following:

QUARTERLY REPORT OF THE SECRETARY.

Thus far during the quarter beginning April 1, 1883, there have been received in the Secretary's office 872 communications, letters, reports, etc., and 949 letters, postals, circulars and other written communications were sent out. Of printed matter, there were distributed about 800 copies of the Annual Reports, and 9,720 copies of Preventable-Disease Circulars, Quarterly Reports, College Directories and miscellaneous publications. One hundred and eighty-nine packages were sent by express; 82 telegrams were received and 64 sent.

Certificates and Licenses.

Certificates entitling to practice medicine and surgery were issued to 186 graduates upon presentation of diplomas from colleges in good standing; and 6 to practitioners upon length of practice in the State. To midwives, 3 certificates were issued upon the credentials of recognized schools of midwifery; 3 upon length of practice in the State; and 7 upon examination. Among the certificates issued were 3 to dentists, graduates also of medical schools.

Twenty-eight applications for certificates were refused during the quarter. Six of these were from "cancer doctors"; one from a non-resident, not proposing to practice in the State, but desirous of the prestige of the Board's certificate; and one from a "Naturarzt," or natural physician, of whose application, made in German, the following is a literal translation:

MOUNT OLIVE, ILL., May 15, 1883.

HONORED SIR, DR. JOHN H. RAUCH,

President of the Board of Health of the State of Illinois:

Hereby I will ask for an application and, at the same time, ask for information whether I need license as a Naturarzt. Having practiced fifteen years in Germany, which I can prove by testimonials, and also by testimonials in this State, that I have cured in a short time patients that had been under medical treatment, but without success. As I wish now to travel through several States in order to cure their diseases, such as tape-worms, diseases of the stomach, skin, etc., should it be necessary to have a diploma or license, I ask for speedy information as soon as possible. I remain, your servant,

ERNST J. NOBIS.

The New Standard of Minimum Requirements.

At the last meeting of the BOARD it was

Resolved, That the Indiana Eclectic Medical College, of Indianapolis, Ind., and the Joplin Medical College, of Joplin, Mo., having given assurances of their intention and determination to fully carry out and abide by all the requirements considered by the ILLINOIS STATE BOARD OF HEALTH as essential to the good standing of a medical college, the diplomas of said colleges will be recognized in the future by this BOARD whenever, and so long as, it shall appear that their methods and practices entitle them to be classed among "medical institutions in good standing."

Since the adoption of that resolution facts have come to my knowledge which do not encourage the belief that it will be possible to recognize the diplomas of Joplin, at least, upon any assurances yet received. The announcements of this college contain, it is true, all that is asked for in the matter of requirements for graduation, etc.; but the accompanying letters and documents, herewith submitted, demonstrate that a compliance with our standard of minimum requirements in this case will, to a great extent, be merely on paper. In the case of other colleges additional instances of evasions of their own published requirements have also come to my notice since our last meeting, and it devolves upon the BOARD to duly consider what weight shall attach to the paper promises and proclamations of remote schools.

To recognize or reject the diplomas of colleges upon the mere fact of their literal acceptance or non-acceptance of our published standard, could not fail to work injustice in some instances. On the one hand, diplomas would be recognized which might be worthless as evidence of the real qualifications of their possessors; while, on the other, graduates of colleges whose general standing and character are vastly better, might be rejected.

To rigidly adhere to such a rule would, in effect, be to discriminate against the schools of our own State; and yet Illinois colleges, as a whole, do better work, furnish better facilities, and are more thorough in their instruction, than those of many other States. In point of fact, many of these latter should be accorded recognition only as preparatory medical schools; since neither in the qualifications or number of their teachers, in their hospital and clinical advantages, nor in their anatomical, physiological or chemical laboratories, do they possess such an equipment, or furnish such

* Although the language of this resolution explicitly says that these college will only be recognized as in good standing "whenever, and so long as" their methods and practices entitle them to such recognition, the action of the BOARD has been misinterpreted to be a direct and unconditional recognition of the Joplin and Indiana Eclectic. The resolution is not legitimately susceptible of any such construction, nor was it so intended by the BOARD.

I have also answered letters, inquiring whether the diplomas of certain colleges would be recognized in the future, in accordance with the spirit of this resolution—to-wit, that recognition would depend upon a substantial and *bona-fide* compliance with the BOARD's requirements, both as to preliminary education and course of study.

facilities for instruction as to warrant them in conferring the degree of M. D. upon their students, with the popular estimation of the virtues which such a title now possesses.

Further, such a course would virtually frustrate the object of the Medical-Practice Act, by throwing open the State to any incompetent possessor of the diploma of an institution which had nominally complied with the minimum requirements for graduation of the STATE BOARD OF HEALTH. The obvious intent of the law is to guard the people from ignorant and incompetent medical practitioners, and it indicates the standard by which to judge of the fitness of claimants to the rights and privileges conferred by it.

In any effort to define this standard, by formulating the conditions which constitute the "good standing" of a medical college, it must be the actual and *bona fide*, and not a superficial and perfunctory, compliance with the essentials of a sound medical education which shall be the test. Such, of course, is the meaning and intent of the BOARD in its adoption of the report of its Committee on Medical Education.

The Legislatures of Minnesota and Missouri have recently enacted laws similar to, and based upon, our Medical-Practice Act; and in Missouri a State Board of Health has also been created under an act similar to our State Board of Health Act. The schedule of the minimum requirements necessary to insure recognition as in good standing, will be adopted by both these Boards, and assurances have been received of their future co-operation in this effort to improve the system of American medical education.

Preliminary Examinations.

In accordance with the suggestion made at the last meeting, concerning the desirability of securing one common Examining Board on Preliminary Education for all the medical schools in Chicago, a communication was addressed to the faculty of each college, and thus far letters of concurrence and approval have been received from four out of the seven. I have given some thought to the details of such examinations, and now think a feasible course to pursue would be to have the examining board composed of the county superintendent and two of the principals of the Chicago high schools—these to act under the supervision of the STATE BOARD OF HEALTH. Candidates for examination to apply to this Board for the permit to appear before the examiners and no inquiry to be made as to the college which the candidate proposes to attend. The examinations to be made without expense, either to the colleges or to the candidates.

The question has arisen as to the preliminary education of those who have already matriculated—whether the requirement of evidence on this point applies to such. My opinion is that the effect of the new schedule of minimum requirements should not be made retroactive in its application. Reply has, therefore, been made to a number of letters from students, to the effect that where a student has already attended one course of lectures prior to the session of 1883-84, evidence as to his preliminary education—by examination or otherwise—would not be exacted.

Specimen Cases of Fraudulent Advertising Quacks:

Pickett, of Indiana.—The following correspondence sufficiently outlines this individual and his pursuits:

FARINA, ILL., JUNE 4, 1883.

DR. RAUCH,

Secretary State Board of Health, Chicago, Illinois:

SIR:—Our village was visited a few days ago by a "specialist" from Indiana calling himself Dr. Pickett. He came here to sell "Marriage Guides," etc., and to give private lectures. He was also a pretended phrenologist and gave charts. His private lectures were given to men and women separately, and in his last lecture he offered for sale a recipe or appliance of some kind, which he warranted to "prevent conception."

Please inform me in a letter that I can have published, what is the law in regard to such creatures and how the scoundrels may be brought to justice. The fellow promised to return soon, and you may guess his real business, and a number of citizens here would like to know what they can do to suppress the fellow.

Very truly,

ATTORNEY GENERAL'S OFFICE, STATE OF ILLINOIS,
SPRINGFIELD, June 21st, 1883.

JOHN H. RAUCH, M. D.,

Secretary State Board of Health:

DEAR SIR:—In relation to the matter in letter of inquiry to you from —, and which you have submitted to me, regarding the prosecution of one "Prof. Pickett," a lecturer on phrenology and physiology, for selling Marriage Guides and appliances or recipes which he in-sures to prevent conception, I would say that such a party can be prosecuted for dealing in obscene literature under sections 23 and 24 of the Criminal Code, if his so-called Marriage Guides will come under that head; or under section 6 of the Criminal Code, if said Marriage Guides advertise, or he advertise in any other manner, "abortifacient drugs;" or under sections 3 and 4, if he produces, or attempts to produce, or cause, or sells medicines or instruments to produce or cause, abortions in pregnant females.

Our statute is not sufficient to reach one for giving information, selling recipes, etc., to prevent conception.

Very respectfully,

JAMES MCCARTNEY, Attorney General.

Flowers.—During the past week complaints have been again received from DuPage and Ford counties concerning the quack H. D. Flowers, of Fulton, Whiteside county. Sometime in April, last, the evidence on file in the office concerning this man was placed at the disposal of one of the Chicago correspondents, who wrote him up in the following manner:

This man, his brother Henry and son Rudolph, together with their agents, Hamilton and Henry, have swindled hundreds of people throughout Fulton, Lee, Whiteside, Henry, Kane, Knox, Peoria, McLean, Grundy, Ford, Champaign, Macon, Moultrie, and other counties. The mode of operation is thus described by a victim: One of the agents, travelling in advance, distributes copies of "The Medical Examiner, published by H. D. Flower, M. D., of Fulton City—terms twenty cents a year"—an advertising sheet of the usual quack character. This agent posts himself as to all the sick and ailing people in the theatre selected for working, and especially informs himself of their financial condition. This information is conveyed to Flowers, who then appears on the scene and astonishes the credulous rustics with his "intuitive" knowledge of their cases, symptoms, duration of illness, etc. Promises of a cure fall on ready ears; the utmost cent in spot cash is exacted, and notes for as much more as can be extorted. A bottle of worthless stuff is furnished, the notes are discounted at the nearest bank and "Dr." Flowers disappears, to re-enact the performance hundreds of miles away, leaving his duped victims to helplessly discover the swindle. The man has three living wives, two of them heartlessly deserted. He began his infamous career, nearly a quarter of a century since, by performing an abortion on a young girl, daughter of a prominent citizen of Lee county. She died a few days after in a small town in Iowa, whether he had taken her. At the coroner's inquest it was found that he had torn the walls of the womb entirely through in several places. He was arrested, indicted for manslaughter, but broke jail through the connivance of a deputy whom he bribed, and who aided him as a brother. Mason—both subsequently expelled from the fraternity—escaped to Canada, where he lived till he thought it safe to return to Illinois. Since then his career has been one unbroken chain of swindling, infamy and beastly libertinism. One of his deserted wives, married four years ago, is now living in Bloomington. Two weeks after their marriage he was arrested for swindling, and only released on payment of \$4,900, the bulk of the sum being the wedding portion of the bride, whom he at once deserted on his release, accompanied in his flight by one of the most notorious strumpets of Central Illinois. He exhibits a diploma, ostensibly issued by the Medical College of Toronto, but in reality purchased for the sum of \$100 from the equally notorious "Dr." Whittier, of Chicago, better known as "Dr. James."

Local papers have aided the STATE BOARD to expose this gang, and their practices are becoming so well known that the last batch of victims in Kane county have refused payment on the notes given. Attorneys Hopkins & Aldrich, of Aurora, write the Secretary concerning the result of a recent trial on one of these notes: "Your deposition settled all doubt as to whether Flowers obtained the note of Cooper Bros. through fraud. They are, indeed, grateful to you for your kindness in placing them in possession of the facts in the case, and they will materially aid us in dealing out justice to Flowers and his abettor."

Lighthall.—Yesterday's mail brings more complaints and copies of the hand-bills and circulars of James I. Lighthall, or "Kansas Jim, the Indian Medicine man," as he advertises himself. He "can be found at his tents or upon the rostrum," and issues his hand-bills, etc., from "Indian Medicine Lodge, 224 Main st., Peoria, Ill."

Nothhelfer and Fitzgerald.—Among the certificates reported at the last meeting as having been issued during the previous quarter were No. 5,858, to Julius Nothhelfer, of 701 Pine st., St. Louis, issued March 14; and No. 5,891, to Joseph Fitzgerald, also of 701 Pine st., St. Louis, issued March 24.

The application for Nothhelfer's certificate was based on an affidavit that he was a graduate of the St. Louis Medical College, and this was corroborated by a letter from a member of the faculty of that institution, in which he says "I can sincerely endorse Dr. Julius Nothhelfer, a graduate of the St. Louis Medical College, at the session of 1879-80, as to his moral and professional character and standing." In his first letter, March 7, Nothhelfer states that he intends "to practice in a country town in Illinois."

Fitzgerald's certificate was granted upon an affidavit that he was graduated from the Royal College of Surgeons, Ireland, in 1871. The affidavit was accompanied by a number of letters "bearing testimony to the capabilities of Dr. Fitzgerald as a medical man eminently suited to take charge of any institution requiring a courteous and skillful medical officer." These were all written in Dublin none later than 1874, and as this was not deemed recent enough, a rather cautiously worded letter was forwarded by Fitzgerald from a prominent St. Louis physician, its reticence being plausibly explained by Fitzgerald on the ground of the latter being a stranger in the city. Fitzgerald requested that his certificate be sent to Belleville, St. Clair county, where he proposed to practice.

In the latter part of April my attention was attracted to a large three-column, four-page circular, headed, "The Great Surgeons, Drs. Nothhelfer and Fitzgerald, late of London, England, graduates of King and Queen's college, will be at Commercial hotel, 100 to 104 Lake street, Chicago, for one month. Terms for treatment, cash. Charges from \$10 to \$500, owing to the requirements of the case." In this circular they not only promise to cure every imaginable disease, but offer \$500 reward for an incurable case. Inferentially, it is the bulletin of the St. Louis Medical Institute, an establishment which, it is safe to say, has no tangible existence, but which in this sheet, at least, is equipped with the "most perfect surgical instruments and appliances, furnishes the most approved methods of treatment, and treats successfully the great majority of those diseases and deformities considered and given up as incurable. Everything is done by new methods of treatment, new and recently invented instruments, and new and recently discovered remedies." Some of the passages are unique even in quack literature.

For example, the section on "diseases of the sexual organism." This is headed, "Manhood and Womanhood. The worst cases completely restored to health and the enjoyment of life," and closes, after the usual disgusting recital, as follows:

"We would invite the attention of those of either sex afflicted in this manner to our new and successful method of treating this class of diseases, and guarantee a positive and permanent cure of every case [of "Manhood and Womanhood."]"

This case was such a flagrant one that the members of the BOARD were at once telegraphed to for authority to take immediate action, which was promptly accorded; and on May 1, the individuals were notified of the revocation of their certificates. Their bill distributors and agents were arrested under a local ordinance, and a day or two after they left the State. The various papers in this case, the correspondence, and a copy of the advertising sheet, are herewith submitted.

Anderson.—An almost identical sheet with that issued by Noth-
helfer & Fitzgerald is headed, "American Surgical Institute, estab-
lished for the treatment of chronic diseases and deformities. Dr.
J. E. Anderson, proprietor, Indianapolis." The reading matter in
these two sheets is the same, with an occasional change of head-
lines, etc.

Correspondents in Paxton forwarded copies of Anderson's sheet about the middle of May, with a statement that the streets of that town were ornamented with bunches of them tacked to posts, tree-boxes, etc., and accompanied by an announcement that "Dr" Anderson would be at the Blackstone Hotel in Paxton, on Thursday, May 24. These correspondents inquired if Anderson was authorized to practice in this State, and in this manner, and asked for advice. I directed the arrest of the man as soon as he had prescribed for any one, and forwarded the necessary form of complaint, instructions, etc. A letter of June 15, says: "J. E. Anderson appeared on time, but scented danger and absolutely declined to prescribe for any one. Several parties went to see him, but were informed that he had been called away soon after his arrival. The hotel-keeper, however, says that he remained the entire day, and left on the night train."

McDonald.—The trial of James L. McDonald, of Rockford, for practicing in violation of the Medical-Practice Act, was finally held in May last, and resulted in finding the defendant guilty. State's Attorney Works, who conducted the prosecution, writes, June 25:

Judge Brown found McDonald guilty, but intimated that if he asked for a new trial it would be granted, which of course was done forthwith. The Judge stated he thought the record was not in good shape for either party to go up on. The defendant put upon the witness stand a woman who testified to having graduated from the Health College. I showed, upon cross-examination, that Campbell composed the whole faculty; that no text-books were used except Campbell's book and Gray's Anatomy; that there was no dissecting done by students, etc., etc.; and attempted and offered to show by one of our local physicians that the school could not be in good standing, and also to show the same fact by the introduction of the "little red book," all of which the Court would not permit, but in deciding the case, Judge Brown intimated that he had probably erred in not allowing me to show those facts.

If McDonald does not get out of town before next October I shall try the case again, and hope to be able to show the character of the institution.

The "little red book," above referred to, has the following title page:

"Vitapathy: A vital System of Health and Life for the Cure of Disease and the Prevention of Death. Every Physician should learn it; every sick Person should employ it; every Person should read this Book and show it to their Friends and Neighbors, and let every afflicted Person know that in this System there is Hope for all. Read every page of it, and learn and know the Truth, Power and Success of Vitapathy. For further particulars apply to, or address, Prof. J. B. Campbell, M. D., V. D., its Author and Founder, American Health College, Fairmount, Cincinnati, O."

On another page Vitapathy is stated to be "a true System of Physical, Mental and Spiritual Culture, for purifying the Body, developing the Intellect, exalting the Soul, and preparing All for ultimate Immortality, furnishing the Key to Life and Power, by J. B. Campbell, M. D., V. D., Physician and Minister, President of the American Health College, Cincinnati." All this on the following terms:

The author furnishes books, printed lessons, formulas, receipts, specifics, and special modes of vital treatment for all diseases, with the sure method of diagnosis, and all lessons belonging to the Vitapathic System, with diploma and full right to practice, to physicians of all schools and all well qualified persons who can learn the new system at home—

Males, for \$100. Females, for \$75. Male students who need verbal lessons and full college course, with all the above, \$150. Female students (the same) \$100

In an autograph letter from Campbell to the Secretary, he says "the American Health College furnishes an opportunity to learn the higher Metaphysical Theories and the use of the higher and imponderable Forces in Nature that has not been reached yet in the Older schools." He adds that the diplomas of the graduates of the American Health College "show that they are qualified to practice and have equal Rights with Graduates of other Medical Colleges, and that is All that is required. They need no further examination *indeed* none but Vitapathic Professors could fully examine them, And that has been Done here before they graduate."

This man McDonald holds such a diploma from Campbell, and based an application for a certificate thereon. The application was rejected. McDonald began to practice without a certificate, and he was thereupon prosecuted for violation of the statute. State's Attorney Works deserves the thanks of the community and of the BOARD for the intelligence and vigor with which he has conducted the prosecution.

Another Diploma Mill.

A few days since, June 20, I received the papers and diploma here shown, being the application of Ladislaus Slominski, of Chicago, for a certificate from the BOARD. Never having before heard of the institution issuing the diploma I wrote to correspondents in Milwaukee, and have already received the following letter in reply:

DEAR DOCTOR:—In reply to your letter, No. 10,570, I would say that there is in this city a "Diploma Mill," styling itself the Milwaukee College of Medicine and Surgery, that has from time to time issued diplomas. None of the men connected with it are recognized by the profession, and I do not think any of them have received a regular medical education. Certainly most of them are flagrant "quacks." I believe they each have a diploma, and, as they have organized under a general State law, they can not be prosecuted. They have never given anything like a course of instruction.

The personnel of this institution consists of

Samuel F. Fowler, M. D., President.

W. H. Coney, M. D., Secretary and Dean; one of the Board of Directors; Professor of the Principles and Practice of Medicine, and Clinical Lecturer on Venereal and Skin Diseases.

- B. L. Bull, M. D., Treasurer; one of the Board of Directors;
 Professor of Materia Medica and Therapeutics, and Clinical
 Lecturer on Heart, Throat and Lungs.
 O. S. Fowler, M. D., one of the Board of Directors.
 Paul Fisher, one of the Board of Directors.
 M. Sorenson, M. D., Professor of Obstetrics and Diseases of
 Women and Children.
 C. F. Lewis, M. D., Professor of Anatomy and Pathology of
 the Nervous System.
 G. McKay, M. D., Professor of Surgery.
 W. Lockwood, M. D., Professor of Physiology.
 M. H. Palmer, M. D., Professor of Chemistry and Toxicology.
 G. Murray, M. D., Lecturer on Medical Jurisprudence.

I am tolerably familiar with the members of the medical profession, and especially with those engaged in medical instruction in this country; but these individuals are all unknown to me, and I am fully prepared to accept my correspondent's statement that they are "not recognized by the profession."

This morning I am in receipt of a copy of the Second Annual Announcement of the College, from which it is learned that: "This College is incorporated under the general law of the State of Wisconsin. Its faculty have power to issue diplomas of Medicine and Surgery, and are possessed of all rights and privileges granted, or that may be granted, to medical colleges in the country."

It is also stated that "the qualifications requisite for graduation from this College will be of the highest standard, and efforts will be constantly made to render the course of instructions still more thorough and comprehensive."

What is considered the "highest standard" of qualifications requisite for graduation is shown in the following paragraphs from the announcement:

Provided, however, since many States have legalized the status of practitioners by Examining Boards, therefore any person otherwise qualified, and holding certificates of fitness or authority to practice from any State Board of Health, may become an applicant for graduation by attending a single course of lectures in this College.

Likewise, practitioners of five years of reputable and consecutive practice, upon furnishing a certificate of the fact from the County Clerk and three good and reputable citizens, according to the following form, may become applicants for the honors of the school, upon attendance of one full term of Lectures and passing a satisfactory examination.

So far as appears from this announcement the only place provided for clinics and lectures is at "The Hot Springs Medical, Surgical and Vapor Bath Institute;" but whether even this exists, except upon paper, is matter for conjecture, since no location is assigned to it.

I recommend that the application be refused, on the ground that the institution is not in good standing within the meaning and intent of the Medical Practice Act.

The St. Louis Eclectic.

On the 17th of May there was received the following postal card:

Fieldon Ill 5-12-83
John H. Rauch M D. Sir you still
persist in trying to frighten
our Graduates, like _____ of
_____, who have attended two
full, long terms in our School &
Honorably graduated. I look
upon you, as the chief, of a set of
Dastard Bigots & villians & the
sooner you arrest _____ the so-
oner you will get through with it.
Yours L. C. WASHBURN, President of
the ST. LOUIS ECLECTIC MEDICAL COLLEGE.

This production was called forth by my refusal, on the 18th of April last, to issue a certificate based on a diploma of the St. Louis Eclectic.

Other routine correspondence has followed, with which it is not necessary to now occupy the time of the BOARD; but this occasion may be taken to offer a word or two of comment upon the impression which obtains in certain minds concerning the sacred rights of "legally-chartered colleges," and the virtues which inhere in anything called a "diploma," no matter whence it emanates. The latest form in which this has found expression is as follows: "If a physician be such by virtue of the laws of the State of New York, has the State of Illinois power to disqualify him for practice? If she should attempt this, there can be but little question that an issue will be taken in some case for final presentation at the bar of the Supreme Court of the United States."

The question in the above is based upon an erroneous impression as to the rights, privileges and immunities which medical colleges can confer with their diplomas. The assertion which follows, and which seems intended to forestall answer to the question, is based upon want of familiarity with important facts connected with the medical profession in Illinois. To correct this latter, it is only necessary to point out that in the enforcement of the Medical Practice Act in this State, hundreds of physicians, who were such by virtue of the laws of New York or of other States, have been disqualified from practice in this State, during the past six years; and that scarcely a day—never a week—passes when one or more such physicians are not so disqualified and leave the State. See the reports and records of the STATE BOARD OF HEALTH, throughout.

The error as to the rights conferred by the diploma of a college chartered in accordance with the laws of any given State—which is, probably, what is meant by "a physician by virtue of the laws," etc.—has been corrected more than once by the courts, and in the publications of this BOARD. While it is true that every man has a natural right to follow out the bent of his inclination, and to be a clergyman, a lawyer, a doctor, a scavenger, a peddler, an auctioneer, just as he may choose, it is not true that a man can practice any of these professions or occupations except he does it upon such terms as the law imposes; and the law can impose just such terms upon any one of these professions or employments as the legislators in their discretion deem best for the interest of the community.

A legally-chartered medical institution in New York, or in Wisconsin, or in Ohio, or Pennsylvania, or in Missouri, or Massachusetts,* may graduate its "students" and endow them with diplomas conferring upon them the rights and privileges of doctors in medicine—subject to the laws, not only of the State but of the community in which they practice. But when such "physicians" enter Illinois to practice, they must conform to the laws of Illinois.

The right to practice medicine is not a constitutional right, nor a right inherent in the law of nature, nor an absolute right conferred by a college, whether specially chartered or otherwise. It is a statutory right, subject to the control of the Legislature; and the Legislature of this State has prescribed the terms and conditions upon which it may be exercised in this State. Among these terms and conditions is one to the effect that the practitioner, if a graduate, shall present the diploma of a college in "good standing"; and it devolves upon this BOARD, by the terms of the law, to determine what colleges are, and what are not, in "good standing." Only the graduates of such—with exceptions not pertinent for consideration in this connection—may practice medicine in Illinois, no matter what rights the laws of another State may confer in that State.

It has seemed necessary to say this at the present time—without any special reference to the president of the St. Louis Eclectic—for the reason, among others, that it is a matter of importance to the student of medicine, intending to practice in this State, that he pursues his studies at colleges which comply with the requirements of this BOARD.

Professional Decorum.

Attention is occasionally called to certificates, testimonials, etc., purporting to be signed by reputable physicians, and published by the proprietors of patent medicines, nostrums and appliances. Where these bear the signature of any of those holding our certificates, I do not hesitate to address the writer in the interest of professional decorum and propriety, as well as in that of the public. As a rule, such testimonials are given without due consideration, and are used for purposes not contemplated by the writers. As one of them says, in the last reply received, in answer to a recent letter of mine, "The fact is, I never gave the matter a thought, but will be more discreet in the future."

When the BOARD first began its labors such breaches of professional decorum, as well as a large class of other offences—which were usually submitted for adjudication or discipline to the various medical societies, or else went uncorrected—were much more numerous than now. Whenever brought to my notice it has been my custom to simply call the attention of the offender to the fact, without any unnecessary publicity; and as a rule, subject to very few exceptions, this has proved quite sufficient to secure an abandonment of

* For example: The United States Medical College of New York; the Milwaukee College of Medicine and Surgery of Wisconsin; the Vitaphic, or American Health College of Ohio; the Philadelphia University of Medicine and Surgery, and the American University of Medicine and Surgery, of Pennsylvania; the St. Louis Eclectic Medical College of Missouri; the Boston Bellevue Medical College of Massachusetts.

the objectionable practices. I think it is very generally admitted that there has been a marked improvement of the medical profession in Illinois, in this respect, within the past few years.

Small-Pox.

Since the 18th inst., there has been no case of small-pox in the State—the first time that it has been entirely free from the disease since November, 1879. During the quarter, reports of cases have been received from Streator, LaSalle county; Trenton, Clinton county; Robinson, Crawford county; Belleville, St. Clair county; Mound Junction, Pulaski county, and Highland, Madison county. It will be noted that, with the exception of Streator, these places are all in the southern portion of the State. The cases at Trenton, Belleville and Highland came direct from St. Louis, and those at Mound Junction occurred among two families of destitute negroes, the contagion attributed to steamboat hands. There was no spread of the disease, and the victims were all unvaccinated. At Streator the outbreak was more serious—a total of 21 cases with five deaths occurring between March 29 and June 4. The contagion is attributed by some to the same German immigrant, Fritz Bocker, who spread the disease through Grundy and LaSalle counties in February and March last, as reported at the April meeting; by others it is attributed to a pack peddler. Of the 21 cases, 12 had never been vaccinated (the first 8 cases occurred among these;) 4 adults had been vaccinated in infancy or childhood only. The 5 deaths occurred among the 12 unvaccinated. The actual cost of the outbreak was \$5,763.25, and the loss to common carriers, business, labor, etc., is variously estimated at from \$15,000 to \$20,000.

The outbreak at Robinson was marked by some sensational features, with which the BOARD is probably familiar, but which may be here briefly rehearsed for the purpose of calling attention, both that of the profession and of the public, to an obvious duty of the attending physician, no less than of a sanitary officer, whenever suspicion is aroused that a given case may be of a contagious nature.

The facts, as narrated by the attending physician, Dr. T. N. Rafferty, of Robinson, are as follows:

The body of Susan Young was sent to Robinson by express from Cincinnati, on Friday, May 4, accompanied by a permit to ship, signed by Dr. D. D. Bramble, Health Officer of Cincinnati, to J. F. Wiltse, undertaker, and giving the cause of death as purpura hemorrhagica. At the same time a telegram was received by the girl's mother, Mrs. Caroline Young, stating that the body had been sent, and "would not be in a condition to be exposed." This was signed by Dr. B. F. Miller, of Cincinnati, the attending physician. The local undertaker, Thos. Kellar, took the body to Mrs. Young's residence, two miles north of town—and, at her urgent request, inspired by doubts as to the corpse being that of her daughter, he opened the coffin in the presence of the relatives and a few friends of the family. The body was examined until they were satisfied as to its identity, when the coffin was closed, and remained in the house until next day, when burial took place at the neighboring cemetery, in presence of quite a number of persons, but the coffin was not again opened. Of the whole number exposed, five took small-pox after the usual period of incubation, viz: Mrs. Young, Emma Fitch, Willie McCabe, May McCabe, and Mr. Kellar, the undertaker. These were taken sick May 15, Tuesday, and the disease was recognized as small-pox on the following Friday morning, although it was suspected on Thursday. Of these five cases, Mrs. Young and Mr. Kellar died, she on the fourth and he on the eighth day of the disease. Mrs. Young's was a typical case of varicella hemorrhagica, and Mr. Kellar's proved to be of the confluent type. The old lady had never been vaccinated. Kellar was vaccinated twenty years ago, and never revaccinated. Of the other three cases above mentioned, Emma Fitch had been vaccinated in infancy, but not revaccinated, and had an ordinary attack of discrete small-pox; ending in recovery. Neither of the two McCabe children had ever been vaccinated, and both had confluent

small-pox, ending in recovery. The other resulting cases were Lizzie Young and Mrs. McCabe, who nursed the Young family during their sickness, and Mrs. Kellar and child, three years old, wife and child of Thos. Kellar, and who were with him during his sickness. Of these, Lizzie Young had been vaccinated eight years ago, and Mrs. McCabe some twenty years ago. Both had very mild varioloid; one had two pocks, the other five, none on the face in either case. Mrs. Kellar had spurious vaccine disease a number of years ago, and was vaccinated when it was ascertained her husband had variola, with the effect of modifying the disease to some extent, although she was very sick, but is now convalescent.

Dr. Rafferty writes that in this case the vaccination that "took" was not performed until seven days before the initial variola fever set in. The little girl was unvaccinated until after her exposure, but the disease in her case was greatly modified, and of short duration. These nine cases, with two deaths, constitute the extent of the outbreak, and were all in the two houses where the disease first occurred. Very naturally there was intense excitement in Robinson and vicinity; the town is said to have been almost depopulated, public schools were closed and business suspended. On referring to the Vaccination Returns from Crawford county, it was found that the School Vaccination Order of the Board had been very imperfectly complied with. Instructions, with new sets of blanks, etc., were at once forwarded to the county superintendent, and the authorities were advised that the closure of the schools would be entirely unnecessary if the scholars were properly protected by vaccination.

The antecedent history of Susan Young's case shows that she was attending a private boarding school for music in Cincinnati; that after an absence of some days in Kentucky she returned to the school, was taken ill, developing symptoms which led to a diagnosis of purpura hemorrhagica—the diagnosis being concurred in by two consulting physicians—was treated for purpura, and died on the eighth day. It transpires that the possibility of the case being one of purpura variolosa, or hemorrhagic small-pox, was discussed, but not accepted; and that consequently no restrictive measure, no isolation of the patient, no revaccination of the other inmates of the house, was resorted to. Within two weeks after her death two of these inmates were attacked with what was finally recognized as small-pox, and subsequently a third case developed—one of the three dying of purpura variolosa, or hemorrhagic small-pox.

Diagnosis of Contagious Diseases.

These unfortunate results of a mistaken diagnosis have naturally attracted considerable attention from both the secular and the medical press. One of the latter, in an elaborate editorial defense of the attending physician and his counsel, points out that, "If, instead of inciting to ill-timed and meaningless revenge, the various journals, which have found great pleasure in defaming, had spent their energies in showing the public the necessity for repeated vaccination, the value of this preventive method, and the dangers that are incurred, particularly in such places as private schools, by want of attention to this particular, then the lesson taught by this outbreak of variola might have been highly useful."

While deprecating the unjust censure heaped upon the physicians, this journal is, however, forced to admit that they "were not altogether blameless in the matter." It was stated that in their consultation they had discussed the possibility of the illness being *purpura variolosa*. "If such a discussion occurred, and doubt existed, then it was their duty to take every precaution by excluding their patient from any manner of intercourse with her friends, and by personally satisfying themselves that the other inmates had received adequate protection. It should warn all practitioners that, in case of doubt, the wiser plan is always to act on the supposition of greatest contagion, by which no harm can be done and many persons may be saved from serious danger."

I wish to add that it is not only the "wiser plan," but it is the positive duty, both of the practitioner and the sanitarian, to resolve any doubt which may arise or be suggested, with reference to such a disease as small-pox, in favor of the community rather than of the individual. This has been my invariable rule during the entire term of my official existence as a sanitarian, and it is one which I have always enjoined upon my subordinates. While Sanitary Superintendent of Chicago, instances frequently came to my notice where the most serious results followed a departure from this rule; but I never knew of any serious harm resulting from its observance.

The frequent difficulty of diagnosis in the early eruptive stage of small-pox only adds to the importance of such precaution. I have known even a professor of dermatology to be deceived by some ill-defined cases of measles in the early stage, and to take very radical measures concerning them, based upon a small-pox diagnosis. This is not cited invidiously, nor did the mistake reflect upon the skill or attainments of the professor. It is sometimes simply impossible to make a positive diagnosis, especially in the initial stages; and yet patients may even then give rise to infection. So that it is an imperative duty, where doubt exists, to act on the positive assumption, and not on the negative, until the developments resolve the doubt.

Such a course is not always easy or pleasant to follow. Abuse, misrepresentation, imputation of unworthy motives, of professional ignorance or jealousy, not seldom result. Nor is it always necessary that the facts should square with the charges of the assailants, as is shown in the history of a case which was recently cited by a misinformed member of the General Assembly on the floor of the House. I refer to what is known as

"The Springfield Jail Case,"

a matter which has furnished occasion for much misrepresentation and abuse, but which I have hitherto refrained from noticing, since these annoyances were largely personal, and aimed at me individually. Its revival, however, in the shape of a weapon with which to attack the Board, calls for a plain statement of the facts.

One evening, sometime in July, 1880, I was informed by one of the prominent physicians of Springfield that there was a case of small-pox in the county jail, and was requested to accompany him

for the purpose of verifying the diagnosis. I at once assented, and together we proceeded to the jail. Before entering the building, however, we were informed that an old small-pox nurse had also seen the patient, had pronounced it small pox, had been engaged to take charge of the case, and that preparations had been made for the removal of the patient to the small-pox hospital. Entering the cell I proceeded to make an examination by the light of a lamp, it having then become quite dark. There was a profuse eruption upon the face and neck, but not markedly characteristic. I therefore proceeded to examine the chest, and, immediately upon exposing the thorax, remarked, "that looks typical"—referring to the eruption, which certainly was, in this region, sufficiently well-marked. From the officers of the jail it was learned that the man had been complaining some days, and for about forty-eight hours previous to the appearance of the eruption had had considerable fever and seemed to suffer intensely. The eruption was quite general, extending to the scrotum and even to the soles of the feet. For all sanitary purposes the evidence was quite enough to warrant the steps already taken for the immediate removal of such a suspicious case from a crowded jail sweltering in the midsummer heat.

My curiosity, however, was aroused as to the origin of the case. No small-pox was known to exist in the vicinity and the subject had been in confinement for several months. I, therefore, proceeded, in company with the physician above referred to, to the turnkey's room and questioned him on this point. There was also present, during this interview with the turnkey, another Springfield physician, and both of these gentlemen heard the conversation which followed. Failing to get any light upon the probable origin, I cautioned the turnkey that it would be necessary to keep a strict watch upon the patient. My own interest in this was, of course, purely professional. If it was a genuine case of variola—which, notwithstanding the obscurity of its origin, there seemed no reason to doubt—it was highly important the fellow should not be allowed to escape and spread the contagion. Such cases had occurred, under my own observation, in Chicago, and this knowledge made me solicitous that it should not occur in this case. To the turnkey, however, I stated that while the eruption certainly looked suspicious it would not do to be too confident; that prisoners sometimes used croton oil or tartar emetic for the purpose of producing an eruption which resembled that of small-pox, and under cover of the simulated disease managed to effect their escape. Such an argument, addressed to a jail officer, I thought better calculated to secure proper vigilance than one based on sanitary considerations only. With a final admonition as to the necessity of watchfulness, and approval of the steps taken to secure the protection of the other inmates, I left the jail, and the same night proceeded to Chicago in accordance with a previous arrangement. The next day the case was removed to the small-pox hospital in charge of the nurse, and the following night made good his escape while the nurse was asleep.

My connection with the matter began, continued and ended as above stated. I think it needs no defense or apology. Were the same conditions to again arise I should pursue the same course again. But the facts have been so distorted by those having a

purpose to subserve, and the conclusions thence derived are so grossly unjust and injurious, that it has seemed to me proper to take the occasion of their recent employment, for the purpose of adversely affecting legislation on public-health matters, to make this formal statement.

Glanders.

A few days prior to the last meeting of the BOARD the first information concerning what has since proven to be a wide-spread outbreak of glanders was received. As detailed in my report at that meeting, the State Veterinarian was specially commissioned under the authority of the BOARD, and after consultation with the Governor, to visit the infected localities and institute the necessary measures for the suppression of the disease. In each case he was furnished a letter of instruction, in which, after informing him of the infected locality, he was authorized, in the event that he found the report well founded, to aid the local health authorities,—town board or county commissioners, as the case might be—by giving all needed directions and advice concerning the destruction of animals actually suffering with the disease; the quarantine of those that had been exposed; and the disposition of infected property, such as buildings, harness, halters, stable utensils, fences, sheds, hitching posts, watering troughs, etc. He was also requested to furnish a detailed report of the state of affairs as found in each locality and a statement of his action. Up to the middle of June he had thus visited infected localities in Whiteside, Perry, Jackson, Piatt, Ford, Livingston and McLean counties, at a total expense to the BOARD of \$212.13, which amount will be a charge upon the contingent fund for the suppression of epidemic contagious diseases, this use of the fund having been promptly approved of by the Governor. So far as it is possible to judge at this date, the results of the work thus far done have been successful.

The text of Dr. Paaren's report on the Geneseo township (Whiteside county) outbreak is herewith submitted:

OFFICE OF STATE VETERINARIAN,
CHICAGO, ILL., April 17th, 1883.

JOHN H. RAUCH, M. D.,

Secretary Illinois State Board of Health.

DEAR SIR:—

In accordance with the request of the STATE BOARD OF HEALTH, dated April 11th, 1883, that I report to the Board of Health of Geneseo Township, Whiteside County, Illinois, I have the honor to lay before you the following statement, embodying the result of my visit to that place:—

On April 13th, together with Dr. Trumbower, veterinary surgeon, of Sterling, Illinois, I left for Coleta, distant about thirteen miles from Sterling. I there met in consultation two members of the Board of Health of the township, W. C. Hurless, esq., justice of the peace, and S. S. Cobb, esq., clerk of the township; the third member of the said Board being absent from Coleta. The infected farm of the late Wellington Conaway, distant about a mile and a half from Coleta, was visited the same afternoon. While all the dwellings and outhouses on the farms for miles around bear evidence of prosperity and good taste, the dwelling and outhouses of the Conaway farm, long before it was reached, were remarkable by a very conspicuous contrast to all the others. On one side of the public highway, and about seventy-five feet distant from the latter, stands a dwelling, two stories high, and covering a space of about 25x60 feet, the length of the building being parallel with the highway. The floor of the building is raised about two feet from the surrounding surface, and there is a cellar underneath, full of putrid and decaying animal and vegetable matter, skeletons of hogs, dogs, etc., evidently the accumulations of years. A strong, penetrating, indescribable odor pervaded the dingy and filthy rooms in the house, in spite of a very recent sham performance of disinfection with chloride of lime, which was said to have been sprinkled here and there, but perhaps only in the room that was occupied by the deceased

father and son during their brief illness. The adjacent rooms, and the rooms up stairs, were occupied by the widow and about half a dozen children of both sexes, varying from about six to over twenty years old. The dwelling is one of the old landmarks of the township, being upwards of forty years old, and it has evidently for many years back received no other repairs than such as were most necessary to ward off the worst of wind and wet, evidenced by rude and clumsy patching here and there, the weather-boards being disarranged and loose everywhere. Along the highways, on both sides, is what in former days was a picket fence, but now only partly represents such a structure, half of it being down and all of it rotten, and the posts and remaining railing bearing evidence of having been used for hitching horses, who, with their teeth, have rendered it still more unsightly and useless. Opposite the dwelling house, on the other side of the public highway, and close to the same, is the stable, a rudimentary structure of common boards, and about twenty-five by fifty feet, having, under an extension of the roof, on both sides, space for grain, etc. The stable has a sort of ceiling of loose rafters and boards, on which is placed a small quantity of hay and rubbish, and the shingled gable roof is about twenty-five feet high from the ground. There are five stalls with mangers, the construction of which is in keeping with the building. In the stalls were five horses of various ages, and in moderately fair condition, as to flesh; otherwise they were dirty and rough looking. One by one they were led outside for inspection, and were found to be suffering with glanders in various stages of development.

After returning to Coleta, in the evening, I advised the Town Board of Health to send a constable with a written notice to the widow of the late Wellington Conway, informing her that, under penalty of law, she was from that moment and until further orders, prohibited from removing any of the said five horses, as well as six other horses, kept elsewhere on the farm. On the morning of the following day, April 11th, together with the aforesaid two members of the Town Board of Health, and Dr. Trumbower, V. S., I visited a number of farms in the neighborhood around the Conway farm, for the purpose of inspecting all the horses, as they were feared to have been more or less in contact with the horses on the infected farms. I also inspected several horses owned by various parties in the town of Coleta. The horses on the Conway farm had been running at large for some time, and some of the neighboring farmers, while visiting Wellington Conway and his son George, during their sickness and attending their funerals, had been in the habit of hitching their horses to the fence above mentioned, and, consequently, reasonable fear was entertained as to their being tainted with the disease. The result of this inspection will be found stated below. Thereafter the Conway farm was revisited. On my recommendation, proper disinfection of the dwelling house was entrusted to George W. Remage, M. D., of Coleta, and this gentleman accompanied us to the farm. The widow was inclined to resist all of our proceedings. I quietly informed her that I was present on behalf of the STATE BOARD OF HEALTH, and that our mission was one of peace. I also stated that in order to accomplish proper disinfection of the premises, it was necessary that the family move away temporarily, and that the town supervisors would accommodate her and her family. A volley of abuse and invectives was the reply; and she was then told that she should move peaceably if possible, but forcibly, if necessary. After listening to the advice of William C. Hurless, justice of the peace and member of the Town Board of Health, who, during her husband's life, had been his counsellor and adviser, she relented and consented. When, thereafter, the stable was entered, the best one of the five horses was missing. It was suspected that the oldest son, about 20 years old, had taken away this horse; but the whole family pretended to know nothing about it. Being informed that a warrant for his arrest would be forthwith issued, the above mentioned son went quietly away, and, after an hour's absence, brought the horse panting and sweating as after a hurried run.

Five good, true and disinterested farmers and tax-payers had been selected in the morning. They were now sworn in by the justice of the peace, and proceeded to put a valuation on the following property, which I had advised to be destroyed, viz: Two horses and three mares, one of these in foal; the stable containing the horses; about eight hundred feet of fencing, railing, boards and pickets, being about four hundred feet along each side of the road, and also the fencing around the barn-yard; besides all the loose boards and planks lying around within forty feet of the barn. Also, a watering-trough, the halters, all the harness and bridles, curry-combs, pitchforks and shovels; besides the frame work of a hay wagon. Also (in the dwelling house) two feather beds and pillows, together with the bedstead. After being valued, the five horses were led away and shot, and the stable, together with the fencing, and all of the above mentioned things, upon which a valuation was put, will be burned as soon as the wind moderates. I also advised that all the hitching-posts and railings in the streets, and the same adjacent to the churches, and at the blacksmith shops in the village of Coleta, be removed forthwith and destroyed. On the evening of the 14th of April there was, consequently, great scarcity of places where to hitch a horse.

Horses Examined in the Vicinity of Coleta, Whiteside County, Ill., April 13th and 14th, 1883.

No. 1.—Black horse, owned by Martin Overholzer; manifested a slight injection of the nasal mucous membrane. History:—Had been driven to, and tied to the fence in front of the Conway House several times during the past two months. Was ordered to be kept under surveillance during sixty days; allowed to work on the farm, but not to be exposed in public places, nor to be sold or otherwise disposed of until further notice. No. 2.—Black horse, owned by the Rev. Mr. Bales, of Coleta; manifested a slight gray discharge from the right nostril and a trifling enlargement of the submaxillary lymphatics. Was ordered not to be tied to any public hitching-post, and if fed away from home, to be tied in a cow-shed. No. 3.—Gray horse, owned by Martin V. Overholzer. Has a tickling of the nasal mucous membrane, and slight enlargement of the left submaxillary lymphatic glands. Was ordered to be kept secluded during sixty days, and not to be sold or other-

wise disposed of. No. 4.—Gray horse, owned by Martin V. Overholzer; was received from the Conaway farm six or seven weeks ago. Was ordered to be kept secluded during sixty days, and not to be sold or otherwise disposed of. No. 5.—Old bay horse, owned by Joseph Bushman; manifested a slight enlargement of the left submaxillary lymphatics, and slight infiltration of the nasal mucous membrane. Same precautionary measures ordered as above stated. No. 6.—Brown gelding, owned by Joseph Bushman; had several small pimples on the inferior surface of the right ala of the nose. Same precautionary measures ordered as above stated. No. 7.—Bay gelding, two years old, owned by Joseph Bushman; manifested a slight enlargement of the submaxillary lymphatics, and had an aqueous discharge from both nostrils. Same precautionary measures ordered as above stated. No. 8.—Bay gelding, three years old, owned by Wm. J. Howe, kept at Joseph Bushman's farm; had slight enlargement of the right submaxillary lymphatics, slight tumefaction of the nasal membranes on both sides. Same precautionary measures ordered as above stated. No. 9.—Gray gelding, four years old, owned by Henry S. Bushman, kept at the same above-mentioned place. Had slight thickening of the nasal mucous membranes, swelling and tenderness of tendinous bursæ of the fetlock of the left fore-leg. Same precautionary measures ordered as above stated. No. 10.—Brown filly, one year old, owned by Joseph Dietz; manifested enlargement of the submaxillary lymphatics on the left side, somewhat adherent to the bone, and thickening of the mucous membrane of the ala of the nose on the corresponding side. Same precautionary measures ordered as above stated. No. 11.—Gray mare, owned by George W. Remage, M. D., of Coleta. Manifested infiltration of the nasal mucous membrane on both sides, together with a slight puckered roughness; granular aspect of the inferior surface of the ala of the nose; also, some characteristic enlargement of the lymphatic submaxillary glands on the left side. History:—Dr. Remage bought this gray mare, at three years of age, of Wellington Conaway, in the fall of 1881. Soon afterwards there appeared an enlargement of the submaxillary lymphatic glands, with subsequent suppurating abscess. After the abscess had healed she was apparently well. Exposing her to stormy and wet weather she caught cold and discharged very profusely from both nostrils. Mr. Conaway took her back for treatment, on or about the 1st of December, 1881, allowing her to run at large among his other horses. In the spring of 1882, she was extremely poor in flesh, but she was allowed to remain on the Conaway farm until the first week in November, when the owner took her home, and found her not entirely free from a nasal discharge. At the present date, April 14th, 1883, she is in fair flesh. Ordered secluded; not to be used by the doctor for any purpose whatever during sixty days, or longer, if necessary, and not to be sold or disposed of otherwise. No. 12.—Sorrel stallion, aged fourteen years, owned by the late Wellington Conaway. No. 13.—Bay mare, aged fourteen; same owner. No. 14.—Bay gelding, aged five years, same owner. No. 15.—Old bay horse, broken winded; same owner. No. 16.—Sorrel gelding, aged two years; same owner. No. 17.—Sorrel gelding, aged one year; same owner. History:—Nos. 12 to 17, inclusive, were continually exposed to the glandered and condemned horses, during the past eight months, or longer, by running at large on the owner's farm. While none of these six animals show any decided symptoms of glanders at present, they are, however, ordered to be kept secluded, under surveillance, and the widow of the late Wellington Conaway is ordered not to sell or otherwise dispose of them during sixty days, or longer, if found necessary.

*Clinical History of Four Cases of Glanders.**

Was requested, on May 31, 1882, by Mr. Joseph Detwiller, residing three miles east of Sterling, Whiteside county, Ill., to call and examine his horses. The following abstracts from case book will explain their condition, etc.:

No. 1.—Bay horse, nine years old, bought of Mr. Harding early in the spring; presented enlargement of the left submaxillary lymphatic glands, a viscid and purulent discharge from the nostril of the corresponding side. No. 2.—Bay horse, four years old; swelling along the course of the lymphatics; tumefaction and tenderness of the right side of the face and cheek, together with considerable enlargement of the submaxillary lymphatics. Does not eat well, and has considerable fever. No. 3.—Roan mare, seven years old; slight discharge from both nostrils; nodular small circumscribed tumors along the upper lip, on the right side of the nose. No enlargement of the submaxillary lymphatics. No. 4.—Gray gelding, twelve or fifteen years old; does not eat well; has several small circumscribed, nodular tumors on the upper lip, and on the side of the face. No enlargement of the submaxillary lymphatics.

Treatment:—Prescribed arsenical tonics and alteratives. On June 3d, found:

No. 1 had several small glanders nodules appearing on the nasal septum; losing flesh rapidly. No. 2 had swelling on the right side of the face increasing, and had several small, circumscribed tumors make their appearance. No. 3 had several of the nodular tumors becoming soft; opened one of them and cauterized the cavity. No. 4.—The tumors on the lip had formed abscesses, which were opened, and more abscesses were in process of formation; the submaxillary lymphatics on the left side now also were somewhat enlarged. The abscesses were cauterized.

Internal treatment continued, and prescribed nasal injection of a weak solution of chloride of zinc, to be used on horse No. 1, daily. On June 5th, all four cases about the same, except No. 1, which now manifested unmistakable symptoms of glanders. On June 10th No. 1 was ordered to be destroyed, together with his harness, halter, &c., and to be

*Furnished by Dr. M. R. TRUMBOWER, Veterinary Surgeon, Sterling, Ill.

buried; all of which was immediately carried out by the owner. No. 2.—The submaxillary lymphatic glands of the right side enlarged to the size of a hen's egg, very sensitive, no evidence of suppuration; small tumors on the right side had now undergone suppuration and ruptured; the latter were cauterized. Prescribed ungt. hydrarg. biniodid. to be applied to the enlarged submaxillary glands. No. 3.—Ulcers presenting a healthy granulation; very slight enlargement of the right submaxillary lymphatic glands. No. 4.—Ulcers doing well; glands about the same as on the 3d of June.

Visited again on the 14th, 19th and 27th, and found all gradually improving, except No. 2, which I considered so badly affected by true glanders that I did not want to treat him any longer. The owner requested me to take him to my own stable to treat him, but I refused to do so. Accompanied by Mr. Detwiler, I saw this horse again on the Conaway farm, on the 13th of March, 1881. Mr. Detwiler and myself urged Mr. Conaway to kill the horse, upon my statement that he was glandered, and that he could never recover from the disease. The nose, lips, and submaxillary space were enormously swollen; the nasal cavities studded over with ulcers, and, owing to the swelling, the horse was unable to eat. Mr. Conaway refused to kill him, stating that the swelling was all due to decaying teeth, and that he could yet effect a cure of the horse. At that same time, I also examined two other horses, then on the Conaway farm, and informed Mr. Conaway and his family that these two horses were infected with glanders, and that if Mr. Conaway would not kill them, he should at least keep them in a stable separate from his other horses. He laughed at me, saying "they only have a slight cold." One of these horses I condemned on the 2d of April, and he was shot on the 6th of the same month. The other horse was condemned by Dr. N. H. Pauren on the 13th, and was shot on the 14th of April. The Detwiler horse was shot on the 30th of March, by order of the physicians who attended to Mr. Wellington Conaway, who meanwhile had become diseased with glanders himself.

*Clinical History of Fatal Cases of Contagious Glanders (Equinia Glandulosa) in the Human Subject.**

On Sunday, March 11, I was called to see George Conaway, aged 17 years and 23 days, son of Wellington Conaway, a farmer, living about a mile and a half from Coleta, Genesee township, Whiteside county, Ill. He had considerable fever, complained of headache, and there was a diffused tumefaction on the forehead over the right frontal sinus. His symptoms resembled those of catarrhal fever, and an epidemic of that kind was at that time prevailing in this part of the country.

On March 12 the symptoms were aggravated; the swelling of the frontal region had increased. The parents believed that the disease was erysipelas; but discoloration, etc., as in that disease, were wanting. There was no discharge from the nose.

On March 13 the case passed into the hands of Robert McPherson, M. D., who informed me that the swelling of the forehead had increased and extended to the nose, cheeks and lips. The eyelids were also much swollen, and were closed. The glands of the left side of the neck were much swollen.

I saw the boy again on Tuesday, March 20, and found pustules, bullae and tubercles on various parts of the body and limbs. Gangrene had also set in on the face, cheeks and forehead, which parts seemed completely infiltrated with pus. The tubercles and pustules had in some places begun to break down and discharge; and a profuse purulent discharge came from the nose. There was also an excessive perspiration of an offensive odor present. Respiration was labored; the voice was lost; the action of the heart was rapidly falling. From the beginning the patient preferred to rest in a prone position, and was very restless from pain in the head. About the 20th of March he preferred a supine position. He seemed to have his full senses, but from the beginning, and until the case became very much aggravated, he could speak only in a whisper. About March 20 coma ensued, and this became gradually more profound, until he passed away on the next day. He was buried on March 22.

On March 23 the father, Wellington Conaway, aged 45 years, was taken ill. In fact, the day before, at the burial of his son, he complained of being unwell. Robert McPherson, M. D., who was called in, diagnosed pleurisy, and treated the case as such until March 30.

On March 29 I had an interview with Dr. Taylor, and apprised him of my suspicion that this case was one of glanders; my belief being based on the fact that several running sores had appeared on the body and limbs of the patient. I saw the case on the 30th, in company with Dr. Segur, a partner of Dr. Taylor. On the 29th a hard, diffused, swelling had appeared over the left eyebrow. The tubercles and pustules which had appeared on the body and limbs varied in size, some of them being as large as filberts. They were breaking down here and there, and the discharge was purulent, bloody and ichorous on the 30th.

On Sunday, April 1st, Drs. Taylor, McPherson, Freas and Ramage met in consultation, and all agreed that the case was one of glanders. On this day the swelling on the forehead had much increased, and an aqueous fluid was sweating out from it. His mind was now wandering, with occasional lucid intervals; the voice was husky, and the fever had assumed a low typhoid type. He complained of no pain, and said he felt quite comfortable. Up to this time there had been no nasal discharge; the eyelids were not infiltrated and his eyes stared wide open.

On April 2d, in the afternoon, dissolution was evidently rapidly approaching; there was now present a copious discharge from the nose of a characteristic purulent, tenacious and sticky or gluey nature. Coma had appeared and was increasing. The excrements

*Furnished by GEO. W. REMAGE, M. D., of Coleta, Ill.

were passed involuntarily, and there now was, as in the case of the son, an excessive perspiration, of a very offensive odor; in fact, the most horrible stench prevailed the room occupied by the patient, who died on April 2.

It is believed that, by attending in a very careless manner upon his son, the father contracted the disease from him.

Official Statement.

Entered in the Book of Records of the Town Board of Health, Genesee Township, Whiteside County, Illinois.

COLETA, WHITESIDE COUNTY, ILL., April 14, 1883.

The undersigned, N. H. Paaren, M. D., State Veterinarian, representing the STATE BOARD OF HEALTH, by virtue of a special appointment, dated Springfield, Ill., April 11, 1883, by the said BOARD, has this day, after a careful survey and inspection, conducted during the 13th and 14th of the present month, advised the sanitary measures hereinafter stated, to be carried out by the Town Board of Health of Genesee Township, Whiteside County, Illinois, viz:

1st. That the Town Board of Health cause the dwelling-house occupied by the Conaway family, in the township and county aforesaid, to be immediately vacated, and a thorough cleansing and disinfection instituted and carried out under the supervision of a physician.

2d. That five of the horses, owned and kept by the Conaway family, be immediately appraised, destroyed and buried deeply in the ground, distant forty rods from the public highway.

3rd. That the whole of the stables in which the said five horses were kept, together with the harness, halters and stable utensils, be appraised and burned.

4th. That all of the fencing, together with the fence-posts, for a distance of 400 feet along each side of the public highway, also the fencing around the barn-yard, and all the loose boards and railing, and the watering-trough, be appraised and burned.

5th. That all the hitching-posts and railing on both sides of the streets of the village of Coleta, as well as the hitching-posts and railing adjacent to the churches of said village, be removed forthwith and destroyed.

6th. That six horses remaining on the Conaway farm, besides eight horses owned by neighboring farmers, and three horses owned by three different parties in the village of Coleta, be kept secluded within enclosures, during sixty days, or longer, if found necessary, from date; that the owners be prohibited from selling or otherwise disposing of the same during such period; and that they be examined every tenth day by Dr. M. R. Trumbower, veterinary surgeon, of Sterling, Ill. This for the reason that these animals have been, more or less, exposed to contagion.

All of the above measures have been recommended because of the existence of glanders among the horses owned by the late Wellington Conaway, who, together with his son, George Conaway, died from glanders or true *equinia*.

N. H. PAAREN, M. D.,
State Veterinarian.

In conclusion, I may further state that, while glanders and farcy may hereafter develop in some of the animals, now kept secluded and under surveillance, in Genesee Township, and thus continue to be a source of contamination to both man and beast, this township is not the only one in which the said disease at present exists. Immediately outside the limits of the township are said to be fourteen horses, kept by one owner, and which are said to be all very similarly affected, and may possibly prove to be another center of contagion. Whether these animals have contracted the disease from contact with glandered horses in this township, or elsewhere in this county, I am not prepared to state; but during my brief sojourn at Sterling my attention was called to a horse, which I examined and found affected with glanders.

I am in frequent receipt of letters and telegrams from various parts of the State referring to the existence of glanders among horses; and the following two letters, just received, would seem to indicate the existence of a formidable scourge in that locality; viz:

DUQUOIN, ILL., April 18, 1883.

SIR:—There is a disease among horses in this county, creating quite an alarm among the people. Some judges pronounce it glanders.

Will you please come down and look after the matter? Come to DuQuoin, and you will be taken out from there. Please let me know by return mail what you will do, and when you will come.

Yours truly,

A. J. BROWN.

Two others have been received from the same locality, and also a telegram. The following letter has just been received from the Governor's office in Springfield, together with a communication from the private secretary of the Governor, saying that "if you can do so, the Governor thinks you had better go at once to Perry county." But what is the use of my going? I have no authority whatever to do anything there, because our present laws have no reference to horses. If it be glanders, raging at that rate, it may not be long before the loss of more human lives will be reported.

DUQUOIN, ILL., April 18, 1883.

GOVERNOR HAMILTON, *Springfield, Ill.*

DEAR SIR:—There is now on Paradise Prairie, in this county, a disease among horses creating quite an alarm among the people. The disease is quite contagious, and should be looked after at once. Parties have written and telegraphed Paaren, Veterinarian, and can't hear from him. This matter is of great importance, and should be investigated and stopped at once.

Can't you have the Veterinarian come here at once and look into the matter. The people are very much alarmed, and if the matter is not investigated at once it will spread with disastrous results. It is already spreading. Please send Paaren here at once.

Yours truly,

R. W. S. WHEATLEY.

No doubt can exist of the necessity for prompt legislative action in regard to contagious diseases among domestic animals; and it would almost seem proper that the medical authorities of this State take the matter in hand *without delay*, to make it possible to accomplish anything through the present session of our Legislature. Trade and traffic of such diseased animals should be peremptorily prohibited, as by this source, together with the use of such animals on public highways and by-ways, and in the towns and cities of the State, the disease is now continually spreading. When a man becomes convinced that his horses are affected with this loathsome and positively incurable disease, he will endeavor to recover as much as possible of their value, by trading and selling the same to unsuspecting and ignorant parties, who will bring them to other places, where perhaps no such disease is known. Thus there exists in this State, one of the most malignant and contagious diseases known, and with that a constant source of menace and danger to human life.

Hoping that the proceedings as stated in my present report will meet with the approval of the STATE BOARD OF HEALTH, I remain,

Your obedient servant,

N. H. PAAREN, M. D.,

State Veterinarian

As a direct outcome of these investigations and of the efforts made under the authority of the BOARD, the so-called "Pleuro-Pneumonia Act" has been so amended by the General Assembly, just adjourned, as to make its provisions apply also to glanders.

It may also be mentioned that a death occurred in St. Louis last month from this malady—the victim being a street-car driver said to have lately gone thither from some place in this State.

Contagion among Food-producing Animals.

In this connection it may not be out of place to submit the following correspondence to the BOARD:

CONSULAT DE FRANCE, CHICAGO, 76 MONROE ST., May 18, 1883.

DEAR SIR:

I would like to know what powers the STATE BOARD OF HEALTH is invested with by the State laws, or what measures are provided for by the statutes in order to check the spread of contagious diseases among the animals, and also what steps you have to adopt in order to protect the great agricultural interests should a disease of that kind be spreading at one point, either inside or outside of this State. What are your rights in regard to the roads and markets, public or private, like the market of the Union Stock-Yard Company, of Chicago. How many agents you have to dispose of, and how they enforce the State laws, and what is their salary.

I should also be very much interested in learning what money is provided for the expenses incurred in such a case, and whether animals and barns are cared for, disinfected or destroyed at the cost of the owner or the State.

All printed regulations, circulars or advice you would be able to forward me would very much oblige me.

Thanking you in advance for the kind assistance you would favor me with, I have the honor to be, dear sir, your obedient servant,

EDMOND BRUWAERT, *French Consul.*

JOHN H. RAUCH, M. D., *Secretary of the State Board of Health.*

VERA

These inquiries seemed to me obviously for the purpose of securing information to be laid before the French Government as the basis for legislation concerning the importation of American food animals and their products; and in the present hostile attitude of such legislation by some of the Continental powers, it seemed worth while to make the reply as comprehensive and exact as the time at my command would permit. I think I have shown in the following reply that the interests both of the producer and purchaser are well protected under the present system:

ILLINOIS STATE BOARD OF HEALTH,
OFFICE OF THE SECRETARY, SPRINGFIELD, May 30, 1883.

MY DEAR SIR:

I beg to acknowledge the receipt of your communication of the 13th inst., asking certain questions concerning the STATE BOARD OF HEALTH, and the measures provided by law to check the spread of contagious diseases among animals; and regret that the pressure upon my time has been so great as to delay reply until now.

Your inquiries involve, as I understand them, the general question of the conservancy of food-producing animals from contagious or infectious diseases, with specific reference—

First, to the power and authority of the STATE BOARD OF HEALTH in the matter of quarantine, both of exclusion and of isolation; in the sanitary control of roads, markets, stock-yards, etc.; and in the direction of agencies for the enforcement of the laws on these subjects.

Second, with reference to the protection of the agricultural interests from the effects of the introduction of contagion or infection among animals from without, or its spread within, the State.

The second section of the Act of May 25, 1877, creating the STATE BOARD, and from which section the BOARD derives its powers, reads as follows:

SEC. 2. The STATE BOARD OF HEALTH shall have the general supervision of the interests of the health and life of the citizens of the State. They shall have charge of all matters pertaining to quarantine; and shall have authority to make such rules and regulations, and such sanitary investigations, as they may from time to time deem necessary for the preservation or improvement of public health; and it shall be the duty of all police officers, sheriffs, constables and all other officers and employes of the State, to enforce such rules and regulations, so far as the efficiency and success of the BOARD may depend upon their official co-operation. (See page 102 of enclosure, marked "A.")

This section is held to clothe the STATE BOARD with ample authority in all matters affecting the public health; to entrust it with the fullest control of quarantine; to empower it to conduct sanitary investigations, and to make rules and regulations based thereon; and to place at its disposal "all police officers, sheriffs, constables, and all other officers and employes of the State, to enforce such rules and regulations."

It will be seen from this that the existence of any contagious disease among food-producing animals would make it competent for the STATE BOARD, in its discretion, to investigate the facts—as to cause, extent, etc.—and to make the rules and regulations necessary for its suppression.

Such measures may involve condemnation and slaughter of diseased animals; the isolation of the suspected or compromised; the disinfection, or—where disinfection may be insufficient—the destruction, of infected buildings and articles; and all other action necessary to eradicate the contagion. If requisite, quarantines of exclusion may be declared for the protection of threatened localities. Losses and expenses incurred in carrying out these measures are a charge upon the township or county in which the contagion exists.

The agencies actually employed in the enforcement of such measures are, usually, the local health authorities—municipal and village boards of health, township officers or county commissioners, as the case may be, although the language of the Act places all police officers, sheriffs, etc., at the disposal of the Board for this purpose.

ASIDE from the public health or sanitary aspect of the question, the protection of the agricultural interest from the introduction or spread of contagious disease among animals, is also the subject of special legislation.

Section 258 of the first division of the Criminal Code (Chap. 38, Revised Statutes of Illinois, 1880,) provides that any person who shall knowingly and wilfully bring, or cause to be brought, into this State any sheep or other domestic animal infected with contagious disease, or who shall knowingly and wilfully suffer or permit sheep or other domestic animals infected with contagious disease to run at large, shall be fined in any sum not exceeding \$100, and shall be liable in a civil action for all damages occasioned thereby.

An Act of the 32d General Assembly, approved May 31, 1881, creates the office of State Veterinarian, whose duty it is to investigate any and all cases of contagious or infectious diseases among domestic animals of the bovine species in this State. It provides for the quarantine and slaughter of animals in case of an epidemic—Sec. 2; for the appraisement of slaughtered animals—Sec. 3; for the prohibition of the importation of cattle from infected localities—Sec. 4; for penalties for neglecting to report contagious diseases—Sec. 5; for official reports by the State Veterinarian—Sec. 6; for payment of claims for slaughtered animals—Sec. 7; for the compensation of the State Veterinarian and for appraisers' and physicians' fees—Sec. 8; and appropriates \$8,000 as a contingent fund for the purposes of the Act. From the prominence given to pleuro-pneumonia (*pleuro-pneumonie contagieuse de la bete bovine*) in the text of the Act, this is generally known as the "Pleuro-Pneumonia Act," but as you will see from the copy which I have requested the State Veterinarian to send you, all contagious or infectious diseases among animals of the bovine species come within its purview.

Recent outbreaks of glanders in several portions of the State have led to the introduction in both houses of the present General Assembly of a bill amending this latter Act so as to include horses,

mules and asses within its scope. As there is every prospect of this bill being enacted into a law, I send you a copy of it, marked enclosure "B."

In addition to these two, which are still in force, the ravages of that form of anthrax known as the Texas, or Spanish, or splenic fever, led to the passage, in 1867, of an act to prevent the introduction of Texas or Cherokee cattle into Illinois. This, being found imperfect, was amended in 1869, but, after the constitutionality of the amended act had been twice affirmed in the State courts (*Yeazel v. Alexander*, 58 Ill. 254, and *Stevens v. Brown*, 58 Ill. 259,) the United States Supreme Court held that a similar law of Missouri was repugnant to the Federal Constitution, and overruled the Illinois decisions (*Railroad Co. v. Husen*, 5 Otto, 465). The Act was thereupon declared to be unconstitutional by the Illinois Supreme Court in the case of *Salzenstein v. Marvis*, 11 Chicago Legal News, 357, and has since been a dead letter.

A good illustration of the practical working of the STATE BOARD OF HEALTH Act is afforded in recent action had upon the outbreaks just alluded to. The preliminaries upon which the interference of the BOARD was based are detailed upon pages 9 and 10 of the accompanying copy of the report of the quarterly meeting of the BOARD, April 12 and 14, 1883, enclosure marked "C."

It should be borne in mind that the State Veterinarian had no authority to act under the law, which confines him to animals of the bovine species; nor was the public health threatened by an infected food supply. The disease, however, being one capable of affecting the human family—having, in fact, caused two deaths in one locality, the STATE BOARD OF HEALTH, by virtue of authority vested in it by the second section of the Act of 1877, already cited, had ample warrant; and Dr. Paaren was at once dispatched to the infected region. Subsequently, a similar course was pursued in five other counties of the State. A copy of Dr. Paaren's instructions, marked "D," is enclosed. The same general course was pursued in all these cases, namely: An investigation to determine the character and extent of the disease; the appraisal, condemnation and slaughter of all diseased animals; the isolation of those which had been exposed; the disinfection or destruction of all infected property; and an interdict upon the sale, removal or other disposition—except by destruction—of all horses, mules or asses owned by those compromised.

Such of the expenses incurred as are not legitimately a charge upon individuals, townships or counties, are defrayed out of the contingent fund appropriated by each General Assembly for the use of the STATE BOARD in preventing the spread of epidemic, contagious or infectious diseases.

In conclusion, it should be observed that while the STATE BOARD OF HEALTH is vested with the power and authority already described, in practice its functions are largely those of a co-ordinating, directing and advisory body. Upon emergency it may, and does, assume entire control, and may formulate and enforce whatever measures it deems necessary for the preservation of the public health, as for example, in its dealings with yellow fever during the epidemics of

1878-79, and with small-pox during the past two years. What it then did with reference to those diseases it would be entirely competent for it to do with reference to cattle plague, or rinderpest, or Texas fever, should the emergency arise, as is shown by its action in the glanders outbreaks.

In the majority of instances, however, the local health authorities, supported by the power and authority of the STATE BOARD, are able to deal with the questions and conditions which ordinarily arise, without appealing to the BOARD to assume control.

A marked instance of the practical efficiency of a local health authority is afforded by the history of the Texas fever in 1838. At that time I was Sanitary Superintendent of the city of Chicago, with supervision and authority, for sanitary purposes, of an area of five miles beyond the city limits. The first fatal case of the fever was reported at the Union Stock Yards on the 25th of July; another death occurred on the 29th, and on August 1 other cases were detected. By this time the health officer was investigating the outbreak at the Stock Yards; one of the most efficient of my sanitary Inspectors, with his policeman, had been placed in charge of the threatened area within the city limits, and I was visiting the Stock Yards daily and the slaughter-houses twice a day. A quarantine of exclusion was rigidly enforced against all cattle from infected districts, whether native or Texan; and, in order to protect other points, the removal of animals, concerning whose condition there was any doubt, was strictly prohibited. A thorough system of inspection was instituted, employing a force of twenty-one individuals, under whose surveillance all markets, shambles, etc., were placed, and in a few days the entire beef supply of the city and the cattle trade were under the complete control of the Chicago Board of Health; the spread of the disease was arrested; confidence was speedily restored, and I have never heard of a case of the disease being caused by cattle shipped from the Stock Yards after the system of inspection was inaugurated.

Regretting that I am unable at this time to devote more attention to the subject of your inquiry, but trusting that the foregoing may suffice for your present purpose, I am, my dear sir,

Very truly yours,

JOHN H. RAUCH, M. D., *Secretary.*

EDMOND BRUWAERT, Esq., *French Consul Chicago, Ill.*

American Medical Association.

I have deemed it my duty, in view of the amount of attention the subject of ethics has of late been receiving, to also attend the meeting of the American Medical Association, which was held at Cleveland, June 5-8. The phase of the subject which naturally interested me most was in its relations to State Medicine. The chairman of this section, Foster Pratt, M. D., of Michigan, paid a very gratifying tribute to the BOARD, in his general address before the Association; and Dr. H. A. Johnson, of Chicago, read a paper on the Practical Work of the BOARD and the Results of the Medical-Practice Act.

At the conclusion of the reading of Dr. Johnson's paper, two members of the section inquired how I could be a member of a Board

having a homeopath and an eclectic among its members, and at the same time retain my membership in the Association under the code. A spirited discussion of the question ensued, the propounders of the query not only holding that it was wholly inconsistent with the code of ethics of the American Medical Association, and that no one claiming allegiance to it could engage in licensing homeopaths and eclectics to practice without forfeiting its privileges, but implying that the tendency of the work of a Board so composed was injurious professionally.

Drs. Johnson and Ingalls, of Illinois, Hopkins and Bell, of New York, Foster Pratt, of Michigan, Millard, of Minnesota, and other members of the section strenuously opposed these views, and cited the admitted results of the BOARD's labors as a sufficient refutation of the implied strictures. The chairman of the section, Dr. Pratt, finally disposed of the technical question by referring to the formal action of the Association when the same point was sought to be made against himself. Some years ago, in the preparation of a bill similar to the Illinois Medical-Practice Act, he had met in a convention of representatives of the different schools in Michigan, including homeopaths and eclectics. For this he had been arraigned on a charge of violation of the code. The Association then held that the code of ethics could not be violated by any action of a member which was necessary to the discharge of an official duty under the law, and that the fact of membership on a representative Board did not come within the purview of the code of the Association governing the professional relations of medical practitioners.

Immediately following the adjournment of the Association, the Erie County (New York) Medical Society held its semi-annual meeting, at which the report of a special committee on medical legislation was adopted. This report, after quoting largely from the paper read by Dr. Johnson, goes on to say:

An enthusiastic speaker, at the recent meeting of the American Medical Association, said that this BOARD had done more to elevate the standard of medical education and efficiency in its short term of six years than the Association had accomplished during the last quarter of a century. * * * * *

Your committee deems this statement not unworthy the attention of this Society, not alone for the remarkable results accomplished by the ILLINOIS BOARD, but more particularly for the new and important principle involved in the formation of this and similar boards. It is plainly to be seen that a board, to do the work done by that of Illinois, must be endowed by law with full powers, and that no sectarian body is at all likely to receive such endowment. Such a body must represent what the people of the State consider to be the medical profession.

The resolutions submitted by the committee and adopted by the Society recite—

First—That it is the belief of this Society that the present method of training and licensing physicians does not command the entire confidence of the profession or of the people.

Second—That the system of licensing physicians by a State Board of Examiners representing the legally authorized medical profession, as seen in operation during the past six years in the State of Illinois, is a decided improvement upon that now pursued in this State.

Third—That this Society hereby endorses the principle seen in the formation of mixed boards of examiners, that is, boards giving in one body *pro rata* representation to all the different schools of legally authorized physicians, and believes that it is through the agency of such boards that the standard of medical education may be most efficiently advanced, the profession most advantageously controlled and its ranks recruited by the admission only of persons worthy of its high responsibilities.

Fourth—That this society hereby pledges its best ability and endeavor to the cause of securing to the people of this State the services of such a board of examiners.

The Overflow.

It is not at all improbable that the general health of the region affected by the recent crevasses along the Mississippi bank of the American Bottom will suffer to such an extent as to call for some action by the Board.

At one point near Venice, an area of some hundreds of acres, bounded by the National Stock-Yards, and by the embankment of the Chicago and Alton railroad, is submerged to a depth of six or eight feet; and the water is so impounded by dams, embankments and other artificial obstructions that there is no possibility of its flowing off along natural drainage lines as the river falls. Its removal either by pumping or through openings in the levee presents such serious economic difficulties that it is now proposed to await the slow process of evaporation. This may be attended with danger to the public health, and such a contingency should be avoided if possible. It may be feasible to syphon this water over the levee as the river falls, and then the exercise of a little sanitary care as the ground is exposed should suffice to prevent any deleterious effects.

I shall keep informed of the conditions here and elsewhere in Madison, St. Clair, Monroe and Randolph counties; and, in the event that it becomes necessary to do so, I now ask for authority to take such steps on behalf of the Board in the interest of the public health as the occasion may demand.

In this connection, I think it advisable to call the attention of all sanitary authorities in the State to the necessity of special effort in the direction of domestic and municipal sanitation during the summer months. The unusual meteorological conditions which have thus far prevailed during the year, and the compensating conditions which may reasonably be expected to follow—coupled with recent developments in the progress of certain epidemic diseases elsewhere—render it of the first importance that all the adjustable conditions affecting the public health receive prompt and thorough attention.

River and Rail Inspections in the Lower Valley.

At the meeting of the Sanitary Council of the Mississippi Valley, held in Jackson, Miss., in April last, and to which reference was made in my last quarterly report, the following resolutions were adopted:

Resolved. That in case the National Board of Health is deprived of the power of making inspections of persons and freight when demanded by the local Boards of Health, certificates issued under the supervision of a representative or representatives of the Sanitary Council of the Mississippi Valley shall be accepted as valid by the Boards of Health of the Mississippi Valley, provided that said inspections be carried on under the rules and regulations heretofore prescribed by the National Board of Health.

Resolved, That the Sanitary Council recommends that the States of the Valley make voluntary contributions, to be expended under the direction of the Executive Committee of this Council, to continue river and rail inspections in the event that no funds are placed in the hands of the National Board of Health for that purpose.

The Executive Committee consists of Dr. Wirt Johnston of Jackson, Miss., Secretary of the Mississippi State Board of Health, President of the Council; the Hon. David P. Hadden, President of the Legislative Council of Memphis, Vice-President, and myself, Secretary of the Council.

Having received notice from the Secretary of the National Board Health that that body would be unable to continue inspections after June 30th, a meeting of the Executive Committee was held at Memphis on the 21st of June, at which the following proceedings were had:

At a meeting of the Executive Committee of the Sanitary Council of the Mississippi Valley, held in Memphis this 21st day of June, 1883, the following members were in attendance: Dr. Wirt Johnston, of Miss., President; David P. Hadden, of Memphis, Vice-President; Dr. John H. Rauch, of Ill., Secretary. Dr. G. B. Thornton, President of the Memphis Board of Health, and member of the Tennessee State Board, was also present by invitation. After thoroughly canvassing the situation, which up to this date was considered altogether encouraging, the following preamble and resolutions were adopted:

WHEREAS, The Inspection Service now conducted by the National Board of Health in the Mississippi Valley will cease on the 30th of June, on account of want of funds for its further maintenance; and

WHEREAS, The commercial welfare, no less than the health interests, of the Valley demands that these precautions be continued during the summer months; Therefore, be it

Resolved, That the supervision of this Service, from and after June 30, be assumed by the Sanitary Council of the Mississippi Valley, in accordance with the action of the Council had at its fifth annual meeting, in the city of Jackson, Miss., April 3 and 4, 1883.

Resolved, That the inspection station now maintained by the National Board of Health, below Memphis, be continued at the expense of the Taxing District Government of Memphis.

Resolved, That the Mississippi State Board of Health should establish and maintain an inspection station on the Mississippi river at some point between Vicksburg and the Louisiana State line.

Resolved, That the present corps of inspectors of the National Board of Health, on duty at the Mississippi river quarantine station below New Orleans, and on the river and railroads at New Orleans, be continued, under direction of the Executive Committee, from and after June 30.

Resolved, That the rules and regulations of the National Board of Health, for the conduct of this Inspection Service, be, and the same are hereby, adopted for its further continuance, under the direction of the Sanitary Council.

Resolved, That the supervision of this Service, on behalf of the Executive Committee, be assigned to the Secretary of the Council, Dr. John H. Rauch, Springfield, Ill., to whom all reports of inspectors and communications pertaining to the Service should be addressed.

It was further agreed that on and after July 1 only the certificates given by the Inspectors of the Sanitary Council of the Mississippi Valley would be recognized by the Inspection Stations along the river, and by the health authorities of the towns and cities in those States which are members of the Council.

It is expected that the other States which are members of the Council will contribute to the support of these inspections, as per agreement.

THE meeting adjourned subject to the call of the Secretary, and I proceeded to New Orleans for the purpose of personally arranging the details of the Service at that important point. Everything is now in readiness to assume control of the inspections on the 1st of July without interruption, and to continue them up to the 1st of October, or longer, if necessary.

Should circumstances arise to necessitate such measures, Mississippi will place inspectors on duty at or near the Louisiana State line on the north and south railroad lines, and Tennessee will do

the same at Chattanooga, Corinth, Grand Junction, and, possibly, Grenada, or some other point on the Mississippi and Tennessee railroad. Of course, this will not be done unless the health conditions of the Gulf coast and Lower Mississippi are such as to make it necessary.

Our obvious interest in all this work is the protection of the southern extremity of the State from a repetition of the experience of 1873 and 1878, as well as the avoidance of commercial interruption which constantly threatens during the yellow-fever season. During the past three years this has been successfully done by the National Board of Health, following out and extending the system inaugurated by this Board and the Sanitary Council, during the summer of 1879. It is greatly to be regretted that the National Board has been prevented from continuing the work for which it alone, among all the sanitary agencies thus far created in this country, has been adequately prepared. The responsibilities are too great, and the interests too diverse and often conflicting, to entrust to State and local boards, or to volunteer organizations like the Sanitary Council; and myself and colleagues on the Executive Committee of the Council assume the duties and responsibilities as an unavoidable obligation which we would gladly be relieved from in future.

All of which is respectfully submitted.

JOHN H. RAUCH, Secretary.

On motion of Dr. Haskell, the report of the Secretary, which had been discussed, section by section, as read, was received, the recommendations and actions contained therein were approved, and the report was ordered to be printed in the report of the proceedings of the meeting.

THE BOARD then went into executive session, at the close of which it was announced that the certificate of Dr. T. M. Eddy had been ordered to be revoked.

Drs. Haskell, Ludlam and Clark were appointed a committee to draft an appropriate expression of the sentiments of the Board to the retiring member, John M. Gregory, LL.D., to be presented at the next meeting.

The auditing committee reported that it had examined and audited accounts amounting to \$2,202.57, had found the same to be correct, and recommend that they be paid.

On motion of Dr. Haskell, the Secretary was given discretionary authority to act for the BOARD in any case of emergency which may arise in the interims between the regular meetings.

On motion of Dr. McKenzie, the BOARD adjourned.

THIRD QUARTERLY MEETING, CHICAGO, OCTOBER 18-19, 1883.

THE third regular quarterly meeting, 1883, of the ILLINOIS STATE BOARD OF HEALTH was held at the Grand Pacific Hotel, in the city of Chicago, on Thursday and Friday, October 18-19, 1883.

Present, at morning session, on Thursday: Newton Bateman, President; John McLean, A. L. Clark, W. A. Haskell, W. R. McKenzie, and the Secretary, John H. Rauch.

The minutes of the June quarterly meeting were read and approved. Upon the call for reports from officers, under the regular order of business, the Secretary presented the following:

QUARTERLY REPORT OF THE SECRETARY.

Since the date of the last meeting and up to the middle of the present month—June 29 to October 15—there have been received in the Secretary's office 1232 communications, letters, reports, etc., exclusive of 60 diplomas submitted for verification and the papers accompanying the applications for certificates in 116 cases; and 1 49 letters, postals, circulars, and other written communications, were sent out. This increase in the office correspondence is largely incidental to the work on the section on Medical Education and the Regulation of the Practice of Medicine, which has been substantially completed during the quarter. Of the publications of the Board there have been distributed 676 copies of Annual Reports and Official Registers; 443 sets of advance sheets "Medical Education" etc., and 8,647 copies of Preventable-Disease Circulars, Quarterly Reports, Inspection-Service Reports, and miscellaneous publications. Three hundred and seventy-six packages were sent by express, and the remainder by mail. Eighty-four telegrams were received, and 126 sent—a large number of these, however, being under the frank of the Western Union, furnished for the use of the Inspection Service in the Mississippi Valley, of which the Secretary has had the personal supervision since July 1.

Certificates and Licenses.

Certificates, entitling to practice medicine and surgery under the Medical-Practice Act, were issued to 94 graduates upon presentation of diplomas from colleges in good standing; and 7 to practitioners upon length of practice in the State. To midwives, 6 certificates were issued upon the credentials of recognized schools of

midwifery; 2, upon length of practice in the State; and 7, upon examination. Total number of certificates issued during the quarter, 116; 101 to physicians and 15 to midwives.

Twenty-three applications for certificates have been refused—among them two from “cancer doctors;” three from individuals, concerning whom it was learned that they proposed practicing in an irregular manner; and the remainder either from persons whose antecedents were professionally unsatisfactory, or who presented diplomas from institutions not recognized by the BOARD as in good standing. I have also declined to assume the responsibility of issuing a certificate under the following circumstances:

A. B. attended one winter course of lectures, which began in September, 1882, and lasted 24 weeks. At the close of this course he attended one term at a summer school of medicine, beginning February 10, 1883, and continuing twenty weeks. At the conclusion of these forty-four continuous weeks of lectures, all within the same twelve months, he was graduated from the latter school. These facts coming to my knowledge I have declined to take action, and deem it proper to submit the case with all the papers, for the decision of the BOARD, merely remarking that I think there are some mitigating circumstances.

Preliminary Examination.

A number of letters concerning the requirement of the BOARD as to the preliminary education of medical students, or illustrating a certain phase of this subject, have been received since the last meeting. Among them is this from a student in attendance at one of the leading colleges in a neighboring State. The writer understands that the “state Medical board of Illinois prohibits any one “from practicing medicine in the state unless they hold a Diploma “from some recognised school of medicine that requires a preliminary examination before comencing the study of medicine.”

[Verbatim copy of second page.]

I would like to find out
whether I will be
prevented from practicing
in the state of Illinois
I commenced the study of
medicine three years ago
in the ——— College before
that act was passed and
intend graduating in
the Spring. And have
previously made arrangements
to locate in your state.
you will confer a great
favor by informing
me at once, you will
find enclosed Stamp
yours with respect.

In another letter, whose writer appends the initials “M. D.” to his name, and who says he has practiced “ten years under the Supervision” of his “perceptor and attended to full courses of Instructions one time at the ——— ——— Collage one at the ——— Colag of ———,” occur the following evidences of his fitness to pursue the study of medicine: giv, statment, localitey, Liv, hav,

Supervshen, peresepter, to (for *two*.) ful, corses, turme, collage, colag, helth, certificat, aBov, wood (for *would*), Receved, mee, apear, conciderabel, Disadvantag, fair (for *far*), leav, practis, complye, requiarmments, Whair, countey, resid, becaus, sum (for *some*), afair, Bee, pleas, ancer.

Still another, from a graduate, with the usual dislocation of capital letters, plural nominatives with singular verbs and vice versa, etc., has professor, recognised (3 times), cirtificate (3 times), Diaploma (this magic word is usually capitalized), thes (twice), sergeons, (twice), apperes, there (for *their*), knot (for *not*), etc., etc.

In another case the writer wishes to come into Illinois from a neighboring State, where he has been practicing for twenty years or more. He refers the BOARD to "those that is acquainted" with him and his "practtice," and trust that it will be found "consistant" with the views of the BOARD to grant him a certificate. One of his references writes that the applicant has practiced with him and under his instruction, "when he needed it," during the past three or four years, and that he believes him well qualified to "practis Medicene further more if he is permitted to practis by your authority he will Locate in pope County and I expect to assist him," etc. "In Conclusion I will say if you can consistantly give him a certificate you will grant a Grate faviour to a worthy man." Seven other M. D.'s—"the Under Sign physicians of——, being personly and Proffesionly acquainted," etc., also vouch for his skill and ability "to practis Medicine in its Verrious branches," and commend him to the kind attention of the BOARD.

Upon a sheet of the official letter paper of a college in another State, a student writes as follows:

DEAR SIR:—I take the oppertunity of forming acquaintnce
By writing to you for a little instruction I am
tending the——Medical School & will Posibly
Graduate & I have an Uncle in——County Ills
and I want to know about, regeristering a
Diploma from this school——
—— since I am here they
speak of this school not beeing Reconised
In my State Ills if so let me here how it
is by return mail Please its good in this State
& several States that I know but I want to
know if it good in my State a Diapl- ma
I will Close by saying Please just tell me
how I will have to do to get to register
It home in —— county Ills
Write Back to me while I am here
if you will write it will re leave me a
great deal sure
address

J. N. ——

—— in care of M. D.

On the back of this letter sheet is a lengthy advertisement of the college, which opens with these sentences:

"The unbounded success of the * annual session of the * * places beyond all doubt its future success as a medical college. The improvements that have been made in the college building and the additions made to the lecture room appurtenances, have aided much in making this session a success. But the principal element of success has been the earnestness and fitness of the faculty, and the fine body of students who make up the class."

[The originals of these letters were presented to the BOARD, for the personal inspection of the members.]

To these illustrations of the mental equipment of a certain class of medical students and practitioners, I append, as the only comment, an extract from the report of the committee of this BOARD, appointed June 25, 1880, and the second and third of the Conditions of Admission to Lecture Courses, from the Schedule of Requirements adopted by the BOARD as the standard entitling to recognition (as the legal qualification for practice in Illinois,) any diploma issued after the session of 1882-83:

The failure to make adequate preparation before entering upon professional studies is doubtless one of the most serious and even fatal defects in American medical education. As students usually begin their studies with private preceptors, the remedy lies first with those who consent to act as such preceptors. Let them strenuously advise all candidates to make a liberal and thorough scholastic preparation, and the reform would be well begun. But the failure of private preceptors to perform this obvious duty cannot exonerate medical colleges from the responsibilities which, by implication, they voluntarily assume. The committee is glad to report that so many of the leading medical colleges have announced preliminary examinations as conditions of admission, as to justify including such examinations in the requirements or marks of "good standing."

After a careful comparison of the usages of the colleges, and of the opinion of the profession, the committee offers the following scheme of requirements, and recommends its formal adoption as defining the colleges whose diplomas shall be hereafter accepted by the BOARD:

**MINIMUM REQUIREMENTS FOR A MEDICAL COLLEGE TO BE HELD IN "GOOD STANDING"
AFTER THE SESSION OF 1882-83.**

I. CONDITIONS OF ADMISSION TO LECTURE COURSES.

* * * * *

2. Diploma of graduation from a good literary and scientific college, or high school, or lacking this,

3. A thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy.

The Medical-Practice Act.

Among the prosecutions and other action under the Medical-Practice Act, during the quarter, have been the following:

Lighthall.—In my last report I alluded briefly to the quack, James I. Lighthall, of Peoria, variously advertised by himself as "Kansas Jim," "Rastie Jack," "The Indian Medicine Man," etc. In the early part of July he visited Decatur, Macon county, with a concert troupe, an Indian out-fit and other clap-trap devices, and for a time drove a thriving business, pulling teeth and selling "cure-all" remedies, the secret of whose preparation he claimed to have obtained from the Indians. Among his attendants was Dr. W. O. Davis, of Peoria, to whom the STATE BOARD OF HEALTH granted a certificate last April, and under cover of which certificate Lighthall was trying to shield himself from the law.

Upon complaint of some of the medical men of Decatur, and proof of Davis' conduct being laid before the members of the BOARD, his certificate was revoked, July 20. Lighthall was arrested for violating the Medical-Practice Act, but was taken before a justice of the peace and so escaped for the time being. Upon his release he announced his intention of transferring his operations to Springfield, and opening up "right under the nose of the STATE BOARD OF HEALTH." By advice of the Secretary complaint and information were filed before the county judge of Macon county, by

whom Lighthall was committed for trial under bond of \$500. Immediately after filing his bond he again opened his "medicine tent," etc., but learning that another complaint had been entered against him, involving the deposit of another \$500, and that it was the intention to file a complaint for every repetition of his swindling practices, he packed up his traps and left town.

Loose.—Through the efforts of Dr. J. C. McCormick, of Bunker Hill, Macoupin county, another Indian quack has been compelled to leave Illinois. One "Dr." Loose, claiming to have obtained his medical skill and knowledge from the "Winnebago, Chippewa, Menominee and Ojibway tribes of Indians of the far North," was arrested, September 5th, on the complaint of Dr. McCormick, for practicing in violation of the Medical-Practice Act.

The prosecution showed the man to be totally devoid of any medical knowledge or skill, and an arrant humbug and imposter, fleecing the credulous by his claims of unusual powers acquired from savages. Loose was held in the penal sum of \$150 for his appearance at Carlinville, but has since left the State.

Keck.—Following on Lighthall's heels, Mrs. Dr. Keck, of Davenport, Iowa, Peoria and elsewhere, made her appearance in Decatur. The sentiment of the community and the action of the medical men in that town, practically "boycotted" her, so that it was impossible to find a patient for whom she had prescribed, to be used as a witness in the necessary legal process. After a pretense of fulfilling her advertised stay, she left without having done any business that could be discovered.

Nobis.—The "Naturarzt" Nobis, to whom reference was made in my last report as having been refused a certificate, began operations soon thereafter, in the neighborhood of Barry, Pike county. His methods were similar to those of all quacks—seeking out chronic cases of incurable diseases, professing unusual skill and claiming the possession of secret remedies. Among other things he boasted of his ability to cure epilepsy in a marvelously short time with one of the nauseous preparations of the Middle Ages, and of which various indescribable portions of birds, reptiles, etc., are the principal components. Before it was possible to secure his arrest he became alarmed and left Pike county, ostensibly for Iowa.

Flowers.—Another of the numerous victims of the notorious quack and swindler, H. D. Flowers, of Fulton City, Whiteside county, has been heard from through the following affidavit, transmitted to the BOARD:

STATE OF ILLINOIS,
CARROLL COUNTY, } ss.

Henry Fox, of Thomson, Carroll county, being duly sworn, upon his oath deposes and says that on or about the 20th day of November, 1882, an agent representing Dr. H. D. Flowers, of Fulton, Whiteside county, came to my place looking for patients for said Flowers, and guaranteeing a "cure or no pay." A few days thereafter Dr. Flowers himself arrived, and warranted to cure myself, wife and daughter for the sum of sixty dollars. He left a lot of medicine for us to use, and promised to call every week or two to see how we were getting along. After getting my note for the amount, he cleared out, and has not been seen here since, now about nine months. As for his medicine, it was entirely worthless, and did neither myself or family any good; my wife thinks it did her harm. I denounce the said Dr. H. D. Flowers as a full-fledged swindler.

HENRY FOX.

Subscribed and sworn to before me this 20th day of August, 1883.

WESLEY DIAL, J. P.

Other correspondence from Lombard, DuPage county, Roberts, Ford county, Fulton and elsewhere, has also been received. Among this is a letter from a townsman and old acquaintance of Flowers, in which is given the formula for Flowers' panacea. It consists of an infusion of mandrake, gentian, colomba, quassia, bone-set and wormwood, with a little alcohol and sugar. The writer says he has seen Flowers "do up a two-bushel basket full of these herbs and roots at one time, and boast that the result would net him two thousand dollars worth of notes. Every one gets the same medicine, no matter what the ailment is. Flowers' chief concern is to get a note from his victim for as much money as possible; to sell this for what he can get, and then to keep out of the way."

Advertising Specialties.

The attention of the BOARD has been called, during the quarter, to the advertisements of various persons setting forth their special "isms." In nine cases the individuals, when addressed concerning the unprofessional and misleading character of these advertisements, desisted from the practice.

Prosecutions under the Act.

In connection with the prosecutions by State's Attorneys, for violations of the Medical-Practice Act, I have addressed the following communication to the Attorney General:

ILLINOIS STATE BOARD OF HEALTH,
OFFICE OF THE SECRETARY, SPRINGFIELD, Oct. 1, 1888.

SIR—It being deemed necessary to put in the complaint, hereto attached, the allegations therein underlined, and it being necessary to make the same allegations in the indictment or information, I have the honor to request that you state whether it is or is not necessary that the people should prove, beyond a reasonable doubt:

1. That the accused did not have an unrevoked certificate from this BOARD of the genuineness of his diploma or license.
2. That the accused did not have an unrevoked certificate from this BOARD, authorizing him to practice in the State of Illinois.
3. That the accused did not have a commission as a surgeon of the United States army or navy.
4. If it is necessary the people should prove any or all of these allegations, is it necessary to produce the records for that purpose? If not necessary, how can the allegations be proved otherwise?
5. Is there any statute of the State of Illinois which makes a certificate of the STATE BOARD OF HEALTH, under the seal of the BOARD, to the effect that a given individual is not authorized to practice by said BOARD, evidence in any court?
6. Is the STATE BOARD OF HEALTH such a public office as that certificates of its records, duly authenticated by the seal of the BOARD, can be used as evidence?

7. Is the STATE BOARD OF HEALTH vested with discretionary power to determine what constitutes a legally chartered medical institution in good standing?

Very respectfully,

JOHN H. RAUCH, M. D., *Secretary.*

The Hon. JAMES MCCARTNEY, Attorney General, State of Illinois.

The form of complaint and information alluded to is that prepared by Attorney General Edsall, heretofore published by the BOARD. Attorney General McCartney's reply is as follows:

STATE OF ILLINOIS, ATTORNEY GENERAL'S OFFICE,
SPRINGFIELD, ILLINOIS, October 13, 1883.

DR. JOHN H. RAUCH, *Secretary STATE BOARD OF HEALTH:*

DEAR SIR—I have the honor to acknowledge receipt of your communication of the 1st inst., in which you request me to state whether it is not necessary, in prosecutions for a violation of the law of 1877 regulating the practice of medicine in the State of Illinois, that the people should prove beyond a reasonable doubt—

1. That the accused did not have an unrevoked certificate from this BOARD of the genuineness of his diploma or license.

2. That the accused did not have an unrevoked certificate from this BOARD authorizing him to practice in the State of Illinois.

3. That the accused did not have a commission as a surgeon of the United States army or navy.

4. If it is necessary the people should prove any or all of these allegations, is it necessary to produce the records for that purpose? If not necessary, how can the allegations be proved otherwise?

5. Is there any law or statute of the State of Illinois which makes a certificate of the STATE BOARD OF HEALTH, under the seal of the BOARD, to the effect that a given individual is not authorized to practice by said BOARD, evidence in any court?

6. Is the STATE BOARD OF HEALTH such a public office as that certificates of its records, duly authenticated by the seal of the BOARD, can be used as evidence?

These questions are very comprehensive and involve the indictment, trial, conviction and sentence, almost, in a suit for violation of the statute regulating the practice of medicine. All the questions can, however, be answered by fixing the status of the law regulating the practice of medicine under which these prosecutions must be had.

Foundation of the Law.

This law can only be maintained under the theory that it is a proper exercise of the police power of the State—that power existing primarily in all governments—the power to pass all laws deemed necessary to protect the health, morals, lives, limbs, comfort and quiet of all persons, and the protection of all property within the State. Unless coming under this broad power this law would be an unwarrantable interference with private rights.

Conditions of the Law.

Coming then, under the police power of the State, and being maintained upon the theory that the law is enacted for the preservation of the public health from the experiments of quacks and unqualified persons, it must be construed as an absolute prohibition against the practice of medicine in this State, except under the conditions specified in the act. These conditions are, that the person practicing—if he practices under a diploma from a medical college—shall have a certificate from the BOARD OF HEALTH of the State that his diploma is genuine; or, if he is not practicing under a diploma, that he has been examined and found qualified by the STATE BOARD OF HEALTH; or that he is a commissioned surgeon of the United States army or navy; or that he had been practicing medicine ten years in the State of Illinois prior to the first day of July, 1877; or that he was a student prescribing under the supervision of preceptors; or was performing gratuitous services in a case of emergency. These are the conditions, and these alone, under which a person may "profess publicly to be a physician and to prescribe for the sick, or to append to his name the letters of M. D."

Burden of Proof upon the Defendant.

When the question is raised in any case, and it has been proven that a person has been practicing medicine, it devolves upon him to show that he had a right to practice under one of the conditions specified in the act. If he has the certificate required by the act, he can produce it in his defence; if he is a commissioned surgeon in the United States army or navy, he can produce his commission; if he practiced medicine ten years prior to

July, 1877, he can readily prove that fact; or, if he was a student prescribing under a preceptor, or performing gratuitous services in cases of emergency, he can readily produce this evidence in his defense.

There are several reasons why the burden of proving these conditions is cast upon the defendant, when once it is shown beyond a reasonable doubt that the accused has practiced medicine within the jurisdiction of the court. One is, that the best evidence must always be produced, and the best evidence in these cases must necessarily be in the possession of the defendant. If he is practicing under a certificate, the certificate is the best evidence of that fact, and it is in the possession of the defendant; if he is a commissioned surgeon of the United States army or navy, his commission is the best evidence of that fact, and the commission is in his possession; if he has practiced medicine ten years in this State prior to July 1, 1877, he alone knows by whom he can prove that fact; if he prescribed as a student under the supervision of a preceptor, or performed gratuitous services in a case of emergency, it is the accused only who knows the facts and by whom they can be proven.

The People Not Required to Prove a Negative.

Again: It is very rarely required that any party should be compelled to prove a negative. If the whole burden of proof in these cases was on the People, they would be required to prove that the defendant had *not* a certificate; that he was *not* a commissioned surgeon in the United States army or navy; that he had *not* practiced medicine ten years in this State prior to July 1, 1877; that he was *not* a student prescribing under the supervision of preceptors; and that he was *not* performing gratuitous services in a case of emergency. In each of these cases, it will be seen, the State would be required to prove a negative.

Another rule governing the admission of evidence is, that where the subject-matter of a negative averment lies peculiarly within the knowledge of the other party, the averment is taken as true, unless disproved by that party. Thus, if it should be charged in an indictment or complaint that A. B., on etc., etc., etc., practiced medicine without then and there possessing the qualifications prescribed in the certain act of the General Assembly of the State of Illinois, entitled "An act to regulate the practice of medicine in the State of Illinois," approved May 29, 1877, and without then and there having complied with the provisions of that act, and under this charge the prosecution should prove beyond a reasonable doubt that the defendant A. B. did, within eighteen months prior to the finding of the indictment, prescribe for the sick while publicly professing to be a physician, or that he did append to his name the letters "M. D.," a conviction must necessarily follow, unless he should produce his certificate of the STATE BOARD OF HEALTH, his commission as surgeon in the United States army or navy, or prove himself to have so acted under one of the other conditions prescribed in the statute.

Full authority for this conclusion will be found in 1st Greenleaf on Evidence, Sec. 72, and in the decisions of the courts hereinafter cited, in which the license to practice a profession or to transact other classes of business is classed in the same general category with prosecutions for selling liquor, in which cases it devolves upon the person accused to show that he has the authority to sell, or to do the act charged.

In support of the conclusions herein reached, and for the use of courts in which suits may arise involving the above questions, I refer to the following authorities:

State v. Gazlay, 5 Ohio, 14; Mobile v. Yulile, 3 Ala., 137; Cousins v. State, 50 Ala., 113; Goldthwaite v. Montgomery, Id., 186; McKaskell v. State, 31 Ala., 510; Simmons v. State, 12 Mo., 268; Cohen v. Wright, 22 Cal., 322; Ex parte Yale, 24 Cal., 241; Ex parte Spinnery, 10 Nev., 323; Louisiana v. King, 21 La. Ann., 201; Porter & Co. v. State, 53 Ala., 46; Languille v. State, 4 Tex. App., 312; Antle v. State, 6 Tex. App., 202; State v. Goldman, 44 Texas, 101; State v. Hayne, 4 S. C., 403; Wheat v. State, 6 Mo., 455; Schmidt v. State, 14 Mo., 137; State v. Hale, 15 Mo., 697; State v. Richeson et al., 45 Mo., 555; Ford v. Simmons, 13 La. Ann., 397; Shelton v. Clark, 1 Johns., 513; Timmerman v. Morrison, 11 Johns., 399; Kane v. Johnson, 9 Bosw. (N. Y.), 151; Great Western R. R. Co. v. Bacon, 34 Ill., 317; Gunnarssohn v. Sterling, 92 Ill., 569.

From an examination of these authorities, it appears beyond controversy that the authority exists in the Legislature to require that a license shall be obtained to practice any profession, or follow any pursuit in which dealings are had with the general public; and that any conditions the Legislature choose to attach to the obtaining of the license or the pursuit of the business of a general character, are legal, and if a charge be made that any person is pursuing the business or profession required by the law to be licensed or pursued under certain conditions, it devolves upon the person charged to prove that he is licensed, or is pursuing the business under one of the conditions named in the law.

Evidence of Want of Authority to Practice.

In answer to certain other specific questions submitted, I would say that there is no statute of the State which makes a certificate of the STATE BOARD OF HEALTH under the seal of the Board evidence that a given individual is *not* authorized to practice medicine.

The only certificate authorized by the statute to be issued by the Board is a certificate that the person's diploma is genuine, and from a legally-chartered medical institution in good standing, or that he has been examined and found qualified to practice medicine.

The STATE BOARD OF HEALTH is such a public office as that certificates of its records, duly authenticated by the seal of the Board, could be used as evidence, if the Legislature had provided that any record should be kept by said Board. But it not having so provided, a copy purporting to be a copy of its records would not be evidence, no matter how authenticated. Hence the certificates issued by the Board under the law are the only evidences of authority from the Board.

The law does not specify *how* a certificate may be revoked, but simply authorizes the revocation for unprofessional or dishonorable conduct. In such cases the ordinary method would be deemed the proper one, viz: that the BOARD should pass a resolution revoking the certificate—a copy of which resolution, under the seal of the BOARD, should be served upon the person holding the certificate, and another certified copy, with proof of service, would be evidence of the revocation in any court.

The STATE BOARD to Determine the "Good Standing" of Colleges.

To your final query—to-wit: Is the STATE BOARD OF HEALTH vested with discretionary power to determine what constitutes a "legally-chartered medical institution in good standing." I reply that it is a universal rule of construction of statutes that the whole law must be construed and taken together. It is, therefore, not proper to take any single section, clause or sentence, and construe that alone; but all the statute should be construed and read as one act.

The first section of the law regulating the practice of medicine in the State of Illinois, passed May 29, 1877, declares that every person practicing medicine in this State shall possess one of the qualifications required by the act. If he is a graduate in medicine, he shall present his diploma to the STATE BOARD OF HEALTH, who shall certify to its genuineness; and this certificate shall be conclusive evidence of the right of the holder to practice medicine in this State. This section vests the BOARD OF HEALTH with no discretionary power, except to determine whether the diploma is genuine or not; and if genuine, and presented by the proper person, it is conclusive.

But Sec. 3, of the same act, defining more in detail the duties of the STATE BOARD OF HEALTH when such a BOARD shall be established, declares that the BOARD shall issue certificates to "all who shall furnish satisfactory proof of having received diplomas or licenses from *legally-chartered medical institutions in good standing*," etc. By this section the BOARD are not compelled to issue certificates, unless a diploma or license is presented to them, and it must also be from a "legally-chartered medical institution," and such institution must be also one "in good standing."

The STATE BOARD is Judge of the Facts.

Necessarily, the BOARD OF HEALTH must determine both of these facts primarily. They can not issue the certificate unless the diploma is from a "legally-chartered medical institution," nor unless this is one "in good standing." The BOARD OF HEALTH must necessarily be the judges of both of these facts in the first instance, and this section must be read and construed in connection with the first section, so that both shall stand if possible. It is also a rule of construction that, if it be possible, all parts of a law must be reconciled, so that no sentence or parts of a sentence shall be rendered null or of no force. This can be easily done in this case by reading in the first section the further conditions placed in the third, as follows: "That every person practicing medicine, in any of its departments, shall possess the qualifications required by this act. If a graduate in medicine he shall present his diploma, *from a legally-chartered medical institution in good standing*, to the STATE BOARD OF HEALTH," etc. This reading would not conflict with anything already in the first section, and would be simply a reading authorized by the whole act, and in accord with its spirit throughout.

I have no doubt that the STATE BOARD OF HEALTH, when a diploma is presented to them for certification, have a right under this law to determine whether the diploma is issued by a "legally-chartered medical institution" or not; and also a right to determine whether it is from one "in good standing" or not; and if it lacks either of these qualifications, I believe it to be the duty of the BOARD to refuse the certificate. This accords also with the spirit and purpose of the act, which, as before said, is intended to protect the health and lives of the public against unqualified persons, which could not effectively be done if diplomas from colleges that did not pretend to give a complete medical education were alone sufficient authority to practice. If this were permitted, the law could be made entirely valueless as a protection.

Very truly yours,

JAMES MCCARTNEY, Attorney-General.

Office Correspondence.

As was to be expected, the action of the BOARD on the subject of Medical Education has given rise to many letters of inquiry, suggestion and comment. A large number of applications for information concerning the status of colleges, both in Illinois and elsewhere, have been received and answered; as well as concerning the professional status of individuals. Those concerning colleges are mainly from students, inquiring as to the value of the diplomas of specified colleges as bases for certificates entitling their possessors to practice in this State. Such inquiries have been answered, generally, by furnishing the student with a copy of the Schedule of our Minimum Requirements, and recommending him to make, for himself, a comparison of this with the curriculum of study and qualifications required by the college in question.

In addition to the letters from students, the colleges themselves have asked for information on various matters, the most important being those concerning—

The right of a college to grant diplomas, after only one course of lectures, to men holding certificates of State Boards of Health based on years of practice prior to the passage of the Medical-Practice Acts.

The right of colleges to grant diplomas after only one course of lectures, to men who present evidence of a certain number of years' practice.

Some of these letters I have deemed it advisable to present to the BOARD, for its formal action during the present session, although I think the principles involved are already clearly defined. The following communication, however, I have already acted upon, to a certain extent, in a personal interview with the writer:

DEAR DOCTOR:—I desire your decision upon a point which has arisen in regard to the admission of students to our senior class who have attended one course at the ————. I do this because it is a question that might at some time come before your BOARD. These are the facts: The ———— has a three-term course—we have two. Their junior class includes anatomy, chemistry, physiology, materia medica, histology, surgical anatomy, etc. Their second term includes, with these, pathological anatomy and principles and practice of medicine and clinics; surgery and obstetrics are reserved for the last course, etc.

Some of the young men who attended the junior course in that institution last winter are desirous of attending the ————. They exhibit to me a matriculation sheet in which they are credited with having attended only the lectures set forth in the curriculum for juniors. But they state they attended all the lectures except those on obstetrics and surgery, and that they attended a portion of these. It seems that they have the benefit of lectures upon these two branches for but one term anyway at that school. They would get that at the ————.

The question is: Can we admit them to the ———— as medical students, and permit them to come forward for graduation next spring, subject to examination as others? I learn that other colleges admit these same juniors. Shall we exclude them?

We do not wish to take any unfair advantage of the ———— school, nor do we wish to place ourselves "out of line" so far as the regulations of your BOARD are concerned. I have, therefore, determined to submit the matter to you and shall await your reply before taking further action. * * *

I met Dr. ———— personally, during the early part of this month, and discussed the question with him. Fully convinced of his good faith, I suggested that—in view of the fact that students who had attended only one term of a three-years' graded course had not received the equivalent of a single term in a two-course college (that is, in the number of branches taught)—the only practical way to meet the difficulty, which occurred to me, would be by having an examination of the candidate in the branches that he had not attended the full number of lectures upon; and base his admission to the graduating class, other conditions being satisfactory, upon the result of such examination.

Such a plan, I admit, is open to objection. It must rest, very largely, upon the good faith and character of the college, and it should be so guarded as to prevent injury to the three-years' schools. I have now in my possession the names of three men who were graduated, at the last commencement of a two-years' school, after attendance upon only one term of a three-years' graded course and the graduating course of the two-years' school. No examination was held in these cases, but the tickets of the one term at the three-years' college were accepted in lieu of evidence of attendance upon a full course, without question. I have also infor-

mation from good authority, that these gentlemen had not, at the date of graduation, completed the usual three-years' course of study required even by the two-lecture-term school. The granting of diplomas under such circumstances must be held to seriously invalidate the claims of the college to be held in good standing.

Should these gentlemen apply for certificates, I must decline to assume the responsibility of issuing them until the BOARD has determined whether a diploma granted in direct violation of the published conditions of the college itself, as well as of the general usages and requirements of colleges in good standing, is or is not "fraudulent," or is or is not "lawfully possessed," within the meaning and intent of the fourth section of the Medical-Practice Act. If the BOARD decide adversely, then the only way in which these gentlemen may legally practice medicine in Illinois will be by passing the examination of the BOARD, or by presenting diplomas granted after completing the usual curriculum and period of study and otherwise complying with the conditions of graduation exacted by medical institutions in good standing. If such laches upon the part of the college may not be taken cognizance of, the question still remains whether the case of the individual does not come within the scope of the tenth section of the Act.

Concerning the professional status of individuals, inquiries have been received from Missouri, Kentucky, West Virginia, Mississippi, Texas and California, as well as many from various parts of the State. One correspondent writes of the graduation of a man by an Ohio college after only one year's study. This graduate is not practicing in Illinois, and the information is furnished the BOARD as throwing light upon the methods of the college, with reference to the recognition of its diplomas in this State.

I have also been applied to for an official statement as to the status, before this BOARD, of a reputable regular college, for use in a foreign country.

Various sanitary matters, both in Illinois and in other States, have occasioned considerable correspondence; among these being the appearance of the Texas cattle fever at a number of points, the latest being at Sedalia, Mo.

Chicago Medico-Historical Society.

The following letter explains itself:

CHICAGO, SEPT. 1st., 1883.

DEAR DOCTOR: At a special meeting of the Chicago Medico-Historical Society, held June 28th, 1883, the following resolution was adopted:

Resolved, That any member knowing any "doctor" or "doctors" practicing in Chicago not mentioned in the Report of the STATE BOARD OF HEALTH, report the names of such "doctor" or "doctors" to the Secretary before the special meeting of the C. M. H. Society, to be held Tuesday evening, Oct. 9th, 1883.

This resolution was adopted in order that this Society should act with the STATE BOARD OF HEALTH in its legal efforts against quackery.

PLYM. S. HAYES, Secretary.

I replied in substance, to Dr. Hayes' letter transmitting this, that I fully appreciated, on behalf of the BOARD, this, the first systematic, effort to co-operate in our attempt to suppress quackery in Chicago.

Other State Boards.

The Missouri State Board of Health has been organized since our last meeting, and during the month of July its Secretary, Dr. J. C. Hearne, spent a day in the Secretary's office for consultation, as well as for the purpose of familiarizing himself with the office methods, forms, blanks and other details. Full sets of the publications of the BOARD, copies of blanks, registers, etc., have been furnished, and whatever information seemed likely to be useful. I attended the first regular meeting of the Missouri Board, August 1, by invitation, as the representative of this BOARD. At this meeting the Missouri Board passed a resolution recognizing the efforts of the ILLINOIS BOARD, and pledging the fullest co-operation. Secretary Hearne was also instructed to invite my attendance at their subsequent meetings. I accordingly met with them again on the 30th of September, and on the 2nd and 3rd of October, and advised with them in the disposition of sundry questions which had arisen in the interims between their meetings. They have formally endorsed, and promulgated as their own standard, our schedule of minimum requirements necessary to entitle a college to be held in good standing.

The similarity of the laws under which the two Boards operate, and the community of objects in view, render the work already done by this BOARD of much value to the Missouri Board, as establishing precedents and formulating the principles upon which to base decisions in the many difficult and delicate questions which continually present themselves. For this reason, and also because the work of our own BOARD, in its efforts to improve the status of the profession, and to elevate the standard of medical education, is facilitated by harmony of action and views on the part of similar organizations, I have felt warranted in devoting more time to these first meetings of the Missouri Board than I should otherwise.

For the purpose of relieving medical men in good standing of the trouble of obtaining certificates from both Boards, where their practice extends into both States, and as a matter of comity between the two Boards, I would suggest that action be taken by this BOARD looking to the recognition of the certificates of the Missouri Board, where these are based upon examination, or upon the diplomas of colleges in good standing.

DURING the session of the American Association for the Advancement of Science, held in Minneapolis, in August, I also met with the Minnesota State Board of Medical Examiners, and with members of the State Board of Health of Minnesota. The Minnesota Medical-Practice Act is very similar to that of Illinois, and this informal meeting was had for purposes of consultation with the view of securing the desired concert of action. The Board of Examiners have the right to examine non-graduate candidates for certificates entitling to practice, and are authorized to pronounce upon the good standing of medical colleges, in the same manner and to the same extent as is this BOARD. They have, therefore, agreed to adopt the Illinois schedule of minimum requirements as their standard.

From the character of the Board, and the fact that the only teaching institution in the State—the Minnesota College Hospital—will not examine its own candidates for graduation, but will refer them to that Board for examination, and will grant degrees only in accordance with the decision of the Board, I think the medical future of Minnesota promises well.

In this connection I would suggest that for the purpose of making the medical-practice acts and legislation of the different States more efficient and their administration more uniform, this BOARD call a conference of those charged with the execution of these laws, or vested with authority, duty or responsibility under them. Delegates to such conference to be appointed by the State Boards of Health or of Medical Examiners, where such Boards exist, and elsewhere by the State Executives from among representative medical men.

The Public Health.

The State has continued gratifyingly free from any epidemic disease of a serious nature. Scarlet fever, of a mild type, has prevailed in many localities, but with an unusually low death rate. In response to many requests, an edition of the Preventable-Disease Circular, No. 3, on Scarlet Fever, is being prepared in the German language, and will be ready for distribution in a few days. Diphtheria has been reported from a number of places, and many applications have been received for the pamphlet concerning its prevention. Small-pox cases have occurred at Chester, Randolph county, Aviston, Clinton county, and near Oakland, in Coles county. In Chester there were two cases in August, resulting from a St. Louis convalescent who removed to Chester about three weeks before the first case appeared. Neither had been vaccinated but both recovered. Reporter: Dr. W. R. McKenzie, Chester, attending physician. At Aviston, the disease was imported from St. Louis by a German visiting his brother-in-law in the former place. He had been living in a block in St. Louis which was infected with small-pox when he left the city, and had had a "breaking out on his face and body before leaving, but only a few pimples." This man infected his brother æt. 45, vaccinated in Germany in childhood, not revaccinated until after exposure,—mild case of varioloid; and his nephew, æt. 13, no evidence of vaccination—typical case of unmodified small-pox, confluent on face; both recovered. Precautionary measures of the Board were enforced, and there was no spread of the disease. Total cost of the outbreak, \$662. Reporter: A. de Buhrman, M. D., attending physician. About the latter part of August a man returned from a visit to Cincinnati to his home near Oakland, Coles county. September 10, he was found to be suffering with varioloid. His wife and two children, all unvaccinated, contracted the disease, the wife and one child dying. All known to have been exposed were at once vaccinated, but two of the attendants had mild attacks of varioloid. No other cases have occurred. Reporters: W. M. Chambers, M. D., Charleston, consulting physician; W. J. Peak, M. D., Oakland, attending physician.

During July there was a severe outbreak of dysentery in the town of Watseka, Iroquois county. Dr. D. C. Jewett, in response to a letter from the Secretary, reported, August 14, that there had been about one hundred cases, with twenty deaths, thirteen of which were due to dysentery, alone, and the remainder to some fatal complication. The disease, however, at that time was already upon the decline, the alarm and apprehension subsiding, and, "with the rigid sanitary discipline which is now enforced throughout the corporation, we anticipate no further trouble." (Extract from Dr. Jewett's letter).

Dr. Jewett ascribes this outbreak to the result of the inundations from the Iroquois river and Sugar creek, at the confluence of which the town of Watseka lies. Last spring the high water from these two streams submerged fully one-half of the town, washing out the contents of privy vaults, cess-pools, etc., and polluting the wells. The exhalations from the wet earth under the summer sun, the poisoned water supply and malarial influence fully account for the outbreak. The occurrence is another illustration of the evils liable to result from the subterranean storage of fecal filth.

Yellow fever has been entirely excluded from the Mississippi valley during the past summer, for the first time for many years. To what extent this is due to the non-intercourse quarantine of Louisiana, to the river and rail inspection service, to the exclusion of infected vessels from the Mississippi river, to improved methods of sanitation; and to what extent to favorable meteorological and other non-adjustable conditions, it would be difficult to say. Doubtless all had some influence in the result. As among the measures in which the BOARD is most directly interested, the following details are submitted concerning the

River and Rail Inspection Service.

In accordance with the statement made in the report to the June meeting of the BOARD, supervision of this Service was assumed by the executive committee of the Sanitary Council of the Mississippi valley, on July 1, in pursuance of the action of the Council at its Jackson meeting. I found it necessary to visit New Orleans, in the discharge of my duties as executive officer of the Council in charge of this Service, in July (5th—10th) and August (8th—13th). The maintenance of the Service by the National Board of Health ceased June 30, for want of funds, but the Service was continued uninterruptly, until all danger had passed. The Sanitary Council maintained one inspector at the Mississippi river quarantine station below New Orleans, and two rail and two river inspectors in the city and port of New Orleans; the expenses being defrayed by contributions from the railroad, steamboat, and commercial interests through a committee of New Orleans merchants, except in the case of the railroads who paid their inspectors direct. No officer or member of the Sanitary Council received any compensation for his services in connection with this work.

In addition to the inspectors above enumerated, Mississippi maintained a station at Ft. Adams, and Memphis one on President's

Island. The Service was operated at all these points according to the rules and regulations of the National Board of Health, and no change was made by the Council after assuming supervision.

From May 15th, the beginning of the quarantine season, up to the close of July, there had arrived at the Mississippi river quarantine station below New Orleans, seventy-three vessels from foreign ports. Of these, forty-seven were inspected up to June 30, under the supervision of the National Board of Health, and during July the remaining twenty-six were inspected under the supervision of the Sanitary Council. Of these latter, eleven were from ports infected by yellow-fever at the date of departure, and three of them namely: the *Berna*, July 8; the *Merchant*, July 16; and the *Buteshire*, July 17, arrived with cases of yellow fever on board.

Among the remaining vessels one was found to have had yellow fever on board in Havana last season, and in seven other cases it was probable that they had been infected at some previous time. The sanitary condition of the vessel, cargo, crew and passengers in twelve cases was good, and in the remaining vessels—with the exception of the *Berna*, *Merchant* and *Buteshire*, which were infected—the report of the inspector was qualified. In all cases the vessels were subjected by the quarantine authorities to a thorough general cleansing, purification of bilge, hold, etc., and disinfection with carbolic acid and copperas, and the cargoes were fumigated with sulphurous-acid gas. Coffee-ships from Rio de Janeiro, were either not allowed to proceed up to New Orleans at all, or only after removal of cargo and thorough fumigation of the same.

The arrival of the *Merchant*, July 16, and of the *Buteshire* the following day, both from Vera Cruz with yellow-fever cases, led the Governor of Louisiana, July 20, to recommend to the Louisiana State Board of Health that no infected vessels be permitted to enter the Mississippi river, and that all infected vessels then at the quarantine station be removed out of the river at once; assigning the reason that their presence at that point had practically rendered the station an infected port in dangerous proximity to New Orleans, and threatened a stupendous calamity to the Mississippi valley. At its meeting, July 23, the Board discussed this communication, and finally adopted a resolution requesting the Governor to issue a proclamation enforcing his recommendations, and declaring non-intercourse between Louisiana and Vera Cruz, Rio de Janeiro, Havana, and other infected ports, which proclamation was made the following day, July 24. The infected vessels were ordered to be removed from the river, and for the first time in a number of years the Lower Mississippi was freed from the menace arising from the admission of yellow-fever ships to the river.

Immediately upon the receipt of information of this action, the request, previously preferred to Gov. McEnery, to permit the Sanitary Council inspector to remain at the quarantine station, was withdrawn by telegram and the inspector was relieved from duty July 31.

It is remarked, in this connection, that while the National Board of Health and the Sanitary Council have been advocating for the last four years the exclusion of infected vessels from the Mississippi

during the dangerous season, and the use of Ship Island as a refuge station for such vessels, the necessity for absolute non-intercourse has not been recognized. The plan proposed by these two bodies contemplated the maintenance of an inspection station at or near Port Eads. All vessels entering the river would here be subjected to a rigid examination. Those found to be infected would be compelled to go to Ship Island refuge station; healthy vessels from infected ports would be subjected to such treatment as would render it safe to allow them access to New Orleans, while all others, if found in a good sanitary condition, would be passed without detention. In this way it was believed the public health could be properly protected without inflicting any serious injury to the commercial interests of New Orleans.

DURING August the operations of the Service were confined to New Orleans, Vicksburg, (at Fort Adams) and Memphis (at President's Island). With the exception of one suspicious case in the early part of the month in Jackson county, Miss., on Fort Bayou, near the coast, there was a very unusual absence of anything like yellow fever in the area in which the Inspection Service was maintained. In the case alluded to, the Mississippi State Board of Health acted upon the hypothesis that the disease was yellow fever, although the diagnosis was conflicting and the weight of opinion against that conclusion. An inspector was at once put on duty in the district, the locality was placed under a quarantine of isolation for fifteen days, disinfection was resorted to, and nothing further of a suspicious nature developed.

New Orleans had not been so free from alarm, or cause for alarm, during the corresponding months of many years, as during the sixty days ended August 31; and on the 13th of that month, immediately after my return from New Orleans, I recommended that, "unless yellow fever should appear in that city by the 20th inst., inspections should cease on the 31st." Doubts as to the character of the Jackson county, Miss., sickness, and the conditions at Pensacola and vicinity, prevented the adoption of this suggestion; but on the 15th of September, New Orleans and the valley remaining free from any suspicious illness, the Service was definitely suspended for the season.

From May 15 to September 15th, during which period the Service was maintained, there were inspected 73 ocean vessels at the Mississippi river quarantine station; 277 steamboats and other craft at the port of New Orleans; 439 steamboats and other craft at the stations at Ft. Adams, Miss., and President's Island, Tenn.; and 1421 freight trains on the Illinois Central and Louisville and Nashville railroads at New Orleans. The aggregate inspections comprise 2210 ocean vessels, river craft and freight trains, with a capacity of 2,534,870 tons, and carrying 89,947 officers, crew and passengers.

There has been, practically, no trouble with regard to yellow fever, during the past summer, in any portion of the region in which the Sanitary Council and the State of Illinois are directly interested.

Chicago Sewage.

During the past summer I have frequently examined the condition of the Chicago river and its branches, and of the Illinois and Michigan canal, attracted more particularly thereto, from time to time, by the reports concerning the spread of Asiatic cholera abroad and the possibility of its appearance in this country. In July I made a pretty thorough inspection of the Ogden ditch and dam, the DesPlaines river at the dam and the Bridgeport pumping works; and subsequently submitted the following report on the same to Governor Hamilton:

ILLINOIS STATE BOARD OF HEALTH,
OFFICE OF THE SECRETARY, Springfield, Aug. 4, 1883.

SIR: In accordance with your request I have recently inspected the "Ogden Ditch," with respect to its influence upon the sanitary condition of the Chicago River and the Illinois and Michigan Canal. I found that the dam constructed by the city of Chicago some years ago, on the recommendation of the Chicago Board of Health, for the purpose of preventing the flow of water from the DesPlaines river into the "ditch" and thence into the South Branch of the Chicago river, was practically worthless. The dam itself is broken down, and the approach thereto has been washed away. At the time of my examination a volume of water was pouring through the "ditch" into the South Branch which I estimated to be nearly if not quite equal to the flow through the canal on that day.

Through the destruction of this dam—or the failure to keep it in repair—the DesPlaines river is now substantially diverted into the South Branch; and the area drained by the DesPlaines west and north of the city, and at times as far southwest as Lemont, has since the opening of spring furnished a volume of water much greater than the capacity of the canal itself. The effect of this has been to obstruct the flow of the main Chicago river and South Branch to the canal, and frequently to reverse the flow and establish a current outward to the lake.

During the period of my recent observations, I found on three occasions a decided current lakeward; on two occasions no movement was perceptible, and the waters of the main river were foul and stagnant. Only once was there noted any current toward the canal. It should be remarked also that during this period the lake level averaged about three feet above the Chicago datum—its fluctuations, the influence of the wind, and the varying sewage-production of the city being sufficient to cause the changes in the direction of the current above noted.

As a result of this alternate reversal and suspension of movement in the river, the South Branch was found to be in a very offensive condition—in fact, since the water was let into the "deep cut" in 1871, I have never known the main river to be worse, if so bad, as I found it at Clark street bridge at this time. It may be remarked that the non-operation of the Fullerton avenue conduit—the pumps of which were not at work for about forty-eight hours during the week—had some share in this result; but, since the capacity of

these pumps is only about 18,000 cubic feet per minute, it is obvious that their suspension had little to do in producing the existing condition.

An adequate explanation is afforded by the volume of water pouring into the South Branch through the "Ogden ditch," which, with the flow from the South and West forks and the sewage production of the city proper, is sufficient to occasionally overcome the head of water in the lake, and so to create a current in that direction, or to practically dam up the contents of the main river and South Branch.

Meantime, while the sewage of the thickly-settled area drained by the South Branch and main river is thus "bottled up," so to speak, between a high lake level at the one end and the DesPlaines influx at the other, the canal is only carrying off the waters of the DesPlaines, plus the drainage of the South and West forks, and occasionally some portion of the contents of the South Branch. If the DesPlaines were excluded, the flow in the canal would necessarily be maintained from the South Branch, and any increase in the height of the lake level would result in an increased access of lake water into the river from this natural cause. As a matter of fact, only once since the opening of navigation this season has lake water been observed at Lockport. This occurred for a short time after the wind had been blowing from the northeast for several days in succession, and forced the water into the main river and South Branch in sufficient volume to overcome the influx from the DesPlaines. As nearly as I can ascertain, it is probable that from 30,000 to 32,000 cubic feet per minute passed through the canal at this time. The appearance of lake water at Lockport with this amount of flow clearly demonstrates, therefore, that if the flow of the canal could be maintained at about 40,000 cubic feet, the sewage dilution would be sufficient for all practical purposes at the present time.

During the period of my investigation the average stage of water in the canal was much higher than usual. For a period of fifteen consecutive days—July 16 to July 30 inclusive—the average was 9.75 feet—the highest level being 10.4 feet on the 24th and 25th, and the lowest being 9.6 feet on the 16th, 17th, 18th, 20th, 21st and 22d. The flow through the canal during the season thus far has varied from about 23,000 to 32,000 cubic feet per minute, the variations being due to the same causes which affect the movement of the Chicago river.

While even the maximum quantity above given—32,000 cubic feet per minute—is not sufficient for thorough dilution of the sewage, its value as a means of purifying the Chicago river is diminished just in proportion to the extent to which water from the DesPlaines is substituted for water from the Lake.

In my judgment it is obvious that the dam at the entrance of the "Ogden ditch" should be immediately repaired, so as to affectually exclude the DesPlaines from the South Branch. If this were done the present flow in the canal, instead of being mainly DesPlaines river and the sewage of the West and South forks, would be largely the contents of the South Branch and main river diluted

with clear lake water. With the present high lake level this would speedily establish a fair sanitary condition of the main river and the greater portion of the South Branch.

With respect to the operation of the new pumping works at Bridgeport, it appears that these can not now be fully utilized on account of the failure of those interested in the maintenance of bridges across the canal along "the summit" to comply with the notification of the Canal Commissioners. On the 11th of September, 1892, the Superintendent of the canal notified the railroad companies and all others concerned to raise their bridges to the necessary height by January 1, 1893, so that on the opening of navigation a higher stage of water might be maintained in the canal. No action has yet been taken by these parties.

In view of possible contingencies which may occur to affect the public health, it is of the utmost importance, first, that the "Ogden ditch" dam be at once reconstructed; next, that these bridges be raised with as little delay as possible, and that the pumping works be placed in a condition to do the work for which they were intended. The first measure will, to a great extent, and promptly, improve the condition of the river; while, should a sanitary emergency arise, the other will make it possible to utilize the full effect of the pumps and canal.

A good sanitary condition of the Chicago river is not alone one of the most important factors in the welfare of Chicago, but it also concerns the communities along the entire length of the canal.

Very respectfully,

JOHN H. RAUCH, M. D.

THE fall in the DesPlaines river, which occurred soon after this inspection was made, remedied, to some extent, the condition of the Chicago river, by causing the flow in the canal to be taken more largely from the South Branch, instead of from the DesPlaines.

Aside, however, from any consideration of Asiatic cholera or other extraordinary menace to the public health, the present sanitary interests of Chicago and of the territory along the line of the canal, imperatively demand some prompt and satisfactory solution of the Chicago sewage problem. Upon such solution hinges

1st. The prevention of a by no means improbable or remote epidemic, constantly threatened by the pollution of the city's water supply from this sewage.

2d. The abatement of the intolerable nuisance created by the frequent conversion of the main river and the South Branch into an elongated uncovered cess-pool of the filthiest description, stretching out through the city for miles.

3d. The relief of the communities along the banks of the canal from the evils caused by pouring this mass of filth, in varying degree of concentration, down past their doors and through their towns and villages.

From a sanitary standpoint the problem presents one or two factors which warrant the assertion that its solution is neither impracticable nor alarmingly expensive. Assuming that the only feasible

or safe line of disposal lies through the canal and Illinois river—a matter which I have heretofore affirmatively discussed in reports to the BOARD—it remains to determine what degree of dilution is necessary in order to render this sewage harmless and inoffensive as it flows through the canal; and then to secure the means for such dilution, always under control and regardless of the varying lake levels and the amount of rainfall and drainage from the circumjacent country. From the observations which I have made I believe the canal is of sufficient capacity to carry off, without serious impediment to navigation, the volume which would result from this dilution, at the present time. If this is not the case the fact should be demonstrated at once. It is, therefore, clearly the duty of the city of Chicago, immediately upon the close of navigation, to have the Bridgeport pumps put into operation, and their capacity and the capacity of the canal determined by actual experiment.

If the pumps will furnish, and the canal carry off, the volume of water which would result from the adequate dilution of the sewage of the South branch of the Chicago river, this will relieve the communities along the canal of the nuisance and menace to health caused every winter by the diminished flow and consequent concentration of the contents of the canal; it will keep the main river and South branch in a practically good sanitary condition; and it will prevent the usual spring pollution of the Chicago water-supply, which results from the washing out of the winter's accumulation of sewage, by the spring thaws and rains, into the lowered lake level which obtains at this season and which favors the flow of the sewage out toward the crib.

It is intimated, on the one hand, that the canal can not carry off such a volume, and, on the other, that the pumps have not the capacity to furnish it, independent of the lake level. Even if both of these statements be true the difficulties are certainly within the ordinary scope of the civil engineer, and the question of expense—no matter what the actual figures may be—is one of relative insignificance.

As soon as practicable, the dam at the entrance of the Ogden ditch should also be put into condition to control the admission of the waters of the DesPlaines into the South branch and canal.

All of which is respectfully submitted.

JOHN H. RAUCH, *Secretary*.

At the conclusion of the reading of the Secretary's report, on motion of Dr. Clark, it was accepted, the recommendations and actions of the Secretary were approved, and the report was ordered to be printed in the account of the proceedings of the meeting.

Upon the request of the Secretary the regular order of business was suspended to take up the consideration of sundry cases affecting the status of colleges and of individuals, in many of which the parties were already in attendance. The BOARD thereupon went into executive session, at the conclusion of which, the following action was ordered to be made public:

Resolved, That the discretionary power heretofore conferred upon the Secretary, "to act for the BOARD in any case of emergency which may arise in the interims between the regular meetings," be so construed as to apply specifically to the class of cases under consideration, to-wit: questions concerning medical colleges and practitioners,—as well as to sanitary necessities.

THE consideration of the Secretary's report was resumed, and Dr. Haskell offered the following, which was adopted:

Resolved, That the River and Rail Inspection Service in the Mississippi Valley, maintained by the National Board of Health during the past season up to the close of June, has been again demonstrated to be of signal usefulness in protecting commercial interests from the injurious effects of unfounded rumors and unnecessary local quarantines which grow out of such rumors, as well as in guarding the sanitary interests of the valley.

Resolved, That the Executive Committee of the Sanitary Council of the Mississippi Valley has discharged the duties devolved upon it in connection with said River and Rail Inspection Service from July 1 to September 15, with commendable wisdom, moderation and efficiency.

Resolved, That the individual members of the ILLINOIS STATE BOARD OF HEALTH, colleagues of Dr. Rauch, endorse, in the fullest sense, his actions as executive officer of the Sanitary Council in charge of said Inspection Service.

Dr. Ludlam offered the following, which was also adopted:

Resolved, That the Secretary transmit a copy of the report of the proceedings of this meeting to his Honor, the Mayor, and to the Health Commissioner, of the City of Chicago, with a communication to each of them, inviting attention especially to that portion of his Quarterly Report which treats of the Chicago-sewage question.

The BOARD then resumed, in executive session, the consideration of cases under the Medical-Practice Act, at the close of which, the Secretary was authorized to communicate the decisions in all adjudicated cases, and to furnish the necessary information as to the revocation of certificates, directly to the individuals interested. At six o'clock p. m., the BOARD adjourned to 10 o'clock, Friday morning.

FRIDAY, October 20, 10 o'clock a. m.—Present: Newton Bateman, John McLean, R. Ludlam, W. R. McKenzie and John H. Rauch.

A short executive session was first held, the majority of cases being disposed of, either by reference to the Secretary with power to act, or by postponement for future consideration.

Under the call for reports from committees, the following was submitted:

WHEREAS, Our late associate, John M. Gregory, LL. D., long and honorably connected with the work of the ILLINOIS STATE BOARD OF HEALTH, and for a considerable time its presiding officer, has resigned his membership in this BOARD, in order the more entirely to devote himself to the duties of his office as a member of the United States Civil Service Commission; therefore, be it

Resolved, That we recognize in Dr. Gregory a gentleman of a high sense of honor; of broad and enlightened views upon a range of questions vitally affecting many important interests; and a conscientious, capable and experienced public officer.

Resolved, That our best wishes and kindest regards follow him in his new field of labor.

On motion of Dr. Rauch, the preamble and resolutions were unanimously adopted.

The auditing committee reported that it had examined and audited accounts, amounting to \$2,757.30; had found the same to be correct, and recommend that they be paid.

The report of the committee was accepted, and, on motion of the Secretary, the BOARD, at 12:45 p. m., adjourned.

SPECIAL MEETINGS

SUMMARY OF OFFICE WORK AND MISCELLANEOUS.

THE BOARD has held five special meetings during the year 1893, namely, on November 3 and 10, and on December 1, 8 and 15. These meetings were of a purely executive nature, held for the purpose of taking action on sundry cases under the Medical-Practice Act. At the meeting held on Saturday, November 3, the certificate of Dr. Frank B. Smith, temporarily of Peoria, formerly of Chicago, was revoked for "unprofessional and dishonorable conduct." He was proved to be associated with the notorious "K. & K. surgeons," of Detroit and elsewhere, a firm of disreputable and fraudulent advertising quacks, who have been for some time endeavoring to secure a foothold in the State, from which they are themselves excluded through the operation of the Medical-Practice act. Smith, who is the graduate of a recognized college, and obtained a certificate from the BOARD as such, has been employed by the "K. & K.'s," and is advertised as the "vice-president" of the concern. Following the revocation of his certificate, he instituted a suit in the United States District Court at Detroit, against the Secretary of the BOARD, for \$50,000 alleged damages. The probability is that this suit is merely brought for advertising purposes, and with no intention of pushing it to a trial.

Among the other business transacted at the special meetings, the cases of eleven practitioners, holding the certificates of the BOARD, and against whom various charges had been preferred, were satisfactorily adjusted, the offenders agreeing to refrain from the objectionable practices in the future. In a number of other cases the parties have left the State.

SUMMARY OF OFFICE WORK.

THE office correspondence for the year amounts to 4,036 letters and other communications received, and 5,157 sent, exclusive of 562 diplomas submitted for verification and the papers accompanying the applications for certificates from 787 physicians and midwives.

During the same period 2,712 copies of annual reports and official registers, 585 copies of the advance sheets of the section on Medical Education, and 73,287 copies of preventable disease circulars, quarterly reports, and other printed matter, making an aggregate of 76,584 copies of publications, have been distributed.

Certificates and Licenses.

Certificates entitling to practice medicine under the Medical-Practice Act, were issued to 515 graduates upon diplomas from legally chartered medical institutions in good standing, and 25 to practitioners on length of practice in the State; making in all five hundred and forty practitioners of medicine admitted to practice in Illinois during the year 1883. During the same period, 163 applications have been refused, and eleven certificates have been revoked; thus reducing the number of practitioners by 174, through the enforcement of the provisions of the Medical-Practice Act.

Among the causes for refusal to issue certificates were the following: Presenting diplomas of institutions not recognized by the BOARD as in good standing; unsatisfactory personal or professional antecedents, habits or associations, warranting the charge of unprofessional and dishonorable conduct; intent to practice in an unprofessional and dishonorable manner, as by claiming to cure incurable maladies; to possess unusual skill, experience or facilities; and similar claims involving deceit and fraud upon the public. The revocations of certificates were in all cases based upon charges of "unprofessional and dishonorable conduct."

A total of fifty-one midwives have been admitted to practice during the year—twenty-five upon credentials, seven upon length of practice in the State and nineteen upon examination. In all, forty presented themselves for examination, of whom twenty-one were rejected.

MISCELLANEOUS.

In addition to the other matters which have engaged the Secretary's attention—and which are detailed in the abstracts of the various quarterly reports for the year—may be mentioned three outbreaks of

Trichiniasis.

One of these, resulting in three deaths, occurred during the early part of November, in a family near Gardner, Grundy county; the second and third during December, in Woodburn, Macoupin county, and in Bloomington, respectively. The Gardner and Bloomington cases resulted from eating uncooked pork and sausage, and the Woodburn cases from raw smoked sausage. Specimens of the meat from Gardner and Woodburn were sent to the Secretary for examination, the character of the disease being only suspected, until the microscope showed, in one case, about 2,000, and in the other, about 8,000 trichinæ to the cubic inch. Dr. A. T. Darrah has reported the Bloomington outbreak quite fully, and Drs. Taxis and Reid, of Gardner and Woodburn respectively, have promised detailed reports of their cases.

The matter, however, possesses little sanitary importance, except that it is well to put on record every authentic instance of the occurrence of trichiniasis, and to determine its cause. Since 1866 the Secretary has noted every such instance in this State, and of the deaths resulting, which now number sixteen; and without exception they have been caused by eating uncooked or imperfectly cooked pork in some form. He sees no reason to modify the opinion expressed in 1881, in reply to an inquiry addressed him by a committee of the Chicago Board of Trade and the State Department at Washington, to-wit: "That, as a sanitarian, I regard the danger to human life from trichinæ as practically amounting to nothing, it being so easily prevented by thorough cooking."

The investigations which have been made during the past four years, both in this country and abroad, show American pork to be freer from trichinous infection than that of other countries. The hog in every country is subject to the parasite; even the wild swine in European forests have been found infected, and an outbreak of trichiniasis in 1881, at the village of Khiam, near the sources of the Jordan in Palestine, was caused by the flesh of a wild boar slain in the woods near the village. Prof. Virchow is recently reported to have condemned the outcry against American pork, as utterly illogical, unnecessary and unjustifiable by sanitary reasons, and adds that "no case of trichinæ in American hog meat has been proved to exist in Germany for ten years." Neither in Switzerland nor England has it been found necessary to interfere with the importation of American hog products; and yet in these countries their reputation is higher than ever before. It is only where the custom of eating raw pork obtains that severe or extensive outbreaks of trichinias occur. Such an outbreak was that at Emersleben, in Saxony, last fall. MM. Brouardel and Grancher, who made an investigation, found that it was not due to American pork at all, but that the trichinous hog, which was the origin of the disease, was born and reared in a stable at Emersleben, the offspring of an English boar and a native sow. Killed on the 12th of September, 1883, a slice of the carcass was eaten raw on the 13th by two men, who were taken ill on the 16th, and died a month later. Meantime the rest of the meat, mixed with other, was minced up and sold between the 13th and 19th of September. Except by five persons, who cooked it a little, this minced meat was eaten perfectly raw, and within a short time there were two hundred and fifty persons sick, of whom forty-two died; and one hundred and twenty-six more cases, with eleven deaths, occurred in neighboring villages among persons who ate sausage made by the same butcher. Trichinæ were found in abundance by MM. Brouardel and Grancher in the bodies of two of the victims. This is the most extensive outbreak yet reported; but as previously remarked, the question is one of economic and commercial importance, and in only a very limited sense has it any sanitary interest. Proper cooking will render the most badly infected piece of trichinous meat absolutely innocuous. Exposure to a temperature of 150-160 degrees, F., is fatal to the trichina.

DURING the month of February, 1883, the series of Preventable-Disease Circulars of the ILLINOIS STATE BOARD OF HEALTH was added to by the publication of editions of twenty thousand copies each of Circulars on DIPHTHERIA: Its Prevention and Control; on TYPHOID FEVER: Its Sanitary Features—Prevention of Its Spread; and on SCARLET FEVER: Its Prevention and Control. The Diphtheria circular was published February 1; the Scarlet-Fever circular, February 10; and the Typhoid-Fever circular, February 17; and their distribution was followed by such a demand for editions in other languages that the BOARD finally authorized their translation into German and the printing of ten thousand copies of each in that language.

DIPHTHERIA: ITS PREVENTION AND CONTROL.

PREFATORY.—Diphtheria is a contagious disease—that is, one capable of being conveyed from a person suffering with the disease to a healthy person. It is, therefore, preventable, and the success of efforts at prevention depends upon a knowledge of the modes by which it may be conveyed.

For practical purposes these are as follows:

I. By immediate contact with the exhalations, discharges, etc., from a diphtheritic patient.

II. By contact with such emanations through the medium of air and water.

The obvious deductions are, on the one hand, to destroy these emanations, or to render them harmless, as promptly as they are produced; and, on the other, to secure the utmost attainable purity of air and water. The specific instructions which follow have reference to these two modes of prevention, and should be carefully observed by every family in any community where Diphtheria makes its appearance.

Because Diphtheria finds the majority of its victims amongst children, there is not the same attention given to precautions against its spread as there is, for example, in the case of small-pox. And yet there is every reason to believe that—aside from the specific measure of vaccinal protection—the spread of Diphtheria may be as effectually controlled by a scrupulous observance of proper precautions.

A preventable disease which, not infrequently, causes a greater mortality than typhoid fever, small-pox, scarlet fever and measles combined; which, during 1-80, caused 51.33 out of every 1,000 deaths from all causes in the United States; and which, during the past year, 1882, caused nearly that proportion (51 out of every 1,000) in the State of Illinois—Diphtheria certainly demands the best efforts of all interested in its suppression; and this the more imperatively, since its treatment is, as yet, confessedly unsatisfactory.

I.—Its Prevention.

1. If one is subject to catarrh, or inflammatory affections of the throat, especial care should be paid to the condition of the general health and to the general hygienic surroundings. There is reason to believe that Diphtheria originates spontaneously in such persons when the system is debilitated from any cause.

2. During the existence of Diphtheria, avoid crowded gatherings in badly ventilated rooms, as in theatres, public halls, and even churches. This is of especial importance during cold weather.

3. Secure thorough ventilation and perfect cleanliness of nurseries, kindergartens, schoolrooms and other places where children are cared for. Parents should make it their personal business to secure these in the home and nursery; and to see that those in charge of schools, etc., are also mindful of these important matters. Children are more subject to Diphtheria than adults, and the disease is more fatal with them; hence the necessity of these precautions on their behalf.

4. During the existence of a case of Diphtheria in the neighborhood do not neglect any soreness of the throat, however slight, until assured of its harmless nature by the family physician.

5. Unless absolutely necessary, do not come in contact with, or inhale the breath of one sick with sore throat. Avoid kissing, or eating and drinking in common with such sick person.

6. Diphtheria has so often appeared where uncleanly conditions have prevailed, when it could not be traced to continuous propagation by contagion, that its relation to filth as a cause may be assumed for sanitary purposes.

It is immaterial whether the filth exists in visible and disgusting forms, such as the garbage heap, the cess-pool or the privy vault, or in the invisible and possibly inodorous gases from an illy-constructed sewer; from decaying vegetables in the cellar, or in the poisonous exhalations from the human breath and body in unventilated rooms. All these undoubted causes of ill-health should be at once abated.

7. Because of the fact stated in No. 3, an adult may venture, when necessary, to come in contact with a case of Diphtheria; but no child should ever be so exposed, either directly or indirectly. Adults who are compelled to visit such cases should take the precaution to bathe and change clothing before going near a child. Children should be prevented from entering the water-closet or privy into which Diphtheria discharges are thrown, even after disinfection. In short, they should be removed at once and definitely from any possibility of contagion during the existence of a case.

8. Cats, dogs, cows, swine, and some other of the lower animals are known to be subject to Diphtheria, and fatal cases among human beings have been contracted from them. Avoid, therefore, having anything to do with a cat, dog, cow, hog or other animal suffering from any throat disease, until it is known not to be Diphtheria.

9. Outbreaks of Diphtheria have been traced to the carriage of the contagion by the wind. Therefore, it is advisable to close the windows and doors, and avoid as much as possible the side of a house towards a known infected house or locality, especially during the prevalence of high winds from that direction.

10. There are no specifics or antidotes for Diphtheria. The resort to such can do no possible good, and may lead to harm.

II.—Its Control.

1. Diphtheria is, at times, as virulent and contagious as small-pox. Like small-pox, too, it is not always easy to detect its character during the early stages. Therefore, when one has sore throat, foul breath, with some fever—and, especially, if there is Diphtheria in the neighborhood—the sufferer should be at once separated from all other persons, except the necessary attendants, until it is ascertained whether the disease be Diphtheria (or other contagious disease). If this prove to be the case, the following precautions should be at once adopted. These are, substantially, the same as already recommended by the STATE BOARD OF HEALTH in the Circular on Small-Pox:

The Sick-Room.—The room selected for the sick should be large, easily ventilated, and as far from the living and sleeping rooms of other members of the family as it is practicable to have it. All ornaments, carpets, drapery, and articles not absolutely needed in the room, should be removed. A free circulation of air from without should be admitted both by night and day—there is no better disinfectant than pure air. Place the bed as near as possible in the middle of the room; but care should, of course, be taken to keep the patient out of draughts.

If the room connects with others which must be occupied, lock all but one door for entrance and exit, and fasten to the door frames—top, bottom and sides—sheets of cheap cotton cloth, kept wet with *thymol water* or chloride of zinc solution—two drachma chloride zinc to a half gallon of water. Over the door to be used, the sheet must not be tacked at the bottom nor along the full length of the lock-side of the frame, but about five feet may be left free to be pushed aside; this sheet, however, must be long enough to allow ten or twelve inches to lie in folds on the floor, and must, also, be kept wet with the disinfectant.

Precautions in the Sick-Room.—All discharges from the nose and mouth of the patient should be received on rags and immediately burned. Night-vessels should be kept supplied with a quart or so of the *Copperas Disinfectant*, into which all discharges should be received. All spoons, dishes, etc., used or taken from the sick-room, should be put in boiling water at once.

A pail or tub of the *Zinc Disinfectant* should be kept in the sick-room, and into this all clothing, blankets, sheets, towels, etc., used about the patient or in the room, should be dropped immediately after use, and before being removed from the room. They should then be well boiled as soon as practicable.

Attendants.—Not more than two persons—one of them a skillful, professional nurse, if possible—should be employed in the sick-room, and their intercourse with other members of the family should be as much restricted as possible.

In the event that it becomes necessary for an attendant to go away from the house, a complete change of clothing should be made, using such as has not been exposed to infection; the hands, face and hair should be washed in thymol water, or chloride of zinc solution.

Miscellaneous.—No inmate of the house, during the continuance of the disease, should venture into any public conveyance, or assemblage, or crowded building, such as a church or school; nor, after its termination, until permission is given by the health authorities.

Letters must not be sent from the patient, and all mail matter from the house should first be subjected to a dry heat of 250-260 deg. F.

Domestic animals, dogs, cats, etc., should not be allowed to enter the room of the patient, or, better still, should be excluded from the house.

During the entire illness the privy should be thoroughly disinfected with the *Copperas Disinfectant*, three to five gallons of which should be thrown into the vault every three or four days. Water-closets should be disinfected by pouring a quart or so of this disinfectant into the receiver after each use.

Care after Recovery.—Recent authorities pronounce Diphtheria patients dangerous, and liable to communicate the disease by their breath and excretions or by contact with their persons, for a period of forty days from the beginning of the disease. In any event, such a person should not be permitted to associate with others, nor to attend school, church or any public assembly, until the throat and any sores which have been on the lips or nose are entirely healed; nor until, in the judgment of the attending physician (who should certify to that effect), or of the health officer, such association will not endanger others. Care should be taken that the clothing worn by convalescents has not been exposed to the infection, or has been thoroughly disinfected. The garments worn at the time of being taken ill should be cared for at once, lest others contract the disease through handling them.

2. Cases of Diphtheria should be promptly reported to the proper health authority, either by the attending physicians or by the householders. Plain and distinct notices, in the form of placards, should be placed upon the house or premises where there is a case of Diphtheria, and children, especially, should not be allowed to enter such house. Notice should also be given to all public schools, of the locality of any house in which there is Diphtheria, and the scholars should be cautioned against visiting or playing on the infected premises.

3. Immediately upon receipt of notice of the existence of a case of Diphtheria, the health officer should visit the locality and secure prompt compliance with the precautions above set forth. He should see that the proper placards are duly posted; should notify the schools; take charge of funerals of those dying of this disease; superintend the disinfection of rooms, clothing and premises; and, finally, give official certificates of recovery, and of freedom from liability to communicate the disease to others. Until these latter are issued a rigid system of isolation or quarantine should be maintained with regard to an infected house and its contents—persons and things.

Where there is no health officer, the attending physician should see that the above precautions are carried out.

4. In the event of death, the clothing in which the body is attired should be sprinkled with thymol water, the body wrapped in a disinfectant cerecloth (a sheet thoroughly soaked in the *Zinc Disinfectant, double strength*) and placed in an air-tight coffin, *which is to remain in the sick-room until removed for burial*. No public funeral should be allowed either at the house or church, and no more persons should be permitted to go to the cemetery than are necessary to inter the corpse.

5. After recovery or death all articles worn by, or that have come in contact with the patient, together with the room and all its contents, should be thoroughly disinfected by burning sulphur. To do this, have all windows, fire-places, flues, key-holes, doors and other openings securely closed by strips or sheets of paper pasted over them. Then place on the hearth or stove, or on bricks set in a wash-tub containing an inch or so of water, an iron vessel of live coals, upon which throw three or four pounds of sulphur. All articles in the room and others of every description that have been exposed to infection, which can not be washed or subjected to dry heat, and are yet too valuable to be burned, must be spread out on chairs or racks; mattresses or spring beds set up so as to have both surfaces exposed; window shades and curtains laid out at full length, and every effort made to secure thorough exposure to the sulphur fumes. The room should then be kept tightly closed for twenty-four hours.

After this fumigation—which it will do no harm to repeat—the floor and wood-work should be washed with soap and hot water, the walls and ceiling whitewashed, or, if papered, the paper should be removed. The articles which have been subjected to fumigation should be exposed for several days to sunshine and fresh air. If the carpet has unavoidably been allowed to remain on the floor during the illness, it should not be removed until after the fumigation; but must then be taken up, beaten and shaken in the open air, and allowed to remain out of doors for a week or more. If not too valuable, it should be destroyed; but, whenever practicable, it should be removed from the room at the beginning of the illness.

After the above treatment has been thoroughly enforced, the doors and windows of the room should be kept open as much as possible for a week or two. Where houses are isolated articles may be exposed out of doors. The entire contents of the house should be subjected to the greatest care, and when there is any doubt as to the safety of an article it should be destroyed.

All this work should be done—both the disinfection and the destruction of property—under the direct supervision of the local authorities.

6. Such articles of clothing, bedding, etc., as can be washed, should first be treated by dipping in the *Zinc Disinfectant*; they should then be immediately and thoroughly boiled. The ticking of beds and pillows used by the patient should be treated in the same manner, and the contents, if hair or feathers, should be thoroughly baked in an oven. If this can not be done, they should be destroyed by fire, as should, in any event, all straw, husk, moss, or "excelsior" filling. The clothing of nurses should be thoroughly fumigated and cleaned before it is taken from the house, or, better still, burned, if feasible.

SCARLET FEVER: ITS PREVENTION AND CONTROL.

PREFATORY.—Scarlet Fever is, pre-eminently, the contagious disease of childhood. Although all ages are liable to the disease, the chances of attack rapidly diminish after the fifth year. This predisposition of childhood is attributed to the feeble resisting power of early life. For the same reason, the chances of recovery and of escape from its serious after-effects increase with the age of the individual.

These considerations should lead to especial care in guarding young children from danger of exposure to the contagion of Scarlet Fever. The common theory of too many mothers and nurses—that "the diseases of childhood are to be expected anyway; there is no use in attempting to guard children from their distinctive diseases"—is mischievous in the extreme, and should be refuted by all sanitarians, health officers and family physicians. Because a certain class of diseases are more prevalent and more dangerous in early life, and grow less frequent and less fatal as the vigor and fullness of adult life are approached, would seem to be common-sense reasons why the infant and young child should be all the more carefully guarded against exposure to them*—and this is especially true of the disease under consideration.

As in other contagious diseases, there are two important matters demanding attention in order to prevent the spread of Scarlet Fever. The first is to *isolate* the patient—to separate the sick from the well. The second is to destroy, at once and effectually, everything which comes from the body of the patient—before it can infect anything else, if possible; if not, then to subject everything likely to be infected to such treatment as will destroy the poisonous property.

The Scarlet Fever poison is contained in the breath and discharges of the patient, and especially in the skin which peels off at the close of the attack, and may be scattered through the air in tiny scales or powder. These particles may settle down in undusted corners, or lodge in clothing, carpets, bedding, etc.; and, as they retain their poisonous property for an indefinite period, may kindle an epidemic whenever dislodged to come in contact with susceptible subjects.

The instructions, which follow, with reference to the care of the sick, and especially those with reference to the means of destroying the poison, should be conscientiously carried out in every household where there is a case of scarlet fever. In a sanitary sense, every person is his brother's keeper where contagious disease is concerned. Concealment, or neglect of known necessary precautions, whereby contagion is spread, may be as murderous in effect, whatever the intent, as the club of Cain itself.

* Since one attack of Scarlet Fever usually suffices to prevent subsequent ones, the question has sometimes arisen as to the propriety of intentionally exposing children to the contagion during exceptionally mild epidemics of the disease. This is a question which must, in all cases, be decided by the family physician. And it should not be forgotten that even a mild case in one child may communicate a malignant attack to another.

If the instructions herein set forth were faithfully followed in every case of Scarlet Fever, for a comparatively brief space of time, its poison could be entirely eradicated,—and this scourge of childhood would soon cease to fill mothers' hearts with dread and anxiety.

Its Prevention and Control.

1. During the existence of Scarlet Fever in a community, all cases of sore throat, with fever, are to be looked upon with suspicion until their innocent character is established.

2. If a child, who has not previously had an attack of Scarlet Fever, should, unfortunately, be exposed to a case, it should be carefully watched during the following two weeks. Upon the first symptoms of shivering, lassitude, headache, frequent pulse, hot, dry skin, flushed face, furred tongue, with much thirst and loss of appetite, the child should immediately be separated as completely as possible from other members of the household and all other persons, until a physician has seen it and determined whether it has Scarlet Fever. All persons known to be sick with this disease (even those but mildly sick) should be promptly and thoroughly isolated from the public. This is of quite as much importance as in a case of small-pox.

3. As soon as it is determined that the disease is Scarlet Fever, the following precautions should be scrupulously carried out. These are substantially the same as already recommended by the STATE BOARD OF HEALTH, in the circulars on small-pox and diphtheria.

The Sick-Room.—The room selected for the sick should be large, easily ventilated, and as far from the living and sleeping-rooms of other members of the family as it is practicable to have it. All ornaments, carpets, drapery and articles not absolutely needed in the room, should be removed. A free circulation of air from without should be admitted both by night and day—there is no better disinfectant than pure air. Place the bed as near as possible in the middle of the room; but care should, of course, be taken to keep the patient out of draughts.

If the room connects with others which must be occupied, lock all but one door for entrance and exit, and fasten to the door frame—top, bottom and sides—sheets of cheap cotton cloth, kept wet with *Thymol Water* or chloride of zinc solution—two drachms chloride of zinc to a half gallon of water. Over the door to be used, the sheet must not be tacked at the bottom nor along the full length of the lock-side of the frame, but about five feet may be left free to be pushed aside; this sheet, however, must be long enough to allow ten or twelve inches to lie in folds on the floor, and must, also, be kept wet with the disinfectant.

Precautions in the Sick-Room.—All discharges from the nose and mouth of the patient should be received on rags and immediately burned. Night-vessels should be kept supplied with a quart or so of the *Copperas Disinfectant*, into which all discharges should be received. All spoons, dishes, etc., used or taken from the sick-room, should be put in boiling water at once.

A pail or tub of the *Zinc Disinfectant* should be kept in the sick-room, and into this all clothing, blankets, sheets, towels, etc., used about the patient or in the room, should be dropped immediately after use, and before being removed from the room. They should then be well boiled as soon as practicable.

Attendants.—Not more than two persons—one of them a skillful, professional nurse—should be employed in the sick-room, and their intercourse with other members of the family should be as much restricted as possible.

In the event that it becomes necessary for an attendant to go away from the house, a complete change of clothing should be made, using such as has not been exposed to infection; the hands, face and hair should be washed in thymol water or chloride of zinc solution.

Miscellaneous.—No inmate of the house, during the continuance of the disease, should venture into any public conveyance, or assemblage, or crowded building, such as a church or school; nor, after its termination, until permission is given by the health authorities.

Letters must not be sent from the patient, and all mail matter from the house should first be subjected to a dry heat of 250-260 deg. F.

Domestic animals, dogs, cats, etc., should not be allowed to enter the room of the patient, or, better still, should be excluded from the house.

During the entire illness the privy should be thoroughly disinfected with the *Copperas Disinfectant*, three to five gallons of which should be thrown into the vault every three or four days. Water-closets should be disinfected by pouring a quart or so of this disinfectant into the receiver after each use.

Care after Recovery.—There is danger of communicating the disease directly, from one recovering from Scarlet Fever, so long as there is any soreness of the eyes, nose or air-passages, or any symptom of drowsy; but, more especially, so long as the skin continues to peel off. Although this latter process is usually completed within about forty days from the beginning of the sickness, cases happen, sometimes, when it lasts even seventy or eighty days. No matter how long this period may be, the child must be considered dangerous until all scaling or peeling of the skin has ceased. Vaseline, cosmoline, olive oil or lard should be used, in the discretion of the attending physician, to anoint the skin. In order to prevent the scales from being scattered about and so spreading the contagion.

When recovery is complete, and the skin smooth and free from scales, the child should be bathed all over, at least twice or oftener, and the hair thoroughly washed each time

before being allowed to leave the house. This bathing should be under the direction of the family physician, at such times and in such manner as he thinks prudent. The addition of a gill of thymol water to each gallon of the bath is recommended.

4. No person, after recovering, should appear in public wearing the same clothing worn while sick or recovering from Scarlet Fever, until such clothing has been thoroughly disinfected, and this without regard to the time which has elapsed since recovery. Nor should a person from premises in which there is or has been a case of Scarlet Fever attend any school, Sunday school, church, or public assembly, or be permitted by the health authorities or by the school board to do so, until after disinfection of such premises and of the clothing worn by such person if it has been exposed to the contagion of the disease.

5. Cases of Scarlet Fever should be promptly reported to the proper health authority, either by the attending physicians or by the householders. Plain and distinct notices, in the form of placards, should be placed upon the house or premises where there is a case of Scarlet Fever, and children, especially, should not be allowed to enter such house. Notices should also be given to all public schools, of the locality of any house in which there is Scarlet Fever, and the scholars should be cautioned against visiting or playing on the infected premises.

6. Immediately upon receipt of notice of the existence of a case of Scarlet Fever, the health officer should visit the locality and secure prompt compliance with the precautions above set forth. He should see that the proper placards are duly posted; should notify the schools; take charge of funerals of those dying of this disease; superintend the disinfection of rooms, clothing and premises; and finally, give official certificate of recovery, and of freedom from liability to communicate the disease to others. Until these latter are issued, a rigid system of isolation or quarantine should be maintained with regard to an infected house and its contents—persons and things.

Where there is no health officer, the attending physician should see that these precautions are carried out.

7. In the event of death the clothing in which the body is attired should be sprinkled with thymol water, the body wrapped in a disinfectant cerecloth (a sheet thoroughly soaked in the *Zinc Disinfectant*, double strength,) and placed in an air-tight coffin, which is to remain in the sick room until removed for burial. No public funeral should be allowed, either at the house or church, and no more persons should be permitted to go to the cemetery than are necessary to inter the corpse.

The health authorities should take charge of burials, and superintend the preparation of the bodies; or, in the absence of such authorities, the attending physician should direct the undertaker as to these matters.

8. After recovery or death, all articles worn by, or that have come in contact with the patient, together with the room and all its contents, should be thoroughly disinfected by burning sulphur. To do this, have all the windows, fire-places, flues, key-holes, doors and other openings, securely closed by strips or sheets of paper pasted over them. Then place on the hearth or stove, or on bricks set in a wash-tub containing an inch or so of water, an iron vessel of live coals, upon which throw three or four pounds of sulphur. All articles in the room and others of every description that have been exposed to infection, which can not be washed or subjected to dry heat, and are yet too valuable to be burned, must be spread out on chairs or racks; mattresses or spring beds set up so as to have both surfaces exposed; window shades and curtains laid out at full length, and every effort made to secure thorough exposure to the sulphur fumes. The room should then be kept tightly closed for twenty-four hours. After this fumigation—which it will do no harm to repeat—the floor and wood-work should be washed with soap and hot water, the walls and ceiling whitewashed, or, if papered, the paper should be removed. The articles which have been subjected to fumigation should be exposed for several days to sunshine and fresh air. If the carpet has unavoidably been allowed to remain on the floor during the illness, it should not be removed until after the fumigation; but must then be taken up, beaten and shaken in the open air, and allowed to remain out of doors for a week or more. If not too valuable, it should be destroyed; but whenever practicable, it should be removed from the room at the beginning of the illness.

After the above treatment has been thoroughly enforced, the doors and windows of the room should be kept open as much as possible for a week or two. Where houses are isolated articles may be exposed out of doors. The entire contents of the house should be subjected to the greatest care, and when there is any doubt as to the safety of an article, it should be destroyed.

All this work should be done—both the disinfection and the destruction of property—under the direct supervision of the local authorities, or attending physician.

9. Such articles as clothing, bedding, etc., as can be washed, should first be treated by dipping in the *Zinc Disinfectant*; they should then be immediately and thoroughly boiled.

The ticking of beds and pillows used by the patient should be treated in the same manner, and the contents, if hair or leathers, should be thoroughly baked in an oven. If this can not be done, they should be destroyed by fire, as should, in any event, all straw, husk, moss or "excelsior" filling. The clothing of nurses should be thoroughly fumigated and cleaned before it is taken from the house, or, better still, burned if feasible.

TYPHOID FEVER: ITS SANITARY FEATURES—PREVENTION OF ITS SPREAD.

PREFATORY—When it is considered that, one year with another, over 2,000 people die annually in the State of Illinois from Typhoid Fever; that upwards of 14,000 more are disabled by it for an average period of three months each; that these persons are taken from all classes of the community, and at all ages between 5 and 40 years—a large proportion during the productive or self-sustaining period; and when it is further considered that the disease is believed, on the one hand, to be as communicable as small-pox or measles, and, on the other, it is asserted to be “altogether and easily preventable,” the duty of health officers, sanitarians and medical men, with reference to its suppression, would seem too obvious to need further emphasis or explanation.

Typhoid Fever has been fitly termed “the type of the filth-diseases.” Without reference to the question whether it may originate in, or be caused by the gases and other products of putrid animal matter, its prevalence unquestionably bears a constant relation to the condition of the sanitary surroundings.

Where there is a polluted water-supply; where there is undrained ground, contaminated with excremental filth; where foul, over-flowing or leaky privy-vaults soak the earth for rods with their contents; where defective, unventilated sewers and “skin” plumbing abound, there does Typhoid Fever find its most numerous victims.

From such localities the contagion, finding its way by various unsuspected channels, may invade the most cleanly and carefully-ordered household. The frequent mode by which it is spread is through the water-supply. A small quantity of the infectious matter of the disease is sufficient to poison the contents of a well or cistern, and thus to give rise to an outbreak among the susceptible who depend upon such source of supply. Or this water may, as has frequently been proved, be used for dairy purposes, and so introduce the infection into families, supplied with milk from such dairy, miles away from the source of danger.

The poison of Typhoid Fever exists, principally, in the discharges from the bowels of those suffering with the disease; and so well has the deadly character of such discharges been established, that attempts have been made to secure legislation enforcing the compulsory disinfection of the intestinal evacuations of all Typhoid Fever patients. This is, of course, impracticable; and whatever is done in this direction to limit the prevalence of the disease, can only be accomplished through the spread of knowledge concerning its character and mode of diffusion. In this work boards of health can do little unaided by the family physician. Upon him rests the responsibility of seeing that thorough disinfection is carried out in every case of Typhoid Fever he may be called to treat.

To assist in the discharge of this responsibility, the following memorandum, concerning the sanitary aspects of Typhoid Fever, and the instructions as to disinfection, etc., have been prepared, and are published in the hope of making more effective the efforts to restrict the spread of a disease which so eminent an authority as Dr. Parkes has pronounced “altogether and easily preventable.”

I.—Its Sanitary Features.

1. For sanitary purposes, Typhoid Fever is a contagious disease. Its specific poison will produce the same disease if introduced into the system of a susceptible healthy individual.
2. Like small-pox, scarlet fever, and many other contagious diseases, one attack of Typhoid Fever, as a rule, protects from subsequent attacks.
3. The specific poison of Typhoid Fever is contained in the diarrheal discharges (and, possibly, in other excretions and the exhalations,) of the patient. If these obtain access to a water-supply, or to articles of food or drink, an outbreak of Typhoid will follow among those partaking of such water or food. Repeated instances of this kind have been traced to the use of water from an infected well and to infected milk.
4. The diarrheal discharges, when dry, may preserve the poison as effectually as the crusts of small-pox, the scales of scarlet fever, and the dried membrane of diphtheria preserve the specific poisons of those diseases.
5. These discharges, coming into contact with putrid animal matter, as by being thrown into water-closets and privies, are capable of saturating such matter with the Typhoid Fever poison in its most concentrated and virulent form.
6. Typhoid Fever may, therefore, be propagated in either of the following ways: (a) By poisoning the water supply through direct access of the discharges, or by their percolation through the soil. (b) By the aerial dissemination of the poison in dried particles of discharges or other excretions. (c) By exhalations from sewers, water-closets, privies, or other receptacles of these discharges.—By modes (a) and (b), articles of diet, both liquid and solid, may be contaminated, and thus give rise to outbreaks of the disease.
7. From the foregoing the deduction is obvious that the important sanitary indication, during the existence of a case of Typhoid Fever, is to subject the intestinal discharges and other excretions of the patient, to such process of disinfection as will destroy the specific poison contained, and to do this promptly and efficiently.

II.—Prevention of its Spread.

1. When a case of Typhoid Fever is known to exist in a neighborhood, strict examination should be made regarding the surroundings and character of the water-supply of the locality. If there be any reason to suspect that this may be possibly contaminated from the case, its use should be forbidden until the proper measures can be taken to protect it against such contamination, and the question of its safety be definitely settled. The location of wells, with reference to the privy into which Typhoid discharges are thrown, the inclination of the ground between such points, and the character of the soil, should all be taken into consideration. Wells into which surface-washings from the infected premises might find their way by the natural slope of the ground, and wells within a given distance of the privy of such premises, should be at once abandoned. The contaminating distance varies according to the nature of the soil and the depth of the well, in a loose, porous soil, a well 30 to 40 feet deep will be dangerous if within 100 feet of the Typhoid premises.
2. If the case exists in a sewered neighborhood, every householder whose premises connect with a sewer in common with the infected house, should have a thorough inspection made of the drainage of his own premises. If the sewer connection be not broken by a proper ventilating shaft, extending above the highest point of the roof, such shaft should be provided forthwith. All interior plumbing should be examined, defective joints repaired, traps put in order, and the flushing devices of water-closets made effective.
3. Scrupulous cleanliness in every portion of the premises should be enforced. All decaying animal and vegetable matter, and every kind and source of filth in and around the house should be removed, and disinfectants be freely used. Surface drains and gutters, areas, out-houses, privies, shelters for domestic animals, fowls, etc., should receive close and constant attention, and the *Copperas Disinfectant* be used freely and regularly in every such place.
4. The precautions recommended to prevent the extension of the infection to other localities, are of even more importance upon the premises where a case of Typhoid Fever exists. Here there is the greatest danger of the poison finding lodgment in the soil which favors its growth and intensity, namely, filth in any form. Therefore, the advice given in No. 3 should be rigidly carried out, in its every detail, upon the infected premises.
5. Within the infected house itself the important matter to attend to is the prompt disinfection of the discharges from the patient, and of every thing liable to come in contact with such discharges. The following details should be observed:
 - (a) All discharges should be received in vessels containing a quart or so of the *Zinc Disinfectant*, or a gill of a concentrated (5 per cent.) solution of chloride of zinc.
 - (b) If there be a water-closet, this should be used exclusively for the discharges from the patient while the fever lasts, and the receptacle should be flooded three or four times a day with the *Zinc Disinfectant*.
 - (c) When practicable—instead of being thrown into a privy—the discharges, after being thoroughly disinfected, should be buried in the ground, at least 100 feet away from any well or other source of water-supply.
 - (d) A pail or tub of the *Zinc Disinfectant* should be kept in the sick-room, and into this all clothing, blankets, sheets, towels, etc., used about the patient or in the room, should be dropped immediately after use, and before being removed from the room. They should then be

well boiled as soon as practicable. Rags, closet-paper, or other material used about the person of the patient, should be immediately burned. (e) The sick-room should be large, easily ventilated, and as far from the living and sleeping-rooms of other members of the family as it is practicable to have it. All ornaments, carpets, drapery, and articles not absolutely needed in the room should be removed. A free circulation of air from without should be admitted both by night and day—there is no better disinfectant than pure air. Place the bed as near as possible in the middle of the room, but keep the patient out of draughts. (f) Not more than two persons, one of them a skillful, professional nurse, if obtainable, should be employed in the sick-room, and their intercourse with other members of the family should be properly restricted. If possible, the attendants should be selected from those who have already had Typhoid Fever. In the event that it becomes necessary for an attendant to go away from the house, a change of clothing should be made, using such as has not been exposed to infection; the hands, face and hair should be washed in thymol water, or chloride of zinc solution—half an ounce of chloride of zinc to one gallon of water.

6. After recovery, or during convalescence, the patient is to be considered dangerous so long as the intestinal discharges continue to be more copious, liquid and frequent than natural; and disinfection should be maintained until the attending physician advises that it is no longer necessary.

7. In the event of death, the clothing in which the body is attired should be sprinkled with thymol water, the body wrapped in a disinfectant cerecloth (a sheet thoroughly soaked in the *Zinc Disinfectant, double strength*.) and placed in an air-tight coffin, *which is to remain in the sick-room until removed for burial*. Public funerals are not advisable.

8. After recovery or death, all articles worn by, or that have come in contact with the patient, together with the room and all its contents, should be thoroughly disinfected by burning sulphur. To do this, have all windows, fire-places, flues, key-holes, doors, and other openings securely closed by strips or sheets of paper pasted over them. Then place on the hearth or stove, or on bricks set in a wash-tub containing an inch or so of water, an iron vessel of live coals, upon which throw three or four pounds of sulphur. All articles in the room and others of every description that have been exposed to infection, which can not be washed or subjected to dry heat, and are yet too valuable to be burned, must be spread out on chairs or racks; mattresses or spring beds set up so as to have both surfaces exposed; window-shades and curtains laid out at full length, and every effort made to secure thorough exposure to the sulphur fumes. The room should be kept tightly closed for twenty-four hours. After this fumigation—which it will do no harm to repeat—the floor and wood-work should be washed with soap and hot water, the walls and ceiling whitewashed, or, if papered, the paper should be removed. The articles which have been subjected to fumigation should be exposed for several days to sunshine and fresh air. If the carpet has unavoidably been allowed to remain on the floor during the illness, it should not be removed until after the fumigation; but must then be taken up, beaten, and shaken in the open air, and allowed to remain out of doors for a week or more. If not too valuable, it should be destroyed; but, whenever practicable, it should be removed from the room at the beginning of the illness.

After the above treatment has been thoroughly enforced, the doors and windows of the room should be kept open as much as possible for a week or two. Where houses are isolated, articles may be exposed out of doors. The entire contents of the house should be subjected to the greatest care, and when there is any doubt as to the safety of an article it should be destroyed.

All this work should be done—both the disinfection and the destruction of property—under the direct supervision of the local authorities or attending physician.

9. Such articles of clothing, bedding etc., as can be washed, should first be treated by dipping in the *Zinc Disinfectant*; they should then be immediately and thoroughly boiled.

The ticking of beds and pillows used by the patient should be treated in the same manner, and the contents, if hair or feathers, should be thoroughly baked in an oven. If this can not be done, they should be destroyed by fire, as should, in any event, all straw, husk, moss, or "excelsior" filling. The clothing of nurses should be thoroughly fumigated and cleaned before it is taken from the house, or, better still, burned, if feasible.

10. Cases of Typhoid Fever should be promptly reported to the proper health authority by the attending physician, or by the head of the family. Immediately upon receipt of notice of the existence of a case, the health officer should visit the locality and secure prompt compliance with the precautions above set forth. He should make a careful investigation as to the probable cause of the outbreak, and if this be found to be due to an infected water- or milk-supply, the use of such supply should be rigidly interdicted, and the necessary steps at once taken to correct the evil.

He should superintend the disinfection of rooms, clothing and premises; and, finally, give official certificates of recovery, and of freedom from liability to communicate the disease to others. Until these latter are issued, a system of isolation or quarantine should be maintained with regard to an infected house and its contents—persons and things.

In the event of death from a malignant case, or where there are a number of severe cases in one house or locality, the health officer should exercise even greater authority than here indicated. He should enforce disinfection, cleansing of premises, abandonment of suspected water, and other measures, arbitrarily, if necessary; and, in his discretion, should forbid public funerals where the conditions—either of the disease as to virulence, or of the sanitary surroundings—warrant such a course.

Where there is no health officer, the attending physician should see that the proper precautions are carried out, as herein advised.

11. Painless diarrhea, or simple "looseness of the bowels," occurring, in one who has never had Typhoid Fever, should excite suspicion while this disease exists in a neighborhood. The disease varies in the intensity of its symptoms, so that mild, walking cases are not uncommon. It is advisable, therefore, that *all* diarrheal discharges should be disinfected during the existence of Typhoid Fever in a community.

*** Best Disinfectants.—**

Sunlight, fresh air, soap and water, thorough cleanliness—for general use.

For special purposes the following are the most efficient, the simplest and the cheapest:

I.—Copperas Disinfectant.

Sulphate of iron (copperas).....one and one-half pounds.
Water.....one gallon.

A convenient way to prepare this is to suspend a basket containing about sixty pounds of copperas in a barrel of water. The solution should be frequently and liberally used in cellars, privies, water-closets, gutters, sewers, cess-pools, yards, stables, etc.

II.—Sulphur Disinfectant.

Roll sulphur (brimstone).....two pounds.

To a room ten feet square, and in the same proportion for larger rooms. See *Rule 8*, of Section II, for mode of use.

III.—Zinc Disinfectant.

Sulphate of zinc (white vitriol).....one and one-half pounds.
Common salt.....three-quarters of a pound.
Water.....six gallons.

For application and modes of use see *Rules 5, 7, and 9* of Section II.

IV.—Thymol Water.

Made by adding one teaspoonful of *Spirits of Thymol* to half a gallon of water. *Spirits of Thymol* is composed of—

Thymol.....one ounce.
Alcohol, 85° et.....three ounces.

May be used for all the disinfectant purposes of carbolic acid; it is quite as efficient in this strength, and has an agreeable odor. See *Rules 5 and 8* for application and uses. Where thymol is not available, chloride of zinc solution may be used—half an ounce of chloride of zinc to one gallon of water.

Copies of these Circulars can be obtained by applying to the Secretary of the State Board of Health, Springfield.

* Appended to each of the Preventable-Disease Circulars.

SANITARY COUNCIL OF THE MISSISSIPPI VALLEY.

The following is the full text of the report of the proceedings of the Sanitary Council of the Mississippi Valley, at its fifth annual meeting, Jackson, Mississippi, April 3 and 4, 1883, referred to by the Secretary in his quarterly report submitted at the April meeting of the STATE BOARD:

In accordance with the discretionary power conferred upon the Executive Committee at the last annual meeting, to call together THE SANITARY COUNCIL OF THE MISSISSIPPI VALLEY "at such time and place as may seem necessary," the fifth annual meeting of the COUNCIL was held at Jackson, Mississippi, beginning on Tuesday, April 3, 1883.

In addition to the regular members of the COUNCIL, representatives of the leading commercial, transportation and industrial interests of the Valley were invited, by the following circular letter, to be present:

SPRINGFIELD, ILL., MARCH 13, 1883.

DEAR SIR:

The suspension of some of the most important functions of the National Board of Health—especially its Sanitary Inspection Services; the attitude of the Louisiana State Board of Health toward the New Orleans Auxiliary Sanitary Association, and toward other State Boards of Health in the Valley; the continuance of Asiatic cholera in threatening proximity to lines of travel, and the prolonged existence of a fatal form of *cholera nostræ* in some parts of Mexico;—together with other considerations touching the public health, combine to renew the interest which originally attached to the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY.

It now seems probable that it will only be by such co-operative action as can be secured through the COUNCIL that commerce and travel in the Valley will escape, during the coming summer, the interferences from conflicting and irresponsible local quarantines, which obtained prior to the inauguration of the Inspection Service of the National Board of Health.

At the forthcoming session of the COUNCIL, to be held at Jackson, Mississippi, April 3, proximo, these matters will be discussed, and an attempt be made to secure such uniformity of action, in necessary measures for the protection of the public health, by local and State boards, as shall be least onerous to commercial intercourse, travel and traffic.

You are earnestly invited to be present in person at this meeting of the COUNCIL, and to secure the attendance of other representatives of commercial, transportation and industrial interests.

By order of the Executive Committee.

GUSTAVUS DEVRON, *Louisiana,*
President.
D. B. HILLIS, *Iowa,*
Vice-President.
JOHN H. RAUCH, *Illinois,*
Secretary.

In response to this invitation, and to the regular notification, the following-named representatives and delegates assembled in the hall of the House of Representatives, in the Capitol at Jackson, Mississippi, on the morning of April 3:

ARKANSAS: Dr. J. A. Dibbrell, Jr., Little Rock, Secretary State Board of Health.

ILLINOIS: Drs. W. A. Haskell, Alton, member, and John H. Rauch (Secretary of THE COUNCIL) Secretary, State Board of Health; J. M. Hall, Chicago, Health Department; Jas. G. Kiernan, Chicago; R. J. Curtiss, Joliet; B. M. Griffith and J. L. Million, Springfield; A. Schlernitzauer, Bellaville; P. H. Barton, Danville; H. LeCaron, Braidwood; W. A. Doak, Martinsville; Heber Robarts, Carbondale.

INDIANA: Dr. H. G. Jones, Evansville, Health Department.

IOWA: Dr. W. H. Dickinson, Des Moines, member State Board of Health.

LOUISIANA: Drs. Gustav Devron and L. F. Salomon, and Messrs. Edward Fenner and W. B. Schmidt, New Orleans Auxiliary Sanitary Association; Drs. D. C. Hollday and J. M. Watkins, New Orleans Medical and Surgical Association; Dr. W. G. Austin, Orleans Parish Medical Society; Col. J. C. Clarke, Vice-President Illinois Central R. R., South Div.; Messrs. Adolph Schreiber and John Chaffee, New Orleans, Cotton Exchange; George Purvis, Lumber Exchange; W. M. Smallwood, Produce Exchange, and G. H. Ryan and Wm. Grayner, members of the City Council.

*MISSISSIPPI: Drs. F. W. Dancy, President; Wirt Johnston, Secretary, and S. V. D. Hill, W. F. Hyer, Robert Kells, B. F. Kittrell, C. A. Rice, J. M. Taylor and J. Wright, members State Board of Health; Messrs. A. M. Paxton and A. Shelton, Vicksburg.

MICHIGAN: Dr. R. C. Kedzie, Lansing, representing State Board of Health.

MISSOURI: Drs. Joseph Spiegelhalter and Robert Luedeking, St. Louis Board of Health; Dr. W. B. Outten, representing the M. P. & S. W. railway system.

OHIO: Dr. L. C. Carr, Cincinnati.

TENNESSEE: Dr. G. B. Thornton, Memphis, member State Board of Health; Hon. David P. Hadden, Memphis, President Legislative Council; Messrs. S. L. Barinds, Memphis Cotton Exchange, and John K. Speed, Memphis Merchants' Exchange.

WISCONSIN: Prof. W. W. Daniels, Madison, member State Board of Health.

The COUNCIL was called to order by the President, Dr. Devron, of Louisiana, and the session was opened with prayer by the Rev. Dr.

*The Mississippi State Board of Health was also in session in Jackson at the same time, and attended the meeting of the COUNCIL in a body.

John Hunter; after which his Excellency, Governor Lowry, welcomed the delegates and representatives to the capital of his State, and expressed the belief that their deliberations would be characterized by such concert of action as would inspire confidence among the people that every proper measure would be employed to prevent the introduction and spread of infectious disease. He entirely appreciated the importance of the deliberations of such a body, composed alike of those vested with authority in matters of quarantine and other subjects connected with the preservation of the public health, and of representatives of the great material interests of the West and South—interests so quickly and profoundly affected by quarantine restrictions, not less than by the rumors, often baseless and unfounded, but which served, nevertheless, to throw communities into panic and alarm. Mississippi is fully alive to the dangers arising from the neglect of proper precautions; from want of concert of action between neighboring States and communities; and from the absence of authoritative and trustworthy information from exposed points. With implicit confidence in the wisdom, integrity and ability of the State Board of Health, which is clothed with ample power and supplied with abundant means, he felt warranted in pledging the State of Mississippi to earnest and cordial co-operation in the objects of the Council, to which it was unnecessary to add assurances of his own personal and official sympathy and support.

On behalf of the citizens of Jackson and of the State, the *Clarion* editorially addressed the Council in the following terms, given in this connection as clearly outlining the situation and the problems to be discussed:

No more important body has ever met in the Mississippi Valley than the grave and deliberative assembly known as the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY, now in session in this city. It is composed of citizens of the highest and most responsible occupations and stations in society. Members of the learned profession of medicine, which stands first in its sublime work of benevolence—men of commerce, and practical humanitarians, whose life-long labor of love is the good of their fellowmen. These representatives are bound together by the ties of a common country, a common hope for its prosperity, and that touch of generous human nature which makes the whole world kin.

As the means of rapid intercommunication between our own and foreign countries have increased, the dangers of the introduction of yellow fever and other pestilential diseases have grown proportionately. Experience has demonstrated that State and local sanitary organizations, though useful in their way, are not sufficient protection against such visitations, and it was found necessary to establish a National Health system which would be uniform, simultaneous and vigorous in its operation. Inspired by this knowledge, Congress, on the 3d of March, 1879, passed an act "to prevent the introduction of infectious or contagious disease into the United States, and to establish a National Board of Health." The whole country applauded its wisdom; and on the 2d of June, 1879, thus encouraged, it passed a more general act enlarging the powers of the National Board of Health and placing a sufficient sum of money at its disposal for the performance of the important trusts devolved upon it. How well the Board acquitted itself of its obligations, and subserved the objects of this beneficent legislation, has become history. Unfortunately, the last Congress, owing to petty jealousies of one kind and another not necessary to be mentioned here, crippled its power and deprived it of the means absolutely needed for the successful execution of its functions. At its first session one hundred thousand dollars were placed at the disposal of the President, instead of the Board; it was diverted into other hands for disbursement, with what unsatisfactory results the country is but too well informed. At the late session the blunder was repeated, and no action was taken to continue in force the law of June, 1879, which will expire in June next—four years from the date of its approval.

In this grave emergency, the SANITARY COUNCIL has met, to devise measures for supplying the omissions of the National Legislature, so far as in it lies, and to suggest a method for concerted action by State and local organizations. Also to appeal to the President to select the National Health Board as the agent for the disbursement of the money appropriated by Congress, over which he has discretionary control. The object is commendable. The danger is imminent. The power and the duty of the National authority to expend money according to the sum needed to ward off pestilential diseases can not be questioned. If the power to "regulate commerce" confers authority to clean out harbors and improve the navigation of streams, it certainly exists to divest commerce

of the horrors of disease which carries death to thousands, and spreads desolation and destruction. If the government has power to appropriate money for the relief of sufferers by Providential dispensations like flood and famine, who will question its duty to stand sentinel at the outposts to protect the country from the ravages of the horrible diseases which, on repeated occasions, have ravaged communities? We bid Godspeed to the SANITARY COUNCIL, and, in the name of Mississippi, pledge an earnest co-operation in whatever measures it may adopt to accomplish the objects of its assembling.

Under the regular order of business, at the conclusion of Governor Lowry's address, the roll of members was called. The minutes of the fourth annual session, held at Cairo, Illinois, April 19-20, 1882, and of a special meeting held at Indianapolis, Indiana, October 19, 1882, during the session of the American Public Health Association in that city, were then read and approved.

On motion of Dr. Rauch, of Illinois, the delegates, *in posse*, whose names had been signed as in attendance, and had presented proper credentials, were elected to membership.

On behalf of the Executive Committee, the President, as Chairman of the Committee *ex officio*, addressed THE COUNCIL as follows:

GENTLEMEN:

Those members who have been previously present at sessions of the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY may recognize in the presence of the present delegation representatives from the commercial and other interests not heretofore represented, they having been invited by the Executive Committee, who in, tendering such invitations, deemed the present convention of vital importance to all.

The main and sole object of this body is the protection of human life from imported and contagious diseases from any point, and this object is to be attained with the least possible restriction to travel and commerce. New Orleans has been considered the source of pestilence, producing yellow fever, and non-residents as well as residents sustained this view. Non-residents are also under the impression that the city is the source and cause of danger, while the citizens, or a part of them, recognized no necessity for quarantine.

Experience has taught the public at large, as well as the medical profession, that yellow fever does not originate in New Orleans, nor will it ever propagate there to any excessive and dangerous extent if that city is kept clean. The experience and labors of the Sanitary Association, in preserving the gutters, canals and streets in complete and good condition, have proven the above assertion beyond a doubt; and as the merchants of New Orleans are fully aware that the city can never be a large and prosperous commercial metropolis so long as it is supposed to be a center for the distribution of yellow fever, they will contribute, freely and with open hands, funds to the Sanitary Association, and thus continue the good work of keeping the city clean and free from imported disease. Again, though the Board of Health of Louisiana is not represented in this convention, that body has given the visiting delegates from New Orleans very positive assurance that a strict and rigid quarantine shall be established and maintained, from May 1, at all ports of entry in the State of Louisiana.

If any case of yellow fever or suspicious case should occur in the city of New Orleans, they have pledged themselves to give immediate, accurate, complete and truthful information of the same to the health officers of this Valley.

In order that this statement may not be taken as the opinion of a member of that Board, a special session will take place this very day, if it was not held within the past twenty-four hours, and resolutions will be passed to this effect, and will be transmitted to this Convention before adjournment.

Moreover, if any question or request from this COUNCIL be transmitted by telegram to the President or Conference Committee of the Board of Health of Louisiana, a special meeting will be held and the answer thereto immediately returned; thereby securing a better understanding than can result from the assertion of any delegate from that body, who can not bind the Board of Health by his representation or acts. The National Board of Health, through its Secretary, has informed those interested in its objects that it yet continues its work of inspection and co-operation with the State and local authorities; but, as its time of existence is limited to some time in June, the successor to this organization must be created by the COUNCIL in order that the old shotgun and other unnecessary quarantines be not repeated as they existed previous to the creation of the National Board of Health, and this is a subject of importance for the discussion, consideration and decision of the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY.

Under a call for reports from special committees, Dr. Rauch, the Chairman of the Committee on Immigrant Inspection, with reference to small-pox importation, reported that the inspection service of the National Board of Health, endorsed and recommended by the COUNCIL at its Cairo meeting, was begun on the 1st of June last, and

continued, substantially, up to the close of December. Its value had been amply demonstrated, alike in the protection of our own people from imported contagion over a vast area of country, especially in the interior, extending from Minnesota to Texas; in protecting the immigrant from the results of his own neglect; and in relieving common carriers from the menace of local and State quarantines of exclusion. The committee was unanimous as to the desirability of a continuance of the service, of which, however, there was little prospect, in the present crippled condition of the National Board of Health.

Dr. Hyer, of Mississippi, moved that the report of the committee be adopted. Carried.

Dr. Salomon, of Louisiana, from the Committee on the Effects of the Mississippi Overflows on the Public Health, made a verbal report of progress, and referred to an elaborate paper of Dr. Stanford E. Chaille, of New Orleans, on this subject, in which the data of seventeen inundations of New Orleans, between 1718 and 1881, are studied. The conclusion arrived at by Dr. Chaille, from the facts and views cited in his paper, is that they "fail to indicate that the partial inundations of New Orleans have ever influenced unfavorably its mortality, whether by yellow fever, by cholera, by malarial fevers or diseases generally."

On motion of Dr. Jones, of Indiana, the report was received and the committee granted further time.

The report of the Treasurer was received and referred to the Auditing Committee, consisting of Messrs. Chaffee, Hadden and Fenner.

On motion of Dr. Kedzie, of Michigan, a committee of one from each State represented in the Council, was authorized to formulate the new business for the meeting. The committee was composed as follows:

| | |
|--------------------------------|---|
| J. A. DIBBLELL, JR., Arkansas. | W. F. HYER, Mississippi. |
| B. M. GRIFFITH, Illinois. | JOS. SPIEGELHALTER, Missouri. |
| H. G. JONES, Indiana. | L. C. CAIR, Ohio. |
| W. H. DICKINSON, Iowa. | G. B. THORNTON, Tennessee. |
| D. C. HOLLIDAY, Louisiana. | W. W. DANIELS, Wisconsin. |
| | R. C. KEDZIE, Michigan, <i>Chairman</i> . |

To this committee was referred the President's address, reports of various committees and the following communication, furnished by Dr. Thornton, of Tennessee:

NATIONAL BOARD OF HEALTH,
WASHINGTON, March 26, 1883.

DR. J. H. PURNELL, *Secretary Board of Health, Memphis, Tenn.*:

DEAR SIR—Inquiries having been received at this office concerning the action to be taken by the National Board of Health during the yellow fever season, I have been instructed to communicate to you the intentions of the Board, so far as they can be formed with certainty under present conditions.

The law of 1879, under which the Board maintains its refuge stations at Ship Island, Miss., Sapelo Sound, Ga., and Elizabeth river, Virginia, and its inspection service at New Orleans and on the Mississippi river, will expire on June 2d next.

There has, however, been appropriated by the sundry civil appropriation bill of March 3d last, the sum of \$100,000 to be used by the President in case of an actual or threatened epidemic in aid of State and local boards or otherwise, in his discretion, for preventing or suppressing the disease, and maintaining quarantine at points of danger.

As the Board has the authority and the means to open its stations in aid of State and local boards for the prevention of the introduction and spread of yellow fever, it proposes to do so some time in May next, to co-operate with the local authorities as heretofore, and to continue the work until its authority shall have expired. If, in the meantime, the President should come to the assistance of the Board with the epidemic appropriation placed at his disposal, the work can be continued until the close of the season of danger; but should the Board be disappointed in this, its power to aid will cease, and State and local authorities will have to take such action in the case as may seem good to them.

I am, Sir, with much respect,

C. H. SMART.

Major and Surgeon U. S. A., and Secretary National Board of Health..

On motion, the COUNCIL then adjourned until 2 o'clock p. m.

AFTERNOON SESSION—APRIL 3.

At half-past 2 p. m. the President called the COUNCIL to order.

The Secretary read a number of communications, among them regrets at unavoidable absence and expressions of approval of the COUNCIL and its objects and methods, from Dr. J. J. Speed, Secretary of the Kentucky State Board of Health; Dr. R. B. S. Hargis, of the Pensacola, Fla., Board of Health; Dr. Hillary Ryan, Caldwell, Texas; Dr. A. W. Cantwell, Health Officer, Davenport, Ia.; Dr. Pinckney Thompson, of Henderson, Ky., member State Board of Health; the St. Louis Cotton Exchange, railway officers and steamboatmen of St. Louis and Memphis, and other individuals and organizations. He also announced that Col. Clarke had tendered free transportation to members of the COUNCIL for a visit to New Orleans.

Pending the report of the Business Committee, Col. Clarke was invited to address the members on the relations of sanitation to commerce, and responded in a terse, vigorous and eminently common-sense speech. He dealt especially with the relations of sanitary work to railroads, and of the pecuniary value of such work to all classes of common carriers, whether by rail or river. Its importance to the Nation was dwelt upon, and the hope expressed that a National Health Department would be some day established. He briefly alluded to the relations of the COUNCIL to the Louisiana State Board of Health, and trusted that any existing differences might be speedily removed and harmony between all health organizations and officials prevail.

Dr. Outten, for the Missouri, Pacific and Southwestern railway system, followed in the same general strain, and expressed the interest felt by the general transportation officials of St. Louis in the work of the COUNCIL.

The Hon. Edward Fenner, First Vice-President of the New Orleans Auxiliary Sanitary Association, detailed the objects of that organization and what it had accomplished for New Orleans.

Mr. T. W. Ryan, of the New Orleans City Council, spoke briefly on behalf of the municipal authorities of that city, and expressed their sympathy with the objects of the SANITARY COUNCIL.

The Hon. D. P. Hadden, President of the Legislative Council of the Taxing District, gave an account of the working of the Waring drainage and sewerage system of Memphis, and stated that the sani-

tary condition of the city was much improved by this and by the other work recommended by the National Board of Health Commission.

The Secretary read a communication from the Secretary of the Louisiana State Board of Health, transmitting the preamble and resolutions adopted by that body as the result of a request of the State, parish and New Orleans medical societies, "that the State Board of Health appoint immediately a committee to confer with committees from said societies, and with a third committee, to be appointed by the New Orleans Auxiliary Sanitary Association, for the purpose of discussing in joint meeting such subjects as are likely to come up before the meeting of the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY, which is to take place on Tuesday, April 3, in Jackson, Miss."

The preamble and resolutions of the Louisiana Board are as follows:

WHEREAS, At a conference meeting of the several delegations of the medical, commercial and sanitary organizations of New Orleans, held on the thirt-first ultimo, it was resolved that the State Board of Health of Louisiana reaffirm and set forth its previous declarations in relation to matters connected with the prevention of the introduction of contagious diseases through the maintenance of a rigid quarantine through the summer months; be it, therefore,

Resolved, That the State Board of Health of Louisiana hereby declares as follows:

1. That it will maintain during the summer months a system of rigid maritime quarantine for the exclusion of contagious diseases, in accordance with the proclamation of the Governor, just issued.
2. That it will give to the boards of health of surrounding States prompt information of the appearance of yellow fever in New Orleans, and in no manner (in the future, as in the past,) will it tolerate any attempt to conceal or suppress the knowledge of the existence of any cases or suspicious cases of that disease.
3. That it will permit its health records to be examined by any citizen of Louisiana or by any citizen of any other State, located in New Orleans, properly delegated by any kindred organization for the performance of that duty.
4. That the resources of the State Board of Health for quarantine purposes are fully adequate to enable it to guarantee that there will be no interruption to the same.

On motion of Dr. Austin, of Louisiana, the communication was received, and, after some discussion, the preamble and resolutions were referred to the Business Committee.

On motion, the Council adjourned to Wednesday morning at 9 o'clock.

WEDNESDAY, APRIL 4.

THE COUNCIL was called to order by the President at 9:30 a. m., and immediately proceeded to the consideration of the following report, submitted by Dr. Kedzie, Chairman of the Business Committee, and which, after discussion and amendment, was adopted:

Mr. President:

The committee, consisting of one member from each State represented in the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY, to formulate a project of business for the consideration of the COUNCIL, presents, as its report, the following preamble and resolutions, and recommends their adoption:

WHEREAS, It is the sense of the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY that the National Board of Health possesses to the fullest extent the confidence of the States of the Valley; it is, therefore

Resolved, That a committee be appointed by the President of this COUNCIL to petition the President of the United States to place the \$100,000 epidemic fund in the hands of the National Board of Health for disbursement in case its use is demanded.

Resolved, That in case the National Board of Health is deprived of the power of making inspections of persons and freight when demanded by the local boards of health, certificates issued under the supervision of a representative or representatives of the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY shall be accepted as valid by the boards of health of the Mississippi Valley, provided that said inspections be carried on under the rules and regulations heretofore prescribed by the National Board of Health.

Resolved, That the SANITARY COUNCIL recommends that the States of the Valley make voluntary contributions, to be expended under the direction of the Executive Committee of this COUNCIL, to continue river and rail inspections in the event that no funds are placed in the hands of the National Board of Health for that purpose.

Resolved, That the SANITARY COUNCIL recommends for the guidance of the health organizations of this Valley, the system of inspection, isolation, disinfection and quarantine heretofore prescribed by the National Board of Health.

Resolved, That the communication of the Louisiana State Board of Health be received in the spirit in which it is tendered, and that its co-operation with the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY, in protecting the Valley from epidemic diseases, will be cordially approved and acknowledged.

All of which is respectfully submitted.

R. C. KEDZIE, *Chairman*.
B. M. GRIFFITH.
W. H. DICKINSON.
JOS. SPIEGELHALTER.
G. B. THORNTON.

J. A. DIBBRELL, JR.
H. G. JONES.
W. T. HYER.
L. C. CARR.
W. W. DANIELS.

D. C. HOLLIDAY, *Secretary*.

The practicability of carrying out the third resolution was discussed by Drs. Dibbrell, Thornton, Outten, Spiegelhalter and Holliday, and by Messrs. Hadden and Schmidt. Dr. Rauch, in reply to a question from Dr. Holliday, said he was satisfied that the money could be raised for such a purpose; that the Illinois State Board of Health would do its share; that he knew of the existence of one corporation that would not hesitate to assume the support of at least one inspector in New Orleans, and called attention to the following passage from the letter of Mr. Thomas H. West, President of the St. Louis Cotton Exchange, as an earnest of the sentiment of commercial organizations and business men: "We believe such measures are not only necessary to guard the public health, but of vast importance to the commercial interest; and this Exchange will gladly use its influence in aiding the COUNCIL in carrying out any practical system of quarantine for the general good of the Mississippi Valley."

Colonel Clarke decried the parsimony of the General Government in withholding the few thousand dollars necessary for the protection of the health and business welfare of thirty millions of people, and pledged himself to further the purpose of the resolution in every way possible.

The President announced the following as the committee to prepare the memorial provided by the first resolution:

J. A. DIBBRELL, JR., M. D., Arkansas.
W. A. HASKELL, M. D., Illinois.
H. G. JONES, M. D., Indiana.
W. H. DICKINSON, M. D., Iowa.
JAS. J. SPEED, M. D., Kentucky.
Hon. EDWARD FENNER, Louisiana.

R. C. KEDZIE, M. D., Michigan.
F. W. DANCY, M. D., Mississippi.
JOS. SPIEGELHALTER, M. D., Missouri.
L. C. CARR, M. D., Ohio.
Hon. D. P. HADDEN, Tennessee.
Prof. W. W. DANIELLS, Wisconsin.

The committee was instructed to secure the endorsement of the Governors of their respective States for the memorial, and to induce them to use their full influence in its favor.

On motion, the COUNCIL took a recess for dinner.

AFTERNOON SESSION—APRIL 4.

On convening, at 2 o'clock p.m., Dr. Rauch moved that the next annual meeting of the COUNCIL be held on the third Wednesday in March, 1884, unless circumstances arise to justify the Executive Committee in calling it for an earlier date. Adopted.

He also called attention to a suspicious cholera-like affection prevailing in some portions of Mexico, and suggested the necessity of vigilance on the part of the Gulf and Rio Grande authorities concerning its spread.

The election of officers being next in order, Dr. WIRT JOHNSTON, of Jackson, Miss., was nominated for President, and elected by a ballot cast by the Secretary at the request of the COUNCIL. The Hon. D. P. HADDEN, of Memphis, was duly elected Vice-President.

The following votes of thanks were tendered, with the usual remarks:

To the retiring President, Dr. Devron, for the dignity and ability shown by him as presiding officer.

To Col. J. C. Clarke, for the courtesies shown by him to the COUNCIL.

To the press, for its careful and exact reports and the aid furnished by it in the furtherance of the objects of the COUNCIL.

To the citizens and authorities of Jackson, Miss., for their cordial reception and many hospitalities.

The Auditing Committee reported that the accounts of the Treasurer had been examined and found correct.

The following draft of the memorial of the President of the United States, authorized at the morning session, was submitted by the Committee:

To the President:

We, a committee appointed by the SANITARY COUNCIL OF THE MISSISSIPPI VALLEY, at its fifth annual meeting, in the city of Jackson, Miss., April 3-4, 1883, do humbly but sincerely petition that the fund of \$100,000, to be used, with your approval, in the event of an outbreak of yellow fever or other epidemic disease on the coasts of our country, be placed at the disposal of the National Board of Health.

That body can give confidence to the people of the Valley as to the necessary precautions and safeguards yearly demanded by the exposure of our Southern ports to the ravages of yellow fever. Their inspection stations and the mode their officers have adopted in isolation and disinfection, establishing quarantine only when emergency or occasion demands it, have earned for the National Board a degree of confidence that, of itself alone, is worth millions of dollars to the commerce of the country.

To supplant this body, or withhold from it the necessary funds to maintain inspection stations at all exposed points, will, in our humble judgment, clog the wheels of commerce by bringing about a feeling of distrust on the first alarm, be it true or false, and cause recourse to the shot-gun policy of quarantine, which can but prove destructive to the commercial interests of the Mississippi Valley, which, in a measure, affect those of the entire Union.

With these views, submitted with full faith in your judgment, and appreciation of the solicitude you must feel for the welfare of the public health, we herewith subscribe ourselves, your most humble petitioners.

On motion, the draft of the memorial was approved, and it was ordered to be engrossed and signed by the delegates from the States of Ohio, Indiana, Illinois, Kentucky, Iowa, Tennessee, Missouri, Michigan, Wisconsin, Louisiana, Arkansas and Mississippi, and to be forwarded to the President at Washington.

The following preamble and resolution were introduced and unanimously adopted:

WHEREAS, The commendable interest of the Auxiliary Sanitary Association of New Orleans, as manifested by its local work, in practical sanitation and its efforts to maintain a high standard of public health in that city, since its organization in 1879, as well as to restore confidence in communities outside of New Orleans having commercial intercourse with it, by the prompt publication of reliable information pertaining to the public health of that city, entitle it to the confidence and moral support of this COUNCIL, and the whole Mississippi Valley; therefore,

Resolved, That this COUNCIL, rightly appreciating the objects and efforts of the Auxiliary Sanitary Association in the delicate and responsible duties it has assumed, to preserve the public health and at the same time maintain the integrity of the business interests of New Orleans and those having commercial relations with it, we hereby pledge our moral support to the Auxiliary Association as its just due, and heartily commend it to the confidence of all having commercial relations with New Orleans.

At the request of the President, the Secretary read the following letter from Dr. Hargis, of Pensacola, the paper therein referred to—
On the Sanitary Management of Yellow Fever—being received too late for action in the regular order:

PENSACOLA, FLA., April 2, 1882.

My Dear Dr. Devron:

I intended to leave this city for Jackson, Miss., this morning, but am prevented by a fortuitous circumstance. I deeply regret it, and the more because I had no premonition until a moment ago, and now have not time to say what I would like to say to the members of the COUNCIL on the occasion of the present meeting and its importance to future sanitation in the South, and especially the great Valley of the Mississippi.

I herewith transmit you a paper which I proposed to read to the COUNCIL and will thank you to read or have it read for me before that distinguished body.

As the mail closes in a few minutes I have scarcely time to add, that although I am debarred the pleasure and gratification of meeting the COUNCIL and participating in its deliberations in *propria persona*, it is gratifying to have the privilege to write that it has my warmest sympathies and sincere wishes for a pleasant and fruitful conference.

I remain, dear Dr., yours truly,

R. B. S. HARGIS.

On motion, the fifth annual meeting of the Council was declared adjourned *sine die*.

FINANCIAL STATEMENT

OF THE

ILLINOIS STATE BOARD OF HEALTH, FOR THE FISCAL YEAR ENDED
SEPTEMBER 30, 1883.

| | | |

NOTES.

DR. ROBERT A. MCLEAN, Dean of the Faculty, Med. Dept., University of California, furnishes (December 20, 1884,) the number of matriculates (43) and of graduates (15) at the last session of this college—the session ending October 31, 1884. These figures are included in the tables on pp. IX, XI, XIV, and XV; but were received too late for insertion in the body of the CONSPECTUS (p. 6).

THE Evansville Medical College of Indiana (since suspended), had a class of 12 matriculates, and graduated 4, at its last session—that of 1883-84. See page 28.

DR. PERRY H. MILLARD's postoffice address (Secretary of the Faculty, Med. Dept., Univ. of Minnesota,) is Stillwater, Minn. See page 50.

COMMENTS ON THE CONSPECTUS—SUMMARY AND TABLES.

THE Schedule of Minimum Requirements, adopted in 1880 by the ILLINOIS STATE BOARD OF HEALTH as its standard for determining the status of medical colleges under the Medical-Practice Act, took effect at the close of the lecture-sessions of 1882-83. Diplomas, issued at the close of the sessions of 1883-84, are accepted unconditionally—as sufficient warrant for the certificate of the BOARD, required by law—from all colleges which give evidence, in their Announcements and elsewhere, of an actual and bona-fide compliance with this Schedule. The diplomas of colleges which do not give such evidence are required to be supplemented by an examination before the BOARD, on the branches or subjects of the Schedule omitted by the colleges in question.

The specific publication of the curriculum of study and of the requirements for matriculation and for graduation, in the Annual Announcements of Colleges is desirable on many accounts. The omission of these data, or their obscure and imperfect presentation—as well as the failure to publish the names and addresses of matriculates and graduates—is calculated to throw doubt upon the character of the work of the school.

Up to the first of December, 1884, the diplomas (session of 1883-84,) of 47 colleges had been presented to the BOARD for verification and acceptance by applicants for certificates; and of this number, 26 had complied with the Schedule, and their Diplomas were accepted unconditionally. In the remaining 21, the applicants were required to undergo an examination on the branches or subjects omitted.

THE following is the

SCHEDULE OF MINIMUM REQUIREMENTS.

I. CONDITIONS OF ADMISSION TO LECTURE-COURSES.—1. Credible certificates of good moral standing. 2. Diplomas of graduation from a good literary and scientific college, or high school. Or, lacking this—a thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy.

II. BRANCHES OF MEDICAL SCIENCE TO BE INCLUDED IN THE COURSE OF INSTRUCTION.—1. Anatomy. 2. Physiology. 3. Chemistry. 4. Materia Medica and Therapeutics. 5. Theory and Practice of Medicine. 6. Pathology. 7. Surgery. 8. Obstetrics and Gynecology. 9. Hygiene. 10. Medical Jurisprudence (Forensic Medicine).

III. LENGTH OF REGULAR OR GRADUATING COURSES.—1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks, each. 2. Two full courses of lectures, not within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

IV. ATTENDANCE AND EXAMINATION OR QUIZZES.—1. Regular attendance during the entire lecture-courses shall be required, allowance being made only for absences occasioned by the student's sickness, such absences not to exceed twenty per centum of the course. 2. Regular examinations or quizzes to be made by each lecturer or professor daily, or at least twice each week. 3. Final examinations on all branches to be conducted, when practicable, by competent examiners other than the professors in each branch.

V. DISSECTION, CLINICS AND HOSPITAL ATTENDANCE.—1. Each student shall have dissected during two courses. 2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. TIME OF PROFESSIONAL STUDIES.—This shall not be less than three full years before graduation, including the time spent with a preceptor, and attendance upon lectures or at clinics and hospital.

VII. INSTRUCTION.—The college must show that it has a sufficient and competent corps of instructors, and the necessary facilities for teaching, dissections, clinics, etc.

A TOTAL of 234 different Medical Institutions, dating from the year 1765, are listed in the pages of the CONSPECTUS. Of this number the diplomas or licenses of 132 have been presented to the ILLINOIS STATE BOARD OF HEALTH for verification and acceptance—131 for the first time prior to the session of 1883-84, and one other for the first time since the close of that session. There are now remaining in existence 128 institutions of medical education of all classes which are empowered to grant degrees—116 in the United States, and 12 in Canada. Among the extinct schools there are 54, out of 153 regular; 7, out of 20 homeopathic; 12, out of 24 eclectic; and 6, out of 10 physio-medical and miscellaneous. Out of 18 fraudulent institutes, 17 are now extinct. The "Boston Bellevue" is the only one of this class remaining, and this exists only on paper and is, probably, incapable of harm; since it is doubtful if any one can be found so credulous as to buy its "diploma." (See page 46, of the CONSPECTUS, concerning this institution.)

THE recent improvement in the standard and methods of medical education is, to some extent, indicated by the following figures:

There are now 102 colleges which exact an educational requirement as a condition of matriculation; in the first CONSPECTUS there were only 45.

Attendance on three or more lecture-courses before graduation is now required by 35 colleges, as against 22 heretofore; and provision is made for a three- or four-years' graded course by 56 others.

VII

Hygiene is now taught in 80 colleges, and medical jurisprudence in 92; as against 42 and 61, respectively, heretofore.

The average duration of lecture-term has increased from 23.5 weeks to 24.5 weeks; or aggregates of 2960 weeks for 126 institutions, and 3135 weeks for 123 institutions, respectively; 4 more colleges have lecture-terms of five months or over, and 11 more have terms of six months or over, as compared with the preceding session.

The following Summary sets forth these facts in detail:

SUMMARY OF INSTITUTIONS AND STUDENTS.

XI

THE following tables show the number of matriculates and of graduates, by schools of practice, in attendance at the medical colleges of each State and of the Dominion of Canada, during the last seven sessions—1877-78 to 1883-84, inclusive. The percentages of graduates to matriculates, by schools of practice, are also given. For the sessions of 1882-83 and 1883-84, these are so grouped, in the next table, as to afford a ready means of comparison.

I—MATRICULATES AND GRADUATES IN EACH STATE, 1877-78 TO 1883-4, INCLUSIVE.

| States. | Schools. | Classes. | SESSIONS. | | | | | | | Totals..... | Percent. |

REVIEW OF PROGRESS IN MEDICAL EDUCATION.*

In his recent report the Commissioner of Education, the Hon. JOHN EATON, takes occasion to say that, in view of the overcrowded state of the medical profession, the time has now come when the medical student pays to the medical college money for which he receives no calculable equivalent. He asks for bread and receives a stone. The really capable graduate is jostled, crowded, shouted down and trampled upon by a horde of unwieldy behemoths, who not only intercept most of the work that he only is able to do satisfactorily, but who supplement their scant incomes by arts and devices that his nature and training forbid him to join in. Having overcrowded all other departments of medical employment, many of these physicians, by the grace of a diploma, have lately taken up the work of opening and conducting medical colleges, much to the wrath and confusion of the older schools, who would dearly like to retain their monopoly of oversupplying the market with medical "spring chickens."

INADEQUATE REQUIREMENTS FOR PRACTICING MEDICINE.

The position assumed by these older schools is exquisitely illogical; they do not like to establish effectual entrance examinations (which might force some candidates to defer the study of anatomy and chemistry until they had mastered the simpler mysteries of reading and writing) because they do not want "to limit the number of doctors by artificial regulations." This phrase, quoted from a recent address by a widely known and much respected medical teacher and author, teaches us that "artificial regulations" mean all rules or usages that may or can hinder any young white man from paying money twice over for the privilege of hearing the same course of lectures during two courses of instruction. The "regulations" that forbid the faculty from receiving the money of a white woman or that of a black man, we learn by inference, are not "artificial."

This same medical professor and author says that "the law of supply and demand will properly control the professional expansion." Assuming that this is true, let the same rule be applied to the schools that supply the human integers of "the professional expansion:" the establishments that do not try "to limit the number of doctors" by long, complicated, and difficult courses of study obviously should become the most frequented and best attended, because the law of prompt and cheap supply is as much an axiom as the one quoted by the learned professor and author. When, however, "the law of supply and demand" is thus supplied, the professor expresses his disapproval of the result in the following words:

Many of the new colleges which have sprung up so abundantly over the country have really no right to exist. They are unprovided with the materials for teaching, and the fees are insufficient to procure them; they have no hospitals or dispensaries to which they can resort for clinical instruction; the faculties are without reputation or experience; the building in which the college has its habitat is some temporary structure little suited to the purpose. The lectures are mere recitals of text books, which the student could better read for himself.

* See pp. CLXV-CLXXIX, *Report of the Commissioner of Education for the Year 1882-83*. Washington: 1884.

These medical schools get into such desperate pecuniary straits that they must employ every possible expedient to obtain students. One hears of personal solicitations, of promises, of sending out drummers to intercept students on the trains and at hotels, of practices in short which seem to touch at the lowest point of degradation. The "advantages" of these institutions, besides their proximity to the homes of students, are the low fees, or no fees at all, how high soever the nominal price, and the certainty that a diploma may be obtained on a minimum of attendance on lectures. Such institutions are, indeed, little more than "diploma mills." These medical shops hurt our position before the public immensely. They unite with the reputable medical schools to form a national association of medical colleges. After a time they put on a severely virtuous air, and are disposed to snub newer colleges organizing in their vicinity, stigmatizing them as unnecessary, crude, and inferior. Having thus acquired a quasi-position and assuming a tone of lofty pretension, they carry on a traffic in medical diplomas the profits of which enable them to maintain a baleful existence. The most beneficent reform which can now be undertaken is to close the doors of these institutions engaged in flooding the country with unqualified doctors.*

Denunciations like the foregoing are of little value, for they accomplish nothing. When analyzed dispassionately they are reduced to complaints that newer competitors are underselling "the old and well known stands." Of course the customers at the cheaper shops will get an article of inferior quality; that also is a "law" of trade. Even if the respected professor could have his wish and he could "close the doors of these institutions engaged in flooding the country with unqualified doctors," the evil, so injurious to the profession at large and to the guild of higher-priced medical colleges in particular, would not be corrected. If the cheaper schools are closed their clients "will enter some diploma shop and secure such training as its meagre resources afford," together with the coveted diploma. In this direction there is no hope of relief. Gazing on the prospect before him, the professor can well adopt Satan's melancholy words:

In the lowest deep, a lower deep,
Still threatening to devour me, opens wide.

Some medical schools and many medical educators have chosen a much better expedient: they have adopted a preliminary examination to test the would-be medical student's general intelligence and knowledge. Commissioner Eaton is sorry to say that in several cases this preliminary test is a "humbug," but in most of the colleges that have adopted the expedient it has been applied in good faith. Into these schools a person styling himself in writing "a Nachural Practishuner"† can no longer enter for the purpose of being crammed with medical lore. There is little doubt that, either by general consent or the passing of State laws, it will not be many years before an entrance examination will be required of all persons desiring a medical training.

Another antiquated and obsolescent practice in American medical education is also doomed to an early death, to-wit: the practice of requiring less than the usual exertion in order to obtain a diploma from the man who, without previous lecture-courses, has dared to trifle with the lives and health of his fellow creatures during some "years of reputable practice," so called. Formerly it was quite common to offer a man of this kind a degree at the end of *one* course of lectures, while young men whose records and consciences were entirely clear of professional manslaughter were obliged to pay for *two* courses, exactly like each other in subject, length, and cost.

*See the Maryland Medical Journal, vol. VIII, pp. 505-512.

†See the Boston Advertiser of July 1, 1882. Also pp. 39, 60 and 61, Abstract of Proceedings, Sixth Annual Report, ILLINOIS STATE BOARD OF HEALTH.

This practice of selling the same article twice is also falling into deserved disrepute, although still followed and defended by many flourishing medical schools and "demanded" by the large body of young men who always want to become physicians in the easiest way that is considered respectable. These clients crowd the amphitheatres of the schools alluded to, well knowing that, if public sentiment were once thoroughly informed as to their unwritten bargain with the schools they attend, such haste and imperfect preparation for their solemn responsibilities would not long be tolerated in a civilized community. Does this language seem harsh and ill-natured? Let us relieve its effect by quoting the following wise and witty remarks of Surgeon John S. Billings, U. S. A., at a recent medical college commencement:

Being unable, as I have just explained, to remember what was said to me by way of valedictory, and never having been present at a similar ceremony from that day to this, I thought it would be prudent to consult the literature of the subject and find out what is usually said upon such occasions. For this purpose I have examined about a hundred valedictory addresses, and have obtained from them a vast amount of instruction and some little amusement. From them I gather that this is an epoch in your lives, that you are entering a remarkable age of the world's history (it is customary here to allude to steam and electricity), that you live in the most wonderful country under the sun, and that the eyes of the world are upon you. All are agreed upon these points, and also as to the importance and dignity of the science and art of medicine and the necessity of continued study on your part to keep pace with its advances. But the addresses are not equally harmonious on all points. Some of them assert that the condition of medical education in this country is not altogether satisfactory; that there are some medical colleges (not, of course, the college of the graduates, but some other medical college) which might be spared; that there are too many doctors now and more coming, and that some of these not only have not as clear ideas about the precession of the equinoxes or the authorship of the book of Job as a member of one of the learned professions should have, but that there are even graduates in medicine (of other schools of course) to whom the addition of vulgar fractions is a stumbling block and correct spelling a vexation of spirit. On the other hand, I find some who assert, first, that the above statements are unfounded; second, that it is not necessary to know how to spell correctly in order to cure the chills or set a broken leg; and, third, that the demand for higher medical education is essentially a pernicious, aristocratic movement, calculated to oppress the poor and prevent them from obtaining the sheepskins so desirable to cover their nakedness. As, however, I am sure that all of you are just now strongly in favor of higher medical education (without regard to what you may have thought about it a few weeks ago, or what you may think about it a few years hence, when you get a little steam-batching machine of your own), I feel that I shall most contribute to the harmony which this occasion demands by—entirely agreeing with you.*

NEED OF IMPROVED STANDARDS IN MEDICAL INSTRUCTION.

The more thoughtful and less self-seeking members of the medical profession unite with Dr. Billings in his desire for a higher and better medical training than has hitherto been common in America. The venerable American Medical Association has, almost since its foundation, tried to produce a better condition of sentiment on this subject in the profession, and learned committees of its members have reported at different times important recommendations. General Eaton's first annual report, fourteen years ago, contained an article on medical education as it was and as its writer, Charles Warren, M. D., thought it should be. Some of the recommendations in that paper have been almost literally carried out by the recent reforms instituted; others, which the Commissioner believes to be as useful and indispensable to both public and professional well-being, are not accomplished yet, but soon may be. The special form that reformed medical education should assume was pointed out in that article and it was recommended that the lecture courses be *graded* and extended through *three* years, preceded by an entrance examination and terminated by an examination conducted under the

* The Medical News, March 18, 1883.

auspices of the State. When that article was published only two medical colleges in the country provided a graded course of lectures occupying three winter sessions, the Chicago Medical College and the Woman's Medical College of the New York Infirmary. Now, although the Chicago school has not yet made such a course compulsory, many others have done so under the leadership of the medical departments of Harvard University and of the University of Pennsylvania.

Harvard, for 1871-72, announced an extended and graded course of instruction. The University of Pennsylvania, laboring beside a formidable and vigorous rival school, was obliged to proceed more slowly: a university hospital was opened in 1874; three professors of the medical faculty and three lecturers appointed by that faculty, together with five professors appointed by the trustees, became the teaching staff of the hospital. April 4, 1876, four of the hospital teaching corps became permanent members of the medical faculty in the university. In 1877-78 a compulsory graded course of instruction comprised three lecture-courses, each five months long. Early in 1878 a generous woman endowed the university chair of surgery with a gift of \$50,000, and a like endowment of the other chairs in the medical faculty is progressing, so that in time the pay of the faculty will not depend on the size of the attending class or the number graduated. The entrance examination, still of a rudimentary character, was instituted in 1881. The lecture-term was lengthened from five to six months in 1882, and a further prolonging to seven months is announced for the session of 1883-84. Moreover, a fourth year of more advanced study, recommended and advised, but not as yet required, has been arranged to begin at the same time. The graded scheme has thus been tried for six annual sessions, at which the attendance of students has varied from 378 to 363, with an average of 367.5 per session. The graduates from 1878 to 1883, six years, have been 670, an average of 111.66 annually. For the six years before the adoption of the graded course the annual attendance was 388.33, and the average number of graduates was 108.33. Thus, while the university has substantially preserved its attendance, the quality, character and attainments of the students have improved immensely. The longer time, more thorough teaching, harder work and greater expense have attracted a better class of men, while frightening the superficial, the lazy, the badly prepared and the "crammers." The advance in general intelligence and education is very manifest, and the proportion of students possessing literary and scientific diplomas has doubled in six years.

Harvard, as already said, adopted an excellent scheme of three lecture-courses properly graded in 1871, and candidates for degrees were required to spend at least the last entire year under its instruction, besides passing the oral and written examinations in the studies of the two previous years. Of late, like the University of Pennsylvania, a graded course of four years has been provided and is strongly recommended by the faculty, though it is not yet obligatory. Men graduating in three years at Harvard receive the degree of M. D.; those who study the fourth year and pass the examination with credit receive the degree *cum laude*, and, on proper application to the university authorities, may also receive the degree of

M. A. Space is wanting here even to mention the numerous other schools of medicine that have obligatory or alternative graded courses of instruction.

The greatest security for the permanence of this improvement, the Commissioner believes, would be the endowment of the medical chairs with sums sufficiently large to afford, by investment, a decent income to the incumbents. He would not recommend paying an absolutely fixed sum per annum to university professors of any faculty, but would compensate them by a fixed minimum salary (which would prevent the professors' minds from being harassed and weakened by financial worry) and an additional amount, depending upon the number of students who should study in that faculty. The very great importance of endowing the medical chairs is well set forth by Dr. OLIVER WENDELL HOLMES in the following remarks:

Medical science is only a special province of biology, the science which deals with the laws of life. It borrows much from the other divisions of this great realm of knowledge. It levies contributions from other realms, from physics, from chemistry; it accepts a useful hint from whatever source it may come. A medical school has to teach much that is incidental to medical practice, but only in this way can it send forth fully-equipped practitioners. It begins with chemistry, anatomy, physiology, and thus prepares its students for study at the bedside and in the operating room. All this takes time and the coöperation of different experts, each of whom should be a master in his special department. There is a general tendency in this country to hurry through a student's medical education. Young men are impatient to be at work, and they will flock to a school which will give them a degree after a short period of study and a slight examination, which they are almost certain they can pass successfully. In this way great multitudes of practitioners are sent forth not thoroughly fitted for their work, and the community has to suffer the consequences.

A school which depends for existence on the number of its students cannot be expected to commit suicide in order to satisfy an ideal demand for perfection. Any institution which is essentially dependent on the number of paying students it can draw must be tempted to sacrifice its higher aims to popularity. No high standard can be reached under such circumstances, and the only way to insure the independent action of a school which aims at teaching the whole country by example is to endow its professorships so that the very best and highest grade of instruction, and not that which is popular because it is easy and superficial, may always be given from its chairs, whether the classes be large or small. A small number of thoroughly accomplished medical graduates, their knowledge based on sound scientific acquirements and made practical by assiduous clinical observation and teaching, will be worth more to the country than twice or thrice the number of half-taught, hastily-taught practitioners.* A series of such classes will, in the course of a single generation, elevate the whole professional standard, as they go forth, year after year, missionaries in the cause of health, soldiers, and, if need be, martyrs, in the unending battle with disease and its cause.*

* * * * *

MEDICAL LICENSES AND THE CONTROL OF MEDICAL SCHOOLS.

Having reviewed some topics connected with the preliminary qualifications of persons desiring to study medicine and with the amount and method of the medical instruction demanded by the nature and conditions of our present life, General EATON passes to the consideration of the best way to license persons desiring to practice medicine, as follows: "The old and common way of allowing any one who chose to announce himself as a physician or surgeon is fast passing away. The later habit of being satisfied if the candidate for public favor could show his 'diploma' has been fatally injured by the labors of John Buchanan and other proprietors of medical 'steam-hatching machines.' The device of throwing the responsibility of licensing upon voluntary associations of physicians called 'medical societies' has succeeded only on the condition that homœopathsists, eclectics, etc., are not numerous or noisy enough to make an effective resistance. The State of Illinois seems to have solved

* The Boston Medical and Surgical Journal, January 19, 1882.

the problem of protecting the public without assailing the right of personal medical judgment, by the establishment of its STATE BOARD OF HEALTH. This BOARD contains representatives of at least three systems of medical doctrine and practice and two lay members; its method of procedure has been to ascertain not what system or doctrine a candidate believes or wishes to practice, but whether he has studied the human body in health and disease and has investigated the action and results of medical interference with sufficient thoroughness to enable him to act understandingly when he uses a scalpel or administers a remedy. Under such a rule, it is obvious that men of inferior attainments will be forced to prosecute their studies till they have acquired a sufficient amount of knowledge to satisfy the requirements of the BOARD; that medical colleges in the State and surrounding commonwealths will be stimulated to increased exertions in order to prepare their students for the ordeal; and that quacks, pretenders and rascals will be gradually forced out of the State. Such have been the results; and if the BOARD had done nothing else for public health in Illinois it would deserve the gratitude and hearty support of every good citizen; its severer labors about questions of public hygiene, prevention of epidemics, and similar subjects, are additional reasons for public gratitude, but cannot here be discussed."

General EATON then passes to the questions respecting the regulation and control of medical colleges, and remarks that the experience of the last decade is enough to warn any sensible man of the dangers attending entire absence of public control over the conduct of these corporations. We have seen unscrupulous and infamous men unhappily in control of the charters of American medical schools, advertising and selling their wares in three continents, disgracing the profession of medicine, and soiling the reputation of the country which sheltered them. We have seen even the officers of justice conniving with these scoundrels to shield them from punishment for some of their guilty deeds. We have seen tardy justice at last overwhelm the most conspicuous of these offenders, the charters of his schools impeached and repealed, himself, a pretended suicide, fleeing from justice to a neighboring country, and even then and there finding dupes stupid enough or rascals vain enough to buy his worthless wares. We have seen him captured and inadequately punished for his long career of knavery by a short imprisonment. We have seen the short pause of bewilderment and dismay that overtook the diploma-selling industry at this blow succeeded by renewed activity in another State, the laws of which permitted them to hope that medical colleges might be chartered in sufficient numbers to supply the diploma market. We have seen the new crop of medical mushrooms sprouting up in the State of Massachusetts, while the law seems inadequate to deal with the offenders. The correction for this condition of affairs is quite evident, but it will be difficult to attain it at once.

For its remedy he recommends that every State and Territory, and Congress for the District of Columbia, should pass a law ordering every school teaching medicine or surgery in any fashion whatever to furnish unquestionable bonds or other like security for the speedy acquirement of a fund amounting to not less than \$800,000; the

laws should direct that this sum, as fast as any part of it is collected, shall be invested in United States bonds or productive real estate, or interest-bearing loans on real-estate security; the laws should also prescribe that the corporations so endowed shall distribute the income derived from such investment equitably between at least ten professors; that these professors shall teach, didactically or clinically, at least one hundred hours apiece in each calendar year, the instruction by each professor to be progressive in subject and character; that no students shall be admitted to these courses of medical instruction before passing a satisfactory examination in the elements of language, mathematics, physics, and biology; that no candidate shall be finally examined for degrees by a State board till they have studied three years, during each of which they must have studied at least one-third of the course of instruction provided by the ten professors and the thousand hours of teaching above mentioned, and, in addition, performed such an amount of dissecting, laboratory work and hospital attendance as the faculty shall deem necessary; two or more schools desiring to unite their forces under the provisions of the acts should be allowed to do so, retaining one of the charters and names already in existence if they choose, but surrendering the others; and all charters not thus fortified and regulated within two years after the passage of the acts should be declared null and void.

Under a law like this, any ten gentlemen who possessed a sufficient quantity of the public confidence could begin a new medical school whenever and wherever it was thought best; the public would be protected from charlatans; and medical students would have some assurance that the money and time they spent would be of some value to them afterwards. The plan is perfectly practicable; and it is absurd to say that it is unjust to vested interests, etc. The higher courts of New York found, a few years ago, that admission to the bar in that State had become so easy and that the number of young men desiring to become lawyers was so much in excess of the legal business and legitimate increase of the legal profession, that they must take measures to restrict the supply; and they did this by a pre-arranged order that only graduates of specified law schools should after a certain date be eligible for examination. The other law schools in the State promptly closed their doors, and the profession cheerfully upheld the courts in this wise, but certainly unusual, exercise of their authority in this matter. Medical men, unlike lawyers, are not, *ipso facto*, officers of a department of the State government; but they are, or should be, equally guarded by the State governments from the competition of incompetent men and from the injurious effects of over-production by the medical schools.

THE full text of General EATON's report is well worth reading by every one interested in the status of the medical profession, alike as it concerns the welfare of the public and the individual members of that profession to which the public looks for the prevention and the limitation of disease.

Arranged Alphabetically as to States, and Chronologically as to Dates of Organization.

ALABAMA.

MEDICAL COLLEGE OF ALABAMA.

MOBILE, ALA. W. H. SANDERS, M. D., Secretary, 12 St. Joseph street.

ORGANIZED in 1859. Closed during the war and re-opened in 1868. There were no graduates during the years 1862-68, inclusive.

The faculty embraces ten professors, two adjunct professors, two lecturers, and two demonstrators.

COURSE OF INSTRUCTION: Lectures begin November 10, and continue five months, with a recess at Christmas. A preliminary course begins October 20.—Attendance on three annual lecture terms is recommended; provision for such graded course is made, and without cost as to lecture tickets for the third term.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics and diseases of women and children, physical diagnosis and diseases of the chest, ophthalmology and otology, histology, hygiene, medical jurisprudence, clinical and genito-urinary surgery, and practical pharmacy. Weekly quizzes on anatomy and chemistry. Clinics at hospital and infirmary, and of out-door patients at the college.

REQUIREMENTS: For admission, none.

For graduation: 1) age, twenty-one years; 2) good moral character; 3) three years' study; 4) attendance on two full courses of lectures; 5) pass before the members of the faculty a satisfactory examination; 6) a thesis on some medical subject.

FEES: Matriculation (once), \$5.00. Lectures, including hospital, \$75.00. Dissecting, \$10.00. Graduation, \$25.00.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | — | 18 | — |
| 1878-79 | — | 20 | — |
| 1879-80 | — | 20 | — |
| 1880-81 | — | 22 | — |
| 1881-82 | — | 21 | — |
| 1882-83 | — | 16 | — |
| 1883-84 | 75 | 13 | 16 |

Percentage of graduates to matriculates during the only session for which number of matriculates is reported, *sixteen*.

There were also in attendance at the last session 4 post-graduates, who are not included in the number of matriculates above given.

REMARKS: The last announcement, 1881-83, contains a complete list of the alumni of the college, numbering 364.

MEDICAL DEPARTMENT SOUTHERN UNIVERSITY.

GREENSBORO, Ala.

ORGANIZED in 1872. Extinct; last session closed in 1880.

ARKANSAS.

MEDICAL DEPARTMENT. ARKANSAS INDUSTRIAL UNIVERSITY.

LITTLE ROCK, Ark. B. G. JENNINGS, M. D., Secretary of the Faculty.

ORGANIZED in 1879. First class graduated in 1880. Classes have graduated each subsequent year.

The faculty embraces fourteen professors and lecturers, and a demonstrator.

COURSE OF INSTRUCTION: Lectures begin October 1, and continue twenty weeks.—“A voluntary graded course of three years has been established from the organization of this college,”—but “students who prefer to continue their studies on the repetitional system can do so.”

Lectures embrace practice of medicine, institutes and practice of surgery, obstetrics, diseases of women and children, general, descriptive and surgical anatomy, materia medica, therapeutics, hygiene, botany, institutes of medicine, clinical surgery, dermatology, medical chemistry, toxicology, ophthalmology, otology, genito-urinary diseases, physical diagnosis, “meteorology, etc.”

REQUIREMENTS: For admission, none.

For graduation: 1) age, twenty-one years; 2) good moral character; 3) “a satisfactory certificate of having pursued the study of medicine for at least three years;” 4) attendance on two full courses of lectures; 5) satisfactory examination; 6) thesis on some medical subject, or report of clinic.

FEES: Matriculation (paid once only), \$5.00. Lectures, \$50.00. Demonstrator, \$5.00. Hospital, \$5.00. Graduation, \$25.00.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1879-80 | 22 | 1 | 4.6 |
| 1880-81 | 32 | 10 | 31+ |
| 1881-82 | 36 | 5 | 14— |
| 1882-83 | 32 | 4 | 12.5 |
| 1883-84 | 28* | 13 | 46.4 |

Average percentage of graduates to matriculates during the past five years, *twenty-two*.

REMARKS: Two years and nine months of study are accepted for the third requirement for graduation, as above quoted.

*Not including one post-graduate

CALIFORNIA.**COOPER MEDICAL COLLEGE.**

SAN FRANCISCO, Cal. HENRY GIBBONS, Jr., M. D., Dean, 101 Dupont Street.

ORGANIZED in 1859 as the Medical Department of the University of the Pacific. Ceased to exist in 1864, but was revived in 1870, under the same name. In 1882 it became the Medical Department of the University College of San Francisco, and was given the specific designation of the Medical College of the Pacific. In 1883 the institution received its present name.—The first class was graduated in 1860. No classes were graduated in the years 1865-69, inclusive. A class was graduated in 1870 and in each subsequent year.

Faculty embraces twelve chairs, two adjuncts and a demonstrator of anatomy.

COURSE OF INSTRUCTION: Three annual courses of lectures are required to complete the curriculum. The regular course begins June 2, and ends November 1; the intermediate course begins January 14, and ends May 3.—During the first year the student attends all didactic lectures, but gives special attention to descriptive anatomy, physiology, chemistry, surgery and microscopy, and is examined in these branches at the end of the term. In the second year all lectures and clinics must be attended, and examinations in all branches are held at the close, those in descriptive anatomy, physiology and chemistry being final. All lectures and clinics must be attended during the third year, except lectures on chemistry and physiology, if examination in these has been successfully passed. Final examinations, written and oral, in the third year.

The principal branches taught are principles and practice of medicine; clinical medicine and diagnosis; surgery, surgical anatomy, clinical and operative surgery; descriptive and practical anatomy; microscopy and histology; pathology with practical illustrations; obstetrics, diseases of women and children; gynecology; theoretical and practical physiology; ophthalmology, otology, didactic and clinical; chemistry; toxicology; materia medica and therapeutics; hygiene; insanity; medical jurisprudence; physical diagnosis; laryngoscopy.

REQUIREMENTS: For admission, an examination in English composition, physics, arithmetic and Latin rudiments (declension of nouns and grammar.) Graduates of literary, scientific, medical, or pharmaceutical colleges or universities, in good standing, graduates of high schools, and applicants who have passed the examination for admission to any recognized literary college or university, or who hold first-grade certificates from any public school board, as properly qualified teachers, on producing proper evidence of the same, are admitted to matriculation without examination.

For graduation: 1) good moral character; 2) twenty-one years of age; 3) three regular courses of lectures; 4) two courses of clinical instruction; 5) one course of practical anatomy, dissecting the entire subject; 6) satisfactory thesis; 7) successful passing of all examinations.

FEES: Matriculation, \$5; lectures (three courses), \$260; demonstrator, \$10; graduation, \$40. A charge of \$25 is made for each intermediate course, which amount is credited upon the succeeding regular course fees.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877 | 65 | 26 | 40 |
| 1878 | 58 | 15 | 26— |
| 1879 | 42 | 7 | 17— |
| 1880 | 39 | 9 | 15+ |
| 1881 | 67 | 12 | 18 |
| 1882 | 83 | 19 | 22.9 |

Average percentage of graduates to matriculates during the six years, 1883 inclusive, twenty-three.

REMARKS: "While the adoption of a three years' course is a direct pecuniary disadvantage to the college, it is, nevertheless, a great satisfaction to have accomplished this result, as it has been the constant desire of the faculty to raise the standard of medical education, and to graduate capable rather than many students."

MEDICAL DEPARTMENT UNIVERSITY OF CALIFORNIA.

Toland Medical College.

SAN FRANCISCO, Cal. ROBERT A. McLEAN, M. D., Dean, 603 Merchant Street.

ORGANIZED in 1863 as the Toland Medical College. Became connected with the University of California in 1872.

The faculty embraces eleven professors, one lecturer and one demonstrator.

COURSE OF INSTRUCTION: One reading term, and one regular term annually. The session begins February 1, and ends October 31. The course is graded and extends over three years. Students are expected to attend clinics regularly. Examinations are held daily and at the beginning of each session, to determine the progress of the student, his advancement depending on the result of such examination. These examinations are not final, as the examination for graduation includes all the subjects of the three-years' course.

Studies: First year—descriptive anatomy, general chemistry, physiology and materia medica. Second year—Theory and practice of medicine, theory and practice of surgery, principles of obstetrics, general and surgical anatomy, medical and physical chemistry, physiology of the nervous system and reproduction, therapeutics and pathology. Third year—Clinical medicine, clinical surgery, obstetrics, diseases of women, diseases of children, diseases of eye and ear, medical jurisprudence, hygiene and mental diseases.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three full years' study; 4) three regular courses of lectures; 5) successful passage on all subjects by written and oral examination; 6) practical anatomy during two sessions; 7) thesis.

FEES: Matriculation, \$5; demonstrator, \$10; first and second courses of lectures, \$130 each; third course, free; graduation, \$40.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1878 | — | 11 | — |
| 1879 | — | 13 | — |
| 1880 | — | 11 | — |
| 1881 | 61 | 16 | 26+ |
| 1882 | 59 | 15 | 25+ |
| 1883 | 61* | 11 | 18+ |

Average percentage of graduates to matriculates, three years, 1880, 1881, 1882 and 1883, *twenty-three*.

REMARKS: In 1885 a matriculation examination will be required of all those not college graduates or matriculates in the following subjects: English grammar, arithmetic, geography, elementary chemistry. In 1886, and every year thereafter, this examination will also embrace algebra, physics and botany.

*Not including two post-graduates.

CALIFORNIA MEDICAL COLLEGE (*Eclectic*).

OAKLAND, Cal. D. MACLEAN, M. D., Dean, 405 Powell Street.

ORGANIZED IN 1879. The first class was graduated in 1880.

The faculty embraces nine professors, one adjunct professor, and a demonstrator.

COURSE OF INSTRUCTION: One intermediate and one regular course, annually. Regular term begins November 3, and continues six months. Three-years' graded course recommended, but not required.

Lectures embrace principles and practice of medicine, obstetrics, surgery, anatomy, surgical anatomy, physiology, materia medica, chemistry, clinical and operative surgery, clinical medicine, therapeutics, pathology, gynecology, medical jurisprudence, clinical midwifery, diseases of children, clinical diseases of women, clinical diseases of children, mental diseases, hygiene, ophthalmology, otology, clinical diseases of the eye and ear, toxicology, physical diagnosis, laryngoscopy, diseases of the heart and lungs, and nervous diseases. Clinics at hospital and dispensary.

REQUIREMENTS: For admission, 1) certificate of good moral standing; 2) diploma from a high school, college or university, or a thorough examination in the branches of a good English education, including mathematics, composition and elementary natural philosophy.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) "such education as shall give him proper standing with the public and profession;" 4) three regular courses or two intermediate and two regular courses; 5) practical anatomy at least two sessions; 6) "satisfactory examination upon the essential points in the general practice of medicine;" 7) thesis.

FEES: Matriculation, \$5; lectures, \$120; demonstrator, \$10; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1879-80 | 48 | 13 | 27+ |
| 1880-81 | 31 | 11 | 35.5 |
| 1881-82 | 25 | 10 | 40. |
| 1882-83 | 32 | 11 | 34.4 |
| 1883-84 | 30 | 9 | 30 |

Average percentage of graduates to matriculates, during five years, *thirty-three*.

HAHNEMANN MEDICAL COLLEGE OF SAN FRANCISCO (*Homeopathic*)

SAN FRANCISCO, Cal. C. B. CURRIER, M. D., Dean, 427 Geary Street.

ORGANIZED in 1884. Faculty embraces eighteen professors.

COURSE OF INSTRUCTION: Graded, extending over three years. Term begins first Tuesday in June and continues five months; an intermediate term begins about February 4; duration not announced.

Lectures embrace, first year, anatomy, chemistry and pharmacy, materia medica, physiology, histology and minor surgery; second year, same as first with the addition of theory and practice, diseases of throat and chest, diseases of children, obstetrics, chemistry and toxicology, ophthalmology and otology, pathology and surgery; third year, materia medica and the studies proper of the second year continued, together with gynecology, dermatology and venereal diseases, and mental and nervous diseases.—Clinics at the homeopathic dispensary.

REQUIREMENTS: For admission, applicants "will be required to pass a satisfactory preliminary examination, or present documentary evidence of such qualification."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three full courses of lectures; 4) certificate of having dissected every region; 5) satisfactory examination in each department.

FEES: Matriculation (once) \$5; lectures (three courses) \$250; demonstrator, \$10; graduation, \$40.

CANADA.

PRACTITIONERS of medicine in Canada must be registered, and the requirements demanded vary in different provinces. The possession of the degree of Doctor of Medicine, granted by a recognized university, entitles its holder to registration in all the provinces, except Ontario. The curriculum of studies required of a university, in order that its degrees may be registered, is set forth in the following sections of the Quebec Medical Act, and are applicable, with slight changes, to all the provinces:

§ 8. From and after the passing of this act, no person shall be admitted as a student of medicine, surgery or midwifery, unless he shall have obtained a certificate of qualification from the said Provincial Medical Board. And no one shall be entitled to the license of the college, on presentation of a diploma, unless he shall have been previously admitted to the study of medicine, in accordance with the provisions of this act, or unless he shall have passed an equivalent preliminary examination before a college, school or board, authorized by law to require and cause such preliminary examinations to be passed in Her Britannic Majesty's possessions, elsewhere than in the Province of Quebec, and acceptable to the board created by this act. * * * The subjects of the preliminary qualifications to be English and French, Latin, geography, history, arithmetic, algebra, geometry, belles-lettres, and any one of the following subjects: Greek, natural or moral philosophy; and the candidates to present a certificate of good moral character.

§ 15. The qualifications to be required from a candidate for obtaining a license, authorizing him to practice medicine, surgery and midwifery, shall consist in his holding a certificate of study from a licensed physician, for the period intervening between the courses of lectures which he has followed; that he is not less than twenty-one years of age; that he has followed his studies during a period of not less than four years, commencing from the date of his admission to the study of medicine by this board, and that, during the said four years, he shall have attended, at some university, college or incorporated school of medicine within Her Majesty's dominions, not less than two six-months' courses of general or descriptive anatomy, of practical anatomy, of surgery, of practice of medicine, of midwifery, of chemistry, of materia medica and general therapeutics, of the institutes of medicine, of physiology and general pathology, of clinical medicine and of clinical surgery; one six-months' course or two three-months' courses, of medical jurisprudence and of hygiene; one three-months' course, of botany; one three-months' course, and a course of not less than twenty-five demonstrations, upon microscopic anatomy, physiology and pathology; also, that he shall have attended the general practice of a hospital in which are contained not less than fifty beds, under the charge of not less than two physicians or surgeons, for a period of not less than one year and a half, or three periods of not less than six months each; and that he shall also have attended six cases of labor, and compounded medicines for six months. And to remove all doubts with regard to the number of lectures which the incorporated schools of medicine of the Province of Quebec are bound to give, it is enacted and declared that each six-months' course shall consist of one hundred and twenty lectures, except in the case of clinical medicine, clinical surgery and medical jurisprudence. Of the four years' study required by this act, three six-months' sessions at least shall be passed in attendance upon lectures, at a university, college or incorporated school of medicine recognized by this board, the first whereof shall be so passed the session immediately succeeding the preliminary examination, and the last during the fourth year of study, and the candidate shall undergo an examination, on the final subjects of the curriculum, at the end of the session in his fourth year of study.

It is optional in Quebec with the provincial board to accept or reject the degree of a university outside the province, and the test of an examination is sometimes imposed upon its holder.

In Ontario all, except registered practitioners of Great Britain, must pass an examination in the required branches before registration. The remainder of the provinces accept recognized university degrees without examination.

Graduates of United States medical schools, in order to register in a province of Canada, unless holding an academical degree, must 1) pass the matriculation examination; 2) attend a Canadian school one or more full winter courses, so as to complete the curriculum of the province; and 3) pass the professional examination.

Manitoba is an exception, the regulation there being as follows: "American students in medicine (meaning graduates of medical colleges in the United States) obtain a license by passing a practical examination satisfactory to the Board on the following subjects, viz.: Anatomy, physiology, theory and practice of medicine, surgery, midwifery and diseases of women and children, chemistry, materia medica and therapeutics, medical jurisprudence and toxicology." For this examination, and subsequent registration, a fee of \$100 is charged.

STUDENTS attending Canadian colleges, are subject to the following rules:

1. In the case of disorderly conduct any student may, at the discretion of the professor, be required to leave the class-room. Persistence in any offence against discipline, after admonition by the professor, shall be reported to the dean of the faculty. The dean may, at his discretion, reprimand the student, or refer the matter to the faculty at its next meeting, and may in the interval suspend from classes.
2. Absence from any number of lectures can only be excused by necessity or duty, of which proof must be given, when called for, to the faculty. The number of times of absence, from necessity or duty, that shall disqualify for the keeping of a session, shall in each case be determined by the faculty.
3. While in the college students are expected to conduct themselves in the same orderly manner as in the class-rooms.
4. When students are brought before the faculty under the above rules, the faculty may reprimand, impose fines, disqualify from competing for prizes and honors, suspend from classes, or expel from the college.

Ontario.

TORONTO SCHOOL OF MEDICINE.

(Affiliated with the University of Toronto and the University of Victoria College.)

TORONTO, Ont. H. H. WRIGHT, M. D., Secretary, corner Sherbourne and Gerrard Streets.

ORGANIZED in 1843. Degrees were first conferred upon its students by affiliated universities, in 1845. Degrees have been so conferred each subsequent year.

Faculty embraces twelve professors (lecturers), two adjunct professors and two demonstrators.

COURSE OF INSTRUCTION: Two sessions yearly; the winter term of 1884-85 beginning October 1, 1884; continues six months; the summer term opens April 27, 1885, and ends July 4. For curriculum of studies see section fifteen of Quebec Medical Act, quoted above.

REQUIREMENTS: "The school does not exact any requirements as to matriculation, etc., and does not grant degrees. These matters it leaves entirely to the two universities with which it is affiliated, and to the medical council. [OLDRIGHT.]

FEES: Lecture courses, each chair, \$12, excepting anatomy, descriptive and surgical, \$15; normal and pathological histology, each, \$8; medical jurisprudence and chemistry, each, \$6; and botany and hygiene, each, \$5; registration, payable only once, \$5; four optional studies, each, \$5; summer session, \$20.

MEDICAL FACULTY OF TORONTO UNIVERSITY.

TORONTO, Ont.

ORGANIZED in 1849. Extinct since 1852.

TRINITY MEDICAL SCHOOL.

Affiliated with the University of Trinity College, the University of Toronto and the University of Manitoba.)

TORONTO, Ont. W. B. GEIKIE, M. D., C. M., Dean, 324 Jarvis Street.

ORGANIZED in 1850. The school confers the degree of "Fellow by Examination of Trinity Medical School," which is "in every respect the equivalent of M. B., M. D. or M. D., M. C., at Trinity College." [GEIKIE.]

The faculty embraces ten professors, one lecturer and two demonstrators.

COURSE OF INSTRUCTION: The winter session of 1884-85, beginning October 1, 1884, continues for six months; the summer session begins in April and ends the last of June. Four years' attendance is required for graduation.

Lectures embrace the principles and practice of medicine and surgery, materia medica, therapeutics, anatomy, obstetrics, diseases of women and children, chemistry, botany, sanitary science, medical jurisprudence, physiology, histology, pathology, ophthalmology, otology, laryngology. Three examinations are held during the course, viz: at the close of the first, second and fourth years.

REQUIREMENTS: Students are advised to pass the matriculation examinations of the Medical Council of Ontario, or those of the affiliated universities before entering; but are allowed to attend lectures without any examination, though none such can obtain a degree. Students not matriculated elsewhere, and who desire to take the Fellowship Diploma, are required to pass an examination on the following subjects: 1) writing and dictation; 2) English language, including grammar and composition; 3) arithmetic; 4) algebra, including simple equations, Latin, and either Greek, German, French or natural philosophy.

For graduation: a) a recognized matriculation examination; b) four years' pursuit of medical studies; c) attendance on at least two full courses of lectures during either three or four winter sessions, and d) satisfactory examination in all required branches.

FEES: Registration, \$5; lecture courses, each chair, \$12, excepting practical anatomy, practical chemistry, normal and pathological histology, each, \$8; medical jurisprudence, \$6; hygiene and botany, each, \$5; examinations, \$15; summer session, \$20.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1878-79 | 137 | 35 | 25.5 |
| 1879-80 | 136 | 30 | 22+ |
| 1880-81 | 136 | 30 | 22+ |
| 1881-82 | 168 | 35 | 20.7 |
| 1882-83 | 205 | 38 | 18.5 |
| 1883-84 | 222 | 63 | 27.9 |

Average percentage of graduates to matriculates during the past six years, *twenty-three*.

REMARKS: The number of graduates given above includes, also, "men licensed by the Council."

ROYAL COLLEGE OF PHYSICIANS AND SURGEONS.

(Affiliated with Queen's University.)

KINGSTON, Ont. FIFE FOWLER, M. D., L. R. C. S., Edin., President of the Faculty.

ORGANIZED in 1854. First class graduated in 1855, and classes graduated in each subsequent year. Being separately incorporated, the college confers the diplomas of "Licentiate" and "Fellow." Its students obtain the degrees of M. D. and C. M., from the Queen's University, upon passing the required examination.

The faculty embraces twelve professors and two demonstrators.

COURSE OF INSTRUCTION: The winter session of 1884-85 began on the first Wednesday in October, 1884, and continues six months; the summer term begins on the first Monday in May. The course of study is graded, covering four years, and fulfills the requirements of the provincial board. See excerpt from Quebec Medical Act.

REQUIREMENTS: For admission: "Candidates for the degree of the university or the diploma of the college must pass a matriculation examination before they can enter any professional examination, in the following subjects: English language, grammar and composition, arithmetic, algebra, geometry, Latin and natural philosophy. Graduates and matriculates in arts from any recognized university and matriculates of the Provincial Board are exempt from this examination."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) thesis; 4) certificates of attendance on the full course of instruction, as above, for four years, excepting graduates in arts and those who have passed a full years' pupillage in the office of a medical practitioner, of whom only three years' study is required; 5) evidence of having compounded medicines for a period of six months; 6) evidence of having attended six cases of midwifery. For the Fellowship: 1) a degree in arts, or an equivalent examination; 2) evidence of having been engaged in the practice of the profession for five years.

FEES: Registration (payable once only), \$5; tuition, per session, seven chairs, \$12 each; five chairs, \$6 each, and two chairs, \$4 each; practical anatomy, \$3; hospital, \$1. For graduation: diploma of licentiate, \$20; degree of M. D. and C. M., \$30; Fellowship of college, \$50; summer session, \$20.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 48 | 10 | 20.8 |
| 1878-79 | — | 14 | — |

Average percentage of graduates to matriculates during the years 1877-78, 1880-81, 1882-83, 1883-84, *twenty-two*.

MEDICAL DEPARTMENT OF THE WESTERN UNIVERSITY.

LONDON, Ont. W. J. MCGUIGAN, M. D., Registrar, 371 Dundas Street.

ORGANIZED IN 1882. First class graduated in 1883.—Faculty embraces fifteen professors and two demonstrators of anatomy.

COURSE OF INSTRUCTION: One annual graduating session of six months' duration. The course is graded, extending over three sessions in different years.—Lectures embrace anatomy, physiology, obstetrics, diseases of women and children, chemistry, therapeutics, botany, nervous and mental diseases, principles and practice of medicine, surgery, histology, pathology, sanitary science, medical jurisprudence, toxicology.

REQUIREMENTS: For admission, (a) certificate of graduation or matriculation in any recognized British University; (b) certificate of having passed the provincial examination; (c) matriculation examination on English language, arithmetic, algebra, geometry, Latin, writing and dictation. Correct spelling and legible writing are imperative.

For graduation: 1) certificate of having passed a recognized matriculation examination; 2) four years' study; 3) three sessions of six months each upon anatomy, practical anatomy, practice of medicine, surgery, theoretical chemistry, midwifery, diseases of women and children, materia medica, therapeutics, physiology, clinical medicine, clinical surgery; 4) one six months' course on medical jurisprudence; one three months' course on botany; twenty-five lectures on chemistry and toxicology; twenty-five practical demonstrations on histology and pathology; twenty lectures on sanitary science; 5) attendance for at least eighteen months on the practice of some recognized hospital; 6) six months' attendance on the practice of a lying-in hospital, and charge of six cases of confinement; 7) compounded medicines for six months; 8) good moral character; 9) twenty-one years of age.

FEES: Matriculation, \$5; registration, \$2; six chairs, \$12 each; eight chairs, \$6 each, and three, \$5 each; practical anatomy, \$10; hospital, \$5. Graduation, \$25.

STUDENTS: Number of matriculates and graduates at each session reported, and percentage of graduates to matriculates:

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1882-3 | 15 | 1 | 6.6 |
| 1883-4 | 19 | — | — |

WOMAN'S MEDICAL COLLEGE.

TORONTO, Ont. M. BARRETT, M. A., M. D., President, 204 Simcoe Street.

ORGANIZED IN 1883. The college does not confer degrees, but is intended for "the education of ladies in the science and practice of medicine, so as to fit them to undergo the examinations of the College of Physicians and Surgeons of Ontario, which are required for the provincial license, and for degrees in medicine in the several universities."

The faculty embraces ten professors and a demonstrator.

COURSE OF INSTRUCTION: One annual lecture term of six months' duration, beginning on the first Wednesday in October. The course is graded, and extends through three years.

Lectures embrace the principles and practice of medicine and surgery, obstetrics, diseases of women and children, materia medica, botany, anatomy, microscopy, sanitary science, medical jurisprudence, toxicology, chemistry, ophthalmology and otology.

REQUIREMENTS: For admission, certificate of having passed the matriculation examination of the provincial board.

For graduation: 1) four years' study; 2) four courses of lectures of six months' duration; if a graduate in arts three courses; 3) two courses of six months each upon anatomy, dissection, physiology, histology, chemistry, materia medica, therapeutics, principles and practice of medicine and surgery, midwifery, diseases of women and children, and clinical medicine and surgery; one six months' course on medical jurisprudence; one course of three months upon practical chemistry, toxicology, botany, pathology and hygiene; 4) dissect the whole human body; 5) six months' practice in compounding medicines; 6) twenty-four months' attendance on hospital; 7) six cases of midwifery.

FEES: For eight chairs, including practical anatomy, \$12 each; normal histology, pathological histology, \$8 each; medical jurisprudence, practical chemistry, clinical medicine, \$6 each; sanitary science, botany, \$5 each. Registration, once only, \$5. Third course on any branch free.

KINGSTON WOMEN'S MEDICAL COLLEGE.

(Affiliated with Queen's University.)

KINGSTON, Ont. M. LAVALL, M. D., President of the Faculty.

ORGANIZED in 1883. Degree of doctor of medicine conferred by Queen's University, upon passing the required examinations.

The faculty embraces eight professors, in addition to which two professors of Queen's College give instruction in chemistry and botany.

COURSE OF INSTRUCTION: The course of lectures, which will continue for six months each session, "will be equivalent in all respects to the ordinary winter course delivered in other medical colleges, and as such will be accepted in proceeding to the degree of M. D. in Queen's University."

Lectures embrace obstetrics and diseases of women and children; principles and practice of surgery; materia medica and therapeutics; medical jurisprudence and sanitary science; theory and practice of medicine; physiology and histology; anatomy, descriptive and surgical; chemistry; botany; practical anatomy; clinical surgery; clinical medicine.

REQUIREMENTS: "The requisites for graduation will in no sense differ from what is required for the other sex, and the facilities for study will be also the same.

"By the regulations of the University, the matriculation examination of the college may be passed at any time before undergoing examination for the degree. The Medical Council matriculation, which is the intermediate examination of the High Schools with Latin, will be accepted by the University."

FEES: Registration, once only, \$5; seven chairs, \$12 each; practical anatomy, \$8; five chairs, \$6 each; sanitary science and histology, \$4 each. Except in practical anatomy, chemistry and botany, the third and subsequent courses in any branch, free.

STUDENTS: Number of matriculates, session of 1883-84, 11; of graduates, 3. Percentage of graduates to matriculates, twenty-seven.

MEDICAL DEPARTMENT OF VICTORIA COLLEGE.

(Also known as "Rolph's School.")

TORONTO, Ont.

ORGANIZED in 18— . Extinct since 1872.

Quebec.

MEDICAL DEPARTMENT OF MCGILL UNIVERSITY.

MONTREAL, Que. R. PALMER HOWARD, M. D., Dean, 47 Union Avenue.

ORGANIZED in 1824 as the Montreal Medical Institution; became the Medical Department of McGill University in 1829. No class graduated during the Canadian Rebellion, 1837-40.

The faculty embraces thirteen professors, four demonstrators and two instructors.

COURSE OF INSTRUCTION: The complete course of study extends over four winter sessions of six months, and one summer session of three months in the third academic year. The collegiate year of 1884-85 began October 1, 1884, and the summer session will begin April 13, 1885.

At the end of the first year sessional examinations must be passed on anatomy, physiology, chemistry, materia medica, botany, practical anatomy.—At the end of the second year pass examinations on anatomy, practical anatomy, physiology, chemistry, practical chemistry, materia medica.—Third year, sessional examinations on medical jurisprudence with toxicology, hygiene, medicine, surgery, midwifery.—Fourth year, final pass examinations on medicine, surgery, midwifery, clinical medicine, clinical surgery, medical anatomy, surgical anatomy.

REQUIREMENTS: For admission, see section eight of the Quebec Medical Act.

For graduation, see section fifteen of the Quebec Medical Act.

FEES: For first year, \$67; for second year, \$92; for third year, \$87; for the fourth year, \$65; hospital, \$28; university matriculation, \$5; graduation, \$30; separate lecture course, \$5 to \$16.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 161 | 27 | 16+ |

| 1882-83 | 188 | 30 | 16— |
| 1883-84 | 212 | 34 | 16+ |

Average percentage of graduates to matriculates during the past seven years, eighteen.

ÉCOLE DE MÉDECINE ET DE CHIRURGIE.

(Affiliated with the University of Victoria.)

MONTREAL, Que. TH. D'ODET D'ORSONNENS, M. D., President, 26½ rue Ste. Elizabeth.

ORGANIZED in 1843. Degrees were first conferred on its students in 1845. Degrees have been conferred each subsequent year.

The faculty embraces twelve professors, one lecturer and two demonstrators.

COURSE OF INSTRUCTION: One annual session of six months' duration, attendance upon which is compulsory. Students are not received after the first month. The complete course extends over three years of graded instruction with weekly quizzes.

Lectures embrace chemistry, pharmacy, toxicology, materia medica, therapeutics, diseases of women and children, physiology, pathology, principles and practice of medicine and surgery, medical jurisprudence, botany, hygiene, histology and ophthalmology.

REQUIREMENTS: For admission, see section eight of the Quebec Medical Act.

For graduation, see section fifteen of the Quebec Medical Act.

FEES: Matriculation, \$2; lectures, \$120; dissection, \$6; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1881-82 | 111 | 6 | 5.4 |
| 1882-83 | — | 33 | — |

REMARKS: No announcement for the session of 1884-85 has been received, nor has any information been vouchsafed in response to letters of inquiry.

ST. LAWRENCE SCHOOL OF MEDICINE.

QUEBEC, Que.

ORGANIZED in 1851. Extinct, 1862.

MEDICAL DEPARTMENTS OF LAVAL UNIVERSITY.

QUEBEC, Que. ARTHUR VALLÉE, M. D., Secretary, 22 rue Ste. Anne.

MONTREAL, Que. E. P. LA CHAPPELLE, M. D., Secretary, 132 rue S. Laurent.

ORGANIZED in 1852. The department in Quebec is the successor of the Quebec School of Medicine, which was organized in 1848, and existed four years. The Department in Montreal is known as a "Succursale," and was organized in 1878. The first class was graduated in 1855, and a class has been graduated each year since.

The faculty embraces twenty-six chairs, thirteen in each school.

COURSE OF INSTRUCTION: One annual session of about thirty-five weeks' duration; attendance is compulsory; the course is graded and extends over four years.

Lectures are divided into two sections, primary and final. Primary—descriptive anatomy 240 lectures, practical anatomy 180 lectures, of two hours each, microscopical anatomy and histology 120 lectures, physiology 150 lectures, general pathology 80 lectures, hygiene 60 lectures, chemistry 240 lectures, botany 60 lectures; examinations at the end of this course. Final section includes materia medica and general therapeutics 240 lectures, surgical pathology and theoretical surgery 240 lectures, medical pathology and special therapeutics 240 lectures, toxicology 240 lectures, medical jurisprudence 60 lectures, toxicology 60 lectures, diseases of the eye and ear 60 lectures, practical operative surgery 40 lectures, clinical surgery 180 lectures, clinical medicine 180 lectures, clinical studies of the diseases of the eye and ear 60 lectures, clinical midwifery not less than six cases, clinical study of diseases of women and children; examinations at the end of this course.

REQUIREMENTS: For admission, see section eight of the Quebec Medical Act.

For graduation, see section fifteen of the Quebec Medical Act.

FEES: Annual fee, \$54; diploma, \$20.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 70 | 1. | 21.4 |
| 1878-79 | 65 | 9 | 13.8 |
| 1879-80 | 56 | 16 | 28.5 |
| 1880-81 | 97 | 13 | 13.5 |
| 1881-82 | 104 | 12 | 11.5 |
| 1882-83 | 117 | 26 | 22.2 |
| 1883-84 | 109 | 25 | 22.9 |

Average percentage of graduates to matriculates during the past seven years, *nineteen*.

FACULTY OF MEDICINE, UNIVERSITY OF BISHOP'S COLLEGE.

MONTREAL, Que. F. W. CAMPBELL, A. M., M. D., Dean, 10 Phillips Place, Beaver Hall.

ORGANIZED in 1870. The first class was graduated in 1871, and a class has been graduated each year since.

Faculty embraces thirteen professors, two lecturers, one demonstrator, and a curator.

COURSE OF INSTRUCTION: One annual session, extending during the present year from October 1, 1884, to the end of March, 1885. Four years' course recommended but not required. Course of study is graded and in the shorter three years' course is arranged as follows:—First session, materia medica, botany, anatomy, physiology, chemistry, obstetrics, surgery, dissections, hospital practice. Second session, anatomy, physiology, chemistry, materia medica, medicine, gynecology, hygiene, practical chemistry, practical histology, dissections, hospital practice, clinical lectures. Third session, medicine, surgery, pathology, obstetrics, gynecology, medical jurisprudence, hospital practice, and clinical lectures.

REQUIREMENTS: For admission, see section eight, Quebec Medical Act.

For graduation, see section fifteen, Quebec Medical Act

FEES: Registration each session, \$4; eight chairs, \$12 each; two, \$10 each; practical histology, \$16; four chairs, \$6; degrees (C. M., M. D.), \$20; registration of degree, \$5; hospitals, \$28.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

| 1881-82 | 55 | 6 | 10.9 |
| 1882-83 | 34 | 3 | 8.8 |
| 1883-84 | 39 | 10 | 25.8 |

Average percentage of graduates to matriculates during the past seven years, eighteen.

Nova Scotia.

HALIFAX MEDICAL COLLEGE.

HALIFAX, N. S. J. F. BLACK, M. D., Registrar, 49 Granville Street.

ORGANIZED in 1867, as the Medical Department of Dalhousie College; attained its present relation in 1876. First class graduated in 1872. Classes graduated in each subsequent year excepting 1873.

Faculty embraces eight professors, six lecturers and instructors, and two demonstrators.

COURSE OF INSTRUCTION: One annual graduating course of six months' duration. Three years' graded course required, four years' course recommended; daily examinations by the professors; a roll of students attending each class called from time to time.

Lectures embrace principles and practice of medicine, clinical medicine, obstetrics, gynecology, principles and practice of surgery, clinical surgery, physiology, anatomy, dermatology, botany, diseases of children, practical chemistry, materia medica, therapeutics, microscopy, pharmacy, medical jurisprudence, toxicology, insanity and public hygiene.

REQUIREMENTS: For admission; a) diploma of recognized university in arts; or b) matriculation examination on the following compulsory subjects: English language—including grammar, composition and writing from dictation; arithmetic—including vulgar and decimal fractions, and the extraction of the square root; algebra—to the end of simple equations; geometry—first three books of Euclid; Latin—one book, translation and grammar; elementary mechanics of solids and fluids; and one of the following optional subjects, viz: history of England, with questions in modern geography; French translation; German translation; one Greek book; history of Nova Scotia; history of the Dominion of Canada.

For graduation: 1) four years' study; 2) three full courses of lectures; 3) one three months' course in practical pharmacy, chemistry, botany and medical jurisprudence; 4) two six months' courses in other branches; 5) twelve months' attendance at a hospital; 6) three months' practice in dispensing drugs; 7) at least six cases of accouchment; 8) a certificate, from a registered practitioner, of "proficiency in the practice of vaccination;" 9) one course of practical anatomy; 10) thesis; 11) twenty-one years of age; 12) a general written and oral examination on all the branches of medical and surgical science; 13) a clinical examination in medicine and surgery conducted at the bedside, cases being submitted for diagnosis and treatment in the wards of the hospital. In estimating the standing of

candidates and the number of marks to be awarded, professors take into account regularity of attendance, and diligence and care evinced in reporting cases.

FEES: Registration, annual, \$2, or perpetual, \$5; matriculation examination, \$10; lectures, \$12 for each class, except practical anatomy, \$8, and medical jurisprudence, chemistry, pharmacy, microscopy, and botany, \$6 each; graduation, \$20; registration of diploma, \$1.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 29 | 2 | 6— |
| 1878-79 | 36 | 3 | 8+ |
| 1879-80 | 37 | 2 | 5.4 |
| 1880-81 | 35 | 2 | 5.7 |
| 1881-82 | 37 | 1 | 2.7 |
| 1882-83 | 41 | 2 | 7+ |
| 1883-84 | 34 | 5 | 14.7 |

Average percentage of graduates to matriculates, *seven*.

Manitoba.

MANITOBA MEDICAL COLLEGE.

(*Affiliated with the University of Manitoba.*)

WINNIPEG, MA. JAMES KERR, M. D., M. Ch., Dean of the Faculty.

ORGANIZED in 1883. The faculty embraces thirteen professors and one demonstrator. All fellowship degree is granted.

COURSE OF INSTRUCTION: One yearly session; that of 1884-85 began October 1, 1884 and will continue for six months.

For curriculum of study, see section fifteen of the Quebec Medical Act, above.

REQUIREMENTS: "Every student who desires to present himself for the Fellowship Diploma must have passed a recognized matriculation examination, and spent four years in pursuit of medical studies, and attended two full courses of lectures during either three or four winter sessions."

FEES: Registration, \$5; eight chairs, each, \$12; four chairs, each, \$6; two chairs, each, \$5; examinations, each, \$5.

STUDENTS: Number of matriculates during the session of 1883-84, as reported, 15.

COLORADO.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF DENVER.

DENVER, COL., J. H. KIMBALL, M. D., Secretary, Steele Block.

ORGANIZED in 1881. First class graduated in 1882.

The faculty embraces fourteen professors, four lectures and a demonstrator.

Fourth annual session begins on the first Wednesday in October, 1884, and closes on the last Wednesday in March, 1885.

COURSE OF INSTRUCTION: "Is divided into three series, and extends over three consecutive and annual courses of lectures." The junior, or first-year course, embraces anatomy, physiology, histology, materia medica and general chemistry. Middle, or second-year course, embraces anatomy, physiology, principles and practice of medicine, principles and practice of surgery, obstetrics and diseases of children, general pathology and pathological anatomy, therapeutics, hygiene and medical chemistry. Senior, or third-year course, includes principles and practice of medicine and clinical medicine, principles and practice of surgery and clinical surgery, medical and surgical diseases of women and clinical gynecology, obstetrics, clinical obstetrics and diseases of children, ophthalmology and otology, microscopy, medical jurisprudence, diseases of the chest and climatology, laryngoscopy, physical diagnosis, nervous and mental diseases, and diseases of the genito-urinary organs.

REQUIREMENTS: For admission: "All applicants for admission as matriculates are expected to pass a thorough examination in English composition, writing, grammar, arithmetic, natural philosophy and rudiments of Latin; but applicants holding the degree of A. B., or a diploma from any high-school or a certificate of proficiency in the above named branches from a reputable teacher of such school, shall be considered sufficiently prepared, and such degree or certificate shall be received in lieu of an examination."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years study; 4) two full courses of lectures; 5) practical anatomy and chemistry for two sessions; 6) proficiency in diagnosis and therapeutics by practical demonstration on the living subject; 7) satisfactory examination in the seven principal branches of medical science.

FEES: Matriculation (payable once) \$5; lectures, \$75; laboratory (for advanced students) \$15; demonstrator, \$5; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1881-82 | 12 | 5 | 33+ |
| 1882-83 | 21 | 5 | 23.8 |
| 1883-84 | 22 | 5 | 22.7 |

Average percent. of graduates to matriculates, during the past three years, *twenty-six*.

REMARKS: "The preliminary examination of applicants, as to literary qualifications, will be held by the examining board of the faculty on the first Tuesday in October, and following days of that week."

"While the faculty earnestly recommend students to follow out the graded-course system, they do not make it obligatory for them to do so, and the hours of lectures in the different courses are so arranged that they do not conflict with each other."

MEDICAL DEPARTMENT OF THE UNIVERSITY OF COLORADO.

BOULDER, Col. J. A. SEWALL, M. D., Dean of the Faculty.

ORGANIZED in 1883. The faculty embraces seven professors.

COURSE OF INSTRUCTION: Graded, and extends over a term of three years, with a session of nine months in each year.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, histology, ophthalmology, otology and botany.

REQUIREMENTS: For admission, a literary or scientific degree, a high-school diploma, or the candidate will be required to write, in the presence of the examiner, a satisfactory application for admission, containing an account of his educational opportunities and acquirements, and further undergo a thorough examination in the branches of a good English education, including mathematics and natural philosophy.

For graduation: 1) twenty-one years of age; 2) a good moral character; 3) oral and written examinations satisfactory to the faculty.

FEES: Matriculation, \$5; graduation and diploma, \$10; tuition free.

STUDENTS: Matriculates at the session of 1883-84, *eight*.

REMARKS: The three years' course is not obligatory, as the student is allowed to present himself for examination at the end of any collegiate year, which, being satisfactory, the degree of Doctor of Medicine will be given, provided, three years have been passed in study under a preceptor, with attendance on two full courses of lectures.

CONNECTICUT.

MEDICAL DEPARTMENT OF YALE COLLEGE.

NEW HAVEN, Conn. CHARLES A. LINDSLEY, M. D., Dean of the Faculty.

ORGANIZED in 1810, as the Medical Institution of Yale College. In 1879 a new charter changed the title to the present reading.

The faculty embraces eight professors, seven lecturers, one demonstrator.

COURSE OF INSTRUCTION: Graded, extending through three years and consisting of three lecture terms annually, the first (of 11 weeks) beginning in October; the second (of 12 weeks) beginning in January; and the third (of 11 weeks) beginning in April.

Lectures embrace, in the first year, general chemistry, qualitative analysis; medical chemistry and toxicology; anatomy, dissections; normal histology; physiology. The second year, anatomy, dissections; physiology; pathology; materia medica and therapeutics; theory and practice of medicine; clinical medicine; obstetrics; surgery; clinical surgery. Third year, pathology; theory and practice of medicine; physical diagnosis; clinical medicine; surgery; clinical surgery; obstetrics; diseases of women and children; ophthalmology; medical jurisprudence; insanity; diseases of the throat and ear; nervous diseases; venereal diseases; diseases of the skin.

REQUIREMENTS: For admission, excepting graduates in medicine and those who have passed an examination for admission to Yale College or some similar institution, candidates must present a degree in letters or science from a recognized college or sci-

entific school or pass a written examination in mathematics (algebra to quadratics, two books of Euclid, metric system of weights and measures) and physics (Balfour Stewart's or any equivalent elementary work). These entrance examinations are also held, in Chicago, Cincinnati and San Francisco, on the Thursday following the June commencement. "Students not fully prepared are admitted on condition that the deficiency be made up within a reasonable time." Students of any recognized medical school, or of private preceptors in good standing, "may present themselves for examination three weeks before commencement and enter the examinations of the first one or two years, as they see fit"—the result of such examination determining their admission.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' medical study, "two of which must have been in a recognized medical college and the last of which must have been at this school;" and 4) pass the required examinations in all the studies of the three years' course satisfactorily to the board of examiners. This board consists of the faculty and an equal number of the members of the Connecticut State Medical Society.

FEES: Matriculation (paid once only), \$5; tuition for one year, \$125; for the third year to those who have paid for and attended two full courses, \$75; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates:

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 58 | 10 | 17+ |
| 1878-79 | 60 | 16 | 26.6 |
| 1879-80 | 32 | 12 | 37.5 |
| 1880-81 | 26 | 10 | 42+ |
| 1881-82 | 21 | 2 | 9.5 |
| 1882-83 | 32 | 7 | 21.9 |
| 1883-84 | 43 | 7 | 16.3 |

Average percentage of graduates to matriculates during the past seven years, *twenty-four*.

DISTRICT OF COLUMBIA.

NATIONAL MEDICAL COLLEGE, MEDICAL DEPARTMENT COLUMBIAN UNIVERSITY.

WASHINGTON, D. C. A. F. A. KING, M. D., 726 Thirteenth street.

ORGANIZED in 1821, as the Medical Department of Columbian College. It was also authorized to use the title of National Medical College. In 1873 Columbian College became Columbian University. The first class was graduated in 1822. Operations were suspended from 1834 to 1838, and from 1861 to 1863. With these exceptions, classes have been graduated each year since its founding.

The faculty embraces seven professors, one assistant and four demonstrators.

COURSE OF INSTRUCTION: The curriculum of study consists of three graded annual courses of lectures. The regular yearly term begins October 6, 1884, and ends March 1, 1885. A spring session is held during April and May.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, toxicology, medical jurisprudence, dermatology, ophthalmology and otology.

REQUIREMENTS: For admission: "Matriculates will be required to show that they are fitted, by previous education, for the study of medicine, and for this purpose they must either submit themselves to an examination, or in lieu thereof, present a satisfactory certificate of their attainments from some college, seminary or high school." Students who have attended one course in any other regular medical school are placed on the same footing as first-course students of this college, and those who have attended two courses are admitted to the third-year class after passing a satisfactory examination on anatomy, physiology, chemistry and materia medica.

For graduation: 1) three years' study; 2) twenty-one years of age; 3) good moral character; 4) attendance on three courses of lectures, and satisfactory examinations at the end of the second and third years; 5) dissection, at least two sessions; and 6) attendance on two courses of clinical instruction.

FEES: Matriculation (paid once only), \$5; lectures, \$100; examination, primary, \$20; final, \$10; demonstrator, \$10.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates:

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 53 | 6 | 11.3 |
| 1878-79 | 55 | 11 | 20. |
| 1879-80 | 56 | 8 | 14.3 |
| 1880-81 | 44 | 5 | 11.3 |
| 1881-82 | 52 | 8 | 15.4 |
| 1882-83 | 79 | 10 | 12.6 |
| 1883-84 | 78 | 14 | 17.9 |

Average percent. of graduates to matriculates during the past seven years, *fifteen*.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF GEORGETOWN.

WASHINGTON, D. C. J. W. H. LOVEJOY, M. D., Dean, No. 900 Twelfth street, N. W.

ORGANIZED in 1850. First class graduated in 1851; classes have been graduated each subsequent year since.

FACULTY embraces seven professors, two clinical professors, two lecturers and a demonstrator.—Thirty-sixth annual session begins September 22, 1884, and ends April 25, 1885; recess from December 24, 1884, to January 4, 1885, inclusive.

COURSE OF INSTRUCTION: Graded, extending over three years, and consisting of didactic and clinical lectures, recitations, demonstrations, and of dissecting and other practical manipulation during about seven months of each year.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology, otology, laryngology, diseases of children, microscopy, toxicology. Class recitations are conducted by the members of the faculty, one hour every week being devoted to each branch; and at the close of each session class examinations are held upon the subjects of study of each of the three classes.

REQUIREMENTS: For admission, a written preliminary examination upon the ordinary branches of an English education, "for the purpose of ascertaining whether the candidate can profitably pursue the technical study of medicine, and of preventing those not qualified from wasting time and money." Graduates of colleges, high-schools and academies are exempt from this preliminary examination. Students having attended one term at other medical colleges in good standing will be admitted to the second course without passing the first class examination; and candidates presenting certificates of examination from other medical colleges in good standing are admitted to the respective higher classes without further examination.

For graduation: 1) good moral character; 2) twenty-one years of age; 3) not less than three years' study; 4) three full courses of instruction; 5) two courses of practical anatomy; 6) pass all examinations with required percentage (65).

FEES: Matriculation, (paid but once,) \$5; full course of lectures, \$100; demonstrator, \$10

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 40 | 4 | 10 |
| 1878-79 | 38 | 6 | 16— |
| 1879-80 | 54 | 13 | 24+ |
| 1880-81 | 43 | 5 | 11.6 |
| 1881-82 | 30 | 7 | 23.3 |
| 1882-83 | 27 | 4 | 15— |
| 1883-84 | 34 | 7 | 20.5 |

Average percentage of graduates to matriculates during the past seven years, *seventeen.*

REMARKS: Attendance on recitations is obligatory; a record is kept and each student is credited at the end of the course.

MEDICAL DEPARTMENT OF HOWARD UNIVERSITY.

WASHINGTON, D. C. CHARLES B. PURVIS, M. D., Secretary, 113 Thirteenth Street

ORGANIZED in 1867. The first class graduated in 1871, and classes have been graduated each subsequent year.

The faculty embraces ten professors and two demonstrators.

COURSE OF INSTRUCTION: Comprises lectures, recitations, clinics and practical exercises. The annual course of lectures beginning October 6, 1884, continues five months. Three courses of lectures are required, to complete the curriculum. The student is allowed to devote his first term to anatomy, physiology, chemistry and materia medica, but the second must be given to all the subjects. The school has a summer session of eight weeks beginning in April.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, pharmacy and botany, microscopy, dental surgery and toxicology.

REQUIREMENTS: For admission: "Matriculates must be of good moral character, pass an examination in the ordinary English branches, and possess a sufficient knowledge of the Latin language to read and write prescriptions and understand medical terms."

For graduation: 1) twenty-one years of age; 2) three years' study, including three courses of lectures; 3) attended clinical lectures and dissections; 4) written and oral examination on required branches; 5) thesis on some subject of original observation.

FEES: Matriculation, \$10; demonstrator, \$5; incidental expenses, \$15; graduating, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 26 | 9 | 34+ |
| 1878-79 | 30 | 10 | 33+ |
| 1879-80 | 31 | 13 | 42— |
| 1880-81 | 81 | 13 | 16+ |
| 1881-82 | 91 | 16 | 17+ |
| 1882-83 | 87 | 31 | 35+ |
| 1883-84 | 90 | 22 | 24.4 |

Average percentage of graduates to matriculates, *twenty-six*.

MEDICAL DEPARTMENT OF THE NATIONAL UNIVERSITY.

WASHINGTON, D. C. H. H. BARKER, M. D., Dean, 1116 H Street, N. W.

ORGANIZED in 1884. The faculty consists of seven professors and one demonstrator.

COURSE OF INSTRUCTION: The first annual session began the first Monday of October, 1884, and will end the last Thursday in April, 1885. Instruction will be given by lectures, recitations, clinics and practical exercises. "It is deemed advisable to divide the course of studies into three years, advancing the student as he passes the required examination of his respective class." Students who have begun their professional studies elsewhere are admitted to advanced standing upon passing the necessary examination.

Lectures embrace: First year, anatomy, physiology, general chemistry and materia medica; Second year, practical and topographical anatomy, medical chemistry, materia medica and therapeutics, physiology, practice of medicine, surgery, and obstetrics; Third year, practice of medicine, pathological anatomy, surgery, obstetrics, and the diseases of women and children.

REQUIREMENTS: For admission, "All candidates must pass an examination in English, or present a certificate of proficiency in the same from some recognized institute of learning."

For graduation: 1) three years' study; 2) satisfactory examination in all the subjects of the three years' course, "the last of which must have been in this college"; 3) certificate of demonstrator that the necessary dissections of the human body have been made.

FEES: Matriculation (once), \$5; lectures, \$100; demonstrator, \$10.

FLORIDA.

TALLAHASSEE COLLEGE OF MEDICINE AND SURGERY.

TALLAHASSEE, Fla. Prof. H. N. FELKEL, Cor. Sec. of the Florida University.

ORGANIZED in 1883. The faculty embraces eight professors and one demonstrator.

COURSE OF INSTRUCTION: One annual session, opens on the last Wednesday in October and closes on the first Wednesday in March of each year.

Lectures embrace anatomy, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics and gynecology, medical jurisprudence, botany, pharmacy and histology.

REQUIREMENTS: For admission—"Both sexes, of suitable age and of good morals, are eligible for the attendance of lectures by payment of the matriculation and lecture fees."

For graduation: 1) a good moral character; 2) a good English education, as well as a competent knowledge of the natural sciences; 3) "an examination by the members of the entire faculty, on all the branches of medicine and their collaterals, will be made during the last week of the lecture course, and candidates giving full satisfaction of thoroughness of instruction, however obtained, will receive a diploma."

FEES: Matriculation, \$5; tuition, \$60; demonstrator, \$10; examination, \$25.

STUDENTS: Number reported during the session of 1883-84, seven, of whom four graduated, the percentage of graduates to matriculates being *fifty-seven*.

GEORGIA.

MEDICAL COLLEGE OF GEORGIA.

AUGUSTA, Ga. EDWARD GEDDINGS, M. D., Dean of the Faculty.

ORGANIZED in 1829, as a Medical Academy, and has been in constant operation ever since, except during the period of the war. In 1873 it became the Medical Department of the State University, of Georgia.

The faculty embraces fourteen professors, two demonstrators and two assistants.

COURSE OF INSTRUCTION: One annual graduating course, beginning on the first Monday in November and ending on the first of March. "The faculty has determined to abandon, as far as possible, the old system of didactic lectures, for direct teaching by question and answer as practiced in our literary colleges, and to lay special stress on demonstration by experiment and clinical practice." Graded course of three terms recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, ophthalmology, otology and pharmacy.

REQUIREMENTS: For admission, none.

For graduation: "A candidate for the degree of doctor of medicine must have attended two full courses of lectures in this or some other college in good standing, and pass a satisfactory examination on all the branches taught in this institution."

FEES: Matriculation (paid once only) \$5; tickets, \$75; practical anatomy, (paid once only) \$10; diploma, \$30.

STUDENTS: Number of matriculates and graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1882-83 | — | 23 | — |
| 1883-84 | 85 | 37 | 43.5 |

SOUTHERN BOTANICO-MEDICAL COLLEGE.

FORSYTH—MACON, Ga.

ORGANIZED in 1839 at Forsyth. Removed to Macon in 1846. First class graduated in 1841, and classes were graduated every year until 1854, when the name was changed to the Reform Medical College of Georgia—*vide infra*.

THOMPSONIAN COLLEGE.

BARBOURVILLE, Ga.

ORGANIZED about 1850. Extinct.

SAVANNAH MEDICAL COLLEGE.

SAVANNAH, Ga.

ORGANIZED in 1853. Suspended during the civil war, 1861-66. Extinct since 1930.

REFORM MEDICAL COLLEGE OF GEORGIA.

MACON, Ga.

ORGANIZED in 1854, as the successor of the Southern Botanico-Medical College—*vide supra*. Classes were graduated every year until 1861; suspended during the civil war; resumed in 1867; classes graduated in 1868 and each subsequent year until 1874, when the school assumed the name of the College of American Medicine and Surgery—which see.

ATLANTA MEDICAL COLLEGE.

ATLANTA, Ga. JAMES A. GRAY, M. D., Proctor of the College.

ORGANIZED in 1854. Closed during the rebellion, 1861-65. Reorganized in 1865. Classes were graduated from 1855 to 1861, inclusive, and each subsequent year.

The faculty embraces eight professors, one assistant, two lecturers and one demonstrator.

COURSE OF INSTRUCTION: One annual graduating course of lectures, the twenty-seventh session of which extends from October 9, 1884, to March 1, 1885. A graded course of three years is recommended, but not enforced. Medical clinics are held, and "quizzes are given, from time to time, by the professors, to those who desire to enter their names on the lists."

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics, gynecology and diseases of the eye and ear. Instruction is also given in venereal disease, diseases of the throat, minor surgery, and in laboratory work in chemistry and microscopy, which is optional with the student.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) thesis, or a report of any of the clinics; 6) satisfactory examination on subjects mentioned above.

FEES: Matriculation, \$5; demonstrator, \$10; full course, \$75; graduation, \$30. In compliance with a law, making a donation to the building and apparatus of the college, tickets are yearly given gratis to one student from each congressional district in the State.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 88 | 23 | 26+ |
| 1878-79 | 125 | 34 | 27+ |
| 1879-80 | 101 | 43 | 42+ |
| 1880-81 | 93 | 31 | 33+ |
| 1881-82 | 135 | 56 | 41+ |
| 1882-83 | 126 | 39 | 31— |
| 1883-84 | 114 | 48 | 42.1 |

Average percentage of graduates to matriculates, *thirty-five*.

OGLETHORPE MEDICAL COLLEGE.

SAVANNAH, Ga.

ORGANIZED in 1855, and continued its sessions until 1861. Extinct.

COLLEGE OF AMERICAN MEDICINE AND SURGERY.

ATLANTA, Ga.

ORGANIZED in 1874 as successor to the Reform Medical College at Macon. Removed to Atlanta in 1881—*vide supra*. The first class under this name was graduated in 1874. There was no graduating class in 1877, '78, '79, '80 or '81. During the session of 1882-3 there was a class of 24 matriculates, of whom 14 were graduated at the close of the session: percentage of graduates to matriculates, *fifty-eight*. In 1884 the institution was merged into the Georgia Eclectic Medical College.

GEORGIA ECLECTIC MEDICAL COLLEGE.

ATLANTA, Ga. JOSEPH ADOLPHUS, M. D., Dean of the Faculty.

ORGANIZED in 1877. The first class was graduated in 1877 and classes have been graduated each subsequent year. The faculty embraces seven professors and one demonstrator.

COURSE OF INSTRUCTION: One course of lectures annually. The session of 1884-85 was announced to begin on the first Monday of October, 1884, but its duration is not stated. Daily quizzes are held by the faculty. Each member of the graduating class is required to present, once a week, a thesis on some subject already covered by the lectures, and to defend the same.

Lectures embrace physiology, anatomy, chemistry, toxicology, surgery, materia medica, theory and practice of medicine, medical jurisprudence, nervous and venereal diseases, obstetrics, diseases of women and children.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) thesis; 5) must have dissected the best part of the term; 6) "must have been diligent in attending the lectures and clinics;" 7) "thorough examination on the respective branches taught in the college."

FEES: Lectures, \$60; demonstrator, \$5; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| | | | |
|---------|----|----|------|
| 1881-82 | 81 | 24 | 29.6 |
| 1882-83 | 67 | 18 | 27— |
| 1883-84 | 62 | 17 | 27.4 |

Average percentage of graduates to matriculates, *twenty-eight*.

SOUTHERN MEDICAL COLLEGE.

ATLANTA, Ga. WM. PERRIN NICHOLSON, M. D., Dean, P. O. Box, No. 234.

ORGANIZED 1879. Faculty embraces nine professors and four lecturers.

COURSE OF INSTRUCTION: One annual lecture course, the current session beginning October 7th, 1884, and continuing until the first week in March, 1885. Hospital and dispensary clinics are given, and quizzes by the professors to such students as desire them. A graded course of three years recommended, but not required.

Lectures embrace principles and practice of medicine, obstetrics, diseases of women and children, physiology, hygiene, surgery, anatomy, materia medica, therapeutics, toxicology, diseases of the eye, ear and throat, chemistry, venereal diseases, dermatology, and dental surgery.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) "must have attended the dissections;" 5) "must undergo a personal and satisfactory examination before the faculty—examination must occur at close of session, except in cases of pressing necessity, and then only by unanimous consent of the faculty;" 6) thesis, or report of clinic.

FEES: Matriculation (paid once), \$5; tickets, full course, \$75; demonstrator, \$10; diploma, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates:

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1879-80 | 64 | 8 | 12+ |
| 1880-81 | 105 | 38 | 36+ |
| 1881-82 | 126 | 37 | 29+ |
| 1882-83 | 104 | 37 | 35+ |
| 1883-84 | 86 | 27 | 31.4 |

Average percentage of graduates to matriculates, during the past five years, *thirty*.

ILLINOIS.

ILLINOIS STATE BOARD OF HEALTH.

SPRINGFIELD, ILL. JOHN H. RAUCH, M. D., Secretary of the BOARD.

ORGANIZED July, 1877. This BOARD, in accordance with the Medical Practice Act of Illinois, grants licenses to practice medicine and surgery within the State.

The first examination of applicants for licenses, was held November 1, 1877. Examinations are now held in Chicago or Springfield once annually.

The following are extracts from the act conferring this power—see full text *ante*:

THE STATE BOARD OF HEALTH * * * shall receive through its secretary applications for certificates and examinations. * * * If not a graduate, the person practicing medicine in this State shall present himself before said BOARD, and submit himself to such examination as said BOARD shall require; and if the examination be satisfactory to the examiners, the said BOARD shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned.

It shall prepare two forms of certificates, one for persons in possession of diplomas or licenses, the other for candidates examined by the BOARD; and shall furnish to the county clerks of the several counties a list of all persons receiving certificates.

The STATE BOARD OF HEALTH may refuse certificates to individuals guilty of unprofessional or dishonorable conduct, and may revoke certificates for like causes. In all cases of refusal or revocation the applicant may appeal to the body appointing the BOARD.

§ 8. Candidates for examination shall pay a fee of five dollars, in advance, which shall be returned to them if a certificate be refused.

§ 9. Examinations may be made wholly or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

All examinations of persons not graduates or licentiates shall be made directly by the BOARD, and the certificates given by the BOARD shall authorize the possessor to practice medicine and surgery in the State of Illinois.

Where the candidates have any special views of theory and practice of medicine or of therapeutics, respect is paid to such views, and they are allowed, upon request, to appear before individual members of the BOARD for special examination in such branches. Examinations are conducted in the English language. If made in another language, interpreters must be furnished at the expense of the applicant.

All candidates must pass a preliminary examination, such as is indicated in the "minimum requirements," and must fill out the following:

Application for Examination before the Illinois State Board of Health, under the Act to Regulate the Practice of Medicine in the State of Illinois.

1. Name in full.....
2. Nativity and age—(must be at least twenty-one years of age).....
3. Residence and postoffice.....
4. Time spent in professional studies—(must be at least three years).....
5. Physician or preceptor under whom the studies were pursued, with postoffice address—(must be a licentiate of the BOARD or reputable practitioner).....
6. Courses of medical lectures attended.....
7. Name of medical school attended—(time spent at schools not recognized by the BOARD, will not be counted).....
8. Time spent in hospital, if any.....
9. Time of practice, if any.....
10. School of practice chosen.....
11. References as to character—(must present certificate of good character from two licentiates of the BOARD or other reputable practitioners).....

Approved.....188....

.....
President of the BOARD.

Subjects of Examination.

1) anatomy; 2) materia medica; 3) theory and practice; 4) gynecology; 5) physiology; 6) pathology; 7) obstetrics; 8) chemistry; 9) surgery; 10) hygiene; 11) medical jurisprudence.

Eighty percent. of correct answers required.

We have examined this applicant and find him to stand as above.

(Signed by the members of the BOARD.)

NUMBER of candidates examined, 649. Number of candidates licensed, 193. Number of licentiates now practicing in the State, 60—the discrepancy being accounted for by the subsequent graduation of the licentiates and by removals. During the past year thirteen candidates applied for examination, only two of whom attained the required standard.

These examinations are independent of those of graduates of colleges that do not fully comply with the Schedule of Minimum Requirements of the BOARD, and which examinations are confined to the branches or subjects omitted by the given college.

RUSH MEDICAL COLLEGE.

CHICAGO, Ill. JAMES H. ETHERIDGE, A. M., M. D., Secretary, 1634 Michigan Avenue.

ORGANIZED in 1842. First class graduated in 1843, and classes have been graduated each year subsequently.

The following is compiled from the forty-second annual announcement: Session of 1884-85:—Faculty embraces twelve professors, three professors of special departments, and sixteen adjunct professors, lecturers and assistants and demonstrators.

COURSE OF INSTRUCTION: "Instruction is given in this institution by lectures, clinics, practical work in the dissecting room and laboratories, and by repeated oral examinations. The faculty desire that as many as possible of the matriculates shall pursue their studies in the college through three winter and three spring terms. To encourage this more extended curriculum of college study, final examinations in descriptive anatomy, physiology, chemistry, materia medica and therapeutics are open to three-years' students at the end of the second winter session." The forty-second (winter) session began September 23, 1884, and continues twenty-one weeks. The spring session, 1885, begins February 24, and continues sixteen weeks.

Lectures embrace anatomy, physiology, chemistry, materia medica, surgery, principles and practice of medicine, obstetrics, hygiene, medical jurisprudence, genito-urinary diseases, diseases of women and children, dermatology and venereal diseases, ophthalmology, otology, laryngology, dental pathology and surgery, and toxicology.

REQUIREMENTS: For admission, "A matriculation examination which will include the writing of a brief paper on a subject to be given; and an examination in the elementary principles of physics and mathematics as taught in the public schools of the country will be required. The written paper will be a sufficient indication of the student's knowledge of orthography, as well as of the subject given. Graduates of a literary or scientific college, academy or high school, or who have passed the entrance examination to a literary college in good standing; or persons having a State or county teacher's certificate; or graduates in medicine; or previous matriculates of this college; or students who desire to pursue a special course of study—other than for the purpose of securing the degree—will be exempt from examination. Students who have completed a full course of study equivalent to that required for admission to this college, may, by special arrangement, be admitted on the certificates of their instructors."

For graduation: 1) age, twenty-one years; 2) good moral character; 3) three years' study; 4) two full courses of lectures: "The lectures of the spring term cannot be considered as a course of lectures in this requirement;" 5) clinical instruction for two terms; 6) dissection of each region of the body; 7) one course in practical chemistry; 8) "full and satisfactory written or oral examination on each branch taught in the college."

FEES: For the regular winter course—matriculation (good to the following March) \$5; lectures, \$75; demonstrator (till the following March) \$5; chemistry, \$5; final examination (not returnable) \$30. "From alumni of this college, and from its students who have paid for two full courses of lectures, the matriculation fee only (\$5) will be required. From alumni of other recognized medical colleges the matriculation fee and one-half lecture fee will be required." For the annual spring course—matriculation, \$5; lectures, \$20; (this amount will be deducted from the fees of the next following winter session); chemistry, \$5; demonstrator, \$5; hospital and infirmary, \$5. "Graduates of the college are admitted on payment of the matriculation fee only; graduates of other regular medical colleges on payment of matriculation fee and ten dollars."

STUDENTS: Number of matriculates and graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percentage. |
|----------|---------------|------------|-------------|
| 1877-78 | 379 | 128 | 33.8 |
| 1878-79 | 364 | 122 | 33.5 |
| 1879-80 | 481 | 147 | 30.5 |
| 1880-81 | 559 | 172 | 30.7 |
| 1881-82 | 533 | 185 | 34.7 |
| 1882-83 | 549 | 183 | 33.3 |
| 1883-84 | 451 | 166 | 36.8 |

Average percentage of graduates to matriculates during the past seven years, *thirty-three*.

MEDICAL DEPARTMENT OF ILLINOIS COLLEGE.

JACKSONVILLE, Ill.

ORGANIZED in 1843. Suspended lectures in 1848.

REMARKS: The faculty, as given in the catalogues and announcements still extant, embraced six professors, three of whom resided at Jacksonville, one at Springfield, one at Alton, and one at Geneva, Kane county; and who lectured on chemistry, physical aetiology, obstetrics, diseases of women and children, surgical and pathological anatomy, surgery, principles and practice of medicine, materia medica, therapeutics, anatomy and physiology. The course of lectures was of sixteen weeks' duration. The fees were: Lectures, \$60; dissection, \$5; matriculation, \$3; graduation, \$20.

The requirements for graduation were: 1) thorough course of study with some practitioner, (this course, according to the last catalogue, must extend over three years,) 2) two full courses of lectures, provided, however, that several years of reputable experience in the practice of medicine may be accepted in the place of one course of lectures; 3) full and satisfactory examination in all the branches of medical study; 4) thesis. Students applying for graduation were expected to possess a competent English and classical education. Dissection was optional.

During its existence instruction was given to about seventy-five students, and thirty-seven were graduated.

MEDICAL DEPARTMENT, UNIVERSITY OF ST. CHARLES.

ST. CHARLES, Ill.

ORGANIZED in 1847. Annual courses of lectures were delivered until 1848, when the institution was transferred to Rock Island, and subsequently, in 1850, to Keokuk, Iowa, when it became the Medical Department of the University of Iowa, now the College of Physicians and Surgeons of Keokuk, Ia.

ROCK ISLAND MEDICAL COLLEGE.

ROCK ISLAND, Ill.

ORGANIZED in 1849. Lectures were delivered during the years 1849-50. College extinct.

CHICAGO MEDICAL COLLEGE.

Medical Department of the Northwestern University.

CHICAGO, Ill. WALTER HAY, M. D., LL. D., Secretary, 243 State Street.

ORGANIZED in 1859, as the Medical Department of Lind University, it continued under that name until 1864, when, severing this connection, it assumed the name of the Chicago Medical College. The school entered into its present university relations in 1869.

The faculty embraces eighteen professors, one adjunct professor, and five lecturers and demonstrators.

COURSE OF INSTRUCTION: Graded, comprising three annual consecutive courses of lectures. The twenty-sixth annual session began September 23, 1884, and ends March 24, 1885. Studies:—First year course—Descriptive anatomy, physiology, histology, practical microscopy and general chemistry; Second-year course—Surgical anatomy and operative surgery, general pathology and pathological anatomy, materia medica and general therapeutics, state medicine and public hygiene, practical obstetrics, medical chemistry, dermatology, hospital and dispensary clinics;—Third-year course—Theory and practice of medicine and clinical medicine, principles and practice of surgery and clinical surgery, gynecology, diseases of children, ophthalmology and otology, nervous and mental diseases, medical jurisprudence, hospital and dispensary clinics and service as surgical dresser in hospital; Fourth-year course—(optional)—Clinical instruction in medicine, surgery, obstetrics, gynecology, ophthalmology, otology, dermatology, nervous and mental diseases, medical jurisprudence, and more advanced work in microscopic pathology and analytical chemistry.

REQUIREMENTS: For admission, a certificate of graduation from a literary college, a scientific school or academy, or an examination before a committee of the faculty. Accredited certificates of one year's study entitle holders to enter as second-course students after satisfactory examination in studies of first-year course. Certificates of two years' study and of attendance on one full course of lectures entitle to entry as third-course students after examination in studies of first and second years.

For graduation: 1) Evidence of good moral character; 2) three years' study; 3) required age, twenty-one years; 4) attendance upon three courses, or two courses of lectures and sustaining satisfactory examination in studies embraced in first-year course of lectures; 5) dissection of three parts of the human body; 6) one year of hospital attendance; 7) passing all examinations; 8) satisfactory thesis.

FEES: Matriculation, \$5; lecture fees for first and second collegiate years (the third year being free), \$75; demonstrator, \$5; laboratory, \$5; deposit against breakage in laboratory, \$5; hospitals, \$11; examination, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 153 | 50 | 32.6 |
| 1878-79 | 152 | 37 | 24.4 |
| 1879-80 | 148 | 38 | 25.6 |
| 1880-81 | 152 | 45 | 29.2 |
| 1881-82 | 155 | 39 | 25+ |
| 1882-83 | 137 | 42 | 30.6 |
| 1883-84 | 114 | 41 | 35.9 |

Average percentage of graduates to matriculates during the past seven years, *twenty-eight*.

The total number of matriculates in the twenty-five years of the existence of this college has been 2768, and the total number of graduates 875. Average percent. of matriculates to graduates (25 years) 31.

REMARKS: This school was the first in the United States to establish a systematic graded course of medical instruction, in accordance with the principles that obtain in all other branches of education. About nine-tenths of its graduates have completed the three-years' graded course.

HAHNEMANN MEDICAL COLLEGE AND HOSPITAL.

CHICAGO, Ill. E. S. BAILEY, M. D., Registrar, 3634 Michigan avenue.

ORGANIZED in 1859. The first class was graduated in 1860. Classes have been graduated each subsequent year.

The faculty embraces fourteen professors, and two adjunct professors.

COURSE OF INSTRUCTION: One annual graduating course of lectures. The current session began September 23, 1884, and ends February 21, 1885. The plan of teaching is "largely clinical and objective." Daily and weekly quizzes are conducted by the professors in person.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, toxicology, ophthalmology and otology, histology, minor and operative surgery.

REQUIREMENTS: For admission—"Upon application for admission each student must present to the registrar satisfactory evidence of a good English education. Such as are graduates of a literary or scientific college, academy, or high school, or who have passed the entrance examination to a literary college in good standing; who have a county or State teacher's certificate; graduates in medicine; previous matriculates of this college; and students who desire to pursue a special course of study—other than for the purpose of securing the degree—will be exempt from this requirement, providing they furnish this documentary evidence to the registrar. Lacking such credentials from former teachers and preceptors, the students must pass a fair but not a technical examination, before a committee of the faculty appointed for that purpose." The following is quoted in this connection in the Announcement: "By vote of the Inter-Collegiate Committee of the American Institute of Homeopathy, it has been decided that after the session of 1884-85, all colleges represented in that committee, and therefore in the Institute, shall require an entrance examination previous to matriculation. This examination shall include 1) credible certificates of good moral character, 2) a diploma, certificate, or other proof of graduation from a college, academy or high school, or a State or county teacher's certificate, or lacking this, 3) a thorough examination in the branches of a good English education, including elementary mathematics, English composition and elementary physics or natural philosophy."

For graduation: 1) good moral character; 2) twenty-one years of age; 3) two full courses of lectures; 4) satisfactory examination in obstetrics and diseases of women, surgery, principles and practice of medicine, materia medica and therapeutics, physiology, chemistry, anatomy, diseases of the eye and ear.

FEES: Matriculation, \$5; lectures, \$50; graduation, \$25; hospital free to matriculates; demonstrator, \$5; perpetual ticket, \$95.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 165 | 94 | 56.7 |
| 1878-79 | 197 | 67 | 34+ |
| 1879-80 | 205 | 87 | 42.4 |
| 1880-81 | 195 | 100 | 51+ |
| 1881-82 | 264 | 108 | 40.9 |
| 1882-83 | 297 | 134 | 45+ |
| 1883-84 | 259 | 113 | 43.6 |

Average percent. of graduates to matriculates, during the past seven years, *forty-four*.

BENNETT COLLEGE OF ECLECTIC MEDICINE AND SURGERY.

CHICAGO, Ill. MILTON JAY, M. D., Dean, 126 State street.

ORGANIZED in 1868. The first class was graduated in 1869. Classes have been graduated each subsequent year.

The faculty consists of fourteen professors, two demonstrators and four assistants.

COURSE OF INSTRUCTION: Extends over two annual lecture terms, but students electing a three years' graded course will be allowed, at the end of the second year, to enter the final examination upon anatomy, physiology, chemistry and materia medica.—Instruction is imparted by didactic and clinical lectures, daily quizzes and laboratory work. The lecture term of 1884-85 began September 30, 1884, and continues six months, closing March 31, 1885. A practitioner's course begins February 16, 1885, and continues six weeks.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, orthopedy, ophthalmology and otology, diseases of the teeth and adjacent structures, venereal diseases and dermatology, diseases of children, electro-therapeutics, pharmacy, toxicology and insanity.

REQUIREMENTS: For admission—A good elementary English education, including mathematics, English composition and elementary physics, as attested by the presentation of a diploma of graduation from some literary and scientific college or high school, or by a creditable examination upon those branches by a committee appointed for that purpose. A competitive examination, open to first-course matriculates, and embracing mathematics, physics, English and Latin, entitles the one who stands highest to a scholarship.

For graduation: 1) the candidate must possess satisfactory references as to good moral character and have attained the age of twenty-one years; 2) three years' study; 3) must have attended not less than two courses of lectures, the last of which must have been in this college; 4) must have completed the prescribed course of analytical chemistry and practical anatomy; 5) sustain a satisfactory and honorable examination in every department.

FEES: Matriculation, \$5; lectures, \$50. demonstrator, \$10; analytical chemistry, \$10; examination \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 139 | 65 | 46 |
| 1878-79 | 106 | 29 | 27 |
| 1879-80 | 123 | 37 | 30 |
| 1880-81 | 127 | 51 | 40 |
| 1881-82 | 118 | 38 | 33 |
| 1882-83 | 147 | 52 | 35 |
| 1883-84 | 159 | 50 | 31 |

Average percentage of graduates to matriculates during the past seven years, *thirty-five*.

EDINBURG UNIVERSITY OF CHICAGO.

CHICAGO, Ill.

INCORPORATED September 23, 1870, under the general incorporation act of the State. A fraudulent institution, exposed by the ILLINOIS STATE BOARD OF HEALTH, and since defunct.

WOMAN'S MEDICAL COLLEGE OF CHICAGO.

CHICAGO, Ill. D. W. GRAHAM, M. D., Secretary, 101 Warren avenue.

ORGANIZED in 1870. The first class was graduated in 1871. No class was graduated in 1872. Classes have been graduated each subsequent year.

The faculty embraces twenty-one professors, two lecturers, four assistants and two demonstrators.

COURSE OF INSTRUCTION: The session of 1884-85 began September 16, 1884, and will continue thirty-one weeks, closing April 21, 1885. A graded course of three years recommended, but not required. Instruction is given by didactic lectures, recitations, clinical lectures, practical work, and attendance on hospitals.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, hygiene, ophthalmology and otology, diseases of children, diseases of the throat and chest, diseases of the nervous system, histology, dental surgery, dermatology.

REQUIREMENTS: For admission—"Students must present, before matriculating, satisfactory proof of a good English education. A certificate of graduation from high school, academy or college, or a teacher's certificate from a county superintendent of schools,

will be accepted as sufficient evidence of such education. Students without such credentials will, in every case, be required to pass an examination before a committee of the faculty. Certificates of character are required."

For graduation: 1) twenty-one years of age; 2) three years' study; 3) two full courses of lectures, one of which must have been in this college; 4) two courses in practical anatomy; 5) one course in practical chemistry; 6) one course in hospital clinical instruction; 7) a satisfactory examination.

FEES: Matriculation, \$5; lectures, \$50; demonstrator, \$5; chemical laboratory ticket, \$5; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

Average percentage of graduates to matriculates during the past seven years, *twenty-two.*

CHICAGO HOMEOPATHIC MEDICAL COLLEGE.

CHICAGO, ILL. J. R. KIPPAX, M. D., Secretary, 3154 Indiana Avenue.

ORGANIZED in 1876. The first class was graduated in 1877. Classes have been graduated each subsequent year.

The faculty embraces fifteen professors two lecturers, and three demonstrators.

COURSE OF INSTRUCTION: A regular session of twenty-two weeks' duration, and a spring session of six weeks' duration, annually. Three-years' graded course recommended but not required. A junior and a senior course (two separate and distinct courses) are delivered during each college term. Clinics at hospital and dispensary.

Lectures embrace: Junior year, anatomy, physiology, microscopy, materia medica, chemistry, toxicology, minor surgery, odontology, sanitary science and clinics. Senior year, principles and practice of medicine and surgery, gynecology, pedology, materia medica, obstetrics, ophthalmology and otology, mental and nervous diseases, mental jurisprudence and clinics.

REQUIREMENTS: For admission—"All applicants must possess good moral character, and present to the secretary satisfactory evidence of a good English education, such as is required of all matriculates by the STATE BOARD OF HEALTH OF ILLINOIS. It is not intended to make this examination technical or rigid, but that every student must possess a fair English education. Previous medical matriculates of medical colleges having an equivalent examination, graduates or matriculates of literary or scientific colleges, graduates of high schools, and students who possess a county or State teacher's certificate, will be exempted from this examination on presentation of their diplomas or certificates, attesting graduation or matriculation."

For graduation: 1) twenty-one years of age; 2) three years' study; 3) two full courses; 4) practical anatomy to the extent of having dissected every region of the human body; 5) pass all the regular examinations.

FEES: Full course of lectures, including matriculation, \$55; perpetual ticket, \$90; final examination, \$25; partial course, each chair, \$10; demonstrator's ticket, \$5; hospital, \$5.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 105 | 25 | 23.3 |

COLLEGE OF PHYSICIANS AND SURGEONS OF CHICAGO.

CHICAGO, ILL. D. A. K. STEELE, M. D., Secretary, 1801 State Street.

ORGANIZED in 1882. The first class was graduated in 1883. The faculty consists of twenty-three professors, eight lecturers and three demonstrators. Three chairs are unassigned.

COURSE OF INSTRUCTION: The session of 1884-85 commenced September 23, 1884, and continues twenty-four weeks. A graded course of three years recommended, but not required. "Instruction will be given by didactic and clinical lectures, practical work in the dissecting room, clinical and physiological laboratories, and by oral and written examinations."

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics, gynecology, hygiene, medical jurisprudence, histology, microscopy, dermatology, genito-urinary diseases, dental surgery, orthopedics, ophthalmology and otology, diseases of children, nervous and mental diseases, laboratory work in chemistry and physiology.

REQUIREMENTS: For admission—"No previous reading or study of medicine is required before entering college. Each candidate must be not less than eighteen years of age. He must present to the faculty 1) a diploma of graduation from a literary college, high school or academy; or 2) a certificate of having passed the entrance examination in a literary or medical college; or 3) he must undergo a satisfactory examination in the branches of a good English education, before a committee of the faculty."

For graduation: "1) good moral character; 2) attainment of twenty-one years of age; 3) three years' study under the direction of a physician in good standing; 4) dissection of each part of the cadaver; 5) attendance upon two terms of clinical and hospital instruction; 6) satisfactory examinations."

FEES: Matriculation, \$5; lectures, \$50; demonstrator, \$10; chemical laboratory, \$5; graduation, \$30; "Cook county hospital ticket (good till the following March), and for the Eye and Ear Infirmary, good for one year (optional), each, \$5.

STUDENTS: Number of matriculates and graduates at each session reported, and percentage of graduates to matriculates:

| Session. | Matriculates. | Graduates. | Percent. |

| 1882-3 | 152 | 52 | 34.2 |
| 1883-4 | 167 | 52 | 31.1 |

Average percentage of graduates to matriculates during the past two years, *thirty-three*.

QUINCY COLLEGE OF MEDICINE.

Medical Department of Chaddock College.

QUINCY, ILL. C. R. S. CURTISS, M. D., Secretary.

ORGANIZED in 1882. The faculty embraces fourteen professors and one demonstrator.

COURSE OF INSTRUCTION: One lecture session is held annually, extending from the second Tuesday in October to the second Wednesday of March.

Lectures, clinical and didactic, embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, toxicology, ophthalmology, otology, pharmacy, diseases of the mind and nervous system.

REQUIREMENTS: For admission, "All applicants who can present evidence of a good English education, sufficient to enable them to understand medical literature, and to readily and thoroughly comprehend the necessary technicalities of our profession, are eligible to our class. This may be made apparent by diploma of graduation from a good literary and scientific college or high school, or lacking this, a thorough examination in the branches of a good English education, including mathematics, English composition and elementary physics."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two courses of lectures; 4) two courses of instruction in anatomy, including dissections and demonstrations; 5) three years' study; 6) a creditable examination in all the branches taught in the institution.

FEES: Matriculation, \$5; lectures, \$40; demonstrator, \$10; examination, \$25.

| 1883-84 | 12 | 4 | 33.3 |

INDIANA.

UNIVERSITY OF INDIANA.

NEW ALBANY, Ind.

ORGANIZED in 1833. The following history of this, the first fraudulent medical school in the West, is compiled from the minutes of the New York County Medical Society of the date December 16, 1833:

It appears that John Cook Bennett, M. D., LL. D., chancellor, secretary, etc., of this institution, journeyed to New York city in the summer of 1883, and, having appointed two members of the county medical college as assistants, proceeded "to examine candidates and dispense diplomas," the persons usually paying therefor the sum of twenty-five dollars. This proceeding becoming known to the society, a committee was appointed "to investigate and report on the subject of diplomas purporting to be issued by the University of Indiana." The committee reported—

(1.) That such an institution was in existence, having been incorporated by an act entitled "An act to incorporate the Christian College, in New Albany, in Floyd county, Indiana."

(2.) That said college was organized by a meeting of eight persons, at the house of Bennett, in New Albany.

(3.) That the said college, under its charter, claims, and probably exercises the right, to confer eight different kinds of degrees on males, and seven on females.

(4.) That this university embraces seven departments, including a department of medicine.

(5.) That John Cook Bennett was bishop and secretary of the general university, and president, chancellor and professor of midwifery in the medical department.

(6.) That by a by-law, the bishop was authorized to send out commissioners to confer degrees, etc.

(7.) That at the time of issuing the diplomas, this university did not possess buildings, apparatus or facilities of any kind to teach physic and surgery; had not given any full course of instruction, nor had any lectures on medical science been delivered.

And finally, that the charges against the members of the society were true; whereupon the society publicly reprimanded the offenders.

INDIANA MEDICAL COLLEGE.

LA PORTE, Ind.

ORGANIZED IN 1844. Lectures were continued at this college until 1848, when the institution was removed to St. Charles, Ill., thence to Rock Island, Ill., in 1849, and finally to Keokuk, Iowa, where it remains as the College of Physicians and Surgeons of Keokuk.

MEDICAL COLLEGE OF EVANSVILLE.

EVANSVILLE, Ind.

ORGANIZED IN 1849. Classes were graduated during the years 1850 to 1854, inclusive, numbering 44 alumni. Lectures were suspended from 1854 to 1871. The college was re-organized in 1871, and classes were graduated from 1873 to 1884, inclusive, when the institution suspended.

PHYSIO-MEDICAL COLLEGE OF INDIANA.

INDIANAPOLIS, Ind. C. T. BEDFORD, M. D., Secretary, 290 Massachusetts Avenue.

ORGANIZED IN 1873. The first class was graduated in 1874. Classes have been graduated each subsequent year.

The faculty embraces nine professors and two lecturers.

COURSE OF INSTRUCTION: The session of 1884-85 began October 14, 1884, and will continue twenty-four weeks. The methods of teaching consist of didactic lectures, recitations, quizzes, and general reviews.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, hygiene, histology, toxicology, diseases of the rectum, diseases of children, clinical medicine and surgery.

REQUIREMENTS: For admission:—"All applicants must possess at least a good English education. If an applicant is a graduate of a literary college, or presents a certificate from some scientific school or academy, the same will be accepted as satisfactory evidence, but unaccompanied by the above evidence he or she must sustain a satisfactory examination by a board of censors."

For graduation: The following is a verbatim copy of the "Requirements for Graduation," from the annual announcement, twelfth regular session, 1884-85: "Applicants for graduation in this college must be 21 years of age, a good moral character, attendance at least upon two full courses of lectures (the last of which must be in this college), three years' course of reading attendance at hospital clinics, two courses of dissection under the supervision of a demonstrator, a competent knowledge of all the branches taught in this college, qualifications sufficient to rightly apply the principles inculcated in everyday practice, are regarded as requisite to an examination which must be satisfactory to each professor in his own department."

FEES: Matriculation, (paid but once) \$5; hospital, \$3; lectures, \$75; demonstrator, \$5; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 19 | 8 | 42+ |
| 1878-79 | 15 | 7 | 46+ |
| 1879-80 | 15 | 8 | 53+ |
| 1880-81 | 20 | 10 | 50 |
| 1881-82 | 24 | 10 | 40+ |
| 1882-83 | 26 | 17 | 40+ |
| 1883-84 | 21 | 7 | 33.3 |

Average percentage of graduates to matriculates during the past seven years, *forty-eight*.

MEDICAL COLLEGE OF FORT WAYNE. FORT WAYNE, Ind.

ORGANIZED in 1876. Classes were graduated in each year from 1877 to 1883, inclusive.

During the summer of 1883, the effects of the college were sold under execution, and the organization became extinct.

MEDICAL COLLEGE OF INDIANA.

INDIANAPOLIS, Ind. C. E. WRIGHT, M. D., Secretary, 107 N. Alabama Street.

ORGANIZED in 1878, when the Indiana Medical College (organized in 1868) and the College of Physicians and Surgeons of Indiana (organized in 1873) were united to form this college. It was formerly the Medical Department of Butler University, but severed its connection with that institution in 1883.

The faculty embraces eleven professors, four lecturers, two assistants, a curator and one demonstrator.

COURSE OF INSTRUCTION: The sessions of 1884-85 embrace a preliminary term, which began September 15, and ended September 30, 1884, and a regular graduating course which began October 1, 1884, and continues until February 28, 1885. Systematic daily examinations of the class by members of the faculty are held. Clinics at hospital and college.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, toxicology, pharmacy, dermatology, syphilis, diseases of the mind and nervous system, laryngology, clinical medicine and surgery, ophthalmology and otology, diseases of children.

REQUIREMENTS: For admission: Candidates before commencing the first year of study must pass a creditable preliminary examination, covering 1) credible certificate of good moral standing, 2) diploma of graduation from a good literary and scientific college, or high school. Or, lacking this, 3) a thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy.

For graduation: "He must produce satisfactory evidence of good moral character, and of having attained the age of twenty-one years. He must file a satisfactory certificate of having studied medicine for at least three years under a regular graduate, or a licentiate and practitioner of medicine in good standing, using the word 'regular' in the sense commonly understood in the medical profession. No candidate shall be eligible for final examination for graduation, unless his term of three years' study shall have been completed, or shall expire at a date not later than three months after the close of the final examination. He must file the proper official evidence that during the above-mentioned three years he has matriculated at some affiliated college or colleges for two regular sessions, and in the course of the same has attended two full courses of instruction. The candidate must have passed a personal examination before the faculty on all the branches of medicine taught in this college."

FEEs: Matriculation, \$5; laboratory, \$5; lectures, \$40; demonstrator, \$10; hospital, \$6; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1878-79 | 143 | 66 | 46+ |
| 1879-80 | 182 | 60 | 33— |
| 1880-81 | 200 | 83 | 41.5 |
| 1881-82 | 164 | 58 | 35+ |
| 1882-83 | 131 | 53 | 40.4 |
| 1883-84 | 71 | 43 | 65.8 |

Average percentage of graduates to matriculates, during the past six years, *forty*.

CENTRAL COLLEGE OF PHYSICIANS AND SURGEONS.

INDIANAPOLIS, Ind. JOSEPH EASTMAN, M. D., Secretary, 197 N. Delaware Street.

ORGANIZED in 1879. The first class was graduated in 1880.

The faculty embraces ten professors, two demonstrators and one prosector.

COURSE OF INSTRUCTION: The collegiate year of 1884-85 embraces a preliminary fall course, opening September 24, ending October 1, 1884, and a winter session, commencing at the latter date and closing March 1, 1885. A three-years' graded course is recommended, but not required. Clinical instruction at college and hospital.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology, otology, histology and diseases of the nervous system, clinical medicine and surgery.

REQUIREMENTS: For admission, "Students must present, before matriculating, satisfactory proof of a good English education." Certificates of graduation from a high school or like institution, or a teacher's certificate from a county superintendent of schools, will be accepted as sufficient evidence of such education. Students who have attended one course of lectures, and practitioners in good standing, are exempt from this requirement.

For graduation: 1) good moral character; 2) twenty-one years of age; 3) three years' study; 4) two full courses of lectures; 5) must pass satisfactory examination in anatomy, including dissections, physiology, chemistry, materia medica, therapeutics, obstetrics, surgery, principles and practice of medicine, clinical medicine.

FEES: Matriculation, \$5; lectures, \$40; laboratory, \$5; demonstrator, \$5; hospital, \$6; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates:

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1879-80 | 42 | 12 | 28.5 |
| 1880-81 | 62 | 17 | 27.4 |
| 1881-82 | 43 | 10 | 23+ |
| 1882-83 | 44 | 24 | 54.5 |
| 1883-84 | 28 | 13 | 46.4 |

Average percent. of graduates to matriculates during the past five years, *thirty-five*.

FORT WAYNE COLLEGE OF MEDICINE.

FORT WAYNE, Ind. C. B. STEMEN, M. D., Dean, 261 W. Wayne Street.

ORGANIZED in 1879. The first class was graduated in 1880.

The faculty embraces sixteen professors, two lecturers and nine assistants.

COURSE OF INSTRUCTION: The collegiate year of 1884-85 began September 16, 1884, and will continue until March 1, 1885. A three-years' graded course is recommended, but its acceptance is optional with the student. Clinics at hospital and college.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, toxicology, ophthalmology and otology, diseases of children, orthopedic surgery, genito-urinary and rectal diseases, mental and nervous diseases.

REQUIREMENTS: For admission, "Each student must present satisfactory evidence, on examination or otherwise, of proficiency in the fundamental branches of an English education. Graduates from a college, academy or high school, or a license to teach in the public schools, will be evidence of such proficiency."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) "satisfactory certificate of having studied medicine three years under a regular graduate or licentiate and practitioner of medicine in good standing. No candidate shall be eligible for final examination for graduation unless his or her term of three years' study shall have been completed, or shall expire at a date not later than three months after the close of the final examination;" 4) two full courses of lectures, not within the same twelvemonth; 5) dissection for one session; 6) instruction in chemistry during one session; 7) must have followed the practice of a hospital; 8) must pass monthly and terminal examinations; premature examination will be granted if good and sufficient reasons are given for requesting it.

FEES: Matriculation, \$5; lectures, \$40; demonstrator, \$5; laboratory, \$5; hospital, \$5; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

| 1882-83 | 25 | 12 | 48 |
| 1883-84 | 23 | 10 | 43.5 |

Average percentage of graduates to matriculates during the past three years, *fifty-one*.

INDIANA ECLECTIC MEDICAL COLLEGE.

INDIANAPOLIS, Ind. L. ABBETT, M. D., Dean, 31½ Virginia Avenue.

ORGANIZED in 1880. Beach Medical College was merged into this institution in 1884.

The faculty consists of eight professors and one demonstrator.

COURSE OF INSTRUCTION: The regular session of 1884-85 began October 1, 1884, and will continue twenty weeks.

Lectures embrace anatomy, physiology, chemistry, materia medica, therapeutics, theory and practice of medicine, pathology, surgery, obstetrics, gynecology, hygiene, medical jurisprudence, ophthalmology, otology, electro-therapeutics, psychological medicine, toxicology and pharmacy, diseases of children, diseases of the throat and chest, dermatology.

REQUIREMENTS: For admission: "Every student must possess a good English education, including mathematics, English composition and elementary physics. A diploma from a high school or college is preferred."

For graduation: 1) twenty-one years of age; 2) three years' study; 3) two full courses of lectures; 4) must produce evidence of attendance on lectures on practical anatomy; 5) thesis or clinical report; 6) examination on the regular and essential branches of medicine; 7) good moral character.

FEES: Matriculation, \$5; demonstrator, \$5; lectures, \$40; graduation, \$25; laboratory, \$5.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

| 1883-84 | 31 | 10 | 32.2 |

Average percentage of graduates to matriculates during the past four years, *forty*.

HOSPITAL MEDICAL COLLEGE OF EVANSVILLE.

EVANSVILLE, Ind. CHARLES KNAPP, M. D. Secretary.

ORGANIZED in 1882. The first class was graduated in 1883.

The faculty consists of nine professors and two lecturers.

COURSE OF INSTRUCTION: The collegiate year of 1881-85 includes a preliminary course of four weeks in September, and a regular session which began October 1, 1884, and closes the last of February, 1885. Clinics at hospital and dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, genito-urinary diseases, clinical medicine and surgery, diseases of children.

REQUIREMENTS: For admission, "Students will be required to present evidence of a good English education, either by presenting a diploma from a literary college, high school or academy, or by passing a satisfactory examination before a body of educated men."

For graduation: 1) three years of study with a regular physician; 2) two full courses of lectures, the last being at this college; 3) the candidate must have reached his majority and possess a good moral character; 4) he must have dissected three parts of the human body; 5) must pass a satisfactory examination in each of the seven branches taught in this college.

FEES: Matriculation, \$5; lectures, \$40; practical anatomy, \$5; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1882-83 | 11 | 5 | 45.4 |
| 1883-84 | 11 | 2 | 18.1 |

Regarding the session of 1882-83 the secretary of the college writes: "One of the graduates had already graduated in another college. Our percentage [of graduates to matriculates] therefore, is *forty*." Allowing this, the average percentage of graduates to matriculates during the past two years, is *twenty-seven*.

BEACH MEDICAL COLLEGE.

INDIANAPOLIS, Ind.

ORGANIZED in 1883. In 1884 this college was merged into the Indiana Eclectic Medical College, (*vide supra*.)

IOWA.**COLLEGE OF PHYSICIANS AND SURGEONS.**

KEOKUK, Iowa. J. C. HUGHES, M. D., Dean of the Faculty.

ORGANIZED in 1850, succeeding the Medical Department of the University of Iowa at Keokuk. The first class was graduated in 1851. Classes were graduated each subsequent year. The faculty embraces seven professors and two lecturers.

COURSE OF INSTRUCTION: The session of 1884-85 began October 8, 1884, and will continue twenty weeks. A three-years' graded course recommended, but not required. Clinics at college infirmary; daily quizzes conducted by the faculty.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, toxicology, clinical medicine and surgery, ophthalmology and otology.

REQUIREMENTS: For admission: "A certificate of graduation from a literary college, academy, high school, or first-class teacher's certificate, or a matriculation examination in the branches of a good English education."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) three years' study; 5) no thesis required; 6) satisfactory examination, either oral or written at the discretion of the faculty, in anatomy, physiology, and pathology, chemistry, materia medica, therapeutics, practice of medicine and surgery; 7) must have dissected during two courses.

FEES: Matriculation, \$5; demonstrator, \$5; lectures, \$20; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1879-80 | 266 | 117 | 66.6 |
| 1881-82 | 273 | 126 | 46+ |
| 1882-83 | 130 | 54 | 41.5 |
| 1883-84 | 121 | 59 | 48.7 |

Average percentage of graduates to matriculates for four years, *forty-five*.

IOWA MEDICAL COLLEGE.

KEOKUK, Iowa.

ORGANIZED in 1858. Extinct since 1860.

MEDICAL DEPARTMENT OF THE STATE UNIVERSITY OF IOWA.

IOWA CITY, Ia. O. T. GILLET, M. D., Secretary of the Faculty.

ORGANIZED in 1870. The first class was graduated in 1871. Classes have been graduated each subsequent year.

The faculty embraces eight professors, one demonstrator, three lecturers and one prosector.

COURSE OF INSTRUCTION: The annual graduating session of 1884-85 began October 8, 1884, and will close March 4, 1885. Two courses of study are provided: a two-years' course and a three-years' course, one of which the student is required to select at the beginning of the second year. Daily quizzes; clinics at hospital. Recitations, practical work in laboratory, didactic and clinical lectures constitute the mode of instruction. All students in the advanced classes will receive special practical instruction in physical diagnosis, mechanical obstetrics, application of splints, bandages and surgical dressing.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, insanity, toxicology, ophthalmology and otology.

REQUIREMENTS: For admission—"All candidates for admission to the course of medical lectures must give evidence of a good English education. If the applicant is a graduate of a literary or scientific college, or presents the certificate of having passed the entrance examination of such an institution, or the certificate of graduation from a high school or academy, it will be accepted in lieu of an examination. In any other case, the candidate must pass an examination before a committee of the faculty, as follows: A written composition, not to exceed a page of foolscap, on a given subject, which will be the test of orthography, grammar, etc.; an examination in common arithmetic, history of the United States, in geography and elementary physics, or natural philosophy. Students from other schools not requiring preliminary examinations must present credentials, or be examined for admission.

For graduation: 1) twenty-one years of age; 2) unexceptionable moral character; 3) three years' study; 4) two courses of lectures; 5) satisfactory examination in all the branches taught. In cases where the three-term course is adopted, a certificate of time of study is not an absolute requirement.

FEES: Matriculation, \$5; lectures, \$20; demonstrator, \$10; laboratory, \$5; graduation, \$25; hospital, \$3.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 82 | 19 | 22+ |
| 1878-79 | 92 | 15 | 10+ |
| 1879-80 | 126 | 22 | 17+ |
| 1880-81 | 149 | 35 | 23+ |
| 1881-82 | 151 | 46 | 30+ |
| 1882-83 | 162 | 35 | 21+ |
| 1883-84 | 142 | 37 | 26+ |

Average percentage of graduates to matriculates, during the past seven years, *twenty-three.*

HOMEOPATHIC MEDICAL DEPARTMENT OF THE STATE UNIVERSITY OF IOWA. **IOWA CITY, Ia. A. C. COWPERTHWAIT, M. D. Dean of the Faculty.**

ORGANIZED in 1877. The first class was graduated in 1878; classes have been graduated each subsequent year.

The faculty consists of three professors, four lecturers and one curator. The teaching of this department is supplementary, the peculiar views of the school only being taught. The lectures on subjects common to both schools are delivered by the professors in the regular department.

COURSE OF INSTRUCTION: The annual session of 1884-85 began October 8, 1884, and will close March 3, 1885. A two-years' course and a three-years' graded course are offered and students are required to select one or the other upon registration.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, toxicology, ophthalmology and otology, dermatology.

REQUIREMENTS: For admission—Same as in the regular department (*vide supra*).

For graduation. 1) twenty-one years of age; 2) good moral character; 3) three years study; 4) two full courses of lectures; 5) "must have been engaged in the study of practical anatomy and practical chemistry"; 6) satisfactory examination in all the branches taught in the department. "The final examinations will be conducted in writing, by the faculty of the department, subject to approval or rejection by a board of examiners, selected for that purpose from the homeopathic physicians of Iowa. The *ad eundem* degree in this department may be conferred under the following circumstances: The candidate must be in possession of an accredited diploma, and must present letters from two respectable physicians in regard to his moral character and professional standing. An attendance upon lectures from time to time during the session, and a satisfactory examination must be passed on all subjects taught in the department."

FEES: Matriculation, \$5; lectures, \$20; demonstrator, \$10; graduation, \$25; hospital, \$3.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 18 | 1 | 5.5 |
| 1878-79 | 32 | 3 | 9.3 |
| 1879-80 | 47 | 3 | 19+ |
| 1880-81 | 60 | 16 | 26.6 |
| 1881-82 | 46 | 15 | 32.6 |
| 1882-83 | 44 | 12 | 27.3 |
| 1883-84 | 35 | 12 | 34.3 |

Average percentage of graduates to matriculates during the past seven years, *twenty-four.*

IOWA MEDICAL COLLEGE—Eclectic.

(*Medical Department of Drake University.*)

DES MOINES, Ia. J. G. HILL, M. D., Dean of the Faculty.

ORGANIZED in 1881 as the Iowa Eclectic Medical College, Medical Department of Drake University; assumed its present name in 1883. The first class was graduated in 1882.

The faculty embraces eight professors, two assistant professors and four lecturers.

COURSE OF INSTRUCTION: Only one graduating session annually will be given hereafter; the course of 1884-85 began September 10, 1884, and will continue twenty-four weeks. Clinics at college and dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics, gynecology, hygiene, medical jurisprudence, dental pathology, electro-therapeutics, toxicology, laryngoscopy, diseases of the throat and lungs.

REQUIREMENTS: For admission—"Candidates must possess a good elementary English education."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) must have read medicine three years and attended two full courses of lectures, not in the same year; 4) dissection for two terms; 5) satisfactory examination in anatomy, chemistry, materia medica and therapeutics, obstetrics, physiology, practice of medicine and surgery, either written or oral, at discretion of the faculty.

FEES: Matriculation, \$5; lectures, \$25; demonstrator, \$5; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

| Sept., 1883 to Jan., 1884, | 21 | 4 | 19+ |
| Jan. 1884 to June, | 13 | 3 | 23+ |

Total number of individual students, who have attended lectures at this school, 60. Total number graduated, 24. Percentage of graduates to matriculates, forty.

COLLEGE OF PHYSICIANS AND SURGEONS OF IOWA.

DES MOINES, Ia. J. A. BLANCHARD, M. D., Dean of the Faculty.

ORGANIZED IN 1882. The first class was graduated in 1883.

The faculty embraces thirteen professors and two demonstrators.

COURSE OF INSTRUCTION: The third annual session began September 24, 1884, and closes March 5, 1885. A three-years' graded course recommended, but not required. Clinics at hospital and dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, toxicology, histology, ophthalmology, otology, diseases of children and orthopedic surgery, laryngology, dermatology and genito-urinary diseases.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) satisfactory examination in the several branches taught in the college, "and present satisfactory evidence of a preliminary examination in the higher English branches as taught in the high school, academy or college, or be subject to an examination in the same, at the discretion of the faculty;" 6) one course in practical anatomy.

FEES: Matriculation, \$5; lectures, \$45; graduation, \$25; laboratory (optional) \$5; anatomical material at cost.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1882-83 | 9 | 3 | 33.3 |
| 1883-84 | 19 | 8 | 42.1 |

Average percentage of graduates to matriculates for the past two years, thirty-nine.

KING ECLECTIC MEDICAL COLLEGE.

DES MOINES, Ia. O. H. P. SHOEMAKER, M. D., Dean, 319 Walnut Street.

ORGANIZED IN 1883. The first class was graduated in 1884.

The faculty embraces ten professors and one demonstrator.

COURSE OF INSTRUCTION: One session annually; the present session began October 6, 1884, and will continue twenty weeks. A three-years' graded course is recommended, but not required. Clinics at the college and hospital.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, toxicology, diseases of the nervous system, ophthalmology and otology, dental pathology and surgery.

REQUIREMENTS: For admission—"No previous reading or study is required before entering college. Students will be admitted without reference to the school of medicine they have attended, or the preceptor with which they have studied."

For graduation: 1) "Candidates must be twenty-one years old, of good moral character, have read medicine three years and attended two full courses of lectures, not in the same year; or have read two years and attended three courses of lectures; or have attended four courses of lectures without previous reading;" 2) dissected for at least two terms; 3) "must pass a satisfactory examination in the branches of a good English education (or furnish evidence of possessing the same) anatomy, chemistry, *materia medica* and therapeutics, obstetrics, physiology, practice of medicine and surgery, either written or oral, at the discretion of the faculty."

FEES: Matriculation, \$5; lectures, \$25; dissection, \$10; graduation, \$25.

STUDENTS: Number of matriculates, session of 1883-84, 31; of graduates, 9.

Percentage of graduates to matriculates, *thirty*.

KANSAS.

MEDICAL DEPARTMENT, UNIVERSITY OF KANSAS.

LAWRENCE, Kas. J. A. LIPPINCOTT, A. M., D. D., Chancellor of the University.

ORGANIZED in 1880.

COURSE OF INSTRUCTION: Two terms, of twenty weeks' duration, annually, making a preparatory medical course, which is claimed to be "accepted by all the leading colleges of the west as the first of a three-years' course, and students passing examinations in these classes will be admitted to the second year in those colleges on the certificate of the faculty of this institution."

First term—chemistry lectures and recitations daily, for twenty weeks; laboratory practice for twenty weeks; physiology lectures daily, for ten weeks; comparative anatomy, dissections, etc., etc., ten weeks. Second term—botany recitations and laboratory practice daily, for twenty weeks; chemistry, physiology and pathology recitations and laboratory practice, for fourteen weeks; toxicology, six weeks; *materia medica* recitations and practice daily, for twenty weeks.

REQUIREMENTS: A full collegiate course is recommended for all professional students. Any student admitted to the special course in medicine must be prepared for at least the freshman class in all English studies.

KENTUCKY.

MEDICAL DEPARTMENT OF TRANSYLVANIA UNIVERSITY.

LEXINGTON, Ky.

ORGANIZED in 1817. Lectures were delivered at Lexington until 1859, when the institution became extinct. From 1850 to 1859 lectures were delivered during the summer only, the winter session being intermitted to establish the Kentucky School of Medicine, at Louisville.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF LOUISVILLE.

LOUISVILLE, Ky. J. M. BODINE, M. D., Dean, Eighth and Chestnut Streets.

ORGANIZED in 1837. No lectures were delivered from June, 1862, to June, 1863, and no class was graduated in 1863.

The faculty embraces nine professors, one lecturer, four demonstrators and two assistants.

COURSE OF INSTRUCTION: The forty-eighth annual session began September 8, 1884, and will continue until March 3, 1885, which term, together with a spring course beginning March 2, and ending June 1, 1885, comprises the collegiate year. Clinics given at dispensary and hospitals. Frequent quizzes are conducted by the faculty.

Lectures embrace anatomy, physiology, chemistry, *materia medica* and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, clinical medicine and surgery, diseases of children, microscopy, diseases of the throat and chest, ophthalmology, otology.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two complete courses of lectures; 5) one course of practical anatomy; 6) one course of clinical instruction; 7) examination on all the branches taught in the college.

FEES: Matriculation, \$5; lectures, \$75; demonstrator, \$10; hospital, \$5; graduation, \$30; special courses on surgical dressings and ophthalmoscopy, etc., \$5 each.

STUDENTS: Number of matriculates and of graduates at each session reported and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 200 | 69 | 34+ |
| 1878-79 | 210 | 84 | 40 |

Average percentage of graduates to matriculates during the past seven years, *forty-one*.

KENTUCKY SCHOOL OF MEDICINE.

LOUISVILLE, Ky. WM. H. WATHEN, M. D., Dean, Fourth Avenue and Chestnut Street

ORGANIZED in 1850. The first class was graduated in 1851. Classes have been graduated each subsequent year.

The faculty embraces eight professors, three lecturers and one demonstrator.

COURSE OF INSTRUCTION: The twenty-ninth annual session begins February 10, 1885, and will continue twenty weeks. The preliminary session begins January 30, and is of three weeks duration. A three-years' graded course is recommended, but not required. Clinics at hospital and college. "Each professor quizzes the class on his own lectures as they proceed."

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, microscopy, ophthalmology, otology, laryngology, dermatology, venereal disease, diseases of children, diseases of the rectum, clinical medicine and surgery.

REQUIREMENTS: For admission—"Students who fail to bring with them proper evidence of their preliminary education are required to pass a satisfactory examination before a committee of the faculty."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures, the interval between the beginning of the first and close of the second course must be at least fifteen months; 4) "dissection of the several regions of the body;" 5) hospital clinics each year of attendance; 6) one course in practical chemistry; 7) examination on all branches taught in the college. "If, after examination for the degree, he be found to have received three negative votes, he shall be entitled to another examination. Should he decline this, he may withdraw, and will not be considered as rejected. The degree will not be conferred upon any candidate who is often absent from the regular lectures of the college, or who absents himself from the public commencement without special permission of the faculty."

FEES: Matriculation, \$5; demonstrator, \$10; hospital, \$5; lectures, \$75; graduation, \$37; laboratory, \$5.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

| 1883 | 158 | 51 | 32+ |
| 1884 | 159 | 55 | 34.5 |

Average percentage of graduates to matriculates during the past five years, *thirty-six*.

LOUISVILLE MEDICAL COLLEGE.

LOUISVILLE, Ky. C. W. KELLY, M. D., Registrar, Second and Green Streets.

ORGANIZED in 1869. The first class was graduated in 1870. Classes have been graduated each subsequent year.

The faculty embraces nine professors and two demonstrators.

COURSE OF INSTRUCTION: The collegiate year of 1884-85, which began September 1, 1884, comprises a preliminary course of four weeks and a regular winter session, extending from October 1, 1884, to the last week in February, 1885. Daily quizzes are held by the faculty. "The plan of instruction includes lectures, clinics, quizzes and practical demonstrations."

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene and medical jurisprudence, clinical medicine and surgery.

REQUIREMENTS: For admission:—"A preliminary examination will be required hereafter, as a condition of admission to the regular winter course. Gentlemen who are graduates of a literary or scientific college, academy, or high school, or who have passed the entrance examination to a literary college in good standing; who have a county or State teacher's certificate; graduates in medicine; previous matriculates of this college; and students who desire to pursue a special course of study—other than for the purpose of securing the degree—will be exempt from this examination. The examination will include the writing of a brief paper on a subject to be given; and an examination in the elementary principles of physics and mathematics as taught in the public schools of the country."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures (not within the same twelve month); 5) two courses of hospital clinics; 6) dissection of each region of the body; 7) one course in practical chemistry; 8) satisfactory written or oral examination on each branch taught.

FEES: Matriculation, \$5; demonstrator, \$10; lectures \$50; examination, \$30; hospital, \$5.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

Average percentage of graduates to matriculates during the past seven years, thirty-nine.

HOSPITAL COLLEGE OF MEDICINE.

Medical Department, Central University.

LOUISVILLE, Ky. WM. H. BOLLING, M. D., Dean, Chestnut Street, near Preston.

ORGANIZED in 1873. The first class was graduated in 1875. Classes have been graduated each subsequent year.

The faculty embraces nine professors, one lecturer and three assistants.

COURSE OF INSTRUCTION: The thirteenth regular graduating course begins January 22, 1885, and ends June 18, 1885. Clinics continue throughout the year.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, toxicology, clinical medicine and surgery, diseases of children, orthopedic surgery, surgical pathology and diseases of the rectum.

REQUIREMENTS: For admission—"Matriculates who do not furnish evidence of sufficient preliminary education, are required to pass an examination in English and elementary physics. Gentlemen, who are graduates of a literary or scientific college, academy or high school, or who have passed the entrance examination to a literary college in good repute; who have a county or State teacher's certificate; graduates in medicine; previous matriculates of this college, and students who desire to pursue a special course of study—other than for the purpose of securing the degree—will be exempted from this examination. Students who have completed a full course of study equivalent to that required for admission to this college, may be admitted on the certificate of their instructors."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) "satisfactory evidence of having studied medicine for at least three years, under a regular graduate, or licentiate and practitioner of medicine, in good standing, using the word 'regular' in the sense commonly understood in the medical profession. No candidate shall be eligible for final examination unless his term of three years shall have been completed, or shall expire at a date not later than three months after the close of the final examinations;" 4) two complete courses of lectures (not within one and the same year); 5) practical anatomy, two sessions; 6) two courses of clinical and hospital instruction; 7) regular attendance upon the daily lectures, quizzes and clinics; 8) examination on all branches taught in the college.

FEES: Matriculation, \$5; lectures, \$75; demonstrator, \$10; hospital, \$5; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

JEFFERSON SCHOOL OF MEDICINE.

LOUISVILLE, Ky.

ORGANIZED in 1882. This school graduated one class (in 1882), and then suspended operations.

LOUISIANA.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF LOUISIANA.

NEW ORLEANS, La. T. G. RICHARDSON, M. D., Dean of the Faculty.

ORGANIZED in 1831, as the Medical College of Louisiana. Transferred to its present connection in 1847. The Civil War caused a suspension during the years 1863, 1864 and 1865. The department was reorganized in 1865.

The faculty embraces seven professors, one lecturer and a demonstrator.

COURSE OF INSTRUCTION: The fifty-first annual graduating session, that of 1884-'85, commenced October 20, 1884, and closes March 27, 1875. A three-years' graded course is recommended, but not required. Daily rounds of the Charity Hospital wards are made by all the professors and chiefs of clinics, accompanied by the students.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, ophthalmology, otology, pharmacy, clinical medicine and surgery, diseases of children.

REQUIREMENTS: For admission none.—For graduation: 1) good moral character; 2) twenty-one years of age; 3) three years' study; 4) two complete courses of dissection; 5) thesis; 6) pass satisfactory examination.

FEES: Matriculation, \$5; lectures, \$140; demonstrator, \$10; graduation, \$30.

NEW ORLEANS SCHOOL OF MEDICINE.

NEW ORLEANS, La.

ORGANIZED in 1856. Extinct since April, 1870.

CHARITY HOSPITAL MEDICAL COLLEGE.

NEW ORLEANS, La.

ORGANIZED in 1873. Extinct since 1877.

MEDICAL DEPARTMENT OF THE NEW ORLEANS UNIVERSITY.

MEDICAL DEPARTMENT OF STRAIGHT UNIVERSITY.

NEW ORLEANS, La.

"Both are for colored students, and open to males and females. I do not know that any medical diplomas have actually been issued from either. If so, we could not recognize them here, for they certainly have not given such courses of instruction as to qualify men or women to practice medicine." (*Official letter, Louisiana State Board of Health.*)

MAINE.

MEDICAL SCHOOL OF MAINE, AT BOWDOIN COLLEGE.

BRUNSWICK, Me. ALFRED MITCHELL, M. D., Secretary.

ORGANIZED in 1820. The first class was graduated in 1820. Classes have been graduated each subsequent year.

The faculty embraces eight professors and two demonstrators.

COURSE OF INSTRUCTION: One annual course of lectures of sixteen weeks' duration commencing in February. Clinics are given once a week. Daily examinations are made by the faculty.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence and histology.

REQUIREMENTS: For admission—"Candidates for matriculation will be required to give evidence that they possess a good English education. Those who are graduates of colleges, normal schools, high schools, or who have passed the entrance examination to any recognized college, on presentation of their diplomas or matriculation tickets, will be exempt from examination."

For graduation, 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) satisfactory written and oral examination on subjects of the lectures; 5) thesis; 6) "dissection of not less than two parts."

FEES: Matriculation, \$5; lectures, \$78; graduation, \$25; laboratory, \$10.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percentage. |
|----------|---------------|------------|-------------|
| 1878 | 94 | 25 | 26.6 |
| 1879 | 99 | 31 | 31.3 |
| 1880 | 105 | 22 | 21— |
| 1881 | 115 | 30 | 26+ |
| 1882 | 104 | 28 | 27— |
| 1883 | 94 | 28 | 29.7 |
| 1884 | 99 | 33 | 33.3 |

Average percentage of graduates to matriculates during the past seven years, *twenty-eight.*

PORTLAND SCHOOL FOR MEDICAL INSTRUCTION.

PORTLAND, Me. C. O. HUNT, M. D., Registrar.

ORGANIZED in 1855. No diplomas are conferred. "The aim of the school is to afford to medical students greater facilities for obtaining a higher grade of professional education than can usually be given under the direction of a single preceptor."

The faculty embraces ten professors and one demonstrator.

COURSE OF INSTRUCTION: Two terms of fifteen weeks each, annually.

Systematic recitations will be held in anatomy, materia medica and therapeutics, theory and practice of medicine and chemistry.

Lectures embrace, in addition to the foregoing subjects, physical diagnosis, minor and operative surgery, gynecology, physiology, and dentistry.

REQUIREMENTS: For admission—"Students will be required to satisfy the instructors that they are possessed not only of a good common school education, but also of such familiarity with the Latin language as may be acquired by the study of Harkness's Introductory Latin Book, and of a knowledge of physics equal to that which may be got from Norton's Elements of Natural Philosophy."

FEES: For summer term, \$35; for winter term, \$40; for the year, \$60; demonstrator, \$7.

STUDENTS: Number in attendance during 1883, 31.

ECLECTIC MEDICAL COLLEGE OF MAINE.

LEWISTON, Me.

ORGANIZED in 1881, to "supply a demand for Eclectic medical teaching in New England." The information received, as to the present status of the institution, does not warrant any systematic presentation of details. Of the ten members of the "faculty" whose names are given, four are recent graduates of the college; and of the remaining six, two are non-medical men.

No requirements for matriculation are exacted, but students are "expected to possess a good common school education." For graduation it is not necessary that the candidate should pursue the curriculum of instruction or attend the lectures of the school; but by presenting certain documentary evidence, and passing "a successful examination in all the branches taught in this college he will be entitled to a diploma upon the condition named in terms." The terms are—matriculation, \$5; tuition, one course, \$75; scholarship, \$100; graduation, \$25; dissection, \$10.

MARYLAND.

SCHOOL OF MEDICINE OF THE UNIVERSITY OF MARYLAND.

BALTIMORE, Md. L. McLANE, TIFFANY, M.D., Dean, 137 Park Avenue.

ORGANIZED in 1807, as the Medical College in the City of Baltimore. In 1812, faculties of law, theology and arts were added, and the whole chartered under the name of the University of Maryland. The degree of M.D. was first conferred in 1810, and degrees have been conferred each year since.

The faculty embraces thirteen professors, four demonstrators, three prosectors, and ten dispensary physicians and chiefs of clinics.

COURSE OF INSTRUCTION: The seventy-eighth annual session began October 1, 1884, and will close about March 15, 1885. Clinical lectures, introductory to the regular session, were held throughout September. A three-years' course recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics, gynecology, toxicology, ophthalmology, otology, diseases of the throat and chest, diseases of children, diseases of the nervous system, dermatology, clinical medicine and surgery, and dentistry.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) two full courses of lectures; 3) thesis; 4) evidence of attendance on clinical lectures on medicine and surgery; 5) practical anatomy course; 6) good moral character; 7) faithful and regular attendance on lectures and clinics; 8) examination in all the branches taught.

FEES: Matriculation, \$5; lectures, \$120; demonstrator, \$10; graduation, \$30. Not including nine post-graduates and five dentists. "In accordance with a usage which has arisen in other schools, a number of scholarships have been created, to which are appointed students unable to pay the full rates. The holders of these scholarships pay only \$50 for the professors' tickets."

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 135 | 49 | 36.2 |
| 1878-79 | 134 | 53 | 40+ |
| 1879-80 | 173 | 66 | 48+ |
| 1880-81 | 193 | 73 | 37.9 |
| 1881-82 | 197 | 74 | 37.8 |
| 1882-83 | 203 | 97 | 47.7 |
| 1883-84 | 188 | 74 | 39.8 |

Average percentage of graduates to matriculates, *forty*.

WASHINGTON UNIVERSITY SCHOOL OF MEDICINE.

BALTIMORE, Md.

ORGANIZED in 1827, as the Medical Department of Washington College, Pennsylvania. The first class was graduated in 1828, and classes were graduated under the auspices of Washington College until 1840, when the Maryland Legislature empowered the institution to assume the above title. Lectures were delivered and classes graduated until 1851, when it became extinct. In 1867 the institution was reorganized and lectures were thence delivered until 1877, when the institution was merged into the College of Physicians and Surgeons, Baltimore (*vide infra*).

COLLEGE OF PHYSICIANS AND SURGEONS.

BALTIMORE, Md. THOMAS OPTIE, M.D., Dean, 197 North Howard Street.

ORGANIZED in 1872. The first class was graduated in 1873. Classes have been graduated each subsequent year. In 1877 the Washington University School of Medicine was united with this college.

The faculty embraces ten professors, two auxiliary professors, six lecturers and six demonstrators.

COURSE OF INSTRUCTION: Two courses of lectures are given during the year. The winter graduating session of 1884-5 began Oct. 1, 1884, and will close March 15, 1885. The spring course begins March 15, and continues until June 15, 1885. A three-years' graded course is recommended, but not required. Clinics in hospitals and dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology, otology, pharmacy, dental surgery, diseases of the chest and throat, diseases of children, diseases of the nervous system, genito-urinary diseases, pathological histology, orthopedic surgery, and clinical medicine and surgery.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) good English education; 4) three years' study; 5) satisfactory examination.

FEES: Lectures, \$120; graduation, \$30; spring term, \$15. "In order to place the facilities of this school within the reach of the qualified, but poor young men of our country, and in conformity with the usage of the times, we receive a number of *privileged students*, at half the regular fees."

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 165 | 65 | 39.9 |
| 1878-79 | 211 | 80 | 38— |
| 1879-80 | 336 | 110 | 37.7 |
| 1880-81 | 328 | 143 | 43.6 |
| 1881-82 | 346 | 158 | 45.7 |
| 1882-83 | 322 | 109 | 33.9 |
| 1883-84 | 400 | 127 | 31.7 |

Average percentage of graduates to matriculates, *thirty-eight*.

BALTIMORE MEDICAL COLLEGE. (A)

BALTIMORE, Md. W. R. MONROE, M.D., Secretary, 249 Bolton Street.

ORGANIZED in 1881. The first class was graduated in 1882. Dissensions occurring in the faculty of this school caused its disruption after the close of the session of 1883-84; and there are now two organizations issuing announcements under the same name. They are here described as colleges "A" and "B."

This faculty embraces ten professors and one demonstrator. The professorships of surgery and chemistry and the lectureship of diseases of the eye and ear, are unassigned.

COURSE OF INSTRUCTION: The fourth annual session opened on October 1, 1884, and continues until the following March; a spring session will begin March 15, and continue until June 1, 1885.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics, gynecology, hygiene, medical jurisprudence, ophthalmology, otology, diseases of throat and chest, oral surgery, insanity, and diseases of children.

REQUIREMENTS: For admission—"Students must possess good moral characters and studious habits, and unless matriculates of some literary institution or medical college, will be required to furnish sufficient evidence of possessing a good English education."

For graduation: 1) two courses of lectures; 2) "The fitness of a candidate for graduation will be based upon good moral character, and the result of a final examination to be determined by a majority of all the votes of the faculty."

FEES: Matriculation, \$5; demonstrator, \$10; lectures, \$120; graduation, \$30. "In accordance with the custom of other schools, such students as are unable to pay the full fees will be admitted at a charge of fifty dollars for the general ticket."

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1881-82 | 46 | 17 | 38.2 |
| 1882-83 | 53 | 20 | 38.4 |
| 1883-84 | 28* | 14* | 50 |

Average percentage of graduates to matriculates, *forty*.

*Not including two post-graduates.

BALTIMORE MEDICAL COLLEGE. (B.)

BALTIMORE, Md. Z. K. WILEY, M. D., Dean, 195 W. Lombard Street.

ORGANIZED—Vide supra.

The faculty embraces ten professors, one lecturer, one demonstrator and three clinical assistants.

COURSE OF INSTRUCTION: One annual graduating session; that of 1884-85 opened October 1, 1884, and continues until "about the first week in March." A short course of preliminary lectures preceded the regular term.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics, gynecology, medical jurisprudence, microscopy, diseases of throat and lungs, nervous diseases, ophthalmology and otology.

REQUIREMENTS: For admission—"Students must be possessed of good moral character, and, unless matriculates of some literary institution or medical college, will be required to furnish sufficient evidence of possessing a good English education."

For graduation: Candidates must have attended at least two courses of lectures. "The fitness of a candidate for graduation will be based upon good moral character and regular attendance upon instruction afforded by the college, and upon the result of a final examination, to be determined by a majority of all the votes of the faculty."

FEES: Matriculation, \$5; demonstrator, \$10; lectures, \$120; graduation, \$30. "As is the custom in some of the other medical schools, students who are unable to pay the full fees of the college will be admitted at a charge of \$50 per session."

WOMAN'S MEDICAL COLLEGE OF BALTIMORE.

BALTIMORE, Md. WM. D. BOOKER, M. D., Dean, 157 Park Avenue.

ORGANIZED in 1882. The first class was graduated in 1883.

The faculty embraces eight professors, four lecturers, two demonstrators, two instructors and eleven clinical assistants.

COURSE OF INSTRUCTION: One annual graduating session; that of 1884-85 began October 1, 1884, and ends May 1, 1885. The course of study is graded and a three-years' course is recommended, but students are allowed, upon preceptor's certificate of twelve months' medical study, to pursue a two-years' graded course.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, principles and practice of medicine, pathology, surgery, obstetrics, gynecology, hygiene, medical jurisprudence, ophthalmology and otology, diseases of throat and chest, diseases of children, pharmacy, clinical medicine and surgery.

REQUIREMENTS: For admission—"Every student on entering this institution will be required to present a diploma from a respectable institution of learning, or pass a satisfactory examination before a committee of the faculty on the usual elementary English branches taught in the public schools, viz: English grammar, history, geography, arithmetic, elementary physics and composition."

For graduation: 1) twenty-one years of age; 2) two full courses of lectures; 3) one full dissection; 4) evidence of having attended the clinics; 5) examination on all the branches; 6) good moral character.

FEES: Matriculation, \$5; lectures, \$75; demonstrator, \$10; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1882-83 | 19 | 1 | 5.2 |
| 1883-84 | 22 | 5 | 22.7 |

Average percentage of graduates to matriculates, *fifteen*.

MEDICAL DEPARTMENT OF THE JOHNS HOPKINS UNIVERSITY.

BALTIMORE, Md. D. C. GILMAN, LL.D., President of the University.

A PRELIMINARY course of training for young men who propose to pursue the study of medicine, was instituted in 1877. Physics, chemistry and biology, with Latin, German, French and English, form the principal elements of this course, with opportunities for the study of psychology, logic, history, and other branches of knowledge, according to the requirements of the scholar.

"Opportunities are here afforded to a young man, who expects at a later day to take up the study of medicine, to become proficient in laboratory work while acquiring a knowledge of German and French and continuing his general education. A course is arranged, in which physics for the first year, chemistry for the second, and the biological study of plants and animals for the third year, are the dominant topics. At the close of this course the student should have become proficient in a knowledge of the physical and chemical laws which underlie the conditions of life; he should have become familiar with

the structure and functions of living things, in their normal and healthy condition; he should have become skilled in the use of the microscope and other physiological apparatus; and so, when he enters the school of medicine he should know that he has been well prepared for the study of disease and of its treatment, by a training in fundamental sciences, which has not only exercised his eye and hand, but has accustomed his mind to accurate habits of observation and inquiry." This course leads to the university degree of Bachelor of Arts.

MEDICAL DEPARTMENT: "As the construction of the Johns Hopkins hospital approaches completion, the university is devoting much thought to the organization of its Faculty of Medicine. A study of the problem, consultation with eminent physicians at home and abroad, and an examination of other institutions, led long ago to the conclusion that a professorship of pathology should be among the earliest to be instituted. Chemistry and biology, including morphology, embryology and physiology, were already taught in the philosophical faculty. Pathology and therapeutics were the scientific chairs which seemed to be next called for, as their instructions would be likely to require experimental laboratories, distinct from the hospital and from the other university working rooms." This chair has recently been established, and "the nucleus of the medical faculty in the Johns Hopkins University is, therefore, the president of the university, D. C. GILMAN, LL.D.; the professor of chemistry, I. REMSEN, Ph. D., M. D.; the professor of physiology, H. N. MARTIN, Dr. Sci., M. D., and the professor of physiology, W. H. WELCH, A. M., M. D., together with the medical adviser of the Johns Hopkins hospital, JOHN S. BILLINGS, M. D., LL.D., Surgeon, U. S. A., who also lectures on hygiene in the university."

MASSACHUSETTS.

MEDICAL SCHOOL OF HARVARD UNIVERSITY.

Boston, Mass. H. P. BOWDITCH, M. D., Dean, Boylston and Exeter Streets.

ORGANIZED IN 1782. The first class was graduated in 1783, and classes have been graduated in each subsequent year.

The faculty consists of eleven professors, six assistant professors, one curator, two demonstrators, two lecturers, nine assistants to chairs, and eight special clinical instructors.

COURSE OF INSTRUCTION: Instruction in this school is given by lectures, recitations, clinical teaching and practical exercises, uniformly distributed throughout the academic year. The year begins on the Thursday following the last Wednesday in September, and ends on the last Wednesday in June. The course of study recommended by the faculty covers four years, but the degree of Doctor of Medicine continues to be given upon the completion of three years of study. The degree of Doctor of Medicine *cum laude* is given to candidates who have pursued a complete four years' course, and obtained an average of 75 per cent. in all the examinations of this course; and a certificate of attendance on the studies of the fourth year will be given to such students desiring it as shall have attended the course, and have passed a satisfactory examination in the studies of the same.

The division of studies in the three-years' course is as follows: First year—*anatomy, physiology and general chemistry.* Second year—*practical and topographical anatomy, medical chemistry, materia medica, pathological anatomy, clinical medicine and clinical surgery.* Third year—*therapeutics, obstetrics, theory and practice of medicine, surgery, clinical surgery, ophthalmology, dermatology, syphilis, otology, laryngology, mental diseases, diseases of the nervous system, diseases of women, diseases of children, forensic medicine and hygiene.*

In the four-years' course, the first and second-years' studies are the same as in the three-years' course; and in the third year of the four-years' course attention is confined to therapeutics, obstetrics, theory and practice of medicine, clinical medicine, surgery and clinical surgery. During the fourth year the subjects are ophthalmology, otology, dermatology, syphilis, laryngology, mental diseases, diseases of the nervous system, diseases of women, diseases of children, obstetrics, clinical and operative obstetrics, clinical medicine, clinical and operative surgery and forensic medicine.

REQUIREMENTS: "All candidates for admission, except those who have passed an examination for admission to Harvard College, must present a degree in letters, science or medicine from a recognized college or scientific school, or pass an examination in the following subjects: 1) every candidate will be required to write, legibly and correctly, an English composition of not less than two hundred words, and also write English prose from dictation; 2) the translation of easy Latin prose; 3) a competent knowledge of physics; 4) each candidate must pass an approved examination in any one of the following subjects: French, German, the elements of algebra or plain geometry, botany. "Students who began their professional studies elsewhere may be admitted to advanced standing; but all persons who apply for admission to the advanced classes must pass an examination in the branches already pursued by the class to which they seek admission, and furnish a satisfactory certificate of time spent in medical studies. No student shall advance with his class, or be admitted to advanced standing, until he has passed the required examination in the studies of the previous year, or a majority of them; nor shall he become a member of the third class until he has passed all the examinations of the first, in addition to a majority of those in the second year."

For graduation: "Every candidate must be twenty-one years of age, and of good moral character; must give evidence of having studied medicine three or four full years; must have spent at least one continuous year at this school; must have presented a satisfactory thesis, and have passed the required examination." Written examinations on all the main subjects of instruction are distributed, for regular students, through their entire

course of study. "In addition to these written examinations each student is required to present a written report of the analysis of a solution containing inorganic substances, and of a specimen of urine, to examine and report upon a clinical case in surgery, and to take charge of and report upon two cases in obstetrics; each student must also have satisfactorily dissected the three parts of the body."

FEES: Matriculation, (payable once only) \$5; lectures, full year, \$200; one-half year, \$120; special courses, \$15 to \$30 each.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 227 | 47 | 20.7 |
| 1878-79 | 253 | 70 | 27.6 |
| 1879-80 | 263 | 45 | 17.1 |
| 1880-81 | 251 | 60 | 23.9 |
| 1881-82 | 233 | 77 | 33.4 |
| 1882-83 | 229 | 74 | 32.3 |
| 1883-84 | 243 | 59 | 24.2 |

Average percentage of graduates to matriculates, *twenty-six*.

BERKSHIRE MEDICAL COLLEGE (*Medical Department of Williams College*).
PITTSFIELD, Mass.

ORGANIZED in 1843. Lectures were delivered until 1867, when the college became extinct. During its existence 1128 students were graduated.

WORCESTER MEDICAL COLLEGE.
WORCESTER, Mass.

ORGANIZED in 1848. Lectures were delivered until 1858 (?), when the college became extinct.

NEW ENGLAND FEMALE MEDICAL COLLEGE.
BOSTON, Mass.

ORGANIZED in 1843. Lectures were delivered and classes graduated until 1874, when it was merged into the Boston University School of Medicine, (vide infra).

BOSTON UNIVERSITY SCHOOL OF MEDICINE—Homeopathic.
BOSTON, Mass. I. TISDALE TALBOT, M. D., Dean, 66 Marlborough Street.

ORGANIZED in 1873. The first class was graduated in 1874. Classes have been graduated each subsequent year. In 1874 the New England Female Medical College was united with this school.

The faculty embraces nine professors, twelve lecturers, five assistants, and one demonstrator.

COURSE OF INSTRUCTION: The school year of 1884-85 is divided into three terms, as follows: The first term beginning October 9, 1884, continues to December 20, 1884; the second term begins January 1, 1885, and continues to March 12, 1885; the third term begins March 23, 1885, and continues to June 3, 1885. A three-years' graded course is required, and a four-years' graded course is recommended. The degrees of Bachelor of Medicine and Bachelor of Surgery are granted to students of the four-years' course at the end of the third year. To each term and each year certain studies are assigned, in which the student is required to become proficient, as shown by examination, before entering upon more advanced studies.

The arrangement of studies for the three-years' course is as follows: First year—*anatomy, physiology, general chemistry, microscopy, histology, history and methodology of medicine, minor surgery and dissections.* Second year—*medical chemistry, surgical anatomy, surgery and surgical pathology, general pathology and pathological anatomy, special pathology and therapeutics, materia medica and pharmacutics, obstetrics, gynecology, pedology, auscultation and percussion, laryngology and diseases of the throat, and sanitary science.* Third year—*operative surgery, general pathology and pathological anatomy, special pathology, anatomy, materia medica, practical and operative obstetrics, ophthalmology and otology, dermatology, insanity and nervous diseases, medical jurisprudence, "ethics and esthetics," clinics and clinical reports in various departments.*

In the four-years' course the studies of the first year are the same as in the three-years' course; special dissections, histology and microscopy are substituted for gynecology and pedology in the second year; operative surgery, practical and operative obstetrics, materia medica, special pathology and therapeutics, general pathology and pathological anatomy, pedology, gynecology and clinics occupy the third year; and the fourth year continues materia medica, clinics and clinical reports, and takes up ophthalmology, otology, dermatology, insanity, nervous diseases, medical jurisprudence, "ethics and esthetics," and dispensary practice.

REQUIREMENTS: For admission, "Candidates who have taken their first degree in arts, philosophy or science are admitted without examination. All others, before matriculation, are examined in the following branches: 1) in orthography, English composition and penmanship, by means of a page written at the time and place of examination; 2) in arithmetic, geography and English grammar, if there be any doubt whether the candidate has sufficient attainment therein; 3) in elementary physics, by an examination in Stewart's Primer of Physics; 4) in Latin, by requiring a translation from Harkness's Latin Reader at sight. Candidates must be at least nineteen years old, or, if they intend to pursue a four-years' course, within six months of nineteen."

For graduation: "Candidates for the degree of Bachelor of Medicine or Bachelor of Surgery must have studied medicine three full years, the last of which was in this school, and must have passed examinations in all the branches of the first three years of the four-years' course in this school with a minimum average of eighty per cent." Candidates for the degree of Doctor of Medicine must be twenty-one years of age and of good moral character; must have studied medicine at least three years under competent instruction; must have attended at least three full and reputable courses of lectures, the last in this school; and must sustain a satisfactory examination, an average of seventy per cent. being required from all the chairs in order to enable a student to graduate. The candidate must also furnish a thesis in which shall be cited the authorities for all statements of fact and opinion advanced, other than original, and these latter he must be prepared to publicly defend. He is also required to furnish satisfactory written reports of at least twenty medical, five surgical and three obstetric cases attended personally, and five cases seen in each of the clinical departments.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 169 | 43 | 25.4 |
| 1878-79 | 149 | 35 | 23.5 |
| 1879-80 | 127 | 35 | 27.6 |
| 1880-81 | 110 | 28 | 23.6 |
| 1881-82 | 110 | 29 | 26.3 |
| 1882-83 | 109 | 30 | 27.5 |
| 1883-84 | 97* | 31* | 35 |

Average percentage of graduates to matriculates, *twenty-seven*.

*Not including three post-graduates and five special students.

COLLEGE OF PHYSICIANS AND SURGEONS.

BOSTON, MASS. ARTHUR H. WILSON, M. D., Registrar, 504 Broadway, South Boston.

ORGANIZED in 1890. The first class was graduated in 1881.

The faculty embraces nine professors, nine lecturers, four instructors, one demonstrator, and three clinical assistants.

COURSE OF INSTRUCTION: The college year begins on the second Wednesday in October, and ends on the second Wednesday in May. Course of study is graded and extends over three years, but three courses of lectures are not absolutely demanded. Instruction consists of didactic lectures with demonstrations, clinical teaching, recitations and practical teaching on subjects involving manipulation.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, diseases of the nervous system, ophthalmology and otology, histology, dermatology, laryngology, diseases of children, orthopedic surgery, clinical medicine, clinical surgery, genito-urinary diseases.

REQUIREMENTS: For admission, "Candidates for matriculation will be required to give evidence that they possess a good moral character, and a good English education, including elementary physics (heat, light, and electricity). Persons who have studied medicine with a regular physician one or more years, or who have attended one full course of lectures at a recognized medical college, or students who have taken two full courses of lectures, may be admitted to the second or third year's course after examination in the branches of the first course.

For graduation: 1) twenty-one years of age; 2) thesis; 3) three years' study; 4) two full courses of lectures; 5) dissected three parts; 6) fulfill all requirements of laboratory work; 7) satisfactory examination; 8) an acquaintance with the Latin language sufficient for a good medical and surgical education.

FEES: Matriculation, \$5; lectures, \$85; demonstrator, \$5; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1880-81 | 24 | — | — |
| 1881-82 | 49 | 11 | 22.4 |
| 1882-83 | 34 | 10 | 16.6 |
| 1883-84 | 44 | 6 | 13.6 |

Average percentage of graduates to matriculates, *eighteen*.

NEW ENGLAND UNIVERSITY OF ARTS AND SCIENCES.
BOSTON, Mass.

Fraudulent. Extinct.

BELELVUE MEDICAL COLLEGE OF MASSACHUSETTS.
BOSTON, Mass.

ORGANIZED in 1880. A fraudulent institution, exposed by the ILLINOIS STATE BOARD OF HEALTH in 1882. Vide infra; see, also, pp. XIII-XV., Fourth Annual Report of the BOARD.

MEDICAL DEPARTMENT OF THE AMERICAN UNIVERSITY OF BOSTON.
FIRST MEDICAL COLLEGE OF THE AMERICAN HEALTH SOCIETY.

EXCELSIOR MEDICAL COLLEGE.

THE exposure, in November, 1882, by the ILLINOIS STATE BOARD OF HEALTH, of the fraudulent Bellevue Medical College of Massachusetts, led to the correction of a flagrant abuse in connection with the issuing of medical diplomas in Massachusetts. The "Bellevue" was organized under the "Public Statutes relating to Manufacturing and other Corporations," and its officers, on the trial which resulted from the exposure referred to, pleaded that they were legally incorporated, and were empowered by the laws of Massachusetts to issue diplomas and confer degrees without any restriction as to course of study or professional attainments. The United States Commissioner, before whom the trial was had, held the plea to be valid, and dismissed the case, with the following remarks:—

"The State has authorized this college to issue degrees, and it has been done according to legal right. * * * The law makes the faculty of the college the sole judges of eligibility of applicants for diplomas. There is no legal restriction, no legal requirements. If the faculty choose to issue degrees to incompetent persons, the laws of Massachusetts authorize it."

As a result of this decision, the "American University of Boston," and the "First Medical College of the American Health Society," were incorporated under the same authority as the "Bellevue"; and the "Excelsior Medical College" and others were projected. The passage, (June 30, 1883), of an act forbidding any corporation, organized under the public statutes above referred to, from conferring medical degrees or issuing diplomas, or certificates conferring or purporting to confer degrees, unless specially authorized by the Legislature so to do, deprived these concerns of the only object of their creation, namely, the sale of bogus diplomas, and it was believed that they were all extinct.

Recently, however, (October, 1884,) it was learned that the Boston "Bellevue" advertised an annual course to commence October 1, 1884, information concerning which was to be obtained by addressing "Prof. S. G. Ginner, M. D., 24 Dover Street, Boston, Mass." In response to a letter, thus addressed, asking terms, when it would be necessary to attend, etc., and written by a young man who had never read medicine an hour in his life, and who, in his letter of inquiry, made no claim of having done so, the following was received:

"—————, Esq., M. D.:

"MY DEAR DOCTOR:—Your favor of October 31 at hand; in reply will say that our terms for graduation are \$75. Diploma of M. D., (Doctor of Medicine.) It is not necessary for you to attend.

"If you will act as our agent in Illinois, and sell for us out West, we will supply you at \$50 each. The article is solid and will stand the test of Law.

"We prefer to do our *Hon* business from this city—card enclosed.

"Upon receipt of \$50 we will send you one, and you can have the name engraved on it to suit yourself, and that will also allow you a commission of \$25 on each sale.

"Yours very truly,

"G."

This letter is undated, and gives no locality; but the envelope is postmarked "Baltimore, Md., Nov. 14, 1884," and is endorsed "If not delivered in three days, return to Prof. S. G. Ginner, M. D., 455 W. Fayette Street, Baltimore, Md." The "card enclosed" also reads "S. G. Ginner, M. D., Physician and Surgeon, formerly surgeon in the English Royal Navy; No. 455 W. Fayette Street, Baltimore, Md."

MICHIGAN.**DEPARTMENT OF MEDICINE AND SURGERY OF THE UNIVERSITY OF MICHIGAN.**

ANN ARBOR, Mich. A. B. PALMER, M. D., Dean of the Faculty.

ORGANIZED in 1850. The first class was graduated in 1851. Classes have been graduated each subsequent year.

The faculty embraces eleven professors, six assistants to the professors, two demonstrators, one instructor and a curator.

COURSE OF INSTRUCTION: The thirty-fifth annual session began October 1, 1884, and will end the last part of June, 1885, continuing nine months and being divided into two semesters. At the end of each semester written examinations are held. The course of study is graded and extends over three years, but the student will be examined in the studies of the first year without attendance upon lectures. "The students are examined often upon the subjects of the lectures in progress either by the professors or assistants."

Lectures embrace: First year, human and comparative anatomy, embryology, histology, physiology, chemistry, botany, physiological chemistry, and materia medica and therapeutics. Second year, continuation in review of anatomy, histology, physiology, chemistry, and materia medica and therapeutics, with pathology and practice of medicine, surgery and obstetrics. Third year, practice of medicine, sanitary science, surgery, obstetrics and the diseases of women and children, ophthalmology and otology, and laryngology, with clinical medicine and surgery and clinical gynecology. "The above list will be understood to include all special studies that appertain to, and form an essential part of the general subjects enumerated."

REQUIREMENTS: For admission—1) eighteen years of age; 2) good moral character; 3) no previous study of medicine required for admission but candidates will be examined as to their elementary education, and their fitness to pursue properly and profitably the technical study of medicine. The examination will be in writing. The candidate will be asked to give an account of his previous educational advantages, and to answer such questions in arithmetic, geography and history, and on forms of government and current events, as shall show his general intelligence; and particularly will he be required to correct imperfect English, and to show his ability to express ideas correctly in writing. Graduates or matriculates of a university or college, graduates or advanced members of any academy or high school, persons holding certificates from any public school board as being properly qualified as teachers, and persons having certificates, based upon an examination by some recognized medical society, of being properly qualified to engage in the study of medicine, will not be required to pass the above examination.

For graduation: "To be admitted to the degree of Doctor of Medicine, a student must be twenty-one years of age and possess a good moral character; he must have successfully pursued the study of practical anatomy and practical chemistry, and, unless the full course of study has been taken in this college, he must have been engaged in the study of medicine for the period of three years, including the time spent in attendance upon lectures. He must also have passed satisfactory examinations on all the studies included in the full course of instruction; or, if admitted to advanced standing, he must have attended at least two full courses of medical lectures, the last of which was at this college, and must have passed the required examinations."

FEES: Matriculation, for residents of Michigan, \$10; for non-residents, \$25, to be paid but once. Lectures, for residents of Michigan, \$25; for non-residents, \$35. Graduation for all alike, \$10; demonstrator, \$20; laboratory, \$15.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 296 | 98 | 33+ |
| 1878-79 | 329 | 104 | 31.6 |
| 1879-80 | 350 | 91 | 26 |
| 1880-81 | 380 | 99 | 26 |
| 1881-82 | 390 | 90 | 23.7 |
| 1882-83 | 366 | 117 | 32 |
| 1883-84 | 328 | 85 | 25.9 |

Average percentage of graduates to matriculates, *twenty-eight*.

DETROIT MEDICAL COLLEGE.

DETROIT, Mich. H. O. Walker, M. D., Registrar, 177 Griswold Street.

ORGANIZED in 1868. The first class was graduated in 1869. Classes have been graduated each subsequent year.

The faculty embraces eleven professors, ten lecturers and instructors, a demonstrator, a director of dispensary clinics and three assistants.

COURSE OF INSTRUCTION: Two sessions annually. The current graduating term began September 10, 1884, and will close March 5, 1885. The recitation session begins March 11, and will terminate June 11, 1885. Didactic lectures, practical manipulative instruction,

and clinical study in hospitals and dispensary; laboratory work in chemistry and histology required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, laryngology, diseases of children, nervous diseases, orthopedic surgery, pharmacy, dermatology, ophthalmology and otology, clinical medicine, clinical surgery, histology and microscopy.

REQUIREMENTS: For admission—"All matriculates will be required to show on examination a satisfactory knowledge of the English branches. In place of this examination the college will except the degrees of A. B., B. S., Ph. D., certificates of having passed the entrance examination of any incorporated literary college, or any recognized medical college in which an examination is required for admission; also certificates of having graduated at any high school or academy."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures, not within the same twelvemonth; 5) examination on all branches taught in the college; 6) full course of dissection; 7) satisfactory course in chemical and physiological laboratory; 8) practical clinical work for one term in hospital and out-door clinics; 9) thesis.

FEES: Matriculation, \$5; lectures, \$50; hospital, \$10; graduation, \$25, summer session, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1879-80 | 118 | 27 | 23— |
| 1881-82 | 48 | 11 | 23— |
| 1882-83 | 58 | 13 | 22.4 |
| 1883-84 | 75 | 25 | 33.3 |

Average percentage of graduates to matriculates, *twenty-six*.

DETROIT HOMEOPATHIC MEDICAL COLLEGE.

DETROIT, Mich.

ORGANIZED in 1871. Extinct since 1876.

HOMEOPATHIC MEDICAL COLLEGE OF THE UNIVERSITY OF MICHIGAN.

ANN ARBOR, Mich. THOMAS P. WILSON, M. D., Dean of the Faculty.

ORGANIZED in 1875. The first class was graduated in 1877. Classes have been graduated each subsequent year.

The faculty embraces three professors, two lecturers, four assistants to chairs, and a resident physician and surgeon in hospital. Five professors of the department of medicine and surgery (regular school) give instruction to homeopathic students.

COURSE OF INSTRUCTION: One annual session; that of 1884-85 began October 1, 1884, and will end the last part of June, 1885. The course is graded, extending over three years, although two courses may suffice under certain conditions (see requirements for graduation.) Daily quizzes by the assistants of the several chairs.

Lectures as follows: The first year of the course will include anatomy, histology, general chemistry, minor surgery, materia medica, principles of medicine, preparation of medicines and their action, descriptive and anatomical botany, clinics, physical diagnosis, with the necessary practical work in the chemical and physiological laboratories. This year's work in materia medica will be devoted to teaching the source, nature, origin and method of preparing remedies, with their physiological action, and a general survey of their pathogenesis. In the second year the above studies, excepting histology and minor surgery, will be reviewed, and the student will take up general therapeutics, in connection with materia medica, diseases of women and children, obstetrics and their clinical work, materia medica, qualitative chemistry and analysis of urine, pathological anatomy, principles and practice of medicine (including hygiene or preventive medicine), principles of surgery, and ophthalmology and otology. The materia-medica work of this year will consist of special analyses and syntheses of drug-provings. In addition, the student will attend such didactic and clinical lectures on the practical branches as his progress shall render advisable. In the third year the student will enter upon the study of operative surgery, electro-therapeutics, spinal diseases and curvatures, and review obstetrics, materia medica, diseases of women and children, the principles and practice of medicine, and ophthalmology and otology, and receive practical instruction in diagnosis and treatment, both theoretical and clinical.

REQUIREMENTS: For admission—1) good moral character; 2) unless already a matriculate of the university, or a graduate of some respectable college, academy or high school, every candidate will be examined as to his previous education and his fitness to enter upon and appreciate the technical study of medicine. The diploma or certificate of graduation from such institutions must be presented to the dean of the faculty in order to secure exemption from examination. The examination will be in writing, and will cover the ordinary branches of an English education.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) must have attended at least seventy-five percent of the regular lectures; 5) must have spent the required time in practical anatomy, chemical analysis, etc., in the various laboratories and hospitals; 6) must have attended the usual quizzes and drills by the assistants of the several chairs; 7) must also have passed satisfactory examinations in all the studies included in the curriculum; or, *if admitted to advanced standing*, he must attend at least *two full courses* of medical lectures in this college, and pass the required examinations. Students who have completed full college courses for the first and second years in an accredited medical college, will be permitted, upon examination, to enter the third year and complete the studies of that year in this department, and to present themselves for examination for the degree at the end of the year. Students who have attended one full course of lectures in any accredited medical college previous to 1880 will be admitted to advanced standing in the course required in this department, and may be graduated on the conditions in force prior to that date. Students who have studied medicine elsewhere at least one college year, and who possess superior qualifications, may be admitted, on examination, to advanced standing.

FEES: Matriculation, for residents of Michigan, \$10; for non-residents, \$25. (paid but once.) Lectures, for residents of Michigan, \$35; for non-residents, \$55. Graduation, for all alike, \$10. Course in chemical laboratory, \$15; in physiological laboratory, \$15; in physiological laboratory, \$1; in electro-therapeutics, \$1; in anatomy, \$10.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 73 | 22 | 30+ |
| 1878-79 | 63 | 25 | 40— |
| 1879-80 | 70 | 18 | 25.7 |
| 1880-81 | 88 | 23 | 26 |
| 1881-82 | 71 | 15 | 21+ |
| 1882-83 | 57 | 17 | 29 |
| 1883-84 | 55 | 20 | 36.3 |

Average percentage of graduates to matriculates, *twenty-nine*.

MICHIGAN COLLEGE OF MEDICINE.

DETROIT, Mich. J. B. BOOK, M. D., Registrar, 303 Jefferson Avenue.

ORGANIZED in 1880. First class was graduated in 1881, and a class has been graduated each year since.

The faculty embraces sixteen professors, one instructor and two demonstrators of anatomy.

COURSE OF INSTRUCTION: The collegiate year consists of two sessions; the regular session of 1884-85 commenced September 2, 1884, and continues six months; the spring session commences on the second Tuesday of March, and will continue three months. A three-years' graded course is recommended, but not required. Clinics at hospital and dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, otology, ophthalmology, dermatology, laryngology, clinical medicine and surgery, genito-urinary diseases, dental surgery, diseases of children and orthopedic surgery.

REQUIREMENTS: For admission—"Students entering the college, who are not in possession of the degree of a college or university, or of a certificate from a high school or other recognized educational institution, will be required to pass a satisfactory examination in the following subjects: 1) English grammar; 2) English composition (a short composition upon any subject); 3) elementary mechanics of solids and fluids; 4) arithmetic to, and including, common and decimal fractions; 5) algebra to, and including, simple equations; 6) geometry, first two books; 7) general geography and history of the United States; 8) Latin grammar and translation of easy Latin prose; 9) optional studies (one of which will be accepted in lieu of any of the above studies, except English grammar, composition and Latin), Greek, French, German, botany, zoology."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) satisfactory examination in all branches taught.

FEES: Matriculation, \$5; lectures, \$50; graduation, \$20; hospital, \$10; spring term, \$15.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1880-81 | — | 28 | — |
| 1881-82 | 72 | 20 | 28 |
| 1882-83 | 55 | 28 | 50.9 |
| 1883-84 | 71 | 27 | 38+ |

Average percentage of graduates to matriculates, *thirty-eight*.

MINNESOTA.**WINONA MEDICAL SCHOOL.**

Winona, Minn.

ORGANIZED in 1872. Extinct. No diplomas were issued.

MINNESOTA COLLEGE HOSPITAL.

MINNEAPOLIS, Minn. F. A. DUNSMORE, M. D., Dean of the College.

ORGANIZED in 1881. Successor to the St. Paul Medical College, which was organized in 1880.

The faculty embraces twenty professors and one demonstrator.

COURSE OF INSTRUCTION: The collegiate year embraces a spring reading course of three months, which commences the first Monday in April, and a regular session, which begins the first Monday in October and lasts five months. A graded course is recommended, but not required. Instruction is imparted by lectures, recitations, practical work in laboratories and demonstrations, and by hospital and dispensary clinics.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology, otology, clinical medicine and surgery, dermatology, diseases of children, toxicology, nervous diseases, orthopedic surgery, genito-urinary diseases, medical and surgical dentistry.

REQUIREMENTS: For admission—"Before matriculation the student must pass an examination in the common English branches, including reading, writing, spelling, grammar, geography, arithmetic, and elements of physics. Candidates having a degree in arts or sciences, or presenting a certificate from a high school or other institution in good standing, or a teacher's certificate, will be admitted without examination."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) dissection of each part of the cadaver; 4) thesis; 5) three years' study; 6) two full courses of lectures.

FEES: Matriculation, \$5; lectures, \$50; spring course, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

| 1883-84 | 50 | 7 | 14 |

Average percentage of graduates to matriculates, *twelve*.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF MINNESOTA.

MINNEAPOLIS, Minn. PERRY H. WILLARD, M. D., Secretary of the Faculty.

ORGANIZED in 1883. The faculty embraces nine professors. This department is organized by the regents of the University, under their charter empowering them to grant degrees in medicine. The law regulating the practice of medicine in Minnesota makes this faculty also the State Medical Examining Board, with powers and duties similar to those conferred upon the STATE BOARD OF HEALTH OF ILLINOIS by the Illinois medical practice act—that is, to examine into the qualifications of those practicing medicine in the State not exempt from the provisions of the act by reason of length of practice, and to issue certificates entitling to such practice: 1) to those who establish the fact of graduation from a legally chartered medical institution in good standing; and 2) to those who, not being graduates of such institutions, pass a satisfactory examination by said board.

As the faculty of the medical department of the University, they examine and recommend to the regents candidates for the University degrees in medicine and surgery. No instruction is offered in this college. The faculty is an examining body only. Examinations include: 1) the entrance examination; 2) the scientific examination; 3) two or more professional examinations.

"I. The entrance examination embraces the English language, including writing, spelling, grammar, analysis and composition, arithmetic, elementary algebra, plane geometry, geography, United States history, general history, Latin grammar and reading, or an equivalent knowledge of German, French or Scandinavian.

"II. The scientific examination embraces physical geography, natural philosophy, elementary botany, chemistry, drawing—free-hand or mechanical.

"III. The professional examinations embrace anatomy, physiology, pathology, materia medica, therapeutics, medical chemistry, preventive medicine, practice of medicine, surgery, obstetrics, diseases of women, diseases of children, diseases of the nervous system, medical jurisprudence."

DEGREES: All candidates who pass the entrance, scientific and professional examinations, including the appropriate clinical and experimental tests incidental thereto, and give satisfactory evidence of having pursued professional studies as required by the by-laws, being twenty-one years of age or upwards, and of good moral character, are recommended by the faculty of the college to the board of regents to receive the degree

of Bachelor of Medicine (M. B.), which degree duly conferred is the warrant of the University of Minnesota for the practice of medicine and surgery.

Whenever the examinations in any case evince a high degree of proficiency in the literature, theory and practice of medicine, the faculty of the college permit the candidate to present and defend a thesis; this being done to their satisfaction, they recommend the candidate to receive at once the full degree of Doctor of Medicine (M. D.)

Any Bachelor of Medicine of this University who furnishes satisfactory evidence that he has been actively engaged in professional practice for three years after his graduation, and who presents and defends a thesis in the manner prescribed, is recommended to receive the degree of Doctor of Medicine (M. D.)

Doctors of Medicine of other colleges of medicine recognized by the board of regents, upon the recommendation of the faculty of this college, are recommended to receive the degree of Doctor of Medicine of this University, upon successfully defending a thesis in the manner prescribed.

All candidates for the first degree must furnish satisfactory evidence that they have severally pursued the study of medicine for four years in the office of and under the personal direction of a physician in active practice, who is a graduate of some college or school of medicine recognized by the board of regents, upon the recommendation of the faculty of this college. *Provided, however, that—*

(1.) One course of lectures, with other work incidental thereto, in a college of medicine recognized as above, shall be reckoned as equivalent to eight months of such study.

(2.) One term of six months in a school of medical instruction, organized and conducted in conformity with the by-laws, shall be equivalent to one year of such study under a preceptor.

(3.) Three courses of lectures, with work incidental thereto, in colleges of medicine recognized as above, shall be equivalent to three years of study under a preceptor; one year at least must, in all cases, have been passed in a preceptor's office.

(4.) Graduates of colleges and universities receive a credit of one year on professional study, in consideration of superior literary and scientific attainments.

The faculty of this college have authority to provide examinations for candidates for licenses in sanitary science, dental surgery and other specialties. Only Bachelors or Doctors of Medicine can become such candidates. All theses must be upon subjects approved by the faculty, must be founded on original work, and certified as the unaided productions of the candidates.

MISSOURI.

MISSOURI MEDICAL COLLEGE.

ST. LOUIS, MO. T. F. PREWITT, M. D., Dean, corner Twenty-second and Olive Streets.

ORGANIZED in 1840 as the Medical Department of Kemper College. In 1845 it became the Medical Department of the University of Missouri. In 1855 it assumed its present name. The first class was graduated in 1841. It was suspended during the war, and no students were graduated in 1862, '63, '64 or '65. It is sometimes called after its founder, The McDowell Medical College.

The faculty embraces eleven professors, one adjunct professor, one lecturer, three demonstrators and two clinical assistants.

COURSE OF INSTRUCTION: The forty-fourth regular graduating course began October 1, 1884, and will continue five months; the spring course begins March 1, 1885, and will continue nearly three months. A three-years graded course is recommended, but not required. Clinics are given at hospitals and dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology, otology, histology, clinical medicine, clinical surgery, diseases of the nervous system, diseases of children, pharmacy and microscopy.

REQUIREMENTS: For admission—"A preliminary examination will take place in accordance with the rules of the State Boards, as follows: 1) creditable certificates of good moral standing; 2) diplomas of graduation from a good literary and scientific college or high school; or, lacking this, a thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) a satisfactory examination.

FEES: Matriculation, \$5; lectures, \$60; graduation, \$30; demonstrator, \$10.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 240 | 97 | 40.4 |
| 1878-79 | 225 | 90 | 40 |
| 1879-80 | 300 | 120 | 40 |
| 1880-81 | 265 | 125 | 46.4 |
| 1881-82 | 235 | 125 | 53 |
| 1882-83 | 210 | 86 | 41 |
| 1883-84 | *252 | 103 | 40.8 |

Average percentage of graduates to matriculates, *forty-three.*

*Not including seven post-graduates.

ST. LOUIS MEDICAL COLLEGE.

ST. LOUIS, MO. J. S. B. ALLEYNE, M. D., Dean, 3132 Washington Avenue.

ORGANIZED in 1841, as the medical department of the St. Louis University. In 1855 it was chartered as an independent institution under its present name. The first class was graduated in 1843. Classes have been graduated each subsequent year.

The faculty embraces ten professors, eight lecturers, three demonstrators and two clinical assistants.

COURSE OF INSTRUCTION: The collegiate year of 1884-5 embraces a spring and a winter session. The former began March 10, 1884, and continued eleven weeks. The winter graduating course began September 22, 1884, and will continue until March 1, 1885. The course of studies extends over a period of three years, and is graded.

Lectures embrace: First term, chemistry, chemical laboratory practice, anatomy, dissections, histology, histological demonstrations, physiology, materia medica.—Second term, chemistry, anatomy, dissections, physiology, materia medica and therapeutics, pathological anatomy, principles and practice of medicine, medical clinics, clinics for diseases of children, surgical clinics. Third term, dissections, principles and practice of medicine, principles and practice of surgery, ophthalmology, obstetrics, diseases of women, diseases of children, hygiene and forensic medicine, medical clinics, children's clinics, surgical clinics, ophthalmic clinics, gynecological clinics, clinics for diseases of the genito-urinary organs, obstetrical out-clinics.

REQUIREMENTS: For admission—"All students entering the college will be required to pass a satisfactory examination in the branches of a good English education, including English grammar, orthography and composition, mathematics, and elementary physics. Students who present a diploma or certificate of graduation from a literary or scientific college or a high school, shall be exempt from this preliminary examination." Students who have attended other accredited schools may obtain advanced standing by passing the examinations of the proper year.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) must have attended three regular courses of lectures; 5) examination in chemistry, anatomy, physiology, materia medica, therapeutics, principles and practice of medicine, clinical medicine, surgery, obstetrics, hygiene and forensic medicine, pathological anatomy.

FEES: Matriculation (paid but once), \$5; term fee, including demonstrator, laboratory and hospital tickets, \$90; spring session, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 180 | 47 | 26 |
| 1878-79 | 170 | 54 | 31.7 |
| 1879-80 | 163 | 41 | 25 |
| 1880-81 | 153 | 43 | 28 |
| 1881-82 | 167 | 29 | 17.3 |
| 1882-83 | 134 | 40 | 30 |
| 1883-84 | 112 | 33 | 29.4 |

Average percentage of graduates to matriculates, twenty-seven.

MEDICAL SCHOOL OF THE UNIVERSITY OF THE STATE OF MISSOURI.

COLUMBIA, MO. J. G. NORWOOD, M. D., Dean of the Faculty.

ORGANIZED in 1846. The first class was graduated in 1846. From 1845 to 1855 the medical department was situated at St. Louis. See Missouri Medical College. No degrees were conferred during the war, 1861-65.

Faculty embraces eight professors, nine lecturers and four examiners for medical degrees, appointed from as many district medical societies.

COURSE OF INSTRUCTION: One annual session of nine months' duration. The present session began September 8, 1884, the junior course closing the first Thursday in May, 1885, and the senior course ending the first Thursday in June, 1885. The course is graded, requiring only two years for completion. Instruction is given by lectures, recitations and clinical teaching. Seniors visit patients with members of the faculty. Daily examinations are made upon the lectures of the preceding day.

Lectures embrace—Junior class: anatomy, physiology, chemistry, materia medica, medical botany, surgery, physics, metric system of weights and measures, laboratory work, dissecting and medical jurisprudence. Senior class: anatomy, toxicology, surgery, obstetrics, practice of medicine, lectures by special professors, laboratory work (optional), dissecting and medical jurisprudence. "No student is allowed to attend both courses the same year."

REQUIREMENTS: For admission, none. "Before entering the senior class all students must pass a satisfactory examination upon: 1) English grammar (Harvey) and orthography; 2) rhetoric (Hart); 3) history of the United States (Swinton) and its geography; 4) arithmetic (the four fundamental rules, denominate numbers and common fractions).

For graduation: 1) twenty-one years of age; 2) good moral character; 3) last course in this school; 4) satisfactory examination upon the prescribed course; 5) regular attend-

ance on clinics and lectures; 6) practical anatomy and chemistry, one course; 7) thesis. Percentages required at final examination are, anatomy and physiology, 85; chemistry, toxicology, pharmacy, 60; all others, 75.

FEES: Lectures, \$10; demonstrator, \$10; graduation, \$5.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 22 | 8 | 36.3 |
| 1878-79 | 36 | 6 | 16.6 |
| 1879-80 | 43 | 9 | 20.9 |
| 1880-81 | 40 | 5 | 12.5 |
| 1881-82 | 35 | 7 | 20 |
| 1882-83 | 25 | 9 | 36 |
| 1883-84 | 16 | 4 | 25 |

Average percentage of graduates to matriculates, *twenty-two*.

REMARKS: Notice is given of a proposed academic year for students proposing to enter the medical school after the year 1884-85. The first semester of this preparatory year is devoted to Latin, physics, zoology and drawing, English composition, arithmetic and the metrical system; and the second semester to chemistry, political science, botany, and book-keeping. A "passing grade" in these branches will, after June, 1885, be a prerequisite of entrance to the medical school.

HUMBOLDT MEDICAL COLLEGE.

St. Louis, Mo.

ORGANIZED in 185—. Extinct since 1867.

HOMEOPATHIC MEDICAL COLLEGE OF MISSOURI.

St. Louis, Mo. J. T. KENT, M. D., Registrar, 2309 Washington Avenue.

ORGANIZED originally in 1859; reorganized in 1882. Between the years 1869 and 1881, the following homeopathic colleges were organized in St. Louis, viz: The St. Louis College of Homeopathic Physicians and Surgeons, organized 1869; held two sessions and suspended after session of 1870-71. The Homeopathic Medical College of St. Louis, organized 1873. The Hering Medical College, organized in 1880. In 1880 a portion of the faculty of the Homeopathic Medical College of Missouri seceded and revived The St. Louis College of Homeopathic Physicians and Surgeons, which again held two sessions; but after the session of 1881-82 this college and the Hering were consolidated with the Homeopathic Medical College of Missouri.

The faculty of this college embraces twelve professors and one instructor.

COURSE OF INSTRUCTION: The present course of lectures began October 6, 1884, and will terminate March 1, 1885. Clinics at hospital and at dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, diseases of the nervous system, pedology, clinical medicine, clinical surgery.

REQUIREMENTS: For admission—"The applicant must present a certificate of moral character; pass an examination in all the branches of an English education and furnish evidence of scientific and literary qualifications."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) satisfactory examination on all the branches taught.

FEES: Matriculation, \$5; lectures, \$50; graduation, \$25; demonstrator, \$10.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates | Percent. |
|----------|---------------|-----------|----------|
| 1882-83 | 41 | 11 | 27 |
| 1883-84 | 39* | 19 | 48.7 |

Average percentage of graduates to matriculates, *thirty-eight*.

*Not including four post-graduates.

KANSAS CITY MEDICAL COLLEGE.

KANSAS CITY, Mo. E. W. SHAUFFLER, M. D., Dean of the Faculty.

ORGANIZED in 1864, as the College of Physicians and Surgeons of Kansas City. The first class was graduated in 1865; classes have been graduated each subsequent year. The school assumed its present name in 1880.

The faculty embraces twelve professors, one adjunct professor, two lecturers, two demonstrators and one instructor.

COURSE OF INSTRUCTION: One graduating session annually, which, in 1884-85 began September 17, and will close March 17, 1885. A graded three-years' course is recommended, but not required. Hospital and dispensary clinics are given.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, ophthalmology and otology, histology, urinary chemistry, clinical medicine, clinical surgery and diseases of children.

REQUIREMENTS: For admission—The action of the faculty, taken October 18, 1884, concerning preliminary examination is as follows: "Resolved, That from and including the session of 1884-85, applicants for admission to this college shall be examined in the ordinary branches of an English education, including mathematics, English composition and elementary physics. Resolved, That the President appoint a committee of three members of the faculty to conduct such examination of the class at present in attendance at this college."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of instruction; 5) personal examination on the seven principal branches of medicine.

FEES: Matriculation, (paid but once) \$5; lectures, \$50; demonstrator, \$10; hospital, \$3; graduation, \$20.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 31 | 9 | 29 |
| 1878-79 | 31 | 9 | 29 |
| 1879-80 | 44 | 17 | 38.6 |
| 1880-81 | 42 | 12 | 28.5 |
| 1881-82 | 32 | 16 | 50 |
| 1882-83 | 36 | 12 | 33.3 |
| 1883-84 | 38 | 15 | 39.4 |

Average percentage of graduates to matriculates, *thirty-six*.

ST. LOUIS COLLEGE OF HOMEOPATHIC PHYSICIANS AND SURGEONS.

St. Louis, Mo.

ORGANIZED in 1869. Suspended after the session of 1870-71.—See Homeopathic Medical College of Missouri.

ST. LOUIS ECLECTIC MEDICAL COLLEGE.

St. Louis, Mo.

ORGANIZED in 187—. Extinct in 1883.

HOMEOPATHIC MEDICAL COLLEGE OF ST. LOUIS.

St. Louis, Mo.

ORGANIZED 1873. Extinct.

AMERICAN MEDICAL COLLEGE (*Eclectic*).

St. Louis, Mo. GEO. C. FITZER, M. D., Dean, 1103 Chambers Street.

ORGANIZED in 1873. The first class was graduated in 1874. Classes were graduated twice annually from that date up to 1883, but only one annual graduating session is now held.

The faculty embraces eight professors, one demonstrator.

COURSE OF INSTRUCTION: The regular graduating session of 1884-85 began October 6, 1884, and will terminate in March, 1885. It was preceded by a preliminary course of one week. Clinics are given at hospital and college.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, pharmacy, ophthalmology, otology, diseases of children, clinical medicine, clinical surgery and diseases of the nervous system.

REQUIREMENTS: For admission—"A good English education."

For graduation: 1) good moral character; 2) twenty-one years of age; 3) two courses of lectures; 4) three years' study; 5) "must show a record of faithful attendance both at the college and hospital lectures;" 6) satisfactory final examination.

FEES: Tickets for the session, including matriculation and demonstrator's ticket, \$75; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 120 | 78 | 65 |
| 1878-79 | 66 | 36 | 54.5 |
| 1879-80 | 95 | 42 | 44.2 |
| 1880-81 | 66 | 22 | 33.3 |
| 1881-82 | 118 | 40 | 33.9 |
| 1882-83 | 114 | 38 | 33.3 |
| 1883-84 | 65* | 15* | 23+ |

Average percentage of graduates to matriculates, *forty-two*.

*Not including thirteen post-graduates.

ST. JOSEPH HOSPITAL MEDICAL COLLEGE.

St. JOSEPH, Mo.

ORGANIZED in 1876. Five classes containing forty-five students, were graduated. In 1882, this college was merged into the St. Joseph Medical College, (*vide infra*).

COLLEGE OF PHYSICIANS AND SURGEONS OF ST. JOSEPH.

St. JOSEPH, Mo.

ORGANIZED in 1878. Three classes, containing fifty students, were graduated. In 1882, this college was merged into the St. Joseph Medical College, (*vide infra*).

ST. LOUIS COLLEGE OF PHYSICIANS AND SURGEONS.

St. LOUIS, Mo. LOUIS BAUER, M. D., Dean, 519 Pine Street.

ORGANIZED in 1879. The first class was graduated in 1880.

The faculty embraces thirteen professors, two lecturers and one demonstrator.

COURSE OF INSTRUCTION: A preliminary session of four weeks' duration begins on the second Monday in September. The regular graduating session commences on the second Monday of October and continues until the first Saturday of March. A three-years' graded course is recommended, but not required. Clinics are given at hospitals and dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, military surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, dermatology and syphilis, laryngology, clinical medicine, clinical surgery, toxicology and diseases of the nervous system.

REQUIREMENTS: For admission—"The prospective student must present certificate of possessing a good general English education; if without it, he will be examined in the various branches which constitute such an education, to wit: 1) English grammar, orthography, mathematics, physics and history of the United States; 2) his age must not be less than eighteen; 3) he must present credible evidences of a good moral character."

For graduation: 1) twenty-one years of age; 2) a good moral character; 3) at least three years' study of medicine; 4) attendance on two courses of lectures.

STUDENTS: Number of matriculates and graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1879-80 | 19 | 5 | 26.3 |
| 1880-81 | 41 | 9 | 22— |
| 1881-82 | 49 | 12 | 24.5 |
| 1882-83 | 69 | 31 | 45 |
| 1883-84 | 57 | 27 | 47.3 |

Average percentage of graduates to matriculates, *thirty-six*.

JOPLIN COLLEGE OF PHYSICIANS AND SURGEONS.

JOPLIN, Mo.

ORGANIZED in 1880. The first class was graduated in 1881. The school became extinct in 1884.

HERING MEDICAL COLLEGE (*Homeopathic*.)

ST. LOUIS, Mo.

ORGANIZED 1880. See Homeopathic Medical College of Missouri.

NORTHWESTERN MEDICAL COLLEGE OF ST. JOSEPH.

ST. JOSEPH, Mo. J. P. CHESNEY, M. D., Secretary, Felix, between Seventh and Eighth Sts.

ORGANIZED in 1880. The first class was graduated in 1881.

The faculty embraces nine professors and four lecturers.

COURSE OF INSTRUCTION: The regular graduating term begins the first Monday in October and continues five months.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, obstetrics and gynecology, hygiene, medical jurisprudence, diseases of children, diseases of the nervous system, otology and ophthalmology, clinical medicine, clinical surgery, genito-urinary diseases and electro-therapeutics.

REQUIREMENTS: For admission—1) credible certificate of good moral character; 2) diploma of graduation from a good literary and scientific college or high school; or lacking this, a thorough examination in the branches of a good English education, including mathematics, English composition and elementary physics or natural philosophy.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses; 4) satisfactory examination; 5) thesis.

FEES: For the entire course, \$45; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percentage. |
|----------|---------------|------------|-------------|
| 1880-81 | 40 | 24 | 57.5 |
| 1881-82 | 40 | 26 | 65 |
| 1882-83 | 31 | 18 | 58 |
| 1883-84 | 39 | 10 | 25.8 |

Average percentage of graduates to matriculates, *fifty-one*.

JOPLIN MEDICAL COLLEGE.

JOPLIN, Mo.

ORGANIZED in 1881. Extinct.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF KANSAS CITY.

KANSAS CITY, Mo. JOHN W. ELSTON, M. D., Secretary, 515 May Street.

ORGANIZED in 1881. The first class was graduated in 1882.

The faculty embraces fifteen professors, one adjunct professor and two lecturers.

COURSE OF INSTRUCTION: The fourth annual session opened September 15, 1884, and will continue twenty-six weeks. The spring course opens about the middle of March, and continues ten weeks. Instruction is given by lectures, clinics, practical courses in the dissecting room, laboratories and by repeated examinations. A three-years' course is recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, nervous and mental diseases, orthopedic surgery, diseases of the throat and chest, diseases of children, pharmacy, genito-urinary diseases, clinical medicine and clinical surgery.

REQUIREMENTS: For admission—"Every applicant must be of good moral character, and possess the evidences of a good English education. He should also possess a sufficient knowledge of Latin to read and write current prescriptions. Every candidate for matriculation, unless a graduate of some college, high school or academy, or holds a certificate of some literary institution, will be examined to ascertain his fitness for entering upon and appreciating the study of medicine."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) clinical instruction during one term; 6) dissection of each region of the body; 7) full and satisfactory examination in each branch.

FEES: Matriculation, \$5; lectures, \$50; demonstrator, \$10; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1881-82 | 25 | 11 | 44 |
| 1882-83 | 28 | 8 | 38.6 |
| 1883-84 | 45 | 14 | 31.1 |

Average percentage of graduates to matriculates, *thirty-four*.

ST. JOSEPH MEDICAL COLLEGE.

ST. JOSEPH, MO. JACOB GEIGER, M. D., Dean, corner Sixth and Francis Streets.

ORGANIZED in 1882, by the union of the St. Joseph Hospital Medical College and the College of Physicians and Surgeons of St. Joseph. The first class graduated in 1883.

The faculty embraces eleven professors, two lecturers and one demonstrator.

COURSE OF INSTRUCTION: The eighth regular course of lectures commenced October 6, 1884, and will continue five months. Clinics are given in hospital and dispensary. A three-years' course is recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, mental and nervous diseases, ophthalmology and otology, diseases of children, genito-urinary diseases, diseases of throat and nose, clinical medicine and clinical surgery.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) dissection "continuously"; 6) hospital clinics; 7) satisfactory examination on all branches taught in this college; 8) thesis.

FEES: Matriculation, \$5; lectures, \$35; demonstrator, \$10; graduation, \$35.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentage of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1882-83 | 24 | 8 | 33.3 |
| 1883-84 | 35 | 6 | 17.1 |

Average percentage of graduates to matriculates, *twenty-four*.

REMARKS: A second (summer) examination is held for candidates who do not pass an entirely satisfactory examination in certain departments, not exceeding three in number. If they pass these examinations, which are held six months after the regular examination, "they will be recommended to the board of trustees for the degree."

KANSAS CITY HOSPITAL COLLEGE OF MEDICINE.

KANSAS CITY, MO. E. G. GRANVILLE, M. D., Secretary of the Faculty.

ORGANIZED in 1882. The first class was graduated in 1883. The faculty embraces eleven professors and one adjunct professor.

COURSE OF INSTRUCTION: The third annual graduating session began October 15, 1884, and will close March 15, 1885.

Lectures embrace subjects grouped as follows: "Orthopedic, military and clinical surgery, and allopathic materia medica"; "principles of surgery and gynecology"; obstetrics and diseases of women and children; "allopathic theory and practice, and clinical medicine"; "homeopathic therapeutics, theory and practice of clinical medicine"; "eclectic materia medica and practice, and clinical medicine"; "anatomy and diseases of the nervous system"; diseases of the eye, ear and throat; physiology and histology; chemistry; medical jurisprudence.

REQUIREMENTS: For admission—"Each candidate must be not less than eighteen years of age, male or female, and must present to the faculty satisfactory evidence of good moral character. They will be required to present such evidence as will show that their preliminary education and training are sufficient to enable them to profitably and properly engage in the study of medicine. This will, of course, include the elements of a thorough English education."

For graduation: 1) good moral character; 2) twenty-one years of age; 3) three years' study; 4) two full courses of lectures; 5) satisfactory examination in all the branches taught in the college.

FEES: Matriculation, \$5; lectures, \$30; demonstrator, \$10; graduation, \$20.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1882-3 | 18 | 11 | 61.1 |
| 1883-4 | 19 | 9 | 47.3 |

Average percentage of graduates to matriculates, *fifty-four*.

REMARKS: The following verbatim extracts from the last annual announcement are necessary to a better understanding of the matter given above under the caption "Course of Instruction": "We declare that we will teach medicine and not prejudice, and to this end we will teach every science usually taught in medical colleges. In the allopathic school a complete course is presented to the student. Every chair of a regular faculty of medicine is well filled. Homeopathy is taught by a distinguished adherent to the law of *similia similibus curantur*. The materia medica and its application to the cure of disease will be as completely taught as in any homeopathic school in the country. Eclectic medicine will be taught by a professor of large experience. All that is known as distinctive of this school of medicine will be thoroughly taught"—(two lectures each week).

WOMAN'S MEDICAL COLLEGE OF ST. LOUIS—*Homeopathic*.

ST. LOUIS, Mo.

ORGANIZED in 1883, and after giving one course of lectures it became extinct.

MISSOURI STATE BOARD OF HEALTH.

HANNIBAL, Mo. J. C. HEARNE, M. D., Secretary of the Board.

ORGANIZED in July, 1883. This Board is clothed with powers, with respect to the practice of medicine in Missouri, substantially the same as those possessed by the STATE BOARD OF HEALTH OF ILLINOIS. The laws creating the Board, and defining its powers and duties, are almost identical with those of Illinois—for text of which see pp. v-xv., ante. Its standard of recognition of medical colleges as in good standing, and its examination of non-graduate applicants for certificates, are also the same as those in Illinois.

NEBRASKA.

OMAHA MEDICAL COLLEGE.

OMAHA, Neb. GEORGE B. AYERS, M. D., Secretary, 1402 Douglas Street.

ORGANIZED in 1881. The outgrowth of a preparatory school, established in 1880, under the name of the Nebraska School of Medicine.

The faculty embraces sixteen professors and a demonstrator.

COURSE OF INSTRUCTION: The regular graduating session of 1884-85 began October 6, 1884, and will close March 26, 1885. A three-years' graded course is recommended, but not required. The members of the faculty devote a portion of each day to examinations on the subjects of the previous lectures. Clinics are given at the college and in the hospitals.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, ophthalmology and otology, laryngology, toxicology, diseases of children, diseases of the mind, clinical medicine and clinical surgery.

REQUIREMENTS: For admission—"All candidates must present to the faculty satisfactory evidence of a good moral character, and must be at least eighteen years of age, and unless holding a certificate or diploma from some literary institution, must pass an examination in the English branches."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) "such primary education as is clearly requisite for a proper standing with the public and the profession"; 4) three years' study; 5) two full courses; 6) clinical instruction for two sessions; 7) practical anatomy (to the extent of having dissected all the regions of the body) and chemistry, one course; 8) full and satisfactory written and oral examination on each branch taught; 9) close attendance on all lectures.

FEES: Matriculation, \$5; demonstrator, \$10; lectures, \$35; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1881-82 | 33 | 8 | 23 |
| 1882-83 | 30 | 9 | 30 |
| 1883-84 | 20 | 4 | 20 |

Average percentage of graduates to matriculates, *twenty-five*.

REMARKS: Six partial-course students are counted among the matriculates of 1881-82, and five among the matriculates of 1882-83.

COLLEGE OF MEDICINE OF THE UNIVERSITY OF NEBRASKA.

Regular Department.

LINCOLN, Neb. A. R. MITCHELL, M. D., Dean of the Faculty.

ORGANIZED in 1883. The first class was graduated in 1884. The faculty consists of nine professors and four lecturers.

COURSE OF INSTRUCTION: The regular session of 1884-85 began September 17, 1884, and will end March 19, 1885. Instruction consists of didactic and clinical lectures, and laboratory work in each department.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, ophthalmology and otology, orthopedic surgery, diseases of children, clinical medicine and clinical surgery.

REQUIREMENTS: For admission—"No one will be admitted to this department unless the faculty is satisfied that he is sufficiently advanced in an English education to pursue, with advantage, the study of medicine."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) "must successfully pursue the study of practical anatomy and practical chemistry"; 4) thesis; 5) three-years' study; 6) two full courses of lectures; 7) satisfactory examination in all branches taught.

FEES: Matriculation, \$5; tuition, free.

STUDENTS: Number of students reported at session of 1883-84, matriculates, 15; graduates, 3; percentage of graduates to matriculates, *twenty*.

COLLEGE OF MEDICINE OF THE UNIVERSITY OF NEBRASKA.

Homeopathic Department.

LINCOLN, Neb. BARTLETT L. PAINE, M. D.

ORGANIZED in 1883. First class graduated in 1884. Faculty consists of three professors and three lecturers.

COURSE OF INSTRUCTION: Session of 1884-85 began September 9, 1884, and will terminate March 19, 1885. Medical jurisprudence, surgery, physiology, diseases of the eye and ear are taught by the professors of those branches in the regular department. Obstetrics and diseases of women and children, materia medica and therapeutics, theory and practice of medicine, electro-therapeutics, surgical diseases of women and organic diseases of the chest, comprise the subjects of the chairs at the homeopathic faculty.

REQUIREMENTS: For admission and graduation, see requirements of regular department.

FEES: Matriculation, \$5; tuition, free.

STUDENTS: Number of students, session of 1883-84, matriculates, 14; graduates, 3; percentage of graduates to matriculates, *twenty-one*.

COLLEGE OF MEDICINE OF THE UNIVERSITY OF NEBRASKA.

Eclectic Department.

LINCOLN, Neb. Prof. WILLIAM S. LATTI, M. D.

ORGANIZED in 1883. First class was graduated in 1884. Faculty consists of three professors.

COURSE OF INSTRUCTION: Session of 1884-85 began September 9, 1884, and will continue until March 19, 1885. Physiology, chemistry, surgery, medical jurisprudence, ophthalmology and otology are taught by professors of the regular department; while the eclectic faculty lecture upon theory and practice of medicine, obstetrics and diseases of women and children, and materia medica and therapeutics.

REQUIREMENTS: For admission and graduation, see requirements of regular department.

FEES: Matriculation, \$5; tuition, free.

STUDENTS: Number of students, session 1883-4, matriculates, 16; graduates, 1; percentage of graduates to matriculates, *six*.

NEW HAMPSHIRE.**MEDICAL DEPARTMENT OF DARTMOUTH COLLEGE.***(New Hampshire Medical Institute.)*

HANOVER, N. H. CARLTON P. FROST, M. D., Dean of the Faculty.

ORGANIZED in 1797. The first class was graduated in 1798. Classes have been graduated each subsequent year. The faculty embraces eleven professors and one instructor.

COURSE OF INSTRUCTION: One regular lecture course of sixteen weeks' duration. The eighty-eighth annual session commenced July 30, 1884. A recitation term begins December 10, 1884, and ends June 20, 1885. "Clinical instruction will be given to as large an extent as circumstances will admit." Lectures as follows: The courses in surgery and practice consist of sixty-six lectures each; in anatomy and physiology, ninety-nine lectures; in obstetrics and therapeutics, forty-four lectures each; in gynecology, of twenty-two lectures; shorter courses in medical jurisprudence, mental diseases, ophthalmology, laryngology, pharmacy and urinary analysis; the course in chemistry consists of lectures and laboratory work.

REQUIREMENTS: For admission—"Applicants must be eighteen years of age, and, unless already matriculates of some regular medical college or graduates of some reputable college, academy or high school, will be examined as to their fitness for entering upon and appreciating the technical study of medicine. They will be expected to be familiar with the elementary principles of physics (light, heat, electricity, etc.) on entrance.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) three full years' study; 5) one course of dissection. Two examinations annually.

FEEs: Matriculation, \$5; lectures, \$77; graduation, \$25; recitation term, \$40.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877 | 87 | 30 | 34.5 |
| 1878 | 88 | 23 | 26 |
| 1879 | 80 | 26 | 32.5 |
| 1880 | 78 | 29 | 37 |
| 1881 | 91 | 43 | 47.2 |
| 1882 | 75 | 28 | 36.8 |
| 1883 | 80 | 40 | 50 |

Average percentage of graduates to matriculates, *thirty-eight*.

NEW ENGLAND UNIVERSITY OF THE ARTS AND SCIENCES.

MANCHESTER, N. H.

FRAUDULENT. Extinct.

NEW JERSEY.**MEDICAL SOCIETY OF NEW JERSEY.**

ORGANIZED in 1776. The society does not give instruction. It was authorized to confer the degree of M. D., in 1826. The section of the act to reorganize the Medical Society of New Jersey and conferring this power, is as follows: "And be it enacted, that the society shall have the authority to confer the degree of M. D., under such rules and regulations as they may adopt, which degree shall be deemed sufficient evidence of a regularly educated and qualified practitioner of the healing art."

Regulations of the society concerning the conferring of the degree of Doctor of Medicine and honorary membership:

SECTION I. Candidates for the degree of medicine doctor may apply to any district society of this State, and shall be admitted to examination under the following rules and regulations:

1st. Each district society shall appoint annually, or *pro re nata*, a committee of not less than five members, who shall conduct the examination.

2d. All examinations shall be in the presence of the society at a regular meeting; and no candidate shall be examined until he has given satisfactory evidence of having reached the age of twenty-one years; is of good moral character; and has pursued his medical studies under the care of some regular practitioner for the term of three years, including two courses of lectures in some medical institution in affiliation with the American Medical Association. If he has not graduated at some academic college, then the society shall be satisfied that his preliminary education has been such as to qualify him for the study and practice of medicine.

3d. The examination shall extend to all the branches taught in the medical schools recognized as aforesaid; and the candidate shall then be balloted for by the society; and if he shall receive the approving votes of two-thirds of all the members present, the presiding officer shall give a certificate to that effect to the candidate.

4th. This certificate may be presented at the next or any subsequent regular meeting of this society, not extending beyond the period of three years, with a written thesis upon some medical subject; and if upon a ballot they shall be approved by a majority of the members present, the candidate, upon the payment of fifteen dollars, shall be entitled to receive a diploma.

The honorary degree of M. D. may be conferred by the society, by a vote by ballot of three-fourths of the members present; provided the nomination shall have been made at a preceding meeting, and provided the candidate has been a regular practitioner for the period of seven years.

§ 2. Practitioners of medicine of this or any other State may be admitted as honorary members by a vote by ballot of the society, provided that the nomination be made at a previous meeting. The nomination shall be referred to a special committee of three appointed by the president, and the nominee shall not be considered as eligible to election till the committee report. The privilege of honorary membership shall not confer the right to vote.

GRADUATES: Eight or ten diplomas have been conferred. Two were conferred in 1881, and one at the last meeting of the society in 1883.

COLLEGE OF PHYSICIANS AND SURGEONS IN THE CITY OF NEW YORK.

Medical Department of Columbia College.

NEW YORK CITY. JOHN G. CURTIS, M. D., Secretary, Cor. Twenty-third St. and Fourth Avenue.

ORGANIZED in 1807, by the regents of the University of the State of New York, as their medical department, under the name of the College of Physicians and Surgeons in the City of New York. The institution was connected with the Columbia College for a short period in 1814, and became permanently connected with it in 1860, when the Medical Department of Columbia College was added to the original title. The original Medical Department of Columbia College was organized in 1767; it was suspended during the war of the Revolution, and became extinct in 1813. The first class was graduated by this college in 1811. Classes have been graduated each subsequent year.

The faculty embraces seventeen professors, two clinical lecturers, three demonstrators, one director physiological laboratory, and thirty clinical assistants.

COURSE OF INSTRUCTION: The session of 1884-85 began October 1, and will end about the first of May. Instruction consists of didactic lectures with demonstrations, clinical teaching, recitations, and practical teaching in subjects involving manipulation. Clinics at hospitals and dispensaries free to matriculates and optional. Recitations are held daily by a special corps of examiners, optional; fees required, \$40. Many special courses, fees varying from \$12 to \$20. A three-years' graded course is recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, diseases of children, diseases of the mind and nervous system, dermatology and laryngology.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures on anatomy, physiology, chemistry, materia medica and therapeutics, obstetrics, surgery, pathology and practical medicine; 5) satisfactory examination in seven branches; 6) thesis. The examinations for the degree of Doctor of Medicine are in writing, and are held twice a year, viz: 1) immediately after the close of the lectures of the college year in May; 2) during the second and third weeks of September. According to the merits of his thesis and examinations three results of the latter are possible in the case of a candidate for the degree of M. D.: 1. He is "passed" when his thesis and examinations have been satisfactory in each and all of the seven principal branches of medical teaching. 2. He is "conditioned" when the average merit of his thesis and examinations has been satisfactory, while in one or more branches he has been found deficient. In this case the candidate can proceed to his degree only on the condition that he first pass a re-examination in the deficient branch or branches, not

sooner than at the next regular semi-annual examination. 3. He is "rejected" when the average merit of his thesis and examinations has been unsatisfactory; *in this case the candidate must be re-examined in all the seven branches, but the writing of a new thesis is rarely required.*

FEES: Matriculation, \$5; lectures, \$140; demonstrator, \$10; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 413 | 109 | 27 |
| 1878-79 | 485 | 95 | 19.6 |
| 1879-80 | 513 | 117 | 22.8 |
| 1880-81 | 555 | 120 | 21.6 |
| 1881-82 | 547 | 115 | 21 |
| 1882-83 | 543 | 125 | 23 |
| 1883-84 | 505 | 105 | 20.7 |

Average percentage of graduates to matriculates, *twenty-two*.

COLLEGE OF PHYSICIANS AND SURGEONS OF THE WESTERN DISTRICT OF NEW YORK.

FAIRFIELD, N. Y.

ORGANIZED in 1812. Extinct since 1840. During its existence it afforded instruction to 3123 students and graduated 589.

NEW MEDICAL INSTITUTION.

Medical Department of Queen's College, New Jersey.

NEW YORK CITY.

ORGANIZED in 1814; suspended in 1816. In 1826 the Medical Institution was revived under the auspices of Rutgers (formerly Queen's) College, N. J., but became extinct in 1830. It is probable that the diplomas issued after its revival were illegal.

NEW YORK REFORMED MEDICAL COLLEGE—*Eclectic*.

NEW YORK CITY.

ORGANIZED in 1836. Extinct.

NEW YORK SCHOOL OF MEDICINE.

NEW YORK CITY.

ORGANIZED under the auspices of the New York County Medical Society in 1831.

AUBURN MEDICAL SCHOOL.

AUBURN, N. Y.

EXTINCT.—Date of organization and extinction unknown.

GENEVA MEDICAL COLLEGE.

GENEVA, N. Y.

ORGANIZED in 1839. Extinct. Merged into the College of Medicine of Syracuse University in 1872 (*vide infra*.)

ALBANY MEDICAL COLLEGE.

Medical Department of Union University.

ALBANY, N. Y. WILLIS G. TUCKER, M. D., Registrar, 4 Lancaster Street.

ORGANIZED in 1839. The first class was graduated in 1840. It became connected with Union University in 1873, when the present title was assumed.

The faculty embraces twelve professors, two lecturers, one curator and one demonstrator.

COURSE OF INSTRUCTION: The regular graduating session of 1884-85 began September 9, 1884, and will close March 4, 1885. Written examinations are held monthly, clinics at hospitals and dispensary. A three-years' graded course is substantially required for graduation.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, dermatology, psychological medicine, ophthalmology and otology, diseases of children, and diseases of the throat and chest.

REQUIREMENTS: For admission—"Graduates from recognized colleges, scientific schools or medical institutions, and students presenting certificates of competency from the censors of the medical society of the county from which they come, will not be required to pass the preliminary examination on joining the school. All others will be required to pass examinations by a page written at the time, of which the orthography, grammatical construction and penmanship will be considered, and in arithmetic, grammar, geography and elementary physics.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three-years' study; 4) "three-years' graded course in this college, or the equivalent of the first two courses elsewhere and the last in this college," except as hereafter provided; 5) thesis; 6) "satisfactory examination in the several branches of medicine and surgery, final examinations being conducted chiefly in writing." Regular and punctual attendance is required.

The proviso above referred to is as follows: "1) That graduates of recognized literary colleges, scientific schools or colleges of pharmacy will be allowed to present themselves for graduation at the end of their second full course if all other requirements for graduation are fulfilled; 2) that students desiring to enter the second year class may do so if they successfully pass an examination in anatomy, materia medica, chemistry and physiology, and are deemed competent so to enter; and 3) that students who have attended a full course of lectures elsewhere may enter the senior class on passing a satisfactory entrance examination in all the departments. Students entering the second-year class, in either instance as above provided, must attend the full course of lectures each year, and are examined in all the branches at the end of their second course. Students entering the senior class as above provided must attend the full course of lectures, and are examined in all the branches at its close."

FEES: Matriculation, \$5; lectures, \$100; demonstrator, \$10; graduation, \$25; laboratory, \$10.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 153 | 31 | 20.2 |
| 1878-79 | 161 | 43 | 26.7 |
| 1879-80 | 178 | 46 | 25.8 |
| 1880-81 | 172 | 58 | 33.7 |
| 1881-82 | 170 | 54 | 31.7 |
| 1882-83 | 157 | 51 | 32.5 |
| 1883-84 | 149 | 43 | 28.8 |

Average percentage of graduates to matriculates during the past seven years, twenty-nine.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF THE CITY OF NEW YORK.

University Medical College.

NEW YORK CITY. CHARLES INSLEE PARDEE, M. D., Dean, 410 E. Twenty-sixth Street.

ORGANIZED IN 1841. The first class was graduated in 1842. Classes have been graduated in each subsequent year.

The faculty embraces nineteen professors, fourteen assistant instructors, two demonstrators and nineteen clinical assistants.

COURSE OF INSTRUCTION: The collegiate year of 1884-85 is divided into three sessions—a preliminary term, which began September 17, and continued until October 1, 1884; the regular winter course then began, and will continue to the middle of March, 1885; to be followed by a spring session of ten weeks immediately thereafter. Instruction consists of didactic and clinical lectures, recitations, practical demonstrations of subjects involving manipulation, and practice at the bedside and in the laboratories.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology, otology, orthopedic surgery, dermatology and mental diseases.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) "two winter sessions of lectures"; 4) three-years' study; 5) one course of practical anatomy; 6) satisfactory written examinations on surgery, chemistry, practice of medicine, materia medica, anatomy, physiology and obstetrics. Rejected candidates will not be permitted to apply for a re-examination for one year. Honorary degrees are not granted. Two com-

menagements take place annually, at either of which the candidates who have complied with the above requirements may graduate; the first is at the close of the winter, the second at the close of the spring session.

FEES: Matriculation, \$5; lectures, \$140; demonstrator, \$10; graduation, \$30; private instruction in practical branches, averaging \$12 per course.

STUDENTS: Number of matriculates and of graduates at each session reported, and average percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 509 | 153 | 30 |
| 1878-79 | 556 | 204 | 36.7 |
| 1879-80 | 609 | 205 | 33.6 |
| 1880-81 | 623 | 200 | 32.1 |
| 1881-82 | 575 | 213 | 37 |
| 1882-83 | 528 | 163 | 30.8 |
| 1883-84 | 526* | 164* | 31.1 |

Average percentage of graduates to matriculates, *thirty-three*.

REMARKS: "With a view to the final establishment of a systematic, graduated scheme of tuition, students who have attended two full courses of lectures, and who have completed two years of study, may be admitted to a special examination in chemistry, anatomy and physiology, and, if successful, will be examined at the end of the next winter session on practice, materia medica and therapeutics, surgery and obstetrics.—*Extract from the Forty-fourth Annual Announcement.*

*Not including twenty-five post-graduates.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF BUFFALO.

BUFFALO, N. Y. CHARLES CARY, M. D., Secretary, 310 Delaware Street.

ORGANIZED in 1846. The first class was graduated in 1847. Classes have been graduated each subsequent year.

The faculty embraces twelve professors, two lecturers and one demonstrator. The faculty of the spring course consists of ten lectures.

COURSE OF INSTRUCTION: The regular term of 1884-85 commenced on September 25, 1884, and will continue twenty-two weeks. The spring course begins the first Monday after commencement, and continues eight weeks. The course of instruction includes scholastic and clinical teaching, with systematic recitations and special instruction. A three-years' graded course is recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, toxicology, ophthalmology and otology, psychological medicine dermatology and microscopy.

REQUIREMENTS: For admission—"A certificate from the student's preceptor of his moral character, and that he is duly entered, and properly qualified to study medicine, must be presented, on matriculating. The responsibility of sufficient preliminary education rests, of necessity, with the private instructor."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) "dissection of the lateral half of the subject, either here or elsewhere;" 5) two full courses of lectures; 6) satisfactory examination in the several departments; 7) thesis.

FEES: Matriculation, \$5; lectures, \$100; demonstrator, \$10; graduation, \$25; spring course, \$15.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 114 | 42 | 36.8 |
| 1878-79 | 126 | 40 | 31.7 |
| 1879-80 | 138 | 53 | 38.3 |
| 1880-81 | 154 | 48 | 31.1 |
| 1881-82 | 172 | 65 | 37.8 |
| 1882-83 | 178 | 57 | 32 |
| 1883-84 | 155 | 62 | 40 |

Average percent. of graduates to matriculates during the past seven years, *thirty-five*.

REMARKS: CHAS. CARY, M. D., Secretary, writes: "Until we have in New York State a board of examiners—which I sincerely hope is in the near future—or until the leading colleges take the initiative, we in Buffalo can not very well establish matriculation examinations,—although we realize the fact that three out of ten students rejected last year, were rejected on account of deficient preliminary education."

NEW YORK MEDICAL COLLEGE.

LONG ISLAND COLLEGE HOSPITAL.

BROOKLYN, N. Y. SAMUEL G. ARMOR, M. D., LL. D., Dean, 31 Schermerhorn Street.

ORGANIZED in 1860. The first class was graduated in 1861; classes have been graduated each subsequent year.

The faculty embraces nine professors, two lecturers, eleven lecturers on special subjects, and one demonstrator. During the preliminary term there are engaged twelve lecturers and one demonstrator (mostly professors and lecturers of the regulation lecture term), and ten clinical assistants.

COURSE OF INSTRUCTION: The collegiate year is divided into a preliminary and a regular term; the former, for the present year, began September 17, and continues until December 19, 1884; and the latter will begin January 5, and continues until June 3, 1885. A grade course, extending over two collegiate years of nine months each, is recommended, but not required; fifty percent. of the entire class have taken this course for the last four years.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, laryngology, toxicology, ophthalmology and otology, diseases of children, dermatology, nervous diseases and genito-urinary diseases.

REQUIREMENTS: For admission—"In the early part of the regular term candidates will have oral and written examinations, for the purpose of testing their general literary qualifications. Students who have already passed the written examinations in the elementary departments, and graduates of literary, scientific and medical schools will not be required to pass the examinations for general literary qualification."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years study; 4) two full courses of lectures, not completed in the same twelvemonth; 5) practical anatomy, to the extent of having dissected each region of the body; 6) one course of practical chemistry and urine analysis; 7) one course in practical histology and pathology; 8) pass satisfactory examinations, both oral and written, in chemistry, histology, anatomy, physiology, materia medica, therapeutics, pathology, gynecology, obstetrics, surgery, and practice of medicine. But one examination each year.

FEES: Matriculation, \$5; demonstrator, \$5; chemical laboratory, \$5; pathological laboratory, \$5; lectures, \$100; reading term, \$40; graduation, \$250.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

NEW YORK HOMEOPATHIC MEDICAL COLLEGE.

NEW YORK CITY. EDGAR V. MOFFAT, M. D., Secretary, 149 W. Forty-fourth Street.

ORGANIZED in 1860. The first class was graduated in 1861. Classes have been graduated each subsequent year.

The faculty embraces twenty-one professors, two assistant professors, four lecturers, eight clinical assistants and instructors, and four demonstrators.

COURSE OF INSTRUCTION: The session of 1884-85 opened October 7, 1884, and terminates April 15, 1885. The course of instruction is graded, and provision is made for three classes of students—a junior, a middle and a senior class; but the curriculum for graduation may be completed in two courses of lectures.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, diseases of the heart and lungs, diseases of children, laryngology, mental and nervous diseases, ophthalmology and otology, orthopedic surgery, dermatology and genito-urinary diseases.

REQUIREMENTS: For admission—"An entrance examination will be held preliminary to matriculation, covering the simple English branches. Any college or high school graduate or student who has passed the entrance examinations to any regular literary college will be excused from this examination upon presenting diploma or satisfactory evidence to that effect."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) one course of practical anatomy; 6) satisfactory examination in each department; 7) thesis.

FEES: Matriculation, \$5; lectures, \$125; demonstrator, \$10; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 152 | 38 | 25 |
| 1878-79 | 152 | 40 | 26.3 |
| 1879-80 | 128 | 33 | 25.8 |
| 1880-81 | 165 | 54 | 32.7 |
| 1881-82 | 146 | 36 | 24.6 |
| 1882-83 | 145 | 47 | 32.4 |
| 1883-84 | 153 | 53 | 34.6 |

Average percentage of graduates to matriculates, *twenty-nine*.

BELLEVUE HOSPITAL MEDICAL COLLEGE.

NEW YORK CITY. AUSTIN FLINT, JR., M. D., Secretary of the Faculty.

ORGANIZED in 1861. The first class was graduated in 1862. Classes have been graduated each subsequent year.

The faculty embraces eleven professors, seven professors of special departments, one lecturer, seven demonstrators, fifteen assistants to chairs and two prosectors. Three lecturers give instruction during the spring term.

COURSE OF INSTRUCTION: The winter session of 1884-85 began September 17, 1884, and will close in the latter part of March, 1885. The spring course will begin March 17, 1885, and continue until the middle of June. Attendance upon three courses of lectures is recommended, and provision is made for the examination of those pursuing this plan. Hospital clinics are numerous. Regular weekly quizzes are held by members of the faculty upon the subjects of the lectures; these examinations are confined to candidates for graduation.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics; theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, orthopedic surgery, ophthalmology and otology, cutaneous and genito-urinary diseases, diseases of children, toxicology, diseases of the throat. Private courses on practical subjects are given by the faculty and instructors; average fee, \$20.

REQUIREMENTS: For admission—none, except for those who expect to present their tickets or diplomas for recognition in Great Britain. For such, a special matriculation examination is provided, upon the following subjects: English language, including grammar and composition; arithmetic, including vulgar and decimal fractions; algebra, including simple equations; geometry, first two books of Euclid; Latin translation and grammar. In addition to the above, one of the following optional studies is required: Greek, French, German or natural philosophy, including mechanics, hydrostatics, and pneumatics; text-books: Latin—Caesar (*De Bello Gallico*), first two books; natural philosophy—Peck's Gannet, or Parker's philosophy; Greek—first chapter of St. John's Gospel; French—first chapter of *Télémaque*, or Charles XII.; German—Adler's Reader, first part. From those who expect to practice only in this country this examination is not required.

For graduation: 1) twenty-one years of age; 2) proper testimonials of character; 3) three years' study; 4) two full courses of lectures; 5) satisfactory examination in each of the seven departments of instruction, viz.: practice of medicine, surgery, obstetrics

materia medica and therapeutics, physiology, anatomy and chemistry—the examinations upon practice of medicine and surgery include diseases of the nervous system, pathological anatomy, ophthalmology and diseases of the skin; 6) one course of practical anatomy.

FEES: Matriculation, \$5; lectures, \$140; demonstrator, \$10; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 423 | 130 | 30.7 |
| 1878-79 | 450 | 165 | 36.6 |
| 1879-80 | 502 | 142 | 28.3 |
| 1880-81 | 379 | 118 | 31.1 |
| 1881-82 | 480 | 163 | 34— |
| 1882-83 | 467 | 167 | 35.7 |
| 1883-84 | 431 | 149 | 34.3 |

Average percentage of graduates to matriculates, *thirty-three*.

REMARKS: There are three regular examinations for the degree: one at the close of the winter session, one at the close of the spring session, and one during the first week in October. The June and October examinations are exclusively for the benefit of those students who have attended the courses of lectures required, the last course being at this college, but whose time of study does not expire until the summer or fall. Graduates of other accredited colleges are examined in all the departments, the same as undergraduates, and must fulfill all the requirements demanded of undergraduates. The faculty will not grant a degree to any graduate of three or more years' standing who does not exhibit to the secretary a certificate of membership in some medical society entitled to representation in the American Medical Association. This rule is invariable.

NEW YORK MEDICAL COLLEGE AND HOSPITAL FOR WOMEN—*Homeopathic*.

NEW YORK CITY. CLEMENCE S. LOZIER, M. D., Dean, 103 W. Forty-eighth Street.

ORGANIZED in 1863. The first class was graduated in 1864. Classes have been graduated each subsequent year.

The faculty embraces seventeen professors, three lecturers and one demonstrator.

COURSE OF INSTRUCTION: The regular session of 1884-85 began October 2, 1884, and continues twenty-four weeks. The curriculum of studies extends over a three-years' graded course, and is arranged as follows: "First year, theoretical and inorganic chemistry, physiology, general and descriptive anatomy, histology, hygiene—dissections will be obligatory on all students of this year; second year, organic chemistry, with toxicology, histology and pathological anatomy, physiology, anatomy, hygiene, materia medica, surgery, obstetrics, pathology and practice of medicine. Students of this year will attend such clinical lectures as the faculty may approve, and are expected to finish their dissections to the satisfaction of the professor of anatomy.—Third year, continuation of pathology and practice of medicine, materia medica, obstetrics, gynecology, diseases of children, surgery, ophthalmology and otology, diseases of the chest, medical jurisprudence, pathological anatomy, and mental and nervous diseases. During this year students are required to attend the various clinics of the college. Each student will also be required to take charge of obstetrical cases." Actual attendance on lectures is required.

REQUIREMENTS: For admission—"Applicants for matriculation are required to give satisfactory testimony of moral character, together with proof of having arrived at the age of eighteen years; they must also pass an examination in the English branches."

For graduation: 1) twenty-one years of age; 2) three full years' study; 3) three complete courses of lectures; 4) thesis; 5) satisfactory examinations both before the faculty and the board of censors.

FEES: Matriculation, each year, \$5; lectures, per session, \$60; demonstrator, \$10; graduation, \$10.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | — | 27 | — |
| 1878-79 | — | 6 | — |
| 1879-80 | — | 7 | — |
| 1880-81 | — | 5 | — |
| 1881-82 | — | 10 | — |
| 1882-83 | — | 8 | — |
| 1883-84 | — | 8 | — |

The number of matriculates for the past seven years has averaged between 40 and 50 each year; and the average percentage of graduates to matriculates during the same period is *twenty-three*.

REMARKS: The trustees announce that "they will henceforth make the course of study *unequivocally a three-years' graded course*. * * * While studying one year with a preceptor may be excellent preparation for entering college, it can not take the place of the instruction given during the first year in college; hence this decision by the board." There is no provision for admitting students to advanced standing by examination; but a literal compliance with the requirements of attendance upon three full lecture terms is specified as a condition of graduation.

ECLECTIC MEDICAL COLLEGE OF THE CITY OF NEW YORK.

NEW YORK CITY. GEORGE W. BOSKOWITZ, M. D., Dean, 1 Livingston Place.

ORGANIZED in 1853. The first class was graduated in 1866. Classes have been graduated each subsequent year.

The faculty embraces eight professors and two lecturers.

COURSE OF INSTRUCTION: The twenty-fourth annual session began October 6, 1884, and continues six months. Clinics in hospital and dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and diseases of women and children, medical jurisprudence, toxicology, and diseases of the eye, throat and skin.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) three years' study under the supervision of a reputable physician; 3) two full terms of instruction; 4) a thesis on some medical subject.

FEES: Matriculation, \$5; lectures, \$100; demonstrator, \$10; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 107 | 26 | 21.3 |
| 1878-79 | 138 | 24 | 17.4 |
| 1879-80 | 143 | 33 | 22.3 |
| 1880-81 | 215 | 64 | 29.7 |
| 1881-82 | 146 | 50 | 31.2 |
| 1882-83 | 181 | 37 | 28.2 |
| 1883-84 | 95* | 19* | 19.7 |

Average percentage of graduates to matriculates, *twenty-six*.

* Not including six post-graduates.

WOMAN'S MEDICAL COLLEGE OF THE NEW YORK INFIRMARY.

NEW YORK CITY. EMILY BLACKWELL, M. D., Dean, 128 Second Avenue.

ORGANIZED in 1868. The first class was graduated in 1870. Classes have been graduated each subsequent year.

The faculty embraces eight professors, four clinical professors, four lecturers, two lecturers adjunct, one demonstrator and four instructors.

COURSE OF INSTRUCTION: "The college year is divided into two terms of four months' each; and half of the studies appropriate to the year are allotted to each of these terms. The first term lasts from October 1 to February 1. The second from February 1 to May 15. The course of study required to render a student eligible for graduation covers three college years. Those students who wish to do so may, however, divide the second of their three years into two, thus completing their course in four years."

Division of studies: "First year—anatomy, chemistry, physiology, materia medica and histology. Students will also dissect, and work in the pharmaceutical, chemical and histological laboratories. Second year—studies in anatomy, physiology and chemistry will be repeated. Elementary studies will be made in pathological anatomy, practice, surgery, obstetrics, therapeutics and hygiene. Third year—pathological anatomy, practice, surgery, obstetrics, therapeutics and hygiene completed. Attendance on the college clinics will be required. During this year each student enjoys the privilege of attending upon ten cases of obstetrics in the infirmary wards; of witnessing operations at the infirmary, as also at other hospitals in the city, and may listen to the clinical lectures at Bellevue." Each professor quizzes on his own lectures, and an instructor is attached to each chair to assist in quizzing.

REQUIREMENTS: For admission—Students entering the graded college course, unless they bring a diploma from some recognized literary school, will be required to pass a preliminary examination in the following branches: 1. Orthography, English composition and penmanship, by means of a page written at the time and place of examination. 2. Definitions and synonyms as found in "The Scholar's Companion." 3. Latin, through declensions and conjugations. 4. Arithmetic in denominate numbers, fractions, proportion, percentage and the roots. 5. Algebra, Davies' Elementary, through simple equations. 6. Geometry, Davies' Legendre, first and second books. 7. Botany, physics and chemistry, as found in "Science Primers," edited by Profs. Huxley, Roscoe and Balfour Stewart.

For graduation, 1) twenty-one years of age; 2) good moral character; 3) have a good general education; 4) three years in the study of medicine, during which 5) they must have attended three winter sessions of lectures, and 6) received clinical instruction according to the course laid down by this school; 7) a thesis on some medical subject; 8) satisfactory examinations before the faculty and the board of examiners will also be required.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | — | 7 | — |
| 1878-79 | — | 10 | — |
| 1879-80 | — | 11 | — |
| 1880-81 | 60 | 8 | 13.3 |
| 1881-82 | 49 | 10 | 20.4 |
| 1882-83 | 40 | 5 | 13.5 |
| 1883-84 | 40 | 9 | 22.5 |

Average percentage of graduates to matriculates, *sixteen*.

REMARKS: "A course of lectures in any recognized school will be accepted as one of the terms required, but the last course before graduation must have been attended at this college. The faculty also reserve the right to refuse examination to a student on the ground of what they deem to be moral or mental unfitness for the profession. An annual course of lectures in any accredited school will be received as equivalent to a course of lectures in this school, but a certificate of reading under a preceptor will not be received as equivalent to a course of lectures."

Candidates for graduation are examined by a board of seven examiners not otherwise connected with the college.

NEW YORK FREE MEDICAL COLLEGE FOR WOMEN.

NEW YORK CITY.

ORGANIZED in 1871. Extinct.

COLLEGE OF MEDICINE OF SYRACUSE UNIVERSITY.

SYRACUSE, N. Y. WILLIAM T. PLANT, M. D., Registrar, 18 Harrison Street.

ORGANIZED in 1872, as the College of Physicians and Surgeons of Syracuse University. In 1875 it assumed its present title. The Geneva Medical College, organized in 1836, was merged into this institution. The first class was graduated in 1873. Classes have been graduated each subsequent year.

The faculty embraces eleven professors, three lecturers, three instructors, and a director anatomical laboratory.

COURSE OF INSTRUCTION: The college year begins the first Tuesday in October and ends on the second Thursday in June. Attendance at college during a three-years' graded course is recommended, but not absolutely required. Students are divided into three classes, according to their proficiency and time of study. Studies—"First year: anatomy, physiology, chemistry, microscopy, histology and botany. Second year: anatomy, physiology, medical chemistry, materia medica, practice, surgery, pathology and clinics. Third year: therapeutics, practice, surgery, obstetrics, diseases of children, pathology, gynecology, forensic medicine, ophthalmology and clinics."

REQUIREMENTS: For admission—Evidence of possessing a fair preliminary education or examination in the branches of a common English education. Students who have already pursued the study of medicine to some extent, may be examined and promoted to such advanced standing as their acquirements entitle them to. Candidates for the second year will come prepared for the examination in anatomy on the bones, joints and muscles; on nutrition in physiology; on the inorganic part of Attfeld's chemistry; on the optical principles of the microscope; on part 1 of Harris and Power's Manual for the Physiological Laboratory; and on the principles of botany.

For graduation: 1) twenty-one years of age; 2) good character; 3) three years' study, the last of which, at least, must have been spent in this school; 4) satisfactory examinations.

FEES: Matriculation, \$5; lectures, \$100; chemical laboratory, \$10; anatomical laboratory, \$10; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percentage. |
|----------|---------------|------------|-------------|
| 1878-79 | 40 | 5 | 12.5 |
| 1879-80 | 51 | 6 | 11.7 |
| 1880-81 | 60 | 20 | 33.3 |
| 1881-82 | 45 | 11 | 24.4 |
| 1882-83 | 44 | 12 | 27.2 |
| 1883-84 | 46 | 11 | 23.9 |

Average percentage of graduates to matriculates, *twenty-three*.

REMARKS: "Besides the faculty examinations, candidates for the degree are examined orally by the censors appointed by the State, district and county medical societies."

THE REGENTS OF THE UNIVERSITY OF NEW YORK STATE.

OFFICE AT ALBANY, N. Y.

From the law conferring the power of granting diplomas, passed in 1872, the following is taken:

The regents of the University shall not grant a diploma conferring the degree of Doctor of Medicine upon any one who has not, for at least three years after the age of sixteen, pursued the study of medical science with some physician or surgeon duly authorized to practice, and also attended two complete courses of all the lectures delivered to an incorporated medical college. The regents of the University in the State of New York are authorized to appoint one or more boards of examiners in medicine, which shall consist of not less than seven regularly licensed physicians and surgeons in the State. This board shall examine all candidates, referred to them by the chancellor, in anatomy, physiology, materia medica, pathology, histology, clinical medicine, chemistry, surgery, midwifery and therapeutics.

All persons who are over twenty-one years of age, of good moral character, and can produce to the chancellor satisfactory proof that they have competent knowledge of all the branches of learning taught in the common schools of the State, and of the Latin language, and have diligently studied medicine for not less than three years, can apply to the chancellor for an examination by a board of examiners. The fee for an examination shall be \$25. The regents shall grant, to any candidate who has been recommended by five members of the board of examiners, a diploma conferring the degree of Doctor of Medicine from the University of New York. Ten dollars must be paid for this diploma.

UNITED STATES MEDICAL COLLEGE—*Eclectic*.

NEW YORK CITY.

ORGANIZED in 1878, in a manner which has since been declared illegal by the State Supreme Court. Extinct.

COLLEGE OF PHYSICIANS AND SURGEONS OF BUFFALO.

BUFFALO, N. Y.

ORGANIZED in 1879, in a manner which has been decided illegal by the Supreme Court of the State. The first class was graduated in 1880. No class was graduated in 1882. From a circular issued prior to the last session, the following extracts are taken: "The character of the teachings will, as in the past, be liberal to the fullest extent; allopathy and homoeopathy being thoroughly taught by an able staff of medical men. Liberal medicine is rapidly surpassing the old and bigotted systems, whose graduates should not be considered thoroughly 'competent' to go out into the world to practice the *healing art*; whereas, Liberal Medicine gives them a thorough knowledge of *all* the useful systems, thereby enabling them to more successfully cope with disease and death."

MEDICAL DEPARTMENT OF NIAGARA UNIVERSITY.

BUFFALO, N. Y. A. A. HUBBELL, M.D., Secretary, 212 Franklin Street.

ORGANIZED in 1883. The faculty embraces twelve professors, five lecturers and three demonstrators.

COURSE OF INSTRUCTION: A winter course of twenty-five weeks' duration, and a spring course of eight weeks, are given annually. The current winter course began October 1, 1884, and will close March 21, 1885. The time of study required is three years, including three full terms of medical lectures of six months each, and an extension to four years is recommended.

Division of studies: First year—general chemistry, materia medica, pharmacy, histology, anatomy, physiology, dissections, laboratory work. Examinations at the end of the year in general chemistry, materia medica and pharmacy, and in part in anatomy and physiology. Second year—medical chemistry, anatomy, physiology, pathology, therapeutics, hygiene, obstetrics, principles and practice of medicine, principles and practice of surgery, dissections, laboratory work, clinics. Examinations at the end of the year in medical chemistry, anatomy, physiology, pathology, therapeutics and obstetrics. Third year—principles and practice of surgery, operative surgery, obstetrics, diseases of children, diseases of women, diseases of the eye, ear and throat, diseases of the skin, diseases of the nervous system and insanity, genito-urinary diseases, medical jurisprudence, clinical instruction in each department. Examinations at the end of the year for the degree. Students who have attended one full course of lectures elsewhere will be admitted to the second year of this school, after passing the examinations of the first year's studies.

REQUIREMENTS: For admission—All (new) students must pass a matriculation examination in such studies as are considered necessary to fit them for the study of medicine, except students who shall produce testamentary evidence of preliminary qualification from a recognized school or college.

For graduation: 1) twenty-one years of age; 2) a liberal education; 3) at least three years' study of medicine; 4) a good moral character; 5) at least three full courses of medical lectures; 6) completion of the curriculum of this school; 7) satisfactory final examinations before the faculty and board of examiners.

FEES: Matriculation, \$5; lectures, \$60; demonstrator, \$5; graduation, \$35; spring course, \$15.

STUDENTS: Number of matriculates during the session of 1883-84, 13.

HYGEO-MEDICAL COLLEGE OF NEW YORK.
NEW YORK CITY.

EXTINCT.

NORTH CAROLINA.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF NORTH CAROLINA.
CHAPEL HILL, N. C.

ORGANIZED in 1796. This school only gives instruction in medicine, and does not now grant degrees. It granted diplomas in former years.

MEDICAL COLLEGE IN ROBESON COUNTY, N. C.

"A COLLEGE, located in the back woods of Robeson county, was chartered by the State, in 18—, After a career as harmful as it was possible for it to be—sending out yearly numbers of men with diplomas, to prey upon innocent communities on the South Carolina border—it came to an abrupt end, by the death of its only professor."—*Ex tract from Presidential Address of Dr. Wood.*

LEONARD MEDICAL SCHOOL.

Medical Department of Shaw University.

RALEIGH, N. C. Rev. H. M. TUPPER, A. M., President of the University.

ORGANIZED in 1882, for the education of colored students. The faculty consists of five professors.

COURSE OF INSTRUCTION: The session of 1884-85, beginning November 3, 1884, continues five months. Graded course of study, extending over four years. Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, laryngology, ophthalmology and otology, diseases of children, dermatology and diseases of the nervous system.

REQUIREMENTS: For admission—"Applicants must be at least eighteen years of age, and will be required to pass a preliminary examination sufficient to show their fitness to enter upon the study of medicine, unless they can furnish a certificate of their previous standing in school from some principal or president of a reputable institution of learning." A literary course of two years' duration, preliminary to the medical course, has been established by the university. Nine students have completed this course.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) four-years' graded course; 4) dissect the entire cadaver; 5) thesis; 6) satisfactory examinations, an average of seventy-five per cent. being required to pass.

FEES: Matriculation, \$5; lectures, \$60; graduation; \$20.

STUDENTS: Number of matriculates, session of 1883-84, 12.

OHIO

MEDICAL COLLEGE OF OHIO.

CINCINNATI, O. JAMES G. HYNDMAN, M. D., Secretary, 22 W. Ninth Street.

ORGANIZED in 1819. The first class was graduated in 1821. Classes have been graduated each subsequent year. In 1858 the Miami Medical College was merged into this institution, and continued in this relation until 1865, when the Miami was re-established. (See Miami Medical College, infra.)

The faculty embraces ten professors, nine assistants to chairs, three lecturers and three demonstrators.

COURSE OF INSTRUCTION: A preliminary session of two weeks, regular session, which for 1884-85 began September 17, 1884, and ends March 1, 1885, and a spring term of six weeks, annually. Clinics at hospital and dispensary, and private courses for advanced students and practitioners on special topics in medicine and surgery.

Lectures embrace ophthalmology, otology, anatomy, clinical surgery, materia medica, therapeutics, clinical medicine, theory and practice of medicine, principles and practice of surgery, obstetrics, diseases of children, gynecology, physiology, medical chemistry, clinical laryngology, pathology, dermatology, histology and hygiene.

REQUIREMENTS: For admission—"Applicants for admission to the college must give evidence of at least a good English education, including mathematics and the elementary principles of physics. An examination on these subjects, as taught in the common schools, will be conducted by a committee of the faculty. Graduates of a literary or scientific college, high school or academy, gentlemen having a county or State teacher's certificate, graduates in medicine, and students desiring to pursue a special course of study—other than for the purpose of securing the degree—will be exempt from this examination. * * * Students whose previous course of study is equivalent to that required for admission may, by special arrangement, be admitted on certificate of their preceptors."

"The general demand for a good preliminary education of those about to enter our profession is shown by the recent utterances of the American Medical Association and the enactments of several State boards of health. We desire to call special attention to the fact that in several States the diplomas of such schools as do not require an examination preliminary to entrance are not accepted as qualifying for practice."

For graduation: 1) satisfactory evidence of good moral character, and of having attained the age of twenty-one years; 2) satisfactory certificate of having studied medicine for at least three years under a *regular* graduate, or licentiate and practitioner of medicine, in good standing, using the word "regular" in the sense commonly understood in the medical profession. "No candidate shall be eligible for final examination for graduation unless his term of three years' study shall have been completed, or shall expire at a date not later than three months after the close of the final examinations;" 3) at least two full courses of instruction; 4) dissections of at least two regions of the body; 5) clinical instruction (hospital) during each year of attendance; 6) a satisfactory examination in each branch taught in the college.

FEES: Professors' ticket, \$75; matriculation ticket, \$5; dissecting ticket (including material), \$10; practical chemistry (including material), \$10; practical histology (including material), \$10; practical pathology (including material), \$10; hospital ticket, \$5; graduation fee, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 304 | 102 | 33.5 |
| 1879-80 | 326 | 103 | 31.6 |
| 1881-82 | 341 | 104 | 30.5 |
| 1882-83 | 302 | 102 | 33.7 |
| 1883-84 | 257 | 100 | 38.8 |

Average percentage of graduates to matriculates, *thirty-three*.

WORTHINGTON MEDICAL COLLEGE—*Eclectic*.

Medical Department of Ohio University

WORTHINGTON, O.

ORGANIZED in 1832. Removed to Cincinnati in 1843. Classes were graduated in 1834, 1835, 1836, 1837 and 1848. In 1815 the name was changed, and it became the Eclectic Medical Institute. (Vide *infra*.)

THE CINCINNATI MEDICAL COLLEGE.

CINCINNATI, O.

ORGANIZED in 1834. Merged into the Medical College of Ohio in 1846.

MEDICAL DEPARTMENT OF THE WILLOUGHBY UNIVERSITY.

WILLOUGHBY, Lake County, O.

ORGANIZED in 1835. Extinct.

PHYSIO-MEDICAL COLLEGE.

Cincinnati Literary and Scientific Institute.

CINCINNATI, O.

ORGANIZED in 1836. Graduated classes until 1880. Extinct.

AMERICAN MEDICAL COLLEGE.

CINCINNATI, O.

ORGANIZED in 1839. Merged into the Eclectic Medical Institute in 1857.

MEDICAL DEPARTMENT OF THE WESTERN RESERVE UNIVERSITY.

Cleveland Medical College, Medical Department of Adelbert College of the Western Reserve University.

CLEVELAND, O. C. B. PARKER, M. D., Secretary, 193 Erie Street.

ORGANIZED in 1813, as the Medical Department of the Western Reserve University. Reorganized in 1881, when the name became the Medical Department of Adelbert College. See appended remarks. In 1884 the former and present title was resumed. The first class was graduated in 1844. Classes have been graduated in each subsequent year.

The faculty embraces fifteen professors and two demonstrators.

COURSE OF INSTRUCTION: The college year embraces a special spring and a regular winter course. The spring term of 1884 opened April 2, and continued twelve weeks; the regular winter term opened September 10, 1884, and continues twenty-four weeks, ending February 25, 1885. The plan of instruction includes lectures, clinics, recitations, quizzes and practical demonstrations. Three-years' graded course recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, diseases of children, and orthopedic surgery.

REQUIREMENTS: For admission—1) credible certificate of good moral standing; 2) diploma of graduation from a literary and scientific college or high school; or, lacking this, a thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy.

For graduation: 1) Good English education; 2) twenty-one years of age; 3) three-years' study; 4) two full courses of lectures; 5) thesis.

FEES: Matriculation, \$5; lectures (including hospital), \$50; graduating, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1879-80 | 86 | 27 | 31.4 |
| 1881-82 | 188 | 83 | 44.1 |
| 1882-83 | 161 | 50 | 31 |
| 1883-84 | 167 | 54 | 32.3 |

Average percentage of graduates to matriculates, *thirty-six*.

REMARKS: DR. PARKER, the secretary, furnishes the following: In 1881 Mr. AMASA STONE, of Cleveland, donated \$500,000 to the Western Reserve University, then at Hudson, O., on condition that the name should be changed to Adelbert College of Western Reserve University, and remove to Cleveland. About the same time the Cleveland Medical College and the Medical Department of Wooster University united as the Medical Department of Western Reserve University. Through Mr. STONE's efforts the bill of incorporation, passed in 1881, changed this title to the Medical Department of Adelbert College of Western Reserve University; but on his death the heirs consented to the resumption of the present title, and in March, 1883, the ad eundem degree of the Medical Department of Western Reserve University was conferred upon all graduates of the Cleveland Medical College and upon such graduates of the Wooster Medical Department previous to 1881 as desired it. DR. PARKER adds: "We have a strict entrance examination and a written final examination. One-half of our students take the three-years' graded course."

ECLECTIC MEDICAL INSTITUTE.

CINCINNATI, O. JOHN M. SCUDDER, M. D., 228 Court Street.

Organized in 1845, as the successor of the Worthington Medical College (organized in 1832, *vide supra*). The American Medical College was merged into this school in 1857, and the Eclectic College of Medicine and Surgery in 1859. The first class was graduated in 1845, and two or more classes have been graduated each subsequent year.

The faculty embraces eight professors and a demonstrator; the professor of pathology and the practice of medicine also lectures upon hygiene, and the professor of surgery lectures upon medical jurisprudence.

COURSE OF INSTRUCTION: Two sessions annually. The regular session of 1884-85 commenced September 1, 1884, and continues twenty weeks; the spring session will commence January 12 and close June 3, 1885. A three-years' graded course is recommended, but not required. Clinics at hospital and college.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, clinical medicine, pathology, surgery, obstetrics and gynecology, hygiene and medical jurisprudence.

REQUIREMENTS: For admission—none are specified in the announcement, but it is stated that the college will "furnish facilities (at small cost) for a thorough review in all the branches of a good English education, mathematics, physics and natural history."

For graduation: "Students applying for graduation must have read medicine for three years and attended two full courses of lectures in different years, the last of which has been in this institution; or have read two years and attended three courses of lectures; or have attended four courses of lectures without previous reading. Examinations for the degree of Doctor of Medicine will be held at the close of both winter and spring sessions, but there will be but one public commencement yearly—at the close of the spring session, and all diplomas will bear date of the first Tuesday in June."

FEES: Lectures, including matriculation and demonstrator's fees, \$75; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates--

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 267 | 121 | 45.3 |
| 1878-79 | 209 | 74 | 35.4 |
| 1879-80 | 243 | 50 | 20.5 |
| 1880-81 | 316 | 114 | 36+ |
| 1881-82 | 273 | 100 | 36.7 |
| 1882-83 | 225 | 64 | 28.4 |
| 1883-84 | *190 | 83 | 43.6 |

Average percentage of graduates to matriculates, *thirty-five*.

* Not including three post-graduates.

STARLING MEDICAL COLLEGE.

COLUMBUS, O. T. C. HOOVER, M. D., Registrar, 229 East State Street.

ORGANIZED in 1847. The first class was graduated in 1848, and classes have been graduated in each subsequent year.

The faculty embraces thirteen professors, one lecturer and one demonstrator.

COURSE OF INSTRUCTION: The regular session of 1881-85 began September 10, 1884, and closes March 4, 1885. A three-years' graded course is recommended, but not required. Clinics at hospital.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, diseases of children, ophthalmology and otology and toxicology.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) three years' study; 3) two full courses; 4) successful examination; 5) thesis; 6) one course of dissection.

FEES: Matriculation, \$5; demonstrator, \$5; lectures, \$40; laboratory, \$5; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, percentage of graduates to matriculates--

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 65 | 26 | 40 |
| 1878-79 | 48 | 20 | 41.8 |
| 1879-80 | 71 | 26 | 36.6 |
| 1880-81 | 99 | 35 | 35.3 |
| 1881-82 | 116 | 55 | 47.7 |
| 1882-83 | 59 | 25 | 40.7 |
| 1883-84 | 71 | 25 | 35.2 |

Average percentage of graduates to matriculates, *forty*.

HOMEOPATHIC HOSPITAL COLLEGE.

CLEVELAND, O. W. A. PHILLIPS, M. D., Registrar, 83 Prospect Street.

ORGANIZED in 1849, as the Western College of Homeopathic Medicine. In 1857 the name was changed to the Western Homeopathic College, and in 1870 the corporation assumed the present title. In 1870 the Homeopathic College for Women was merged into this institution. The first class was graduated in 1850. Classes have been graduated in each subsequent year.

The faculty embraces eleven professors, one adjunct professor, two lecturers, and one demonstrator.

COURSE OF INSTRUCTION: The regular annual term of 1881-85 began September 24, 1884, and closes March 24, 1885. A three-years' graded course is recommended, but not required. Previous to each lecture the class will be daily questioned upon the subject of the preceding lecture.

Lectures embrace anatomy, physiology, chemistry, materia medica, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, ophthalmology and otology, histology, nervous and mental diseases.

REQUIREMENTS: For admission—"All applicants must present a degree in letters or science, or a teacher's certificate, or pass a creditable examination in orthography, penmanship, composition, English grammar and United States history. This examination is designed to show that each matriculate has at least a fair English education."

For graduation: 1) twenty-one years of age; 2) two full courses of lectures; 3) three years' study; 4) good English scholarship; 5) well sustained written examinations.

FEES: Matriculation, (paid only once) \$5; lectures, \$60; demonstrator, \$10; hospital, \$5; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 106 | 34 | 32 |
| 1878-79 | 108 | 25 | 23+ |
| 1879-80 | 130 | 25 | 19.2 |
| 1880-81 | 131 | 26 | 19.8 |
| 1881-82 | 129 | 26 | 20+ |
| 1882-83 | 131 | 55 | 50.9 |
| 1883-84 | 91 | 40 | 43.9 |

Average percentage of graduates to matriculates, *twenty-eight*.

CINCINNATI COLLEGE OF MEDICINE AND SURGERY.

CINCINNATI, O. R. C. STOCKTON REED, A. M., M. D., Dean, 164 George Street.

ORGANIZED in 1849. The first class was graduated in 1852, and one or more classes have been graduated each subsequent year.

The faculty embraces seven professors, seven associate professors, and one demonstrator.

COURSE OF INSTRUCTION: The regular graduating session of 1884-85 began September 16, 1884, and closes February 28, 1885, with a holiday vacation of nine days. Students may, if they desire, have their course of instruction graded.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, ophthalmology and otology, laryngology, oral surgery, and diseases of children.

REQUIREMENTS: For admission—"Students presenting themselves for matriculation, must possess a degree from some recognized literary college or high school, or a certificate from a county school examiner or board of examiners entitling the holder to teach, not less than one year; or evidence of a fair English education to the entire satisfaction of the faculty."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) three years' study; 5) satisfactory examination; 6) practical anatomy for one session; 7) hospital clinics for one session.

FEES: Matriculation, \$5; demonstrator (including material), \$10; hospital, \$5; lectures, \$40; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

Average percentage of graduates to matriculates, *forty*.

MIAMI MEDICAL COLLEGE.

CINCINNATI, O. W. CLENDENIN, M.D., Dean, 136 West Seventh Street.

ORGANIZED in 1852. Classes were graduated from 1853 to 1857, inclusive. In 1858 this college was merged into the Medical College of Ohio—which see, ante. In 1865 the Miami Medical College was re-established and a class was graduated in 1866, since which time classes have been graduated annually.

The faculty embraces eleven professors, two lecturers, five assistants to chairs, three demonstrators, one prosector and one pharmacist.

COURSE OF INSTRUCTION: The winter session of 1884-85 began September 18, 1884, and continues for five months and a half. It was preceded by a preliminary course of two weeks, and will be followed by a spring term. A three-years' graded course is recommended, but not required—see "Remarks" appended. Special hours are devoted by each professor to review examinations of his preceding lectures. Clinics at dispensary and hospital.

Lectures embrace (by chairs) clinical medicine, principles and practice of surgery, ophthalmology, aural surgery and clinical ophthalmology, obstetrics and clinical midwifery, principles and practice of medicine and clinical medicine, materia medica and therapeutics, diseases of women and children and clinical gynecology, chemistry and toxicology, genito-urinary and venereal diseases and clinical surgery, physiology, clinical laryngology and hygiene, descriptive and surgical anatomy and clinical medicine.

REQUIREMENTS: For admission 1) credible certificates of good moral standing; 2) diplomas of graduation from a good literary and scientific college or high school, or, lacking this, a thorough examination in the branches of a good English education, including mathematics, English composition and elementary physics or natural philosophy.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; one course of 5) practical anatomy, 6) of practical chemistry, and 7) of clinics at the hospital; 8) full and satisfactory examination on each branch taught in the college.

FEES: Matriculation, \$5; demonstrator, \$5; practical chemistry, \$7; practical physiology and histology, \$7; lectures, \$75; graduation, \$25; hospital, \$5.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 129 | 50 | 38.7 |
| 1878-79 | 120 | 33 | 27.5 |
| 1879-80 | 147 | 48 | 32.7 |
| 1880-81 | 126 | 34 | 27— |
| 1881-82 | 124 | 41 | 33+ |
| 1882-83 | 114 | 41 | 36— |
| 1883-84 | 104 | 28 | 26.9 |

Average percentage of graduates to matriculates, *thirty-two*.

REMARKS: The system of instruction is so arranged as to give the student his choice of two courses; one of these is the course commonly given in other medical colleges, and may be completed (in the college) in two years, and consists of two courses of didactic and clinical lectures, including laboratory instruction and dissections. The other course is designated the "Graded Course," and based upon the fact that a regular systematic graded course is the proper one (indeed necessary) for acquiring a knowledge of any of the sciences, and a number of years' experience in this school has fully demonstrated that the "Graded Course" is, in every respect, much the better one of the two, and is urged upon the students by the faculty, as it allows ample time for thorough and practical work in all departments, while the evils of the cramming system are avoided.—*Extract from the twenty-fifth annual announcement.*

ECLECTIC COLLEGE OF MEDICINE AND SURGERY. CINCINNATI, O.

ORGANIZED in 1836. Classes were graduated in 1857, 1858 and 1859. Merged into the Eclectic Medical Institute in 1859.

PHYSIO-MEDICAL INSTITUTE. CINCINNATI, O. WILLIAM H. COOK, M. D., Dean, 80 West Eighth Street.

ORGANIZED in 1859. The first class was graduated in 1860, and classes have been graduated in each subsequent year.

The faculty embraces fourteen professors, and two demonstrators.

COURSE OF INSTRUCTION: The session of 1884-85 began October 1, 1884, and closes March 11, 1885. A three-years' graded course is recommended, but not required. Each professor holds daily quizzes.

Lectures embrace anatomy, physiology, chemistry, toxicology, materia medica and therapeutics, science and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, pharmacy, microscopy, histology, ophthalmology and otology, insanity and mental diseases, dentistry, diseases of children.

REQUIREMENTS: For admission—"Students must, either by high school certificate or suitable examination, give evidence of having a good English education; furnish satisfactory evidence of proper preparation and of good moral character."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three full years' study; 4) two full courses of lectures, and 5) hospital attendance; 6) two courses of dissections; 7) punctual attendance on all the college lectures, graduates' reviews and the two terms of hospital clinics; 8) "written examination in all the departments of instruction." "The standing of the student in the written exercises in practice and the graduates' reviews must also be satisfactory."

FEES: Matriculation, \$5; demonstrator, \$5; hospital, \$5; lectures, \$50; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 37 | 14 | 38— |
| 1878-79 | 33 | 7 | 21+ |
| 1879-80 | 35 | 12 | 34.2 |
| 1880-81 | 34 | 11 | 32.3 |
| 1881-82 | 36 | 12 | 33.3 |
| 1882-83 | 26 | 12 | 46+ |
| 1883-84 | 31 | 10 | 32.3 |

Average percentage of graduates to matriculates, *thirty-four*.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF WOOSTER.

CLEVELAND, O. THEODORE A. WEED, M. D., L. R. C. P., Lond., Secretary, 282 Pearl Street.

ORGANIZED in 1864, as the Charity Hospital Medical College. It was transferred to its present connection in 1870. The first class was graduated in 1865. One or more classes have been graduated in each subsequent year, excepting 1881.

The faculty embraces fifteen professors, two lecturers, two assistants to chairs, one pharmacist, three dispensary physicians and one demonstrator.

COURSE OF INSTRUCTION: Two equal sessions of five months each. The sessions of 1884-85 open September 19, 1884, and March 4, 1885, respectively. Students who have fulfilled the requirements can graduate at the close of either session. A graded course, covering four sessions in two years, is recommended, but not required. Clinics in hospital and dispensary. Five recitations are held each week by professors to review their lectures.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, dermatology, diseases of children, ophthalmology and otology.

REQUIREMENTS: For admission—1) credible certificates of good moral standing; 2) diplomas of graduation from a good literary and scientific college or high school; or, lacking this, a thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy.

For graduation: 1) twenty-one years' of age; 2) three years' study; 3) two dissections of two parts each, at different sessions; 4) two full courses of lectures; 5) satisfactory written examinations on all branches taught. "Candidates [for graduation] having no registration in this college must furnish the following: 1) a certificate of character and prior educational attainments; 2) a certificate of time of study with the date of beginning; and 3) certificates showing what lectures—if any—they have attended, and with whom, and to what extent they have studied practical anatomy."

FEES: Matriculation, \$5; hospital, \$5 demonstrator, \$5; lectures, \$40; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1878 | 83 | 24 | 29— |
| 1879 | 89 | 37 | 41.5 |
| 1880 | 88 | 38 | 43+ |
| 1881 | 106 | 37 | 35— |
| 1882 | 33 | 14 | 42.4 |
| 1883 | 57 | 17 | 21+ |
| 1884 | 46 | 16 | 34.7 |

Average percentage of graduates to matriculates, *thirty-six*.

PULTE MEDICAL COLLEGE—Homeopathic.

CINCINNATI, O. J. M. CRAWFORD, M. D., Registrar, 136 W. Eighth Street.

ORGANIZED in 1872. The first class was graduated in 1873. Classes have been graduated in each subsequent year.

The faculty embraces eleven professors, two lecturers and two demonstrators.

COURSE OF INSTRUCTION: The session of 1884-85 began September 24, 1884; closes March 3, 1885. A three-years' graded course is recommended, but not required. Clinics at hospital and dispensary; quizzes by professors and students' society.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, ophthalmology and otology, and diseases of nervous system, pedology.

REQUIREMENTS: For admission—"An entrance examination will be held preliminary to matriculation, covering the common English branches. Any student presenting a college or high school diploma, or a certificate of admission to any literary college, or a

teacher's certificate, will be exempt from this examination. This rule does not apply to those who have already matriculated in this college."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) three years' study; 5) thorough examination on all subjects taught in the school; 6) dissection of two parts.

FEES: Matriculation, (paid but once), \$5; lectures, \$50; hospital, \$5; demonstrator, \$10; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

| 1883-84 | 65 | 16 | 24.6 |

Average percentage of graduates to matriculates, *forty-one*.

AMERICAN HEALTH COLLEGE.

CINCINNATI, O.

ORGANIZED in 1874-'6. The faculty embraces one person, who teaches "the great vitapathic system, which he originated and copyrighted." The following is extracted from the author's "little red book":

"The author furnishes books, printed lessons, formulas, receipts, specifics, and special modes of vital treatment for all diseases, with the sure method of diagnosis, and all lessons belonging to the vitapathic system, with diploma and full right to practice, to physicians of all schools and all well qualified persons who can learn the new system at home. Males, for \$100. Females, for \$75. Male students who need verbal lessons and full college course, with all the above, \$150. Female students (the same), \$100.

"N. B.—Students can get general medical instruction wherever most convenient, but best at our branches in the different cities of the Union, preparatory to applying here for vitapathy and its higher graduation, with the grand diploma of the American Health College, the highest institution in the world.

"College open for instruction and graduation at all times. Terms cash. No diploma, or books, or lessons, or rights sold separate. All must go together to complete the system to fully paid-up students."

The possessor of one of these diplomas was recently arrested in Illinois for practicing without the certificate prescribed by law—the STATE BOARD OF HEALTH having refused to issue such certificate on the diploma. On trial the man was found guilty, and left the State.

COLUMBUS MEDICAL COLLEGE.

COLUMBUS, O. J. M. DUNHAM, A. M., M. D., Secretary, 198 East Town Street.

ORGANIZED in 1875. The first class was graduated in 1876. Classes have been graduated in each subsequent year.

The faculty embraces thirteen professors, one lecturer, one assistant and three demonstrators.

COURSE OF INSTRUCTION: The session of 1881-85 opened September 10, 1884, and closes March 10, 1885. Instruction consists of didactic and clinical lectures, with daily quizzes.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, ophthalmology, otology, histology and diseases of children.

REQUIREMENTS: For admission—"Holders of degrees in the arts and sciences, those who have successfully made the entrance examination to any college, graduates of high schools and normal schools, and those who hold certificates for one year to teach in the public schools or their equivalent, will be admitted on these testimonials. All others must exhibit evidences of the possession of a good English education."

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two courses of lectures; 4) three years' study; 5) complete dissection of the human body; 6) thesis; 7) satisfactory examination.

FEES: Matriculation, \$5; demonstrator, \$5; lectures, \$30; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 118 | 51 | 42+ |
| 1878-79 | 144 | 50 | 34.7 |
| 1879-80 | 126 | 41 | 32.5 |
| 1880-81 | 143 | 61 | 42+ |
| 1881-82 | 131 | 59 | 45+ |
| 1882-83 | 123 | 46 | 37+ |
| 1883-84 | 77 | 30 | 38.9 |

Average percentage of graduates to matriculates, *thirty-nine*.

PHYSIO-ECLECTIC MEDICAL COLLEGE.

CINCINNATI, O.

ORGANIZED in 1876. Extinct. A fraudulent institution engaged in the sale of diplomas. In 1879 the name was changed to the American Eclectic Medical College, and a new charter was obtained, but the same practices were continued under the new title.

AMERICAN ECLECTIC MEDICAL COLLEGE—1879-1882.

CINCINNATI, O.

ORGANIZED in 1879, as the successor of the Physio-Eclectic Medical College, which see. Extinct. Fraudulent institution, and had no existence except for the sale of diplomas.

TOLEDO SCHOOL OF MEDICINE.

TOLEDO, O.

ORGANIZED in 1878, as a school of instruction only, and did not confer degrees. It held three sessions and was then suspended. See Northwestern Ohio Medical College.

AMERICAN ECLECTIC MEDICAL COLLEGE—1883.

CINCINNATI, O. B. K. MALTBY, M. D., Dean, 192 W. Fifth Street.

ORGANIZED in 1883, as the successor of the institution of the same name, above described. The faculty embraces ten professors.

COURSE OF INSTRUCTION: A preliminary session of four weeks, which "may be occupied, free of cost, in acquiring the branches that will come into the preliminary examination"—i. e., the usual English branches and so much of Latin as is necessary "to understand and use medical terms in reading and in writing prescriptions." One annual graduating session—that for 1884-85 began October 1, 1884, and will close February 17, 1885. There is also a post-graduate session of ten weeks.

Lectures embrace (by chairs) biology, psychology, functional pathology and principles and practice of medicine; anatomy, general and operative surgery, and organic pathology (the incumbent of this chair is also demonstrator of anatomy); obstetrics, gynecology and diseases of children; physiology, histology and clinical medicine; otology, bio-dynamics and nervous diseases; mental and physical hygiene and sanitary science; medical jurisprudence; chemistry and toxicology; materia medica, general pathology and therapeutics; electro-therapeutics and orthopedic surgery.

REQUIREMENTS: For admission—"Applicants for registration must present evidence of a fair amount of intellectual culture to be received into the regular college course. A certificate of college or high school graduation will be accepted as sufficient without examination. In the absence of such testimonials they will be required to pass an examination on the usual English branches, and also in Latin, embracing so much of the language as will enable them to understand and use medical terms in their reading and in writing prescriptions."

For graduation: 1) a good moral character; 2) attendance on two full courses of lectures; 3) three years of medical study; 4) a full and satisfactory examination on the fundamental branches of medical science.

FEES: Matriculation (paid once only), \$5; lectures, each course, \$60; Cincinnati Hospital fee (each session), \$5; demonstrator (each session), \$5; dissecting material (each session), \$5; graduation, \$25.

REMARKS: "In sending out our first announcement it was stated that the college had passed entirely out of the former management into a new one, whose aim would be to hold the institution in such a position before the law as to guarantee to its graduates the right to practice their profession in every State in the Union. This, under the recognition, already assured, of the different State boards, we are able to reaffirm with renewed confidence."—*Extract from Current Announcement.*

So far as relates to any "assurance" from the ILLINOIS STATE BOARD OF HEALTH, the recognition of this college will be based, as in any other case, upon an actual and bona-fide compliance with the schedule of "minimum requirements entitling a college to be held in good standing."

TOLEDO MEDICAL COLLEGE.

TOLEDO, O. JONATHAN PRIEST, M. D., Secretary, 168 Adams Street.

ORGANIZED IN 1833. The first class was graduated in 1833. The faculty embraces ten professors, one lecturer and one demonstrator.

COURSE OF INSTRUCTION: Session of 1884-85; the winter course opened October 1, 1884, and continues twenty weeks, and a spring course opens April 1, 1885, and continues twelve weeks. A three-years' graded course is recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, toxicology.

REQUIREMENTS: For admission—"The faculty earnestly desire to encourage a higher grade of literary qualifications in the student of medicine, and unless he can produce a diploma from some college or a high school certificate he will be required to pass such an examination as will give satisfactory evidence that he can enter profitably on his professional studies.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) a complete dissection of the body; 6) thesis; 7) satisfactory examination on all branches taught.

FEES: Matriculation, \$5; lectures, \$40; lectures, spring course, \$10; demonstrator, \$5; practical chemistry, \$5; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1883 | 19 | 7 | 36.8 |
| 1883-84 | 33 | 14 | 42.4 |

Average percentage of graduates to matriculates, *forty*.

NORTHWESTERN OHIO MEDICAL COLLEGE.

TOLEDO, OHIO. C. A. KIRKLEY, M. D., Secretary, Jefferson and Eleventh Streets.

ORGANIZED IN 1883. This college is an outgrowth of the Toledo School of Medicine, which see ante.

The faculty embraces twelve professors, two lecturers and one demonstrator.

COURSE OF INSTRUCTION: The session of 1884-85 began September 17, 1884, and will continue six months. Didactic lectures, clinical instruction in hospital and dispensary.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, principles and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, diseases of children, diseases of the mind and nervous system, laryngology.

REQUIREMENTS: For admission—"Students desiring to attend the lectures of this college, must furnish 1) satisfactory certificates of a good moral character; 2) diploma of graduation from a literary and scientific college or high school, or in absence of this, 3) must pass a satisfactory examination in the branches necessary to a good English education.

For graduation: 1) good moral character; 2) three years study; 3) twenty-one years of age; 4) two full courses of dissection; 5) two full courses of lectures; 6) attendance during at least two terms of clinical and hospital instruction; 7) must pass a satisfactory examination on all branches, to be conducted, when practicable, by other competent examiners than the professors in each branch; 8) regular attendance during the entire lecture courses, allowance being made only for absence occasioned by the student's sickness, such absences not to exceed twenty per cent. of the course; 9) attendance upon regular examination or quizzes made by each professor, daily or at least twice each week; 10) thesis.

FEES: Matriculation, \$5; demonstrator, \$5; lectures, \$40; graduation, \$25.

STUDENTS: Session of 1883-84: matriculates, 11; graduates, 1.

COLLEGE OF PHYSICIANS AND SURGEONS.

COLUMBUS, O.

No definite information has been obtained concerning this college.

OREGON.**MEDICAL DEPARTMENT OF THE WILLAMETTE UNIVERSITY.**

PORTLAND, Or. E. P. FRASER, M. D., Dean of the Faculty.

ORGANIZED in 1864, and located at Salem. It was removed to Portland in 1878. The first class was graduated in 1867. Classes have been graduated in each subsequent year.

The faculty embraces twelve professors and one demonstrator.

COURSE OF INSTRUCTION: The session of 1884-85 began November 3, 1884, and continues twenty-two weeks. A three-years' graded course is required. Instruction imparted by didactic and clinical lectures, practical work in dissecting room, chemical and physiological laboratories, and by daily quizzes upon the subjects of the preceding lectures.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, principles and practice of medicine, pathology, surgery, obstetrics and gynecology, medical jurisprudence, diseases of the mind and nervous system, genito-urinary diseases.

REQUIREMENTS: For admission: 1) eighteen years of age; 2) good moral character; 3) unless already a matriculate of the university, or a graduate of some respectable college, academy or high school, every candidate shall be examined as to his previous education and his fitness for entering upon and appreciating the technical study of medicine.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three full courses of lectures; 4) three years' study; 5) two courses of practical anatomy; 6) thesis; 7) satisfactory examination as to professional attainments.

FEES: Matriculation, \$5; demonstrator, \$10; lectures, \$120; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

| 1877-78 | 25 | 7 | 28 |
| 1878-79 | 32 | 8 | 25 |
| 1879-80 | 27 | 6 | 22+ |
| 1880-81 | 31 | 13 | 42— |
| 1881-82 | 29 | 9 | 33.3 |
| 1882-83 | 28 | 10 | 36— |
| 1883-84 | 24 | 10 | 41.6 |

Average percentage of graduates to matriculates, *thirty-two*.

PENNSYLVANIA.**DEPARTMENT OF MEDICINE OF THE UNIVERSITY OF PENNSYLVANIA.**

PHILADELPHIA, Pa. JAMES TYSON, M. D., Secretary, P. O. Box 2838.

ORGANIZED in 1765, as the Department of Medicine of the College of Philadelphia, the sixth in the order of succession of American colleges, being chartered chiefly through the influence of Dr. BENJAMIN FRANKLIN and Dr. WILLIAM SMITH. The first medical diploma issued in America was granted to Dr. JOHN ARCHER, in 1768, by this Department, then known as the College of Medicine in Philadelphia. On the organization of the University of Pennsylvania, in 1782, the college assumed its present title and relations, the successor of the College of Philadelphia. Classes have been graduated each year since 1768.

The faculty embraces eighteen professors, twenty-six demonstrators, five lecturers, eight instructors and a prosector of anatomy.

COURSE OF INSTRUCTION: Sessions of 1884-85: The spring session began May 5, and ended about the middle of June, 1884; the preliminary session began September 15, and ended September 27, 1884, and the winter session began October 1, 1884, and ends April 15, 1885. Attendance upon the latter alone is obligatory. The course is graded, and extends over three years. A four-years' graded course is recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology. This enumeration is to be understood as including the collateral studies and special branches of the general subjects.

REQUIREMENTS: For admission—A collegiate degree, or a certificate of having passed the matriculation examination of a recognized college; or a certificate, covering the required subjects, from a recognized normal or high school, or from a duly organized county medical society that has instituted a preliminary examination; or a preliminary examination embracing, first, a brief essay, not exceeding a page of foolscap, which will serve as a test of qualifications in orthography and grammar; second, an examination in the elementary principles of physics, on the subjects considered in Part I of Fownes' Chemistry.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) three full courses of lectures; 5) satisfactory examinations; 6) thesis.

Students who have attended one course in a regular dental school will be admitted as students of the second course in the University of Pennsylvania, after having passed a satisfactory examination in general chemistry and materia medica and pharmacy. Students who have attended two courses in a regular medical school will be admitted as students of the third course in this institution, after having satisfactorily passed an examination in general and medical chemistry, materia medica and pharmacy, anatomy and physiology. Graduates of other regular medical schools in good standing will be admitted as students of the third class without examination. Graduates of colleges of pharmacy and dental colleges in good standing are admitted to the second course without an examination.

FEES: Matriculation, \$5; graduation, \$50; lectures, including laboratory and dissection, \$150.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 375 | 127 | 33.8 |
| 1878-79 | 343 | 91 | 26.5 |
| 1879-80 | 377 | 116 | 30.7 |
| 1880-81 | 374 | 115 | 30.7 |
| 1881-82 | 363 | 122 | 33.6 |
| 1882-83 | 367 | 104 | 28.3 |
| 1883-84 | 367 | 103 | 28+ |

Average percentage of graduates to matriculates, *thirty*.

REMARKS: During the first and second years, much of the student's time is occupied with practical work in the various laboratories of chemistry, pharmacy, osteology, histology and pathological histology, and in dissection; but throughout the second and third sessions he is required to attend the general medical and surgical clinics at the University and Philadelphia hospitals, while special clinical facilities are provided for the third year. In this year, each student receives bedside instruction in clinical medicine and surgery. In physical diagnosis, and in gynecology. Opportunities are afforded for the practical study of diseases of the eye, ear, throat and skin, and for acquiring proficiency in the use of the various instruments employed in their treatment. For this purpose the third year class is divided into sections of convenient size, each of which receives direct personal instruction in the various practical subjects above mentioned. Advanced students may make original researches in the laboratories of pharmacy, chemistry, physiology, pathology and experimental therapeutics.

JEFFERSON MEDICAL COLLEGE.

PHILADELPHIA, Pa. ROBERTS BARTHOLOW, M.D., LL.D., Dean, 1509 Walnut Street.

ORGANIZED in 1826 as the Medical Department of the Jefferson College at Canonsburg Pa. The first class was graduated in 1827. Classes have been graduated in each subsequent year.

The faculty embraces eight professors and eight demonstrators.

COURSE OF INSTRUCTION: Sessions of 1884-85: A preliminary fall session began September 15, and continued two weeks; the regular winter session began September 30, 1884, and will end the last of March, 1885; the spring session begins early in April and ends on the last day of May, 1885. Daily clinics at hospital and dispensaries. A three-years' graded course, for which provision is made, is recommended, but not required.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology, otology, diseases of children, dermatology, toxicology, histology, genito-urinary diseases, pharmacy.

REQUIREMENTS: For admission—"Students entering this college are presumed to have the necessary education for undertaking the study of medicine," hence no requirements are exacted of those applying for matriculation. For those who intend to practice in States where a suitable general education preliminary to the study of medicine is exacted, an examination by a committee of the faculty is provided.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) three years' study; 5) thesis. Students of dental colleges, where a five months' winter session is held, and where full courses are given on anatomy, materia medica, physiology and chemistry, may become candidates, after attendance on two courses at such colleges, and one full course at the Jefferson Medical College, with another on surgery, practice of medicine, and obstetrics. Students of colleges of pharmacy, where full courses are given on materia medica and chemistry, may become candidates, after attendance on two courses at such colleges and one full course at the Jefferson Medical College, with another on anatomy, surgery, practice of medicine, physiology and obstetrics.

FEES: Matriculation, (paid but once) \$5; lectures, \$140; demonstrator, (of anatomy) \$10; all other practical courses free; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

HAHNEMANN MEDICAL COLLEGE—*Homeopathic*.

PHILADELPHIA, Pa. A. R. THOMAS, M. D., Dean, 1733 Chestnut Street.

ORGANIZED in 1848. The first class was graduated in 1849. Classes have been graduated in each subsequent year.

The faculty embraces ten professors, three lecturers and five demonstrators.

COURSE OF INSTRUCTION: The sessions of 1884-85 cover a preliminary course of one week, and the regular annual session, which began September 29, 1884, and closes the latter part of March, 1885. A three-years' graded course is recommended, but not required. Clinics at hospital and dispensary. "Recitations, quizzes, demonstrations, experiments and other practical exercises will be called into requisition as aids in the work of imparting instruction."

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, institutes of homeopathy, microscopy and histology, botany and pharmacy, ophthalmology and otology, diseases of children.

REQUIREMENTS: For admission—"Each student will be required to present a preceptor's certificate that he possesses a good moral character, and that he is otherwise qualified for the study of medicine. He must give evidence of a good education, and pass a satisfactory examination in elementary mathematics, composition, and elementary physics or natural philosophy. Candidates exhibiting the diploma of a literary or scientific college or high school, or a county or State teachers' certificate, or the certificate of an examining board of any accredited medical society, will be admitted without examination.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) at least one course of practical anatomy and surgery; 6) thesis. A student who has attended one or more courses in a medical college in which homeopathy is not taught, must attend one full session of instruction in this institution, and in addition to the general average required for admission, he must obtain a two-thirds' average in the following departments: Homeopathic institutes and materia medica, practice of medicine and clinical medicine.

FEES: Matriculation, \$5; lectures, \$100; practical surgery, \$10; demonstrator, \$10; practical obstetrics and chemistry (optional), \$10 each; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

MEDICO-CHIRURGICAL COLLEGE OF PHILADELPHIA.

PHILADELPHIA, Pa. WILLIAM F. WAUGH, M. D., Secretary, S. W. Cor. Broad and Market Sts.

ORGANIZED in 1831. The first class was graduated in 1832.

The faculty embraces ten professors and an adjunct faculty of lecturers and chiefs of clinics, numbering twelve.

COURSE OF INSTRUCTION: The session of 1884-85 began October 1, 1884, and continues six months. A three-years' graded course is required to complete the curriculum. Daily quizzes by the professors.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, orthopedic surgery, laryngology, nervous diseases, pharmacy, diseases of children, dermatology. Clinics at hospital and full facilities for laboratory work afforded.

REQUIREMENTS: For admission—"A degree in arts, philosophy or science; or, a certificate of examination and graduation from an academy, high or normal-school which does not confer degrees; or the certificate of the Auxillary Literary Term as established by this school; or, a certificate of having passed a preliminary examination of a duly organized county medical society, as ordered by the action of the Pennsylvania State Medical Society; or, finally, a successful examination before the faculty in orthography, English composition, (written as ordered at the time and place of examination,) arithmetic, geography, English grammar, elementary physics, Latin grammar and translations."

For graduation: "A written and oral examination on all the branches of medical and surgical science; 2) a clinical examination in medicine, surgery and ophthalmology conducted at the bedside, cases being submitted for diagnosis and treatment in the clinic rooms and wards of the hospital; 3) thesis; 4) three full courses of lectures."

FEES: The yearly fee for a student pursuing the regular curriculum, is \$140. Graduates of dental colleges or members of the senior class are admitted by the junior class of this institution after passing a satisfactory examination on three branches, to be selected by themselves. Graduates in pharmacy are admitted to the junior class after passing an examination on three subjects selected by themselves, as in the case of the dental graduate. Fees for these two classes—junior year, \$60; senior year, \$100.

Average percentage of graduates to matriculates, twenty.

RHODE ISLAND.

MEDICAL DEPARTMENT OF BROWN UNIVERSITY.
PROVIDENCE, R. I.

ORGANIZED in 1811. "Lectures were delivered and classes graduated annually, from 1814 to 1827, inclusive, excepting the years 1820-21, when it is believed that no classes were graduated. The department fell under President Wayland's strict rules of discipline, enforced on the medical professors."—(G. W. PARSONS, M. D., Providence. According to another correspondent, "Dr. Wayland's new rules threw the medical school overboard in 1827."—(GEO. W. HERSEY, M. D., Secretary, Rhode Island Medical Society.

SOUTH CAROLINA.

MEDICAL COLLEGE OF SOUTH CAROLINA.
CHARLESTON, S. C.

ORGANIZED in 1824; charter obtained in 1823. Permanently closed in 1839. During its existence its graduates amounted to 313.

Dr. J. FORD PRIOLEAU, dean of the Medical College of the State of South Carolina, writes: The Medical College of South Carolina was organized under the auspices and control of the Medical Society of South Carolina, which elected the professors and examined the candidates for graduation of the college. In filling two vacancies the society gave offense to the other members of the faculty, which was increased by a difference of opinion relative to the status of some of the applicants for graduation; and in 1833 the faculty resigned in a body, and established another school, under the title of the Medical College of the State of South Carolina—having obtained a charter in 1833, and giving its first course in 1834. The Medical Society elected the members of the faculties of both colleges, which continued in activity in the city of Charleston until 1839, when, having gradually declined in number of students, the Medical College of South Carolina compromised with the Medical College of the State of South Carolina and permanently closed its doors.

MEDICAL COLLEGE OF THE STATE OF SOUTH CAROLINA:
CHARLESTON, S. C. J. FORD PRIOLEAU, M. D., Dean, 2 Glebe Street.

ORGANIZED in 1833. In 1839 the Medical College of South Carolina was merged into it, the Medical College of the State of South Carolina receiving all the apparatus, buildings and other property of the former. (PRIOLEAU—see Medical College of South Carolina. Classes were graduated annually until 1862, when operations were suspended during the war, and until 1872, when they were resumed. Classes have been graduated annually since 1873. The faculty embraces seven professors, two assistants, one instructor and three demonstrators.

COURSE OF INSTRUCTION: Session of 1884-85 began October 15, 1884, and will end early in March, 1885, embracing a period of twenty weeks. Clinics at hospital. Graded course recommended, but not required. Lectures embrace principles and practice of surgery, clinical surgery, pathology, practice of medicine, clinical medicine, physiology, chemistry, anatomy, ophthalmology, otology, obstetrics, gynecology, materia medica, therapeutics, microscopy, pathology, laboratory instruction (compulsory on first-course students).

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) preliminary education satisfactory to the faculty; 3) three years' study; 4) two full courses of lectures; 5) examination in all the branches. Attendance upon lectures, habits and general character must be satisfactory to the faculty.

FEES: Matriculation, \$5; laboratory, \$5; lectures, including demonstrators and one hospital ticket, \$100; graduation, \$30.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1877-78 | 60 | 17 | 28.3 |
| 1878-79 | 71 | 20 | 28 |
| 1879-80 | 74 | 23 | 29.7 |
| 1880-81 | 77 | 21 | 27 |
| 1881-82 | 56 | 19 | 33.9 |
| 1882-83 | 61 | 18 | 29.5 |
| 1883-84 | 80 | 20 | 25 |

Average percentage of graduates to matriculates during the past seven years, *twenty-nine.*

REMARKS: Pharmacy students are also included in the number of matriculates here given—thus affecting the proportion of graduates to matriculates.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF SOUTH CAROLINA.
COLUMBIA, S. C.

ORGANIZED in 1866. Extinct.

TENNESSEE.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF NASHVILLE AND VANDERBILT UNIVERSITY.

NASHVILLE, Tenn. J. M. SAFFORD, M. D., Secretary of the Faculty.

ORGANIZED in 1850, as the Medical Department of the University of Nashville, and assumed its present relation in 1874. The first class was graduated by the University of Nashville in 1852; and the first diploma was issued by the Vanderbilt University in 1875. Classes have been graduated annually by the respective Universities since these dates.

The faculty embraces ten professors, five lecturers and a demonstrator.

COURSE OF INSTRUCTION: The twelfth regular course of instruction began October 1, 1884, and ends the last Thursday in February, 1885. A three-years' graded course is recommended, but not required. Daily examinations held by professors. Clinics at hospital.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, pathology, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, ophthalmology and otology, psychology, histology, pharmacy and toxicology.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) three years' study; 4) two full courses of lectures; 5) dissection during one session. "The candidate is elected by ballot, and upon receiving four negative votes will be rejected; but will be entitled to another examination by appearing before a full faculty, after all other applicants have been examined."

FEES: Matriculation, \$5; demonstrator, \$10; lectures, \$75; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| 1883-84 | 180* | 93* | 51.7 |

Average percentage of graduates to matriculates, *fifty*.

* Not including 22 post-graduates.

MEMPHIS MEDICAL COLLEGE.

Medical Department, Cumberland University.

MEMPHIS, TENN.

ORGANIZED in 1854. Suspended during the War of the Rebellion. Reorganized in 1872. Courses of lectures were delivered until 187-. Extinct.

NASHVILLE MEDICAL COLLEGE.

Medical Department of the University of Tennessee.

NASHVILLE, TENN. DUNCAN EYE, M. D., 301 Church Street.

ORGANIZED in 1876. Became connected with the University of Tennessee in 1880. The first class was graduated in 1878. Classes have been graduated each subsequent year.

The faculty embraces thirteen professors and two demonstrators.

COURSE OF INSTRUCTION: A preliminary course began September 1, and continued five weeks, until the opening of the regular session, October 6, 1884, which continues five months. Provision is made for a three-years' graded course, which, however, is not obligatory. Clinics at hospital and dispensary. Examinations by the faculty daily.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics and gynecology, hygiene, medical jurisprudence, genito-urinary diseases, toxicology, diseases of children, oral surgery, ophthalmology and otology.

REQUIREMENTS: For admission, none.

For graduation: 1) twenty-one years of age; 2) good moral character; 3) two full courses of lectures; 4) dissections during attendance in this school; 5) satisfactory examination by the faculty.

FEES: Matriculation (paid but once), \$5; demonstrator, \$10; lectures, \$75; graduation, \$25.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

Average percentage of graduates to matriculates, *forty*.

MEHARRY MEDICAL DEPARTMENT OF CENTRAL TENNESSEE COLLEGE.

NASHVILLE, Tenn. G. W. HUBBARD, M. D., Dean of the Faculty.

ORGANIZED IN 1876. The first class was graduated in 1877. Devoted to the education of colored students, male and female.

The faculty embraces seven professors, one assistant professor and one demonstrator.

COURSE OF INSTRUCTION: The ninth annual session began October 6, 1884, and ends February 26, 1885. A three-years' graded course is recommended, but not required. Recitations in anatomy, chemistry and physiology with laboratory work during first year's attendance.

Lectures embrace anatomy, physiology, chemistry, materia medica and therapeutics, theory and practice of medicine, surgery, obstetrics and gynecology, medical jurisprudence, histology, botany, pharmacy.

REQUIREMENTS: For admission—"Applicants must be at least eighteen years of age, of good moral character, and pass examinations in arithmetic, geography, grammar, reading, writing and spelling. Graduates of other recognized colleges and normal schools will, on presenting their diplomas, be admitted without examination."

For graduation: 1) twenty-one years of age; 2) three years' study; 3) two full courses of lectures; 4) must pass a satisfactory written examination in all of the branches laid down in this course, "including the outlines of Bible history and doctrine"; 5) present an acceptable original thesis on some medical subject.

FEES: Tuition, \$30; graduation, \$10; materials for practical anatomy and chemistry at cost.

STUDENTS: Number of matriculates and of graduates at each session reported, and percentages of graduates to matriculates—

| Session. | Matriculates. | Graduates. | Percent. |

VERMONT MEDICAL COLLEGE,
WOODSTOCK, Vt.

ORGANIZED in 18—. Extinct.

VERMONT ACADEMY OF MEDICINE.
CASTLETON, Vt.

ORGANIZED in 1818. Suspended instruction from 1837 to 1841. Extinct since 1854. During its existence it graduated 350 students.

VIRGINIA.**MEDICAL DEPARTMENT OF THE UNIVERSITY OF VIRGINIA.**

CHARLOTTESVILLE, Albemarle County. JAMES F. HARRISON, M. D., Chairman of Faculty.

ORGANIZED in 1825. The first class graduated in July, 1838. There was no graduating class in 1861. The faculty embraces four professors and a demonstrator of anatomy.

COURSE OF INSTRUCTION: One annual graduating session of nine months' duration. Daily examinations on the subjects of preceding lectures. Course is graded, extending over two years. Lectures embrace anatomy, physiology, chemistry, materia medica, theory and practice of medicine, obstetrics, medical jurisprudence, surgery and pharmacy. "The arrangement of the lectures is such that the student acquires a competent knowledge of anatomy, physiology and chemistry before he enters upon the study of the principles and practice of medicine and surgery."

REQUIREMENTS: For admission, none.

For graduation:—"The degree of Doctor of Medicine is conferred upon such students as approve their fitness for the same by rigid and searching examinations. The daily examinations are taken into account in determining the fitness of a student for graduation."

FEES: Matriculation and use of library, \$30; tuition, \$100; graduation, \$15.

*Includes pharmacy students. †Includes one pharmacy graduate.

WISCONSIN.**MILWAUKEE COLLEGE OF PHYSICIANS AND SURGEONS.**

MILWAUKEE, Wis.

No DATE of organization is given in the announcement. The second (dated 1883, which would indicate that the institution was organized in 1881,) says: "This college is incorporated under the general law of the State of Wisconsin. Its faculty have full power to issue diplomas of medicine and surgery, and are possessed of all rights and privileges granted, or that may be granted, to colleges in the country."

It is also stated that "the qualifications requisite for graduation from this college will be of the highest standard, and efforts will be constantly made to render the course of instruction still more thorough and comprehensive." What is considered the "highest standard" of qualifications requisite for graduation is shown in the following paragraphs from the announcement:

"Provided, however, since many States have legalized the status of practitioners by examining boards, therefore, any person otherwise qualified, and holding certificates of fitness or authority to practice from any State board of health, may become an applicant for graduation by attending a single course of lectures in this college."

"Likewise, practitioners of five years of reputable and consecutive practice, upon furnishing a certificate of the fact from the county clerk and three good and reputable citizens, according to the following form, may become applicants for the honors of the school, upon attendance of one full term of lectures and passing a satisfactory examination."

Upon this, and other evidence of irregularities, the ILLINOIS STATE BOARD OF HEALTH has refused to recognize the diplomas of this institution; and its methods, the personnel of the faculty and general character, were fully exposed in the report of the Secretary to the BOARD, at its regular quarterly meeting in June, 1883. Since that exposure, the Attorney General of Wisconsin has taken steps to cause the charter of this college to be declared forfeited for fraudulent and illegal practices, and the institution is now extinct. It has also been known by the name of "The Coney Medical Institute."

ADDENDUM.—Under date, November 26, 1884, (received December 3,) DR. HENRY GIBBONS, Jr., dean of the Cooper Medical College, San Francisco—see page 5 of the CONSPICUOUS*—furnishes the list of matriculates and graduates for the session closed November 1, 1884. There were 80 matriculates, "of which number 70 attended lectures," and 16 graduated. The following table gives the numbers of matriculates and of graduates, and the percentages of graduates to matriculates, at each session reported—

| Session. | Matriculates. | Graduates. | Percent. |
|----------|---------------|------------|----------|
| 1878 | 65 | 26 | 40. |
| 1879 | 58 | 15 | 26— |
| 1880 | 42 | 7 | 17— |
| 1881 | 59 | 9 | 15+ |
| 1882 | 67 | 12 | 18. |
| 1883 | 83 | 19 | 22.9 |
| 1884* | 80 | 16 | 20. |

Average percentages of graduates to matriculates, *twenty-three*.

*The percentage for the session of 1884 is computed upon the full number of matriculates, as in all other cases.

Auxiliary and Post-Graduate Institutions and Courses.

AUXILIARY DEPARTMENT OF MEDICINE, UNIVERSITY OF PENNSYLVANIA.

PHILADELPHIA, Pa. SAMUEL B. HOWELL, M. D., Dean, 1513 Green Street.

ORGANIZED in 1865. The faculty consists of five professors.

COURSE OF INSTRUCTION: Although strictly collateral to medicine, and essential to the thorough education of the physician, the course is largely scientific in its character, and the degree of bachelor of science (B. S.) is conferred upon those graduates in medicine of the University, or of other recognized schools, who attend two full courses of lectures in the Auxiliary Department, pass a satisfactory examination before the faculty, and present an original thesis on some one of the subjects taught.

Lectures comprise medical jurisprudence and toxicology; mineralogy and geology, (including a practical course on mineralogical and geological chemistry); botany, hygiene, comparative anatomy and zoology. The session begins in March and ends in June. The professor of comparative anatomy conducts, during the summer months, at a place on the Atlantic coast, a practical laboratory for special work in the subjects of his chair.

FEES: The lectures are free to students and graduates of the Department of Medicine of the University of Pennsylvania; to other matriculates, \$10 for each professor's ticket, or \$35 for the course; graduation, \$10.

POST-GRADUATE INSTRUCTION, MEDICAL DEPARTMENT, UNIVERSITY OF PENNSYLVANIA.

PHILADELPHIA, Pa. JAMES TYSON, M. D., Secretary, P. O. Box 2838.

ESTABLISHED in 1880, although for many years previous a post-graduate course was afforded during the spring and early summer. The faculty consists of eight professors and ten lecturers.

COURSE OF INSTRUCTION: Five courses of six weeks each are given during the year, the first beginning October 1, the second, November 12, the third, January 10, the fourth February 21, and the fifth, April 15. The teaching consists in bedside and dispensary lessons, in the practical examination of patients, and the use of instruments of precision in the diagnosis and treatment of disease.

The following subjects are taught: Clinical medicine and physical diagnosis; renal diseases, with practical examination of urine; nervous diseases and electro-therapeutics; clinical surgery; ophthalmology; dermatology; otology; gynecology; operative and genito-urinary surgery, with venereal diseases; clinical and operative obstetrics; laryngology; diseases of children; practical physiology; medical chemistry, histology and pathology.

FEES: Matriculation \$5 (matriculates of the University of Pennsylvania exempt); for each branch, \$15, excepting practical physiology, \$25, and medical chemistry, \$50. A reduction of 15 per cent will be made when six or more courses are taken.

NEW YORK POLYCLINIC.

NEW YORK CITY. JOHN A. WYETH, M. D., Secretary, 214 and 216 East Thirty-fourth St.

ORGANIZED in 1882. The faculty consists of nineteen professors; twenty instructors and twenty-seven assistants.

COURSE OF INSTRUCTION: The session of 1884-5, began September 22d, and continues until June 1, 1885. The summer session of 1885 will begin June 1st., and will end September 15th.

Clinics are held daily throughout the year, in diseases of the chest—of children—of general medicine—of laryngology and rhinology—of the mind and nervous system—of the skin, of women; and in ophthalmology, otology, genito-urinary diseases, general and orthopedic surgery, obstetrics and physiological chemistry.

FEES: General ticket for the year, \$300; general ticket for six months, \$200. Special courses, \$10, excepting diseases of the chest and general medicine, \$25, general, genito-urinary, and orthopedic surgery, \$55, and diseases of women, \$35.

REMARKS: This is strictly a school of clinical medicine and surgery. There are no didactic lectures and none but practitioners are admitted.

NEW YORK POST-GRADUATE MEDICAL SCHOOL AND HOSPITAL.

NEW YORK CITY. F. R. STURGIS, M. D., Secretary, 206 East Twentieth Street.

ORGANIZED in 1882. The faculty consists of twenty professors, four associate professors, ten lecturers, thirty-one clinical assistants and three demonstrators.

COURSE OF INSTRUCTION: The regular term began October 1, 1884, and continues until June 2, 1885. The intermediate term opens June 2, 1884, and continues until October 7, 1885.

Lectures are all clinical, and include the following courses: Clinical and orthopedic surgery and mechanical therapeutics; operative surgery; diseases of the nervous system and electro-therapeutics; anatomy and physiology of the nervous system, ophthalmology and otology; diseases of the nose and throat; pathology; physical diagnosis and clinical medicine; urinary analysis; histology; pathological histology; diseases of children; gynecology; obstetrics; venereal and skin diseases; applied anatomy; practical pharmacy and medical chemistry; military, naval and state hygiene.

FEES: Annual ticket, \$400; semi-annual ticket, \$225; ticket for three months, \$150; special courses, of seven weeks each, \$15 to \$30.

PHILADELPHIA POLYCLINIC AND COLLEGE FOR GRADUATES IN MEDICINE.

PHILADELPHIA, PA. JOHN B. ROBERTS, M. D., Secretary, 1118 Arch Street.

ORGANIZED in 1882. The faculty consists of eleven professors, two adjunct professors and twenty-four assistants.

COURSE OF INSTRUCTION: Clinical and practical instruction in medical and surgical specialties is afforded, to physicians only, during the whole year. In addition to the clinical facilities of the college the professors utilize, for purposes of instruction, their services in the Philadelphia, Pennsylvania, Wills, Howard, Episcopal, Presbyterian, German, St. Mary's and St. Christopher's hospitals. Clinical instruction is given in electro-therapeutics, and well-appointed laboratories furnish opportunity for practical work in chemistry, anatomy, pathology, microscopy and surgery.

FEES: General ticket for one year, \$300; special courses, of six weeks' duration, each \$15.

REMARKS: Students after finishing a complete course may, by examination, become Fellows of the College.

COLLEGE FOR MEDICAL PRACTITIONERS.

ST. LOUIS, MO.

ORGANIZED in 1882. No announcement received since the session of 1883-84.

BALTIMORE POLYCLINIC AND POST-GRADUATE MEDICAL SCHOOL.

BALTIMORE, MD.

ORGANIZED in 1884. No announcement received for the current session.

THE CLEVELAND POLYCLINIC AND POST-GRADUATE MEDICAL SCHOOL.

CLEVELAND, O. REUBEN A. VANCE, M. D., Dean, 304 Prospect Street.

ORGANIZED in 1884. The institution is designed wholly for post-graduates—none but practitioners being admitted. No degrees are granted. The faculty consists of six professors.

COURSE OF INSTRUCTION: Four sessions, of seven weeks' duration each, will be given annually. The first session opens the first Wednesday of February, 1885. Daily clinics are held at the Polyclinic and the Franciscan Hospital.

Lectures embrace principles and practice of surgery; gynecology and clinical diseases of women; principles and practice of medicine and clinical medicine; ophthalmology and otology and clinical diseases of the eye and ear; medical jurisprudence; microscopy and clinical chemistry.

FEES: Matriculation, \$5; general ticket, per session, \$20; special ticket for separate courses, each, \$5.

THE following named institutions also have post-graduate courses or other facilities for instruction for practitioners:

RUSH MEDICAL COLLEGE, Chicago, Ill.—A four-weeks' course; fees, \$30.

CHICAGO MEDICAL COLLEGE, Chicago, Ill.—A four-weeks' course; fees, \$30.

HAHNEMANN MEDICAL COLLEGE, Chicago, Ill.—A six-weeks' course; fees, \$30.

BENNETT COLLEGE OF ECLECTIC MEDICINE AND SURGERY, Chicago, Ill.—A six-weeks' course; fees, \$25.

COLLEGE OF PHYSICIANS AND SURGEONS, Chicago, Ill.—A four-weeks' course; fees, none.

MEDICAL DEPARTMENT OF THE UNIVERSITY OF LOUISVILLE, Louisville, Ky.—An eight-weeks' course; fees, \$25.

SCHOOL OF MEDICINE OF THE UNIVERSITY OF MARYLAND, Baltimore, Md.—A six-weeks' course; fees, \$10 to \$20 for each branch.

MEDICAL SCHOOL OF HARVARD UNIVERSITY, Boston, Mass.—Six-months' courses, in histology (\$20), physiology (\$30), medical chemistry (\$30), pathological anatomy (\$20), surgery (\$25), laryngology (\$25), ophthalmology (\$25), otology (\$15), dermatology (\$25), syphilis (\$15), diseases of the nervous system (\$15), gynecology (\$25), obstetrics (\$25). Graduates of other medical schools may obtain the degree of M. D. at this University after a year's study in the graduates' course and by passing the examinations of the three-years' course. Fee for full year, \$200.

BELLEVUE HOSPITAL MEDICAL COLLEGE, New York City.—Private instruction in medical and in physical diagnosis (\$20 each), surgical operations (\$30), operative surgery (\$20), physiological laboratory (\$50), practical chemistry (\$10), diseases of the eye and ear (\$30), pathological laboratory (\$15), diseases of the heart, lungs and throat (\$12), laryngoscopy (\$10). "Intended mainly for the benefit of practitioners."

MEDICAL DEPARTMENT OF THE WESTERN RESERVE UNIVERSITY, Cleveland, O.—A five-weeks' course; fees, \$25.

AMERICAN ECLECTIC MEDICAL COLLEGE, Cincinnati, O.—A ten-weeks' course; fees, \$25.

JEFFERSON MEDICAL COLLEGE, Philadelphia, Pa.—A post-graduate course of instruction, including five terms of six weeks each. Instruction in ophthalmology, otology, gynecology, physical diagnosis, diseases of the chest, orthopedic surgery, normal and pathological histology, diseases of children, nervous diseases, laryngology, urinary pathology, medical chemistry, practical pharmacy, experimental physiology, dermatology, botany, materia medica and experimental therapeutics. Fees range from \$10 to \$20.

LIST OF COLLEGES FOR BOTH SEXES.

THE following institutions either announce that they are open to both sexes, or had both in attendance during the last session:

Cooper Medical College, San Francisco, Cal.

Medical Department of the University of California, San Francisco, Cal.

California Medical College (Eclectic), San Francisco, Cal.

Medical Department of the University of Colorado, Boulder, Col.

Medical Department of Howard University, Washington, D. C.
Medical Department of Florida University, Tallahassee, Fla.
Georgia Eclectic Medical College, Atlanta, Ga.
Hahnemann Medical College, Chicago, Ill.
Bennett College of Eclectic Medicine and Surgery, Chicago, Ill.
Fort Wayne College of Medicine, Fort Wayne, Ind.
Physio-Medical College, Indianapolis, Ind.
Indiana Eclectic Medical College, Indianapolis Ind.
College of Physicians and Surgeons, Keokuk, Ia.
Medical Department of the State University of Iowa, Iowa City, Ia.
Homeopathic Medical Department of the State University of Iowa, Iowa City, Ia.
Iowa Medical College (Eclectic), Des Moines, Ia.
Iowa College of Physicians and Surgeons, Des Moines, Ia.
King Eclectic Medical College, Des Moines, Ia.
Eclectic Medical College of Maine, Lewiston, Me.
Boston University School of Medicine, Boston, Mass.
College of Physicians and Surgeons, Boston, Mass.
Department of Medicine and Surgery of the University of Michigan, Ann Arbor, Mich.
Homeopathic Medical College of the University of Michigan, Ann Arbor, Mich.
Minnesota College Hospital, Minneapolis, Minn.
Homeopathic Medical College of Missouri, St. Louis, Mo.
Kansas City Hospital College of Medicine, Kansas City, Mo.
Omaha Medical College, Omaha, Neb.
College of Medicine of the University of Nebraska, Lincoln, Neb.
College of Medicine of the Syracuse University, Syracuse, N. Y.
Leonard Medical School, Raleigh, N. C.
Homeopathic Hospital College, Cleveland, O.
Eclectic Medical Institute, Cincinnati, O.
Medical Department of the Western Reserve University, Cleveland, O.
Physio-Medical Institute, Cincinnati, O.
Medical Department of the University of Wooster, Cleveland, O.
Pulte Medical College, (Homeopathic), Cincinnati, O.
Columbus Medical College, Columbus, O.
American Eclectic Medical College, Cincinnati, O.
Toledo Medical College, Toledo, O.
Medical Department of the Willamette University, Portland, Or.
Meharry Medical Department of the Central Tennessee College, Nashville, Tenn.

LIST OF COLLEGES FOR WOMEN ONLY.

Woman's Medical College, Toronto, Ont.
Woman's Medical College, Kingston, Ont.
Woman's Medical College, Chicago, Ill.
Woman's Medical College, Baltimore, Md.
New York Medical College and Hospital for Women (*Homeopathic*) New York City.
Woman's Medical College of the New York Infirmary, New York City.
Woman's Medical College of Pennsylvania, Philadelphia, Pa.

LIST OF COLLEGES FOR COLORED STUDENTS.

Leonard Medical Colleges, Raleigh, N. C.
Meharry Medical Department of Central Tennessee College, Nashville, Tenn.
**The Medical Department of Howard University, Washington, D. C., is open to all,
 "without distinction of sex or race."**

LIST OF COLLEGES WHICH CONFER DEGREES UPON ATTENDANCE ON SUMMER SESSIONS.

Cooper Medical College. Session begins June 1, and closes November 1.

University of California Medical College, San Francisco, Cal. Session begins February 1, and closes November 1.

Hahnemann Medical College, San Francisco, Cal. Session begins June 1, and closes October 1.

Kentucky School of Medicine, Louisville, Ky. Session begins February 10, and closes June 28.

Hospital College of Medicine, Louisville, Ky. Session begins January 22, and closes June 18.

Medical School of Maine, Brunswick, Me. Session begins February 5, and closes June 1.

Medical Department of Dartmouth College, Hanover, N. H. Session begins July 30, and closes November 19.

Long Island College Hospital, Brooklyn, N. Y. Session begins January 5, and ends June 3.

Eclectic Medical Institute, Cincinnati, O. Session begins January 12, and closes June 4.

Medical Department of the University of Wooster, Cleveland, O. Session begins March 4, and closes July 4.

Medical Department of the University of Vermont, Burlington, Vt. Session begins March 4, and closes July 1.

REVISED AND CORRECTED TO DECEMBER 1, 1884.

PREFATORY NOTES CONCERNING THE OFFICIAL REGISTER OF 1884.

THERE are embraced in this—the third edition of the **OFFICIAL REGISTER OF PHYSICIANS AND MIDWIVES IN ILLINOIS**, revised up to December 1, 1884—the names, postoffice addresses, and other data necessary for the purposes of identification, of 5,585 physicians to whom certificates have been issued by the **STATE BOARD OF HEALTH** under the act to regulate the practice of medicine, approved May 29, 1877; and who comprise the great majority of those now engaged in practice in this State. To this number are to be added some 300 practitioners, who are exempt from the provisions of the law by reason of having practiced ten years in the State prior to July 1, 1877. So that the total number engaged in the practice of medicine in Illinois, at the close of 1884, is 5,885 of all classes.*

Of the 5,585 certificated practitioners there are 4,780 who hold certificates from the **STATE BOARD OF HEALTH**, based upon "satisfactory proof of having received diplomas or licenses from legally-chartered medical institutions in good standing;" 102 others are practicing under the certificates of the **BOARD** issued after satisfactory examination; and the remaining 703 are non-graduates who have taken out certificates based on years of practice, although not required so to do by the law.

A number of the 4,780 certificated graduates are also exempt by reason of length of practice before the passage of the act, but have obtained certificates from the **BOARD** for the purpose of establishing their professional status. In the first **REGISTER** published by the **BOARD**, June 14, 1880, there were the names of 5,979 physicians, and in the second, published December 20, 1881, there were 5,587—the number of those engaged in medical practice during the last four years showing on the whole, a slight absolute reduction, notwithstanding the increase of population. For purposes of comparison the following totals, from each of the three Registers, are here presented:

*Those exempt from the Medical-Practice Act, on account of length of practice, are, nevertheless, required by the **STATE BOARD OF HEALTH** Act to register their names and postoffice addresses in the office of the county clerk of their respective counties; and it is from the returns from these offices that the number of non-certificated physicians above given (300) has been obtained.

VI

| | June 14, 1880. | Dec. 20, 1881. | Dec. 1, 1884. |
|---|----------------|----------------|---------------|
| Total number engaged in practice..... | 5978 | 5987 | 5885 |
| Graduates and licentiates of medical institutions..... | 4282 | 4488 | 4780 |
| Licentiates upon examination, STATE BOARD OF HEALTH.... | 191 | 183 | 102 |
| Exempt non-graduates, certificated..... | 948 | 896 | 703 |
| Exempts, non-certificated..... | 558 | 420 | 300 |

From the above tabular statement it will be seen that, while the aggregate number of practitioners has not materially varied, there are some notable changes in the numbers of the different classes. Thus, there has been a gain of 498 graduates and licentiates of medical institutions—these now forming over 80 per cent. of the total number, as against about 70 per cent. in 1880; the number of licentiates upon examination of the STATE BOARD has been diminished nearly one-half—mainly by their transfer to the number of graduates, very many of them having, subsequent to their examination, attended lectures and obtained diplomas. Both classes of exempts show heavy losses, due mainly to death, graduation, abandonment of practice and removal from the State.

The following summary, from the first REGISTER, and corresponding figures from the present volume, exhibit these changes for the whole period since the Medical-Practice Act went into operation :

| | July 1, 1877. | Dec. 1, 1884. |
|--|---------------|---------------|
| Total number engaged in practice..... | 7400 | 5885 |
| Graduates and licentiates..... | 3600 | 5032 |
| Non-graduates..... | 3800 | 853 |
| Percentage of graduates and licentiates in 1877..... | 48. | |
| Percentage of graduates and licentiates in 1884..... | 85. | |
| Percentage of non-graduates in 1877..... | 52. | |
| Percentage of non-graduates in 1884..... | 15. | |

The numbers for 1877, above given, are approximated from the returns of county clerks to the STATE BOARD, from applications, and from correspondence on file in the office of the BOARD, and represent, with substantial correctness, the actual numbers of those claiming at that date to be engaged in the practice of medicine and surgery proper, exclusive of midwives. The number of graduates and licentiates in 1884, above given, includes 102 licentiates upon examination of the BOARD, and 150 non-certificated exempts. Among the graduates and licentiates there are also 421 who are licensed as pharmacists.

During the seven years of its existence, or up to December 1, 1884, the BOARD has issued 8,091 certificates to physicians—

| | |
|--|-------|
| To graduates and licentiates of medical institutions.. . . . | 6,745 |
| To exempts, on years of practice.. . . . | 1,127 |
| To licentiates upon examination, STATE BOARD OF HEALTH . . . | 219 |

Diplomas or licenses have been presented by those now in practice in the State, from 138 medical colleges and licensing bodies in the United States; from 10 in Canada; 13 in Great Britain; 34 in Europe; and 1 each in Africa and South America—making a total of 198 different graduating or licensing bodies represented. The subjoined list shows the number of representatives of these various bodies:

In Africa: Funchal Medical College, Madeira.

In South America: University of Sucre, Bolivia.

SINCE the close of the session of 1883, at which time the Schedule of Minimum Requirements took effect, the diplomas of 21 colleges in eight different States have been accepted only after an examination, of those presenting them, in the branches or subjects of the Schedule omitted by the respective colleges.

The text of the Schedule of Minimum Requirements entitling a college to be held in "good standing," the Medical-Practice and State Board of Health acts, and other matters Concerning Practitioners and the Mode of Procedure under the Medical-Practice Act, will be found in the preliminary section, entitled *Medical Practice in Illinois*.

ADDITIONS, changes and corrections, made while the REGISTER was going through the press, will be found in the *Addenda*, beginning on page 277. These are fully indexed; therefore, in consulting the REGISTER reference should be made to the *Alphabetical Index of Names*, beginning on page 285.

INFORMATION of further changes and other corrections should be promptly furnished the Secretary by those interested, for the revision of the future REGISTER.

MEDICAL PRACTICE IN ILLINOIS.

THE ILLINOIS MEDICAL PRACTICE ACT.

AN ACT TO REGULATE THE PRACTICE OF MEDICINE IN THE STATE OF ILLINOIS. Approved May 29, 1877. In force July 1, 1877.

ADMISSION TO PRACTICE MEDICINE: SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly,* That every person practicing medicine, in any of its departments, shall possess the qualifications required by this act. If a graduate in medicine he shall present his diploma to the STATE BOARD OF HEALTH * * * for verification as to its genuineness. If the diploma is found genuine, and if the person named therein be the person claiming and presenting the same, the STATE BOARD OF HEALTH * * * shall issue its certificate to that effect, signed by all of the members thereof, and such diploma and certificate shall be conclusive as to the right of the lawful holder of the same to practice medicine in this State. If not a graduate the person practicing medicine in this State shall present himself before said BOARD, and submit himself to such examinations as the said BOARD shall require; and, if the examination be satisfactory to the examiners, the said BOARD shall issue its certificate in accordance with the facts, and the lawful holder of such certificate shall be entitled to all the rights and privileges herein mentioned.

SEC. 2. [This section is omitted as void, by reason of the passage, at the same session, of the act establishing a STATE BOARD OF HEALTH, which see following. The section refers to the mode of providing boards of examiners in the absence of such STATE BOARD. The omissions indicated by asterisks in section 1, and in the remaining sections, also have reference to this provision for other boards.]

ORGANIZATION, DUTIES AND POWER OF STATE BOARD: Sec. 3. The STATE BOARD OF HEALTH * * * shall organize within three months after the passage of this act; they shall procure a seal, and shall receive through their Secretary applications for certificates and examinations; the President * * * shall have authority to administer oaths, and the BOARD to take testimony in all matters relating to their duties; they shall issue certificates to all who furnish satisfactory proof of having received diplomas or licenses from legally chartered medical institutions in good standing; they shall prepare two forms of certificates, one for persons in possession of diplomas or licenses, the other for candidates examined by the BOARD; they shall furnish to the county clerks of the several counties a list of all persons receiving certificates. In selecting places to hold their meetings they shall, as far as is reasonable, accommodate applicants residing in different sections of the State, and due notice shall be published of all their meetings. Certificates shall be signed by all the members of the BOARD granting them, * * *

VERIFICATION OF DIPLOMAS; FEE AND PENALTY: Sec. 4. Said STATE BOARD OF HEALTH * * * shall examine diplomas as to their genuineness, and if the diploma shall be found genuine as represented, the Secretary of the STATE BOARD OF HEALTH * * * shall receive a fee of one dollar from such graduate or licentiate, and no further charge shall be made to the applicants; but if it be found to be fraudulent, or not lawfully owned by the possessor, the BOARD shall be entitled to charge and collect twenty dollars of the applicant presenting such diploma. The verification of the diploma shall consist in the affidavit of the holder and applicant that he is the lawful possessor of the same, and that he is the person therein named. Such affidavit may be taken before any person authorized to administer oaths, and the same shall be attested under the hand and official seal of such officer, if he have a seal. Graduates may present their diplomas and affidavits as provided in this act, by letter or by proxy, and the STATE BOARD OF HEALTH * * * shall issue its certificate the same as though the owner of the diploma was present.

EXAMINATION OF NON-GRADUATES: Sec. 5. All examinations of persons not graduates or licentiates shall be made directly by the BOARD, and the certificates given by the BOARD shall authorize the possessor to practice medicine and surgery in the State of Illinois.

CERTIFICATES MUST BE RECORDED: Sec. 6. Every person holding a certificate from the STATE BOARD OF HEALTH * * * shall have it recorded in the office of the clerk of the county in which he resides, and the record shall be endorsed thereon. Any person removing to another county to practice, shall procure an endorsement to that effect on the certificate from the county clerk, and shall record the certificate, in like manner, in the county to which he removes, and the holder of the certificate shall pay to the county clerk the usual fees for making the record.

RECORD BOOK TO BE KEPT BY COUNTY CLERK: Sec. 7. The county clerk shall keep, in a book provided for the purpose, a complete list of the certificates recorded by him, with the date of the issue. * * * If the certificate be based on a diploma or license, he shall record the name of the medical institution conferring it, and the date when conferred. The register of the county clerk shall be open to public inspection during business hours.

FEE FOR EXAMINING NON-GRADUATES: Sec. 8. Candidates for examination shall pay a fee of five dollars, in advance, which shall be returned to them if a certificate be refused. The fees received by the BOARD shall be paid into the treasury. * * *

CHARACTER OF EXAMINATION: Sec. 9. Examinations may be in whole or in part in writing, and shall be of an elementary and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

CERTIFICATES MAY BE REFUSED OR REVOKED: Sec. 10. The STATE BOARD OF HEALTH * * * may refuse certificates to individuals guilty of unprofessional or dishonorable conduct, and they may revoke certificates for like causes. In all cases of refusal or revocation, the applicant may appeal to the body appointing the BOARD.

DEFINITION OF "PRACTICING MEDICINE": Sec. 11. Any person shall be regarded as practicing medicine within the meaning of this act, who shall profess publicly to be a physician, and to prescribe for the sick, or who shall append to his name the letters of "M. D." But nothing in this act shall be construed to prohibit students from prescribing under the supervision of preceptors, or to prohibit gratuitous services in cases of emergency. And this act shall not apply to commissioned surgeons in the United States army and navy.

LICENSE TO ITINERANT VENDERS : Sec. 12. Any itinerant vender of any drug, nostrum, ointment or appliance of any kind, intended for the treatment of disease or injury, or who shall by writing or printing, or any other method, publicly profess to cure or treat diseases, injury or deformity by any drug, nostrum, manipulation or other expedient, shall pay a license of one hundred dollars a month, to be collected in the usual way.

PENALTIES FOR NON-COMPLIANCE WITH THIS ACT: Sec. 13. Any person practicing medicine or surgery in this State without complying with the provisions of this act, shall be punished by a fine of not less than fifty dollars nor more than five hundred dollars, or by imprisonment in the county jail for a period of not less than thirty days, nor more than three hundred and sixty-five days, or by both such fine and imprisonment, for each and every offense; and any person filing, or attempting to file, as his own, the diploma or certificate of another, or a forged affidavit of identification, shall be guilty of a felony, and upon conviction shall be subject to such fine and imprisonment as are made and provided by the statutes of this State for the crime of forgery, but the penalties shall not be enforced till on and after the thirty-first day of December, eighteen hundred and seventy-seven: *Provided*, that the provisions of this act shall not apply to those that have been practicing medicine ten years within this State.

THE STATE BOARD OF HEALTH ACT.

AN ACT TO CREATE AND ESTABLISH A STATE BOARD OF HEALTH IN THE STATE OF ILLINOIS. Approved May 28, 1877 ; in force July 1, 1877.

APPOINTMENT OF MEMBERS ; TERM OF OFFICE ; VACANCIES : SECTION 1. *Be it enacted by the People of the State of Illinois, represented in the General Assembly,* That the Governor, with the advice and consent of the Senate, shall appoint seven persons, who shall constitute the BOARD OF HEALTH. The persons so appointed shall hold their offices for seven years : *Provided,* that the terms of office of the seven first appointed shall be so arranged that the term of one shall expire on the thirtieth day of December of each year, and the vacancies so created, as well as all vacancies occurring otherwise, shall be filled by the Governor, with the advice and consent of the Senate : *And provided, also,* that appointments made when the Senate is not in session may be confirmed at its next ensuing session.

POWERS AND AUTHORITY OF THE BOARD : Sec. 2. The STATE BOARD OF HEALTH shall have the general supervision of the interests of the health and life of the citizens of the State. They shall have charge of all matters pertaining to quarantine ; and shall have authority to make such rules and regulations, and such sanitary investigations, as they may from time to time deem necessary for the preservation or improvement of public health ; and it shall be the duty of all police officers, sheriffs, constables, and all other officers and employes of the State, to enforce such rules and regulations, so far as the efficiency and success of the BOARD may depend upon their official co-operation.

REGISTRATION OF BIRTHS AND DEATHS : Sec. 3. The BOARD OF HEALTH shall have supervision of the State system of registration of births and deaths as hereinafter provided ; they shall make up such forms and recommend such legislation as shall be deemed necessary for the thorough registration of vital and mortuary statistics throughout the State. The Secretary of the BOARD shall be the superintendent of such registration. The clerical duties and the safe-keeping of the bureau of vital statistics thus created shall be provided by the Secretary of State.

PHYSICIANS AND ACCOUCHERS TO REGISTER AND REPORT : Sec. 4. It shall be the duty of all physicians and accouchers in this State to register their names and postoffice address with the county clerk of the county where they reside ; and said physicians and accouchers shall be required, under penalty of ten dollars, to be recovered in any court of competent jurisdiction in the State, at suit of the county clerk, to report to the county clerk, within thirty days from

date of their occurrence, all births and deaths which may come under their supervision, with a certificate of the cause of death, and such correlative facts as the BOARD may require, in the blank forms furnished as hereinafter provided.

REPORT OF BIRTH OR DEATH IN ABSENCE OF PHYSICIAN OR ACCOUCHEUR: Sec. 5. Where any birth or death shall take place, no physician or accoucheur being in attendance, the same shall be reported to the county clerk within thirty days from date of [its] occurrence, with the supposed cause of death, by the parent, or if none, by the nearest of kin, not a minor, or if none, by the resident householder where the death shall occur, under penalty as provided in the preceding section of this act.

CORONERS TO REPORT DEATHS: Sec. 6. The coroners of the several counties shall be required to report to the county clerk all cases of death which may come under their supervision, with the cause and mode of death, etc., as per forms furnished, under penalty as provided in section four (4) of this act.

DISPOSITION OF PENALTIES: Sec. 7. All amounts recovered under the penalties herein provided shall be appropriated to a special fund for the carrying out of the object of this law.

COUNTY CLERKS TO KEEP REGISTERS AND RECORDS: Sec. 8. The county clerks of the several counties in the State shall be required to keep separate books for the registration of the names and post-office address of physicians and accoucheurs, for births, for marriages, and for deaths; said books shall always be open to inspection without fee; and said county clerks shall be required to render a full and complete report of all births, marriages and deaths to the Secretary of the BOARD OF HEALTH, annually, and at such other times as the BOARD may direct.

BOARD TO PREPARE FORMS FOR REPORTS: Sec. 9. It shall be the duty of the BOARD OF HEALTH to prepare such forms for the record of births, marriages and deaths as they may deem proper; the said forms to be furnished by the Secretary of said Board to the county clerks of the several counties, whose duty it shall be to furnish them to such persons as are herein required to make reports.

MEETINGS OF THE BOARD: Sec. 10. The first meeting of the BOARD shall be within fifteen days after their appointment, and thereafter in January and June of each year, and at such other times as the BOARD shall deem expedient. The meeting in January of each year shall be in Springfield. A majority shall constitute a quorum. They shall choose one of their number to be President, and they may adopt rules and by-laws for their government, subject to the provisions of this act.

OFFICERS AND COMPENSATION: Sec. 11. They shall elect a Secretary, who shall perform the duties prescribed by the BOARD and by this act; he shall receive a salary which shall be fixed by the BOARD; he shall also receive his traveling and other expenses incurred in the performance of his official duties. The other members of the BOARD shall receive no compensation for their services, but their traveling and other expenses, while employed on business of the BOARD, shall be paid. The President of the BOARD shall quarterly

certify the amount due the Secretary, and on presentation of his certificate, the Auditor of State shall draw his warrant on the Treasurer for the amount.

ANNUAL REPORT: Sec. 12. It shall be the duty of the BOARD OF HEALTH to make an annual report, through their Secretary or otherwise, in writing, to the Governor of this State, on or before the first day of January of each year, and such report shall include so much of the proceedings of the BOARD, and such information concerning vital statistics, such knowledge respecting diseases, and such instruction on the subject of hygiene, as may be thought useful by the BOARD for dissemination among the people, with such suggestions as to legislative action as they may deem necessary.

APPROPRIATION: Sec. 13. The sum of five thousand dollars (\$5,000) or so much thereof as may be necessary, is hereby appropriated to pay the salary of the Secretary, meet the contingent expenses of the office of the Secretary, and the expenses of the BOARD, and all costs for printing, which, together, shall not exceed the sum hereby appropriated; said expenses shall be certified and paid in the same manner as the salary of the Secretary.

OFFICE ROOM: Sec. 14. The Secretary of State shall provide rooms suitable for the meetings of the BOARD, and office room for the Secretary.

CONCERNING PRACTITIONERS AND MODE OF PROCEDURE UNDER THE MEDICAL PRACTICE ACT.

UNDER the Act to regulate the Practice of Medicine in the State of Illinois, all persons practicing medicine in any of its departments are divided into two classes:—First, practitioners who had been practicing medicine ten or more years within the State, prior to July 1, 1877. Second, those who have been practicing medicine in the State for a period of time less than ten years, prior to July 1, 1877.

This second class is sub-divisible into two others—those who are practicing medicine, in any of its departments, who have neither a diploma nor license, and who are required by law to undergo examination by the STATE BOARD for its certificate entitling them to practice medicine and surgery in the State of Illinois. And, second, those who can furnish satisfactory proof of having received diplomas as graduates in medicine or licenses from legally-chartered medical institutions in good standing.

TO BE HELD IN GOOD STANDING in Illinois, colleges must comply with the following schedule of requirements. This schedule took effect at the close of the session of 1882-83. No diploma issued since that date, is accepted as the basis for a certificate, unless the diploma was issued in accordance with the schedule. *The only other mode of obtaining a certificate is through an examination by the BOARD.*

SCHEDULE OF REQUIREMENTS.

I. *Conditions of admission to lecture courses.*—1. Credible certificates of good moral standing. 2. Diplomas of graduation from a good literary and scientific college or high school, or a first-grade teacher's certificate. Or, lacking this—A thorough examination in the branches of a good English education, including mathematics, English composition, and elementary physics or natural philosophy.

II. *Branches of medical science to be included in the course of instruction.*—1. Anatomy. 2. Physiology. 3. Chemistry. 4. Materia Medica and Therapeutics. 5. Theory and Practice of Medicine. 6. Pathology. 7. Surgery. 8. Obstetrics and Gynecology. 9. Hygiene. 10. Medical Jurisprudence.

III. *Length of regular or graduating courses.*—1. The time occupied in the regular courses or sessions from which students are graduated shall not be less than five months, or twenty weeks, each. 2. Two full courses of lectures, not within one and the same year of time, shall be required for graduation with the degree of Doctor of Medicine.

IV. *Attendance and examinations or quizzes.*—1. Regular attendance during the entire lecture courses shall be required, allowance being made only for absences occasioned by the student's sickness, such absences not to exceed twenty per centum of the course. 2. Regular examinations or quizzes to be made by each lecturer or professor daily, or at least twice each week. 3. Final examinations on all branches to be conducted, when practicable, by competent examiners other than the professors in each branch.

V. *Dissections, clinics and hospital attendance.*—1. Each student shall have dissected during two courses. 2. Attendance during at least two terms of clinical and hospital instruction shall be required.

VI. *Time of professional studies.*—This shall not be less than three full years before graduation, including the time spent with a preceptor, and attendance upon lectures or at clinics and hospital.

VII. *Instruction.*—The college must show that it has a sufficient and competent corps of instructors, and the necessary facilities for teaching, dissections, clinics, etc.

CONCERNING the proviso by which physicians are exempted from the penalties of the Act, the Attorney General, J. K. EDSALL, in an opinion dated November 9, 1877, says: "The proviso in question is in these words: '*Provided*, that the provisions of the Act shall not apply to those who have been practicing medicine ten years within the State.' I have no question that the effect of this proviso is to exempt all persons who fall within its terms, from the penalties imposed by the Act in question. But, considering the entire scope of the Act, I am of the opinion that the duty is incumbent upon your BOARD to ascertain, as far as practicable, the names of all those who are entitled to the benefits of that proviso; and that it is the duty of those who have thus practiced medicine ten years within the State to furnish you, on request, evidence of the fact by affidavit, or otherwise. Your BOARD may, with propriety, issue in return some proper certificate, which will show their right to practice under that proviso of the law."

It is the duty, therefore, as well as to the interest of all who claim exemption from the penalties of the Act, in consequence of the fact of their having practiced medicine in this State for ten years previous to July 1, 1877, and who have not procured certificates, to make affidavit concerning their period of practice, and file the same with the BOARD, thus establishing their status legally.

SECTION four of the State Board of Health Act requires that all physicians and midwives, without exception, practicing in this State, shall register their names and post office addresses with the county clerk of the county where they reside. This registration is addi-

tional to, and independent of, the *record* of the certificate issued by the BOARD, and is obligatory in each county into which the physician's or midwife's practice extends.

APPENDED is all needful information as to the course of procedure to be observed in applying for a State certificate and complying with the law.

1. APPLICATIONS FOR CERTIFICATES, ETC.: Applications for certificates, or for blank affidavits, should be made to the Secretary at Springfield. The county clerks are also furnished with blank affidavits, or may obtain the same on application to the Secretary.

A special form of affidavit has been prepared for those who have lost their diplomas by fire or otherwise, and may be had on application as above.

Diplomas or licenses for verification, and affidavits properly filled out and acknowledged, together with the necessary letters of recommendation and fees for certificates, should be sent to the Secretary.

For convenience, diplomas may be presented to any member of the BOARD for verification. In such case the affidavit should be endorsed "Diploma verified," with the signature of the member, before being forwarded to the Secretary.

2. DIPLOMA OR LICENSE TO BE PRESENTED FOR VERIFICATION: In regard to practitioners of medicine who have been practicing in this State less than ten years, the law requires that those who are graduates in medicine, or who have licenses from legally chartered medical institutions in good standing, must actually present for verification, to the STATE BOARD, their diplomas or licenses; and, in addition, such other satisfactory proofs as may be necessary. Graduates may present their diplomas or licenses and affidavits by letter or proxy.

3. AFFIDAVITS REQUIRED: Affidavit must be made that the person presenting the diploma, or license, is the lawful possessor of the same. The affidavit should state date and place of graduation, and name of medical college; length of practice in this State, as well as present place of residence.

4. FEE FOR CERTIFICATES: The fee for a certificate of graduation is fixed by law at one dollar.

5. EXAMINATION OF NON-GRADUATES: It is required by law that all persons practicing medicine less than ten years in any of its departments, who are not graduates in medicine or licentiates, shall be examined directly by the BOARD, which is authorized to issue certificates to those passing the examination.

6. APPLICATION FOR EXAMINATION: The candidate for examination must fill out a blank form, which may be obtained on application to the Secretary. This must be sent to the office of the BOARD, and, if approved, the candidate will be notified when and where to appear for examination.

7. FEE FOR EXAMINATION: Candidates for examination are required to pay a fee of five dollars, in advance—to be returned if the certificate be refused.

8. CHARACTER OF EXAMINATION: Examinations may be made, in whole or in part, in writing or orally; and shall be of an elementary

and practical character, but sufficiently strict to test the qualifications of the candidate as a practitioner.

9. EXAMINATIONS TO BE MADE IN PROPRIA PERSONA: Candidates for examination must present themselves in person before the Board. No examination papers can be sent out to individuals; and no examination can be limited to any one or two special topics, or branches of study or practice. The examinations will be conducted by the entire Board, and upon all branches usually taught in medical schools.

10. SCHOOLS OF PRACTICE IN EXAMINATION: Questions relating to special methods or forms of practice or therapeutics will be referred for examination to the various individual members of the Board, as may be indicated.

11. EXAMINATION IN A FOREIGN LANGUAGE: Those desiring to be examined in any other but the English language may, in the discretion of the Board, be examined through an interpreter, furnished at their own expense and approved by the Board.

12. NON-GRADUATES MUST HAVE STUDIED THREE YEARS: Candidates for examination must present evidence that they have studied medicine at least three years.

13. EVIDENCE OF MORAL AND PROFESSIONAL STANDING: All applicants for certificates, whether holding diplomas or not, are required to furnish satisfactory evidence of good moral and professional standing; such evidence (letters of recommendation,) to be filed in the office of the Board as part of the applicant's professional record.

14. CERTIFICATES TO BE RECORDED IN OFFICE OF COUNTY CLERK: Physicians are required to have *recorded*, in the office of the county clerk, the certificate which may be received from the STATE BOARD OF HEALTH; and in case of removal to another county in the State, to have the certificate recorded in that county also.

15. PHYSICIANS TO REGISTER IN EACH COUNTY: In case a physician practices in any other county than that in which he lives—he having recorded his certificate in his own county—it is not required that he have his certificate recorded in such other county or counties. He must, however, register his name in the county or counties in which his practice extends, and make his returns of births and deaths occurring in those counties to the respective county clerks. In cases of professional consultation only, with resident physicians, such registration is not required.

16. NON-RESIDENT PHYSICIANS PRACTICING IN THIS STATE, AMENABLE TO THE LAW: Physicians, residents of adjoining States, who practice in this State in counties adjoining the one in which they reside, are required to take out certificates of practice, as required of residents of this State. They must record the same in the office of the county clerk of the county or counties in which their practice extends; make returns of births and deaths in those counties to the county clerks, and in every respect conform to all the requirements of the law incumbent upon residents of this State.

17. CERTIFICATES TO EXEMPT GRADUATES: Certificates of graduation will be issued, upon payment of the usual fee, to graduates who have practiced medicine ten or more years in this State, with-

out their being required to send diploma to the BOARD for verification, upon their making an affidavit to that effect, at the same time giving name of college, place and date of graduation. It is not obligatory upon this class of practitioners to take out a certificate, but experience has shown the utility of such a step, in legal questions arising in practice, as well as in many matters involving the professional status of the practitioner.

18. **CERTIFICATES TO EXEMPT NON-GRADUATES :** Certificates will, when desired, be issued to non-graduates of ten or more years' practice in this State, on affidavit of such practice, supported by evidence of good standing in a medical society, or the recommendation of reputable professional or other men, who have known them during their term of practice.

Such certificates differ from those granted to graduates, and are issued in the discretion of the BOARD.

19. **WHAT CONSTITUTES "TEN YEARS' PRACTICE :"** It is not required that the ten years of practice in this State shall be consecutive years; but the sum total of practice in this State must amount to ten years before July 1, 1877. No allowance is made for the time spent in practice in any other State, or in service in the army or navy.

20. **CHANGE OF LOCATION :** It is important that when a change of location is made, it be promptly reported to the BOARD. Unless this is done, the Official Register will necessarily be incorrect.

21. **PROFESSIONAL ACTS ILLEGAL PRIOR TO RECORD OF CERTIFICATE :** No one belonging to the second class, as defined in the beginning of this section, has a right to practice until the certificate of the BOARD is placed upon record in the county in which the individual lives. All professional acts, prior to this being done, are illegal and render the delinquent liable to prosecution.

22. **WHAT CONSTITUTES "PRACTICING MEDICINE" UNDER THE STATUTE :** The eleventh section of the act to regulate the practice of medicine in the State of Illinois, approved May 29, 1877, contains the following: Any person shall be regarded as practicing medicine within the meaning of this act who shall append to his name the letters of "M. D."—[Laws of 1877, page 156, section 11.]

Independently of the statutory definition, the terms import and embrace the pursuit and vocation of one who holds himself out to the public as possessing the requisite skill to treat disease, and accordingly prescribes for or treats patients as a physician. [*Opinion of Attorney General Edsall, July 23, 1880.*]

23. **GRATUITOUS PRACTICE DOES NOT EXEMPT FROM THE LAW :** If a person "practices medicine," as defined by the statute, without complying with the law, it is wholly immaterial whether he charges for his services or not. He is guilty of a violation of the law, and liable to prosecution. This, however, does not apply to gratuitous services rendered in a case of emergency by a non-qualified person.
